**eEnergy Secures Framework Win with University Hospitals Plymouth NHS Trust  
and Achieves EcoVadis Bronze Rating.**

eEnergy Group plc (AIM: EAAS), a leading digital energy services company, is pleased to announce a contract award worth £517,692 with University Hospitals Plymouth NHS Trust. Secured through the NHS Commercial Solutions framework, the project is further evidence of eEnergy's successful public sector framework strategy.

The project will see eEnergy deliver a full LED lighting upgrade across 19 wards at Plymouth Derriford Hospital. Working closely with the Trust, eEnergy supported the application and successful drawdown of NEEF funding - part of the new Great British Energy public sector finance initiative - to unlock investment in energy efficiency.

Delivery will take place in a live, occupied hospital environment, with eEnergy's experienced project teams collaborating with hospital staff to minimise disruption while improving patient and staff environments and cutting energy waste.

In addition, eEnergy has been awarded a Bronze sustainability rating by EcoVadis, placing the Group in the top 35% of companies assessed globally. This independent accreditation strengthens eEnergy's credentials as a transparent, responsible partner in the eyes of public sector buyers, who are placing increasing emphasis on ESG performance across their supply chains.

**Harvey Sinclair, CEO of eEnergy, commented:**

*"Delivering this project with Plymouth NHS Trust marks another proud moment in our growing success across the healthcare sector. As the UK accelerates the decarbonisation of its public estate, we're proving that energy efficiency upgrades can be delivered with minimal disruption, maximum impact, and without upfront cost."*

*"Being awarded a Bronze rating by EcoVadis is a strong endorsement of our commitment to Net Zero and responsible business. It's a great recommendation - but we're not done yet. We know there's more to do, and we're determined to keep raising the bar for our clients and for the planet."*

**About eEnergy Group plc**

eEnergy (AIM: EAAS) is revolutionising the path to Net Zero as a leading digital energy services provider for B2B and public sector organisations. We eliminate the barriers to clean energy generation and energy waste reduction, offering solutions that don't require upfront capital investment. Our vision is clear: make Net Zero possible and profitable for every organisation.

Our primary services include:

- **Reduce:** LED lighting and controls
- **Generate:** Solar PV, ground mount, rooftop, and carport
- **Charge:** EV charging and management software

All eEnergy's services come with intelligent circuit-level energy analytics and are funded through NatWest or Siemens to provide an off-balance sheet-compliant energy-as-a-service solution.

eEnergy has completed over 1,100 decarbonisation projects within the B2B and public sector. We are #1 in the education sector, having worked with over 840 schools, installing over half a million LED lights, and improving the learning environment for over 443,000 students-enough to fill Wembley Stadium almost five times over. In one year alone, eEnergy has saved the education sector £13 million in energy costs. With over 70% of schools yet to transition to LED lighting and over 90% yet to deploy solar, eEnergy estimates that at least £5.4 billion would need to be invested to install adequate rooftop solar, LED lighting, and EV charging infrastructure in UK schools.

eEnergy is a market leader within the education sector and has been awarded the Green Economy Mark by the London Stock Exchange.
