**About eEnergy Group plc**

eEnergy (AIM: EAAS) is revolutionising the path to Net Zero as a leading digital energy services provider for B2B and public sector organisations. We eliminate the barriers to clean energy generation and energy waste reduction, offering solutions that don't require upfront capital investment. Our vision is clear: make Net Zero possible and profitable for every organisation.

Our primary services include:

- **Reduce:** LED lighting and controls
- **Generate:** Solar PV, ground mount, rooftop, and carport
- **Charge:** EV charging and management software

All eEnergy's services come with intelligent circuit-level energy analytics and are funded through a panel of funders (including Redaptive and NatWest) to provide an off-balance sheet-compliant energy-as-a-service solution.

eEnergy has completed over 1,100 decarbonisation projects within the B2B and public sector. We are #1 in the education sector, having worked with over 840 schools, installing over half a million LED lights, and improving the learning environment for over 443,000 students-enough to fill Wembley Stadium almost five times over. In one year alone, eEnergy has saved the education sector £13 million in energy costs. With over 70% of schools yet to transition to LED lighting and over 90% yet to deploy solar, eEnergy estimates that at least £5.4 billion would need to be invested to install adequate rooftop solar, LED lighting, and EV charging infrastructure in UK schools.

eEnergy is a market leader within the education sector and has been awarded the Green Economy Mark by the London Stock Exchange.
