**Notes to Editors:**

Oriole Resources PLC is an AIM-quoted gold exploration company, with projects in West and Central Africa. It is focused on early-stage exploration in Cameroon.

At its district scale Central Licence Package, the Company has identified multi-kilometre long gold anomalies including at its flagship Mbe project. At Mbe, the Company has published a JORC Inferred MRE of 870,000oz at 1.09g/t Au for the MB01-S zone, and an Exploration Target range of 15Mt to 20Mt at a grade of 0.77g/t to 0.94g/t Au for 370,000oz to 605,000oz contained gold for the MB01-N zone. A fully funded maiden drilling programme commenced in November 2025 at MB01-N with the aim of converting the existing Exploration Target to a Resource. BCM is nearing completion of US 4 million in exploration expenditure at Mbe, which will see it earn a 50% interest.

The Company has also reported a Resource of 460,000oz contained gold at 2.06g/t Au in the JORC Indicated and Inferred categories at its 50% owned Bibemi project, where it has applied for an exploitation licence. In November 2025, BCM International completed its earn-in to a 50% interest in Bibemi by meeting certain payment conditions including spending a further US 4m on exploration.

At the Senala gold project in Senegal, AGEM Senegal Exploration Suarl ('AGEM'), a wholly owned subsidiary of Managem Group, has completed a six-year earn-in to acquire an approximate 59% beneficial interest in the Senala Exploration Licence by spending US 5.8 million. The Company has reported a Resource of 155,000oz contained gold at 1.26g/t Au in the JORC Inferred category for the Faré South prospect, and an additional, complementary Exploration Target range of 17Mt to 24Mt at a grade of 0.69g/t to 0.84g/t Au for 380,000oz to 650,000oz contained gold for all prospects at Senala. Best results to date include 20.00m grading 31.13 g/t Au including 10.00m grading 60.98 g/t Au from RC drilling and 59.60m grading 2.20 g/t Au from diamond drilling. Discussions on the formation of a joint venture company are currently underway. The Company also has several interests and royalties in companies operating in East Africa and Turkey that could give future cash payments.
