*Offshore Wind Grouting Contract Awarded for Inch Cape Wind Farm*

Tekmar Group plc (AIM: TGP), the leading provider of technology and services for the global offshore energy markets, is pleased to announce the award of a new contract to provide grouting services for the Inch Cape Offshore Wind Farm, located off the east coast of Scotland.

The project will see Tekmar deliver a specialist grouting solution for key offshore wind infrastructure reinforcing the Group's strategic focus on expanding its presence in this critical service area. Grouting is an integral component of subsea foundation stability, and Tekmar's capabilities in this space continue to support the safe, reliable installation of offshore energy assets.

The contract was awarded by Charles Brand, a civil engineering business with 190 years of complex civil engineering solutions and a principal contractor for the project's landfall works and is scheduled to commence in September 2025.

This award strengthens Tekmar's growing track record in grouting and follows recent investments to expand its subsea structural services across UK and international markets.

**Richard Turner, CEO of Tekmar Group, commented:** *"This contract win marks another step in our strategy to broaden Tekmar's offshore wind service offering, particularly in grouting - an area of increasing strategic importance for the Group. We are delighted to be supporting Charles Brand on a nationally significant project like Inch Cape, and we look forward to safe and successful delivery later this year."*

**About Tekmar Group plc**

Tekmar Group plc collaborates with its partners to deliver robust and sustainable engineering led solutions that enable the world's energy transition.

Through our Offshore Energy and Marine Civils Divisions we provide a range of engineering services and technologies to support and protect offshore wind farms and other offshore energy assets and marine infrastructure. With near 40 years of experience, we optimise and de-risk projects, solve customer's engineering challenges, improve safety and lower project costs. Our capabilities include geotechnical design and analysis, simulation and engineering analysis, bespoke equipment design and build, subsea protection technology and subsea stability technology.

We have a clear strategy focused on strengthening Tekmar's value proposition as an engineering solutions-led business which offers integrated and differentiated technology, services and products to our global customer base.

Headquartered in Newton Aycliffe, UK, Tekmar Group has an extensive global reach with offices, manufacturing facilities, strategic supply partnerships and representation in 18 locations across Europe, Africa, the Middle East, Asia Pacific and North America.
