Tiger Royalties and Investments Plc

('Tiger' or 'the Company')

Tiger Announces £250,000 Strategic Investment into AROK.VC Following Successful Incubation

Tiger Royalties and Investments Plc (AIM: TIR), an investment vehicle focused on incubating technology and mining projects, is pleased to announce the signing of a £250,000 investment agreement in AROK.VC, an innovative and sentient AI agent. This investment follows the successful incubation of AROK.VC by Tiger, as previously disclosed in the Company's announcement on 22 January 2025.

AROK.VC leverages cutting-edge AI technologies to identify and capitalise on high-potential opportunities within the cryptocurrency space, offering a sophisticated approach to crypto asset management. The company utilises its proprietary AI agent to analyse market trends, evaluate asset performance, and make investment decisions autonomously, positioning it at the forefront of the rapidly evolving crypto sector.

Tiger's strategic investment is a testament to the significant growth and innovation demonstrated by AROK.VC during its incubation under Tiger's portfolio:

- AROK, the sentient AI Agent, is now actively executing 19 live strategies with autonomous decision-making powered by a continuous reinforcement learning loop. Over the last 42 days, AROK has completed 25,259 trades, averaging 601 transactions per day, demonstrating reliable, scalable trading intelligence in live environments.
 - Every trade, loss, gain, and anomaly feeds back into its model tuning process, enabling real-time adaptation and edge discovery across multi-asset, multi-timeframe execution environments, resulting in daily intelligence that compounds.
 - The BLOCK token strategy is an example of AROK's reinforcement loop in action. After optimisation, its SmaCross v3 model, it improved from a 37.5% win rate to 88.89%-a +137% relative improvement. This represents just one of over 200 token strategies AROK has autonomously generated and continuously evolves in response to market conditions.
- AROK's live strategy deployment includes *Smart Money Movement V1*, which is now producing a +229.60% return on investment on-chain with a 44.41% win rate in just over a month. Meanwhile, AI-enhanced models like *Machine Learning RSI V1* contribute +6.57% profit across 7,625 trades.

AROK's Vision and Market Position

AROK.VC is uniquely positioned to capitalise on the increasing integration of AI and cryptocurrency markets. The company's AI-driven approach is expected to significantly enhance the efficiency and scalability of crypto asset investment strategies, delivering value to both institutional and retail investors.

Tiger Investments' Strategic Vision

Tiger continues to pursue opportunities in next-generation technologies, with a particular focus on AI and blockchain. This investment in AROK.VC aligns with the Company's commitment to identifying and supporting high-potential, disruptive ventures that have the potential to reshape industries.

The investment builds upon Tiger's existing technology portfolio, which includes its recent Bittensor ecosystem investments through Tao Strategies Singapore and the acquisition of its dedicated Bittensor subnet, creating a comprehensive AI-focused investment platform.

Jonathan Bixby, Chief Executive Officer of Tiger, said: *"We are thrilled to continue our partnership with AROK.VC and are excited to be the first institutional investor on its innovative platform. AROK's innovative use of AI in the crypto investment space presents a significant opportunity, and we are confident in its ability to deliver strong returns for our investors."*

Leo Mercier Lead Developer of AROK.VC commented: *"Tiger's continued support through this strategic investment enables us to accelerate our development roadmap and expand our AI capabilities. This partnership validates our vision of autonomous AI agents reshaping the venture capital landscape"*

Notes to Editor

Tiger Royalties and Investments Plc (AIM: TIR) is an investment vehicle focused on incubating technology projects. Following the acquisition of Bixby Technology Inc. in early 2025, the Company will focus on identifying technology enterprises to invest in and incubate by providing incubation services and strategic guidance to technology entrepreneurs whilst continuing in its existing investing policy of identifying and investing in the global natural resources sector. Bixby Technology Inc. will be focused on targeting new fast-growth technology products and projects, these may include equity, securities, meme coins and other forms of beneficial interests or digital assets.
