

1 September 2025

Tower Resources plc
("Tower" or the "Company")
Bridge Loan

Tower Resources plc (AIM: TRP), the AIM-listed oil and gas company focused on Africa, is pleased to announce that the Company has agreed to expand its Bridge Loan, initially announced on 26 March 2025 and expanded on 1 July 2025, by £250,000, from £750,000 to £1,000,000, with effect from 29 August 2025. The other terms of the Bridge Loan remain unchanged.

The Bridge Loan is an unsecured fixed-price convertible loan (the "Bridge Loan") provided by Prime Resources Limited ("PR") with a term of up to 12 months from 25 March 2025, and convertible into ordinary shares at a fixed conversion price of 0.05588 pence per share (being a premium of 100% to the average of the 5 daily VWAPs prior to the original issue date) if not prepaid earlier. PR is a Gibraltar-registered private investment company and is not related to the Company's prospective farm-in partner Prime Global Energies Limited.

Tower Resources Chairman & CEO, Jeremy Asher, commented:

"The purpose of the Bridge Loan has been to provide the Company with working capital flexibility in preparation for the drilling of the NJOM-3 well on the Thali license in Cameroon. We are still anticipating spudding the NJOM-3 well in Q4 2025, although this is now quite a tight schedule. The Prime Minister of the Republic of Cameroon has issued instructions for the grant of the extension of the initial exploration period of the Thali license and the approval of the farm-out to Prime Global Energies Limited, and the process is ongoing. Therefore, although we expect to receive the formal documentation of these approvals and completion of the farm-out presently, it is important that we keep the current work streams on track in the meantime, in order to minimise delays to the drilling schedule."

Key Terms of the Bridge Loan

The Company has agreed a fixed-price convertible loan, now increased from £750,000 to £1,000,000, with PR, with a duration of up to 12 months from the original drawdown. The material terms of the loan comprise a 5% cash implementation fee payable on drawdown (which is immediate) and interest of 15% per annum or pro rata until repaid, accrued daily and paid on the maturity date. The loan agreement states that as long as the Company's share price (as defined by the average of the 5 latest daily VWAPs) is below the fixed conversion price, then the Company has the right to prepay the loan with accrued interest to the date of repayment and no further fees, with 10 business-days' notice, in which case the conversion right immediately lapses on repayment. However, if the Company's share price is higher than the fixed conversion price, then it will be at the lender's discretion to accept an early cash redemption.

The loan is unsecured, but Tower's operational subsidiaries are parties to standard corporate guarantees, and the facility contains standard default provisions.

Importantly, the terms of the Bridge Loan do not include the issue of any warrants or other equity-linked instruments other than the standard fixed-price conversion right if not repaid with interest.

About Tower Resources

Tower Resources plc is an AIM listed energy company building a balanced portfolio of energy opportunities in Africa across the exploration and production cycle in oil and gas and beyond. The Company's current focus is on advancing its operations in Cameroon to deliver cash flow through short-cycle development and rapid production with long term upside, and de-risking attractive exploration licenses through acquiring 3D seismic data in the emerging oil and gas provinces of Namibia and South Africa, where world-class discoveries have recently been made.

Tower's strategy is centred around stable jurisdictions that the Company knows well and that offer excellent fiscal terms. Through its Directors and staff, Tower has access to decades of expertise and experience in Cameroon and Namibia, and its joint venture with New Age builds on years of experience in South Africa.
