March 25, 2025 â€" Shellâ€" (LON/NYSE: SHEL, AMST: SHELL) will today present to investors at its Capital Markets Day 2025 the next steps in the execution of its strategy. Shell is strengthening its commitment to value creation and maintaining its focus on performance, discipline and simplification.

 $\hat{a} \in \hat{a} \in \mathbb{T}^M$ We have made significant progress against all of the targets we set out at our Capital Markets Day in 2023. Thanks to the outstanding efforts of our people, we are transforming Shell to become simpler, more resilient and more competitive, $\hat{a} \in \mathbb{T}^M \hat{a} \in \mathbb{T}^M$ said CEO Wael Sawan. $\hat{a} \in \hat{a} \in \mathbb{T}^M \hat{a} \in \mathbb{T}^M$ want to become the world $\hat{a} \in \mathbb{T}^M \hat{a} \in \mathbb{T}^M$ leading integrated gas and LNG business and the most customer-focused energy marketer and trader, while sustaining a material level of liquids production. Today we are raising the bar across our key financial targets, investing where we have competitive strengths and delivering more for our shareholders. $\hat{a} \in \mathbb{T}^M \hat{a} \in \mathbb{T}^M$

Today Shell announces that it will:

- Enhance shareholder distributions from 30-40% to 40-50% of cash flow from operations (CFFO) through the cycle1, continuing to prioritise share buybacks2, while maintaining a 4% per annum progressive dividend policy.
- Increase the structural cost reduction target from 2-3 billion by the end of 2025 to a cumulative 5-7 billion by the end of 2028, compared to 20221.
- Invest for growth while maintaining capital discipline, with spend lowered to 20-22 billion per year for 2025-20281.
- Grow free cash flow3 (FCF) per share by more than 10% per year through to 20301.
- Maintain the climate targets and ambition set out in Shell's Energy Transition Strategy 2024.

Â

To deliver more value with less emissions Shell will:

- Reinforce our leadership position in liquefied natural gas (LNG) by growing sales by 4-5% per year through to 2030.
- Grow top line production across our combined Upstream and Integrated Gas business by 1% per year to 2030, sustaining our 1.4 million barrels per day of liquids production to 2030 with increasingly lower carbon intensity.
- Drive cash flow resilience and higher returns in our Downstream and Renewables & Energy Solutions businesses:
 - Pursue focused growth in our high-return Mobility and Lubricants businesses.
 - Leverage competitive strengths to drive profitable and scalable businesses across our lower carbon platforms, where we expect to have up to 10% of capital employed by 2030.
 - Unlock more value from our strong portfolio of Chemicals assets by exploring strategic and partnership opportunities in the US, and both high-grading and selective closures in Europe, enabling the business to prosper whilst improving returns and reducing capital employed by 2030.

Shell will continue to deliver more value with less emissions, growing in areas where we have competitive strengths, and providing a compelling investment case for our shareholders, now, and into the future.

This announcement contains forward-looking statements (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995) concerning the financial condition, results of operations and businesses of Shell. All statements other than statements of historical fact are, or may be deemed to be, forward-looking statements. Forward-looking statements are statements of future expectations that are based on management's current expectations and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in these statements. Forward-looking statements include, among other things, statements concerning the potential exposure of Shell to market risks and statements expressing management's expectations, beliefs, estimates, forecasts, projections and assumptions. These forward-looking statements are identified by their use of terms and phrases such as "aimâ€; "ambitionâ€; †â€ anticipate''; "aspireâ€, "aspirationâ€, †â€ believe''; "commitâ€; $\hat{a} \in \text{ccommitment} \hat{a} \in \hat{a} \in \hat{a} \in \text{could} \hat{a} \in \text{could} \hat{a} \in \text{cm}, \hat{a} \in \text{cdesire} \hat{a} \in \hat{a} \in \text{cstimate} \hat{a} \in \text{cm}, \hat{a} \in \text{cm}, \hat{a} \in \text{cm}, \hat{a} \in \text{cm}, \hat{a} \in \text{could} \hat{a} \in$ $\hat{a} \in \hat{a} \in$ $\hat{a} \in \hat{a} \in \text{probably} \hat{a} \in \text{TM} \hat{a$ $\hat{a} \in \hat{a} \in \text{Target} \hat{a} \in \text{TM} \hat{a} \in \text{TM}; \ \hat{a} \in \text{evision} \hat{a} \in \hat{a} \in \text{will} \hat{a} \in \text{TM}; \ \hat{a} \in \text{evolud} \hat{a} \in \text{target} \hat{a} \in \text{TM}; \ \hat{a} \in \text{evolud} \hat{a} \in \text{target} \hat{a} \in \text{target$ affect the future operations of Shell and could cause those results to differ materially from those expressed in the forward-looking statements included in this announcement, including (without limitation): (a) price fluctuations in crude oil and natural gas; (b) changes in demand for Shell's products; (c) currency fluctuations; (d) drilling and production results; (e) reserves estimates; (f) loss of market share and industry competition; (g) environmental and physical risks, including climate change; (h) risks associated with the identification of suitable potential acquisition properties and targets, and successful negotiation and completion of such transactions; (i) the risk of doing business in developing countries and countries subject to international sanctions; (j) legislative, judicial, fiscal and regulatory developments including tariffs and regulatory measures addressing climate change; (k) economic and financial market conditions in various countries and regions; (l) political risks, including the risks of expropriation and renegotiation of the terms of contracts with governmental entities, delays or advancements in the approval of projects and delays in the reimbursement for shared costs; (m) risks associated with the impact of pandemics, regional conflicts, such as the Russia-Ukraine war and the conflict in the Middle East, and a significant cyber security, data privacy or IT incident; (n) the pace of the energy transition; and (o) changes in trading conditions. No assurance is provided that future dividend payments will match or exceed previous dividend payments. All forward-looking statements contained in this announcement are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. Readers should not place undue reliance on forward-looking statements. Additional risk factors that may affect future results are contained in Shell plc's Form 20-F for the year ended December 31, 2024 (available at www.shell.com/investors/news-andfilings/sec-filings.html and www.sec.gov). These risk factors also expressly qualify all forward-looking statements contained in this announcement and should be considered by the reader. Â Each forward-looking statement speaks only as of the date of this announcement, March 25, 2025. Neither Shell plc nor any of its subsidiaries undertake any obligation to publicly update or revise any forward-looking statement as a result of new information, future events or other information. In light of these risks, results could differ materially from those stated, implied or inferred from the forward-looking statements contained in this announcement.

