Tekcapital plc
("Tekcapital" or the "Company")
City of Boca Raton, Guident, and Circuit
To Launch Autonomous Shuttle Service

Tekcapital Plc (AIM: TEK) the UK intellectual property investment group focused on creating valuable products that can improve people's lives, is pleased to announce that the City of Boca Raton, in partnership with Circuit Transit, Inc. and Tekcapital's portfolio company Guident Corp, is preparing to launch MiCa, the city's first autonomous shuttle service, connecting residents and visitors within Mizner Park through a sustainable, technology-driven loop.

The official launch event will take place at 4:00 PM, Friday, November 21, 2025, at Mizner Park. Boca Raton officials, community leaders, and executives from Circuit and Guident will gather to mark a new chapter in Boca Raton's commitment to safe, accessible, and future-ready transportation.

Harald Braun, Chairman and CEO of Guident said:

"This launch marks a defining moment for Boca Raton and for the future of driverless mobility. The MiCa is managed by Guident's RMCC platform, which bridges technology and human judgment, ensuring that every autonomous journey is monitored, secure, and safe."

Alex Esposito, CEO and Co-Founder of Circuit said:

"MiCa builds on Circuit's transportation services in Boca Raton. Partnering with Guident to introduce an autonomous service in Boca is about continuing to innovate while giving the community a safe, seamless way to get where they need to go."

City of Boca Raton Council Member Yvette Drucker said:

"With MiCa, we're not just introducing autonomous technology, we're building a model of how cities, partners, and technology providers can create safer and smarter transportation together."

The Power Behind the MiCa Shuttle: Guident's RMCC Platform

Guident's RMCC platform powers safe, connected, and intelligent monitoring through:

- Safety Intelligence: Real-time vehicle oversight and predictive incident prevention.

- Security Infrastructure: Encrypted data, system redundancy, and fail-safe operation.
- Mobility Management: Fleet analytics, route optimisation, and vehicle health monitoring.

The RMCC platform transforms autonomy from a vehicle-level feature into a city-scale intelligence network - giving operators, municipalities, and partners the tools to make mobility safer, smarter, and more efficient.

Looking Ahead

Following the MiCa launch, Guident will continue working with the City of Boca Raton and Circuit to expand route capabilities and enhance oversight technologies - setting a new benchmark for autonomous transportation.

About Guident

Guident brings cutting-edge technologies that enhance the safety, efficiency, and operational performance of autonomous vehicles and ground-based surveillance and inspection robots. Utilising proprietary IP and software applications, Guident offers advanced solutions for remote monitor and control. To learn more, please visit www.guident.com.

About Circuit

Circuit provides all-electric, on-demand micro transit that makes short trips easier, more affordable, and more sustainable. Operating in more than 50 U.S. markets, Circuit has delivered millions of rides that connect people to jobs, shops, healthcare, and local destinations. Through partnerships with cities, local governments, and private properties, Circuit helps reduce congestion, cut emissions, and strengthen local economies.
