

4 August 2025

**Zenova Group PLC**  
("Zenova", the "Company" or the "Group")

**Result of AGM and Board Change**

**Zenova Group PLC (AIM: ZED)** a provider of cutting-edge fire safety and heat management technology, is pleased to announce that at its Annual General Meeting ("AGM") held earlier today, all resolutions were duly passed by shareholders.

The Company also announces that Alain Gottesman, Non-Executive Director, has retired as a Director of the Company with effect from the conclusion of the AGM, and did not offer himself for re-election.

The Board would like to take this opportunity to express its upmost thanks to Alain for his valuable contribution to the Company and wishes him well in his future endeavours.

**About Zenova Group PLC**

Zenova Group PLC specializes in the development and supply of advanced fire safety and temperature management technologies for industrial, commercial, and residential sectors. Its product portfolio includes the Zenova FP fire protection paint, Zenova IP thermal insulation paint, and the Zenova FX series of fire extinguishers, all engineered to meet the highest safety and efficiency standards in the industry. The product range is applicable to industrial, commercial, and residential markets.

***Zenova FP, fire protection paint***

A water based, fire protection paint (also known as a 'thermofoaming' or 'intumescent' paint), which can be used on any surface and colour matched to any colour. When exposed to heat or flames, the paint expands and creates a solid foam-like crust which will not burn and insulates the surface it is painted on. This prevents surfaces from catching fire and stops fire spreading. It has been tested by global fire industry experts and complies with UK building regulations and the latest UK and European fire safety standards.

***Zenova IP, thermal insulation paint***

A thermal insulation paint embeds the most modern insulating technology in a thermos-like ultra-thin layer. It saves energy by increasing the thermal insulation level in commercial and residential buildings. Solar heat can increase the temperature within a building by 75% to 90%. Zenova IP has been independently tested and validated to deflect, absorb and dissipate up to 75% of this heat, thereby reducing the inside temperature by up to 45%. Suitable for both exterior and interior, on any type of surface

#### ***Zenova IR, thermal insulation render***

Zenova IR is a ready mixed insulation render that can be applied to internal and external walls in commercial and residential buildings to provide immediate insulation benefits and can be colour matched to any colour.

#### ***Zenova FX, fire extinguishers***

A fire extinguisher like no other. It puts out class A, B, F and electrical fires fully tested against European EN3 as well as British standards. Available in 6 and 9 litre sizes.

#### ***Zenova FX500, aerosol fire extinguisher***

The Zenova FX500 is a high-performance handheld fire extinguisher that is tested by independent experts and adheres to the highest industry standards. Safe for use on any type of fire the Zenova FX500 reduces the risk of reignition. The Zenova FX 500 is quick, easy and safe to operated and has been tested to BS6165 standard.

#### ***Zenova CS, automatic ceiling sprinklers***

The Zenova CS provides ceiling-mounted fire protection for new builds and can be easily retrofitted into any existing environment to address all types of fire risks

#### ***Zenova WB, wildfire barrier***

A wildfire barrier fluid (applied via spray wands or aerial drops), which provides a virtual barrier where fire simply will not burn. Repeated tests on a variety of extremely dry wildfire fuels (grasses, hays, brush) demonstrates the incredible fire resistance Zenova WB provides, while remaining viable after application for 30+ days in dry conditions.
