1. The IW&I asset migration column/row does not net to zero following the change in classification of certain previously reported FUMA to ensure alignment of approach. There is no impact on revenue.
2. Transfers represent client FUMA which has transferred from one service to another and other intra-group movements. These are excluded from net inflows.
3. Annualised net growth calculated as net flows/opening FUMA.
4. Net inflows into multi-asset funds include direct flows and flows into managed solutions delivered using in-house funds.
5. Group eliminations represent RAM funds that are held within portfolios managed by RIM (£7.2 billion) teams. Consequently, after excluding the RAM funds, the FUMA is £99.0 billion in RIM.