Also, in this announcement we may refer to Shellâ \in TMs â \in cenet carbon intensityâ \in (NCI), which includes Shellâ \in TMs carbon emissions from the production of our energy products, our suppliersâ \in TM carbon emissions in supplying energy for that production and our customersâ \in TM carbon emissions associated with their use of the energy products we sell. Shellâ \in TMs NCI also includes the emissions associated with the production and use of energy products produced by others which Shell purchases for resale. Shell only controls its own emissions. The use of the terms Shellâ \in TMs â \in cenet carbon intensityâ \in or NCI is for convenience only and not intended to suggest these emissions are those of Shell plc or its subsidiaries.

Shellâ€TMs operating plan and outlook are forecasted for a three-year period and ten-year period, respectively, and are updated every year. They reflect the current economic environment and what we can reasonably expect to see over the next three and ten years. Accordingly, the outlook reflects our Scope 1, Scope 2 and NCI targets over the next ten years. However, Shellâ€TMs operating plan and outlook cannot reflect our 2050 net-zero emissions target, as this target is outside our planning period. Such future operating plans and outlooks could include changes to our portfolio, efficiency improvements and the use of carbon capture and storage and carbon credits. In the future, as society moves towards net-zero emissions, we expect Shellâ€TMs operating plans and outlooks to reflect this movement. However, if society is not net zero in 2050, as of today, there would be significant risk that Shell may not meet this target.

This announcement may contain certain forward-looking non-GAAP measures such as adjusted earnings and divestments. We are unable to provide a reconciliation of these forward-looking non-GAAP measures to the most comparable GAAP financial measures because certain information needed to reconcile those non-GAAP measures to the most comparable GAAP financial measures is dependent on future events some of which are outside the control of Shell, such as oil and gas prices, interest rates and exchange rates. Moreover, estimating such GAAP measures with the required precision necessary to provide a meaningful reconciliation is extremely difficult and could not be accomplished without unreasonable effort. Non-GAAP measures in respect of future periods which cannot be reconciled to the most comparable GAAP financial measure are calculated in a manner which is consistent with the accounting policies applied in Shell plc's consolidated financial statements. See the document named "Comparable GAAP measures and non-GAAP measures reconciliation†available on our Capital Markets Day 2025 page on shell.com for presentation of the most comparable GAAP measures, definitions and further details of historic non-GAAP measures and other metrics used throughout this announcement.Â

which will be effective from reporting periods beginning on or after January 1, 2027. IFRS 18 will have no impact on recognition and measurement. From Shell's initial impact assessment, it has concluded that the impact will be limited to disclosure and presentation in the Consolidated Financial Statements. The primary change will be that the share of profit from joint ventures and associates will be classified in the Consolidated Statement of Income under the investing category (income generated by the investment) instead of the operating category. As a result of this change, the dividends received from joint ventures and associates will be reclassified in the Consolidated Statement of Cash Flows from cash flow from operating activities to cash flow from investing activities.
