21 October 2025

Hydrogen Utopia International PLC
(the "Company" or "HUI")

Delivery of Shares

Hydrogen Utopia International PLC, a company specialising in turning non-recyclable mixed waste plastic into hydrogen and other carbon-free fuels, new materials or distributed renewable heat, is pleased to announce that, further to the announcement of 10 October 2025, it has delivered 2,307,692 new ordinary shares representing a total of £37,500 (each new ordinary share priced at 1.625p) to AlbR Capital Limited (previously known as Novum Securities Limited) to settle outstanding professional fees under existing unspent share authorities ("AlbR Shares").

Application has been made for the AlbR Shares to be admitted to trading on the London Stock Exchange on or around 30 October 2025 ("Admission") and the AlbR Shares will rank pari passu with the ordinary shares of the Company in issue. For a period of one year from today, any sale of the AlbR Shares will require prior Board Approval.

On Admission the Company will have 405,968,607 ordinary shares in issue, each ordinary share with one voting right. This number should be used by shareholders as the denominator for the calculation by which shareholders will determine if they are required to notify their interest in, or a change to their interest in the Company.

About Hydrogen Utopia International PLC

HUI aims to become one of the leading new European companies specialising in converting non-recyclable mixed waste plastic into hydrogen and other carbon-free fuels, new materials or distributed renewable heat.

A HUI facility uses non-recyclable mixed waste plastic as feedstock and turns it into syngas from which new products and energy can be produced. HUI anticipates that its revenues will be derived from a variety of sources, dependent upon location and configuration of the HUI facilities, including the sale of syngas, hydrogen and other gases, electricity and heat sales, and the payment to it of fees for a given quantity of non-recyclable mixed waste plastic received at a HUI facility.

HUI will target areas where there is significant private sector interest or potential, financial backing is accessible and or where substantial EU and/or government funded sources of grants and loans are or may be available. The global increase in fossil fuel-based energy prices reinforces the need

for alternative, price competitive energy sources, which HUI's business model can provide.
