### **Second €8m Offshore Wind Contract Award**

Tekmar Group plc (AIM: TGP), a leading provider of asset protection technology and offshore energy services, is pleased to announce that it has secured a significant contract award in excess of €8 million with an existing Engineering, Procurement and Construction (EPC) customer.

The scope of work comprises the supply of Tekmar's 10th Generation Cable Protection System (CPS) and associated ancillaries for a major UK offshore wind farm. Tekmar will deploy its in-house engineering expertise and holistic CPS design capabilities to deliver an optimised technical solution for the project. Subject to Final Investment Decision (FID) in early 2026, delivery will be late 2027, with revenue phased across the Company's FY26 and FY27 financial periods.

The contract award reflects the strength of Tekmar's relationship with this existing customer and its proven track record in delivering reliable, technically robust protection technology.

#### **Richard Turner, Chief Executive Officer of Tekmar Group, commented:**

"We are delighted to continue our long-standing relationship with this customer through the award of another major project. This contract reinforces Tekmar's position as the clear market leader in subsea asset protection, with our technologies protecting two thirds of the world's installed offshore wind capacity.

This significant contract builds on our growing success and order book momentum, which is improving utilisation and provides longer term revenue visibility."
