About Sound Energy PLC :

Sound Energy is a compelling transition energy investment opportunity, listed on the UK AIM market of the London Stock Exchange, with operations in Morocco centred around onshore exploration, development and production of gas. Gas is the focal transition fuel and critical to the country's energy policy to move to sustainable local renewable energy away from imported coal and hydrocarbon fuels. The company has a 25 year development concession with a Micro - LNG development underway at Tendrara, the first major onshore gas resource in Morocco, and a funded piped gas project due for FID this year. Small scale LNG will supply the industrial market, the piped gas development is for the power sector. Exploration wells are funded to support the infrastructure led exploration potential. Together these give the company significant opportunities for scalable growth on its 28,000 square km of onshore permits. Sound Energy therefore plays a pivotal role in responding to rising energy demand in Morocco and is facilitating the energy transition. This is further enhanced by Sound's recent early-stage diversification into opportunities in renewable power generation and Hydrogen exploration in Morocco. Sound has strong stakeholder engagement and partnerships with leading Moroccan companies, thereby leveraging in country expertise in renewable energy projects and its funded gas developments. Financially, the company is focused on revenue targets from Phase 1 LNG production this year, judicious investment, prudent cost management and balance sheet deleveraging to fund asset development opportunities. A well supported financial structure and clear strategic focus make Sound Energy poised to deliver further growth potential from its access to Moroccan gas and energy markets.
