

22 May 2025

CML Microsystems Plc

("CML", the "Company" or the "Group")

Exercise of Options and Total Voting Rights

CML announces that on 22 May 2025, an employee exercised, in aggregate, 7,000 options over ordinary shares of 5 pence each in the capital of the Company ("Ordinary Shares"), at an exercise price of £2.31 each. The exercise of the options is today being satisfied by the transfer of existing Ordinary Shares which were held by the Company in treasury.

Total Voting Rights

Following this exercise of options, and in conformity with the Financial Conduct Authority's Disclosure and Transparency rules, CML Microsystems Plc hereby notifies the market that the Company's issued share capital comprises 16,504,754 Ordinary Shares. The Company holds 582,895 Ordinary Shares in treasury. Therefore, the total number of voting rights in the Company is 15,921,859 ordinary shares.

The above figure of 15,921,859 Ordinary Shares in the Company carrying voting rights may be used by shareholders as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change to their interest in the Company under the FCA's Disclosure and Transparency Rules.

About CML Microsystems Plc

CML develops mixed-signal, RF and microwave semiconductors for global communications markets. The Group utilises a combination of outsourced manufacturing and in-house testing with trading operations in the UK, Asia and USA. CML targets sub-segments within Communication markets with strong growth profiles and high barriers to entry. It has secured a diverse, blue chip customer base, including some of the world's leading commercial and industrial product manufacturers.

The spread of its customers and diversity of the product range largely protects the business from the cyclicality usually associated with the semiconductor industry. Growth in its end markets is being driven by factors such as the appetite for data to be transmitted faster and more securely, the upgrading of telecoms infrastructure around the world and the growing prevalence of private commercial wireless networks for voice and/or data communications linked to the industrial internet of things (IIoT).

The Group is cash-generative, has no debt and is dividend paying.
