Transense Technologies plc

("Transense" or the "Company")

Transense to unveil new Translogik TLGi Smart Tyre Inflator at SEMA 2025

Transense Technologies Plc (AIM: TRT), the developer of specialist sensor technology and measurement solutions, will launch its new Translogik TLGi Digital Handheld Tyre Inflator on 4 November 2025 at the Specialty Equipment Market Association (SEMA) Show in Las Vegas, one of the world's largest automotive trade events.

The TLGi is a connected, handheld tyre inflation tool designed for the truck and bus market. It combines precision inflation with real-time digital data capture, providing traceability and improved efficiency for fleet operators and tyre service providers.

Developed in response to customer feedback, the TLGi automatically records tyre pressures both before and after inflation, addressing long-standing industry concerns around traceability and data accuracy. The device features Bluetooth connectivity, real-time pressure monitoring, and cloud-based data logging, with optional RFID and TPMS capability to enhance workflow and diagnostics.

The TLGi complements Transense's existing TLGX tyre inspection range, expanding the company's connected workshop solutions and supporting its strategy to deliver smarter, data-driven tools for fleet maintenance operations.

Ryan Maughan, Managing Director of Transense Technologies, commented: "The TLGi represents a major step forward in connected workshop technology, combining precision inflation with digital traceability to help fleets improve safety, reduce costs and make better-informed maintenance decisions."

The Translogik team will be exhibiting at SEMA in the Global Tyre Expo, South Hall Lower, Stand 49221. The TLGi will also be displayed in the New Products Showcase in the same hall.
