

**OptiBiotix Health plc**  
("OptiBiotix" or the "Company" or "the Group")

**First order with well-known Weight Management Company**

OptiBiotix Health plc (AIM: OPTI, OTCQB: OPTBF), a life sciences business developing products which reduce hunger and food cravings, enhance the gut microbiome, and sweet fibres as healthy sugar substitutes, announces it has received a first order from a well-known weight management company (the "Distributor"). The order follows on from an agreement announced on 20 August 2025. The low six-figure first order includes the supply of a range of private label SlimBiome® finished products (gummies, bars, drinks) and a WellBiome® product planned for delivery and launch in Europe under the Distributor's own brand in H1 2026. This is consistent with the Company's strategy of providing more finished product either via ecommerce or, as in this case, private label products to customers.

The order reflects the interest in bringing ingredients with human studies which show appetite reduction similar to the anti-obesity drugs to traditional weight management brands, and new brands looking to enter the fast evolving 'natural alternative to GLP1 market', which is redefining the weight management market. This market is estimated to be worth 1.2 billion in 2024 and is projected to reach 4.8 billion by 2033, growing at a compound annual growth rate of 16.7% (Market Intelco, 2024).

This follows on from the launch of SlimBiome with a number of large partners and well-known brands internationally including:-

- I. Hydroxycut, a brand which describes itself as the No. 1 selling weight loss supplement brand in the United States of America ("USA"), which is sold online and via major retail outlets including Walmart across the USA.
- II. LightLife, a new brand from Dr Morepen which was launched online in December 2024 and is now expanding into retail across India and looking to extend their product range.
- III. The launch of SlimBiome in Holland and Barrett's SlimExpert range. We anticipate new positioning of products in 2026 reflecting the evolution of the weight management market.
- IV. The inclusion of SlimBiome as LeanBiome in leading sports brands like Muscletech and Myprotein.

**Stephen O'Hara, CEO of OptiBiotix Health plc said:** "We are pleased to announce this large first order with a well-known European weight management company. The order reflects the growing interest in bringing ingredients with human studies demonstrating appetite reduction, similar to the anti-obesity drugs, to brands looking to enter this fast growing 'natural alternative to GLP1 market'.

*"This is another example of the Company launching products with well-known brands in international markets which helps build the SlimBiome brand and, if successful individually and collectively, have the potential to make a significant contribution to future sales growth and shareholder value."*
