About Renewi

Renewi is a pure-play recycling company that focuses on extracting value from waste and used materials rather than disposing of them through incineration or landfill. The company plays an important role in combating resource scarcity by creating circular materials. In giving new life to used materials, Renewi addresses both social and regulatory trends, contributing to a cleaner and greener world.

Our vision is to be the leading waste-to-product company in the world's most advanced circular economies, reflected in a recycling rate of continuing operations of 66.2%, one of the highest in Europe. In FY24, Renewi puts 6.6 million tonnes of low-carbon circular materials back into use. This contributes to mitigating climate change and promotes the circular economy. Our recycling efforts help to protect natural resources and prevent more than 2.5 million tonnes of CO2 emissions annually.

Renewi leverages innovation and the latest technology to turn waste into circular materials such as paper, metals, plastics, glass, wood, building materials, compost, and water. We employ over 6,000 people across 150 operational sites in five countries in Europe. Renewi is recognised as a leading waste-to-product company in the Benelux region and a European leader in advanced recycling.
