

AFC Energy Plc
20 January 2026

AFC Energy Plc

("AFC Energy" or the "Company")

Notice of Full Year Results and Investor Presentation

AFC Energy plc (AIM: AFC), a leading provider of ammonia-based low carbon hydrogen production and hydrogen-to-power solutions at a commercially viable price point, will announce its full year results for the 12 months ended 31 October 2025 on Wednesday, 25 February 2026.

The Company is pleased to announce that John Wilson, Chief Executive Officer, and Karl Bostock, Chief Financial Officer, will host a live presentation for retail investors relating to the FY25 Results via the Investor Meet Company ("IMC") platform on Friday 27 February 2026, at 14:00 hrs GMT. The online presentation is open to all existing and potential shareholders.

Questions can be submitted pre-event via the IMC dashboard up until Wednesday 25 February 2026, 17:00 hrs GMT, or at any time during the live presentation.

Investors can sign up to IMC for free and add to meet AFC ENERGY PLC via:

<https://www.investormeetcompany.com/afc-energy-plc/register-investor>

Investors who already follow AFC ENERGY PLC on the IMC platform will automatically be invited.

About AFC Energy

AFC Energy plc is a leading provider of ammonia-based low carbon hydrogen production and hydrogen-to-power solutions. Our market-leading decentralised ammonia cracker and fuel cell generator products are engineered to unlock the low carbon hydrogen market by meeting customers' needs with scalable, reliable supplies of low carbon hydrogen and power. AFC Energy is enabling customers to decarbonise at a price that is commercially viable.

We are focused on the successful commercial rollout of our core product suite and on creating significant shareholder value by converting our growing opportunity pipeline into contracted orders and delivering sustained revenue growth. Our core strategy is to develop and deploy products that enable the production of scalable, reliable supplies of clean hydrogen at commercially viable prices and without reliance on government subsidies or incentives. AFC Energy achieves this through our proprietary, decentralised and modular ammonia cracker technology, and providing low carbon, offgrid power solutions with our fuel cell generators that are competitive with, and capable of displacing, diesel generators on a total cost of ownership basis.

The Group's modular, decentralised ammonia cracker systems have production capacities of approximately 0.5 and 4 tonnes of hydrogen per day respectively. These enable the generation of scaled volumes of low carbon hydrogen at the point of use within a highly compact footprint. Our systems have the potential to drive substantial revenue growth across a wide range of addressable markets, including hard to abate industrial facilities, transportation and power generation applications.

AFC Energy's fuel cell generator systems are currently offered with generation capacities of 30 kW and 200 kW. They are well-suited to off grid, decentralised and temporary power applications, including the displacement of diesel generators on construction and infrastructure sites. Further use cases include electric vehicle charging for cars, buses and trucks, as well as charging of battery powered non road machinery, with additional emerging opportunities

in maritime, data centre and rail applications.

AFC Energy is listed on the AIM market of the London Stock Exchange and headquartered in Dunsfold, Surrey, UK.
