### Background to and Reasons for the Fundraising

ValiRx is an AIM-quoted life science company focused on cancer therapeutics and women's health. The Company seeks to identify the most promising research in academia and innovative biotechnology companies and translate this research towards clinical development, providing a pathway to commercialisation.

The Company has identified certain fundamental issues impacting drug development today, in terms of innovation, productivity and access. A lack of expertise in early-stage drug developers, particularly in academia, contributes to low rates of success in translating novel scientific research into valuable new therapeutic assets, hindering both the adoption of innovation and the overall productivity of developing new treatments.

To address these fundamental issues, ValiRx has adopted a strategy to improve the efficacy of translating promising novel research into the preclinical development phase, with a particular focus on women's health and oncology. Combining its clinical knowledge, deep biological expertise, data generation and data interpretation abilities, ValiRx seeks to unlock the substantial potential of early-stage innovation and provide a specialist service for its in-house collaborative projects and third-party innovators through its subsidiary, Inaphaea Biolabs Limited ("Inaphaea").

### Use of Proceeds

The proceeds of the Fundraising, in aggregate of approximately £902,000 (before expenses), are intended to be used by the Group for the following:

	<b>Estimated cost</b>
· R&D: invest into the ValiRx future collaborative pipeline	£0.4m
· R&D: preclinical development of Cytolytix	£0.2m
· R&D: preclinical development of VAL201 2.0	£0.05m
· Operating costs (balance from R&D tax credits, revenue and grants)	£0.25m

For the purposes of section 571(6)(c) of the Companies Act 2006, the Issue Price has been determined by the Company following discussions with market participants and its professional advisers.
