**Notes to editors:**

Affini Technology (Affini) was acquired by Petards in June 2024 and is a UK based wireless critical communications solutions provider to the transport, blue light, energy, defence, and construction sectors. Affini's expertise covers the entire life cycle, enabling it to offer an end-to-end service from strategy and design to maintenance and service management.

Affini delivers voice, video and data communication solutions alongside telematics, telemetry and asset/people tracking services and generates significant recurring revenues. It supplies services to a number of blue chip clients, with many customer relationships spanning 10 years or more.

The Affini business originates from 1974 when the radio division of the organisation that formed British Airways was carved out as a separate business. Historically, Affini's core capability was the design, deployment, and ongoing maintenance of critical communications networks within the aviation sector. The foundation of these solutions focused on radio technologies, for both landside and airside Private Mobile Radio (PMR) networks as well as ground to air communications within airports.
