### **About Avacta - [www.avacta.com](http://www.avacta.com)**

Avacta Therapeutics is a clinical-stage life sciences company expanding the reach of highly potent cancer therapies with the pre|CISION<sup>®</sup> platform. pre|CISION<sup>®</sup> is a proprietary payload delivery system based on a tumor-specific protease (fibroblast activation protein or FAP) that is designed to concentrate highly potent payloads in the tumor microenvironment while sparing normal tissues. Our innovative pipeline consists of pre|CISION<sup>®</sup> peptide drug conjugates (PDC) or Affimer<sup>®</sup> drug conjugates (AffDC) that leverage the tumor-specific release mechanism, providing unique benefits over traditional antibody drug conjugates.

### **About the pre|CISION<sup>®</sup> Platform**

The pre|CISION<sup>®</sup> platform comprises an anticancer payload conjugated to a proprietary peptide that is a highly specific substrate for fibroblast activation protein (FAP) which is upregulated in most solid tumors compared with healthy tissues. The pre|CISION<sup>®</sup> platform harnesses this tumor specific protease to cleave pre|CISION<sup>®</sup> peptide drug conjugates and pre|CISION<sup>®</sup> antibody/Affimer<sup>®</sup> drug conjugates in the tumor microenvironment, thus releasing active payload in the tumor and reducing systemic exposure and toxicity, allowing dosing to be optimized to deliver the best outcomes for patients.
