

7 April 2025

Fusion Antibodies plc
("Fusion" or the "Company")

**Result of General Meeting
and
Total voting Rights**

Fusion Antibodies plc (AIM: FAB), specialists in pre-clinical antibody discovery, engineering and supply for both therapeutic drug and diagnostic applications, announces that at the general meeting of the Company, held earlier today, all resolutions were duly passed.

Following the passing of the resolutions, the Company has raised a total of approximately £1.17 million pursuant to the Placing, details of which were announced on 18 March 2025.

Application has been made for admission of the 8,416,020 Second Tranche Placing Shares to trading on AIM (**Admission**). It is currently anticipated that Admission will become effective and that dealings in the Second Tranche Placing Shares will commence on AIM at 8.00 a.m. on 9 April 2025.

Total voting rights

On Admission, the Company will have 113,318,140 Ordinary Shares in issue, each with one voting right. There are no shares held in treasury. Therefore, the Company's total number of Ordinary Shares in issue and voting rights will be 113,318,140 and this figure may be used by shareholders from Admission as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change to their interest in, the Company under the FCA's Disclosure Guidance and Transparency Rules.

Unless otherwise defined herein, the capitalised defined terms used in this announcement have the same meaning as those used in the Company's announcement on 18 March 2025.

About Fusion Antibodies plc

Fusion is a Belfast based contract research organisation ("CRO") providing a range of antibody engineering services for the development of antibodies for both therapeutic drug and diagnostic applications.

The Company's ordinary shares were admitted to trading on AIM on 18 December 2017. Fusion provides a broad range of services in antibody generation, development, production, characterisation and optimisation. These services include antigen expression, antibody production, purification and sequencing, antibody humanisation using Fusion's proprietary CDRx™ platform and the production of antibody generating stable cell lines to provide material for use in clinical trials. Since 2012, the Company has successfully sequenced and expressed over 250 antibodies and successfully completed over 200 humanisation projects and has an international, blue-chip client base, which has included eight of the top 10 global pharmaceutical companies by revenue.

The Company was established in 2001 as a spin out from Queen's University Belfast. The Company's mission is to enable pharmaceutical and diagnostic companies to develop innovative products in a timely and cost-effective manner for the benefit of the global healthcare industry. Fusion Antibodies provides a broad range of services in antibody generation

benefit of the global healthcare industry. Fusion Antibodies provides a broad range of services in antibody generation, development, production, characterisation and optimisation.

Fusion Antibodies growth strategy is based on combining the latest technological advances with cutting edge science to deliver new platforms that will enable Pharma and Biotech companies get to the clinic faster, with the optimal drug candidate and ultimately speed up the drug development process.
