

January 5<sup>th</sup>, 2026

**Gulf Marine Services PLC**  
**('Gulf Marine Services', 'GMS', 'the Company' or 'the Group')**

### **Contract Extension**

Gulf Marine Services (GMS), a leading provider of self-propelled, self-elevating support vessels to the offshore energy industry, is pleased to announce a two-year extension (comprising one year firm and one year option) to an existing contract for one of its mid-size vessels operating in the GCC. This extension relates to a separate contract and a different vessel from the contract extension announced on 30 December 2025 (RNS Number 0449N).

#### **Mansour Al Alami, GMS Executive Chairman, commented:**

"This contract extension strengthens our backlog and highlights our customers' continued confidence in GMS's operations. It follows several new contracts and extensions announced in the last two weeks, reflecting the ongoing strong demand across our markets. As we enter 2026, we do so with positive momentum in our core regions."

This announcement contains inside information and is provided in accordance with the requirements of Article 17 of the Market Abuse Regulation (EU) No. 596/2014 (as it forms part of UK law by virtue of the European Union (Withdrawal) Act 2018, as amended).

#### **Notes to Editors:**

Gulf Marine Services PLC, a company listed on the London Stock Exchange, was founded in Abu Dhabi in 1977 and has become a world - leading provider of advanced self - propelled self - elevating support vessels (SESVs). The fleet serves the offshore energy industries from its offices in the United Arab Emirates, Saudi Arabia, and Qatar. The Group's assets are capable of serving clients' requirements across the globe, including those in the Middle East, South East Asia, West Africa, North America, the Gulf of Mexico, and Europe.

The GMS fleet of 14 SESVs is amongst the youngest in the industry. The vessels support GMS's clients in a broad range of offshore platform refurbishment and maintenance activities, well intervention work, and offshore wind turbine maintenance work (which are opex - led activities), as well as offshore platform installation and decommissioning and offshore wind turbine installation (which are capex - led activities).

The SESVs are categorised by size - K - Class (Small), S - Class (Mid), and E - Class (Large) - with these capable of operating in water depths of 45m to 80m depending on leg length. The vessels are four - legged and are self - propelled, which means they do not require tugs or similar support vessels for moves between locations in the field; this makes them significantly more cost - effective and time - efficient than conventional

offshore support vessels without self-propulsion. They have a large deck space, crane capacity, and accommodation facilities (for up to 300 people) that can be adapted to the requirements of the Group's clients.
