

JULY 2025 TRAFFIC AND CO2 EMISSIONS
WIZZ AIR CARRIED 6.4 MILLION PASSENGERS, AN INCREASE
OF 7% YEAR-ON-YEAR
Ticker: WIZZ

Geneva, 4 August 2025:Wizz Air Holdings Plc ("Wizz Air"), one of the most sustainable European airlines, announces passenger and CO₂ emission statistics for July 2025.

Wizz Air carried 6.35 million passengers during the month of July, a 6.8% increase year on year. Seat capacity increased 7.9% year on year, resulting in a load factor of 92.8%, down 1.0ppt on last year's load factor of 93.8%. Load factor was negatively impacted by the geopolitical crisis in the Middle East as well as the late loading of Tel Aviv cancellation-driven replacements.

During the month:

- Wizz Air continues to be one of the lowest emission airlines, reporting a further decline in CO₂ emissions per RPK in July, down 1.8% year on year, to 50.9g grams per RPK.
- On July 14th, Wizz Air announced a strategic realignment, with a renewed focus on core markets, which includes suspending its Abu Dhabi services as of 1st September 2025.
- Wizz Air announced it will resume service to Tel Aviv from the 8th August, serving 8 countries on 10 routes. The full return to service of 24 routes to 11 countries should be deployed by mid-September.
- July 14th also saw the opening of Wizz Air's first Romanian maintenance centre at Băneasa Airport.
- Wizz Air continues to strengthen its core Central & Eastern European ("CEE") footprint, having announced it will open a new base at Warsaw Modlin Airport in December 2025 with initially two A321neo aircraft and by adding additional A321neo aircraft to our Kraków, Katowice and Skopje bases.
- As Wizz Air continues to grow, we announced forty new routes, with over thirty originating from the CEE.
