

07 April 2025

Smarttech247 Group PLC

("Smarttech247", the "Group" or the "Company")

Smarttech247 awarded Multi-Year Framework Agreement with Major London Airport

Smarttech247 (AIM: S247), a multi-award-winning provider of AI-enhanced cybersecurity services providing automated managed detection and response for a portfolio of international clients, is pleased to announce it has been appointed to a multi-year cybersecurity framework agreement (the "Agreement") with a major international airport in London.

The Agreement has a total potential value of up to £7 million across all four suppliers over its five-year term, with a further one-year extension available. While the Agreement does not guarantee minimum spend, it establishes Smarttech247 as a trusted provider to one of the UK's most high-profile transport hubs, offering a significant opportunity to generate meaningful revenues over the life of the agreement.

Each order under the Agreement will be subject to a separate call-off contract and governed by the framework's standard terms and conditions. The Agreement also provides a flexible mechanism for the customer to procure cybersecurity services from Smarttech247 as needed, including the Company's flagship VisionX platform.

Under the terms of the Agreement, Smarttech247 will be eligible to provide services and solutions under several categories, which include:

- **Cybersecurity Support Services** - including 24/7 managed detection and response services, firewall maintenance, endpoint and XDR management, dark web monitoring and cybersecurity assessments.
- **Cybersecurity Products** - advanced email protection, endpoint detection and response technologies and related licencing.
- **Security Information and Event Management (SIEM)** - next-generation SIEM, internal pen testing, threat intelligence, data discovery and vendor security assessment tools.

Raluca Saceanu, CEO of Smarttech247, commented:

"We are delighted to have been selected for this prestigious framework with one of the UK's busiest international airports. Being selected as one of its preferred suppliers for critical cybersecurity requirements further validates our strong capabilities in managed detection and response, and our ability to support complex, critical infrastructure environments.

"This win reflects the Group's continued execution against its strategy to grow through high-value, long-term engagements with critical national infrastructure clients. It is also a significant opportunity for us to potentially deliver cybersecurity services in a highly regulated and high-security setting over the coming years."
