**URU Metals Limited**

("URU" or the "Company")

URU Metals Limited ("URU" or the "Company") is pleased to announce the release of an interview with its Exploration Vice-President, Richard Montjoie, discussing the latest developments at the Company's flagship Zeb Nickel Project on South Africa's Bushveld Northern Limb.

In the interview, Richard covers:

- Results from the SpectremPlus high-power airborne EM programme and how these data, integrated with gravity and magnetics, have defined coherent late-time conductors along intrusive margins consistent with feeder/chonolith sulphide traps.
- The near-term work programme: ground EM (fixed/moving loop), plate modelling and ranked drill-decision gating designed to improve drill efficiency.
- Regulatory progress including existing Integrated Environmental Authorisation and HDSA participation via a 10% structure (ESOP and Communities NPC) aligned with South African Mining Charter III.
- The Company's tight share register and recent fundraises supporting the technical and permitting workflows.

The Brand Communications interview can be viewed here: <https://youtu.be/TgDJ0tjORvo>

**About the Company**

URU Metals is a mineral exploration and development company focused on advancing its high-potential critical metals projects in South Africa. The Company is committed to creating sustainable value through responsible mining practices, regulatory compliance, and engagement with stakeholders.
