

15 October 2025

**80 Mile PLC / Ticker: 80M / Market: AIM / Sector: Mining**

**Exercise of Warrants and Total Voting Rights**

80 Mile PLC ("80 Mile" or the "Company"), the AIM, FSE, and OTC listed exploration and development company with mineral and energy projects in Greenland and a biofuels plant in Italy, advises that the Company has issued a total of 8,000,000 new ordinary shares of £0.0001 each at a price of 0.35 pence per share ("Ordinary Shares") for a total consideration of £28,000 following an exercise of 8,000,000 warrants ("Warrant Shares").

The Warrant Shares will rank pari passu with the Company's existing shares and application has been made for the Warrant Shares to be admitted to trading on AIM ("Admission"). It is expected that Admission will become effective and dealings in the Warrant Shares will commence at 8:00 am on or around 20 October 2025.

In accordance with the Disclosure Guidance and Transparency Rules, the Company hereby notifies the market that immediately following Admission, its issued and outstanding share capital will consist of 4,337,127,203 Ordinary Shares. Shareholders may use this figure as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change to their interest in, the Company under the Financial Conduct Authority's Disclosure and Transparency Rules.

The Company has 346,935,493 warrants and options outstanding.

**About 80 Mile Plc:**

80 Mile Plc, listed on the London AIM market, Frankfurt Stock Exchange, and the U.S. OTC Market under the ticker BLLYF, is an exploration and development company focused on high-grade critical metals in Tier 1 jurisdictions. With multiple projects in Greenland, as well as a developing industrial gas and biofuels business in Italy, 80 Mile offers both portfolio and commodity diversification focused on base metals, precious metals, and industrial gas while expanding into sustainable fuels and clean energy solutions in Tier 1 jurisdictions. 80 Mile's strategy is centred on advancing key projects while creating value through partnerships and strategic acquisitions.

80 Mile's recent acquisition of White Flame Energy expands its portfolio into the energy and gas sector, adding large-scale licenses for industrial gas, natural gas, and liquids in East Greenland. Approved by shareholders in July 2024, this acquisition diversifies the Company's assets and aligns with its strategy to contribute to sustainable energy solutions, while also exploring conventional energy resources.

The Disko-Nuussuaq nickel-copper-cobalt-PGE project in Greenland is a primary focus for 80 Mile, 100% owned by 80 Mile PLC. Seven priority targets exhibiting spatial characteristics indicative of potential deposits on a scale comparable to renowned mining operations such as Norilsk, Voisey's Bay, and Jinchuan, will be advanced by the Company.

The Dundas Ilmenite Project, 80 Mile's most advanced asset in northwest Greenland, is fully permitted and progressing towards near-term production. With a JORC-compliant Mineral Resource of 117 Mt at 6.1% ilmenite and an offshore Exploration Target of up to 530 Mt, Dundas is poised to become a major supplier of high-quality ilmenite. Recent discoveries of hard rock titanium mineralization, with bedrock samples showing nearly double the ilmenite content of previous estimates, further enhance the project's world-class potential. 80 Mile owns 100% of the Dundas Ilmenite Project under its subsidiary Dundas Titanium A/S in Greenland.

The Thule Copper Project is a significant component of 80 Mile's portfolio in northwest Greenland, focused on exploring and developing high-grade copper deposits within the Thule Basin in northwest Greenland. Leveraging existing infrastructure and exploration credits, the project is strategically positioned in an underexplored region with substantial mineral potential. 80 Mile's established basecamp at Moriusaq will support cost-effective exploration, aligning with the Company's broader strategy to secure high-quality copper and industrial gas projects.

In March 2025, 80 Mile divested its Finnish portfolio, selling its subsidiary, FinnAust Mining Finland Oy, to Metals One. The portfolio consisted of licenses comprising the Hammaslahti Copper-Zinc Project and Outokumpu Copper Project. 80 Mile retains 100% of the rights to any industrial gases (including helium and hydrogen) associated with the projects.
