Launch of Market Edge Intelligence™

AI Solution increases Beeks' total addressable market and opens a new recurring revenue stream

13 August 2025: Beeks Financial Cloud Group plc (AIM: BKS), a cloud computing and connectivity provider for financial markets, is pleased to announce the launch of Market Edge Intelligence™, which the Board considers to be the world's first AI/Machine Learning solution for passive monitoring of capital markets data directly at the network edge.

Developed throughout FY24 and FY25, as previously announced, Market Edge Intelligence™ brings real-time AI analytics and predictive intelligence capabilities directly to colocation facilities, generating actionable insights such as predictive alerts, infrastructure anomaly detection, capacity forecasting and real-time trading signal execution. These insights bring cost savings and operational efficiencies to Tier 1 and Tier 2 customers, including buy-side firms, brokers, market makers, exchanges and venues.

Market Edge Intelligence™ is accessible to financial services organisations worldwide and supports major exchange protocols. The product can be integrated in a variety of ways, including as part of Beeks Analytics, as a standalone solution to operate on a firm's own data, or as a hybrid integration with existing tools and APIs.

The product has already received positive customer feedback and it is set to significantly expand Beeks' addressable market, create upsell opportunities with existing customers and open a new recurring revenue stream, further adding to Beeks' high proportion of contracted multi-year recurring revenue.

Gordon McArthur, CEO of Beeks, commented *"The launch of Market Edge Intelligence™ is a major milestone for the industry and a great example of how Beeks is using AI to push boundaries and transform market infrastructure. The innovation of our products is central to our growth strategy, and this latest launch further secures our position as a leading technology provider for financial markets as we recognise the evolving needs of the trading landscape."*
