The 31 August 2025 NAV shown here has been calculated after taking account of the dividend of 1.375 pence per Share announced by the Company on 5 August 2025 and the €2.2 million/£1.9 million further provision announced on 8 September 2025 related to the Office Portfolio, Ireland loan investment. Reconciliation of NAV per share movements for the month ended 31 August 2025:

	August 2025 pence)
NAV at the beginning of period	97.92
Operating Income available to distribute <sup>(3)</sup>	0.45
Impairment provision on asset classified as Stage 3 <sup>(4)</sup>	(1.27)
Realised FX gains / (losses) not distributable <sup>(5)</sup>	0.12
Unrealised FX gains / (losses) <sup>(6)</sup>	(0.09)
Dividend declared	(1.38)
NAV at the end of the period	95.75

<sup>(3)</sup> Operating Income available to distribute comprises loan income recognised in the period less operating costs incurred and before any impairment is taken into account. The Operating Income available to distribute also includes realised foreign exchange gains and losses that are available to distribute except where the realised gains and losses relate to the settlement of hedges that were previously rolled forward and the gain or loss on that roll forward was classified as unavailable to distribute. (see note 5 below).

<sup>(4)</sup> In August 2025 a loan classified as Stage 3 had an additional impairment provision recognised against it.

<sup>(5)</sup> On occasion, the Group may realise a gain or loss on a capital hedge before the loan matures. When this situation arises the Group separates the realised FX gain or loss from other realised FX gains or losses and considers it unavailable to distribute or not as a reduction in distributable profits. The FX gain or loss will only be transferred to distributable income when the loan is settled, and the final net gain or loss on the capital hedges over the life of the loan can be determined.

<sup>(6)</sup> Unrealised foreign exchange gains/losses relate to the net impact of changes in the valuation of foreign exchange hedges and the sterling equivalent value of Euro loan investments (using the applicable month end rate). Mismatches between the hedge valuations and the loan investments may occur depending on the shape of the forward FX curve and this may cause some movement in the NAV. These unrealised FX gains / losses are not considered part of distributable reserves.

All figures herein are published based on current information, estimates and judgements.
