**Notes to editors**

Harena ([www.harenaresources.com](http://www.harenaresources.com)) is a rare earths exploration and development company focused on the Ampasindava Ionic Clay Rare Earth Project in Madagascar (Harena's interest is 100%). The project hosts one of the largest ionic clay rare earth deposits outside of China, with significant concentrations of high-value magnet metals, specifically heavy rare earths, including neodymium (Nd), dysprosium (Dy), and praseodymium (Pr), which are critical for the composition of neodymium magnets (NdFeB). Harena is committed to low-impact, high recovery mining, providing a sustainable supply of critical minerals for the global energy transition and military/defence industries, as well as meeting the ever growing demand

the global energy transition and military defence industries as well as meeting the ever-growing demand for NdFeB from the robotics sector.
