Thor Energy PLC

("Thor" or the "Company")

Thor Energy to Present at Hydrogen & Natural Gas Technology Conference in Paris

Thor Energy plc (AIM, ASX: THR, OTCQX: THORF) is pleased to announce that its Managing Director and Chief Executive Officer, Andrew Hume, will present at the highly regarded Hydrogen & Natural Gas Technology (HNAT) Conference in Paris, France, later today and tomorrow. The presentations will focus on Thor's strategic positioning and accelerated exploration program in South Australia, which has become a global focal point for natural hydrogen and helium exploration and investment.

The first presentation, being delivered later today, provides a detailed overview of the principal geological elements in South Australia, explaining why the convergence of unique geological factors, combined with favourable government regulations and market opportunities, offers substantial potential for large-scale natural hydrogen and helium resources. The second presentation, scheduled for tomorrow, will provide a corporate snapshot to potential investors detailing Thor's strategy and significant progress in delivery. This includes the strategic divestment of several legacy assets to achieve optimal corporate focus, resource allocation, and liberation of funds necessary to support its core exploration activities.

The presentation is now available to view online via the Company's investor centre:

Andrew Hume, Managing Director and CEO, commented:

"I am delighted to be presenting at the HNAT conference in Paris, where the industry will be assembled, ideas shared, contacts made, and business undertaken. I look forward to sharing some insights from Thor on the favourable geology which underscores our excitement and commitment to explore for natural hydrogen and helium in South Australia, and to provide an update on Thor's activities after a pivotal 2025 and our plans for an exciting, fast-paced exploration work programme across the next year or so."
