About Cloudbreak Discovery PLC

Cloudbreak Discovery PLC is a leading natural resource explorer, project generator and royalty business. Cloudbreak is focused on mineral exploration and energy royalty acquisitions with the aim of bringing near-term cashflow and driving shareholder value. Its primary operating jurisdiction is the United States, but the Company also deploys its project generation model in the international mining sector to acquire interests in projects of merit.

Through its wholly owned but independently operated subsidiary, Cloudbreak Exploration Inc., the Company will develop its array of mineral assets, whilst continuing to generate new projects with a particular focus on commodities with high intrinsic value.

Cloudbreak's generative model across the mineral sector enables a multi-asset approach to investing and exploration. Diversification within the natural resource sector and amongst resource classes is key to withstanding the cycles of investing.
