Reconciliation of NAV per share movements for the month ended 31 July 2025:

	July 2025 (pence)
NAV at the beginning of period	97.41
Operating Income available to distribute ⁽³⁾	0.51
Unrealised FX gains / (losses) ⁽⁴⁾	(0.00)
NAV at the end of the period	97.92

⁽³⁾ Operating Income available to distribute comprises loan income recognised in the period less operating costs incurred and before any impairment is taken into account. The Operating Income available to distribute also includes realised foreign exchange gains and losses that are available to distribute except where the realised gains and losses relate to the settlement of hedges that were previously rolled forward and the gain or loss on that roll forward was classified as unavailable to distribute.

⁽⁴⁾ Unrealised foreign exchange gains/losses relate to the net impact of changes in the valuation of foreign exchange hedges and the sterling equivalent value of Euro loan investments (using the applicable month end rate). Mismatches between the hedge valuations and the loan investments may occur depending on the shape of the forward FX curve and this may cause some movement in the NAV. These unrealised FX gains / losses are not considered part of distributable reserves.

All figures herein are published based on current information, estimates and judgements.
