

Seeing Machines Limited ("Seeing Machines" or the "Company")

2 April 2025

London presentation for investors and analysts

Seeing Machines Limited (AIM: SEE), the advanced computer vision technology company that designs AI-powered operator monitoring systems to improve transport safety, will today hold a presentation for investors and analysts, led by CEO Paul McGlone and CFO Martin Ive.

The presentation will provide an update on Seeing Machines' strategic and operational progress as well as providing an overview of the opportunities ahead. It will also feature a panel discussion with industry commentators, hosted by Peter McNally, Equity Research Analyst from Stifel.

Today's event is taking place in-person in London and also via webcast. It will commence at 12.00pm UK time and, for those joining via webcast, is expected to be finished no later than 2.00pm UK time, with technology demonstrations taking place for those attending in-person from 2.00pm.

To register for the event (webcast only), please use the following link:

About Seeing Machines (AIM: SEE), a global company founded in 2000 and headquartered in Australia, is an industry leader in vision-based monitoring technology that enable machines to see, understand and assist people. Seeing Machines is revolutionizing global transport safety. Its technology portfolio of AI algorithms, embedded processing and optics, power products that need to deliver reliable real-time understanding of vehicle operators. The technology spans the critical measurement of where a driver is looking, through to classification of their cognitive state as it applies to accident risk. Reliable "driver state" measurement is the end-goal of Driver Monitoring Systems (DMS) technology. Seeing Machines develops DMS technology to drive safety for Automotive, Commercial Fleet, Off-road and Aviation. The company has offices in Australia, USA, Europe and Asia, and supplies technology solutions and services to industry leaders in each market vertical.
