

The following amendment has been made to the 'ASX Trading Halt' announcement released on 30 January 2026 at 7am under RNS No 0407R. The PDF link to the full version of the Company's ASX announcement is now available to view.

All other details remain unchanged. The full amended text is shown below.

30 January 2026

## ASX Trading Halt

Aura Energy Limited (ASX: AEE, AIM: AURA) ("Aura" or the "Company") announces that the Company has requested the Australian Securities Exchange ("ASX") to halt trading in its shares quoted on the ASX in accordance with ASX Listing Rule 17.1, pending the release of a further announcement from the Company regarding a capital raising.

The Company expects the securities to remain in trading halt until the earlier of the announcement of the outcome of the capital raising or the commencement of trading on Tuesday 3 February 2026.

Trading in the Company's ordinary shares will continue to trade as normal on AIM, a market operated by the London Stock Exchange, during this period.

### About Aura Energy (ASX: AEE, AIM: AURA)

Aura Energy Limited (ASX:AEE, AIM:AURA) is an Australian-based company focused on the development of uranium and battery metals to support a cleaner energy future. Aura is committed to creating value for host nations, local communities and shareholders through responsible and sustainable resource development. Aura is advancing two

communities, and shareholders through responsible and sustainable resource development. Aura is advancing two key projects:

§ **Tiris Uranium Project, Mauritania** - A fully permitted, near-term development asset with a potential long mine life. Aura plans to transition from a uranium explorer to a uranium producer to capitalise on the rapidly growing demand for nuclear power as the world shifts towards a decarbonised energy sector

§ **Häggån Polymetallic Project, Sweden** - A globally significant deposit containing vanadium, sulphate of potash and uranium with potential long-term value

### Disclaimer Regarding Forward-Looking Statements

This ASX announcement (Announcement) contains various forward-looking statements. All statements other than statements of historical fact are forward-looking statements. Forward-looking statements are inherently subject to uncertainties in that they may be affected by a variety of known and unknown risks, variables and factors which could cause actual values or results, performance or achievements to differ materially from the expectations described in such forward-looking statements. The Company does not give any assurance or guarantee that the anticipated results, performance or achievements expressed or implied in those forward-looking statements will be achieved.

Future funding plans are not commitments and depend on market conditions, approvals and counterparties; there is no assurance finance will be obtained on acceptable terms.

### Notes to project descriptions

The Company notes that the material assumptions underpinning the Tiris Uranium Production Targets, Ore Reserves and the associated financial information derived from the Tiris production target as outlined in the Aura Energy ASX Release dated 29 March 2023 "Enhanced Definitive Feasibility Study", ASX Release dated 28 Feb 2024 "FEED study confirms excellent economics for the Tiris Uranium Project", ASX Release dated 16 April 2024 "Offtake restructure delivers significant value", ASX Release dated 11 Sept 2024 "Updated Production Target Improves Economics at Tiris Uranium Project" and ASX Release dated 13 Dec 2024 "Tiris Uranium Project Alternative Production Targets" are subject to the matters disclosed in the ASX Release dated 25 November 2025 "Chair Address - Annual General Meeting 2025". Process descriptions and cost, NPV, IRR and pay-back estimates may be impacted by the ongoing review of basic engineering work expected to be completed in Q2 2026.

The Tiris Uranium Project Mineral Resources were released ASX Release dated 12 June 2024 "Aura increases Tiris Mineral Resources by 55% to 91.3 Mlbs U<sub>3</sub>O<sub>8</sub>" and Ore Reserves released ASX Release dated 16 Dec 2024 "Substantial increase in Tiris Uranium Project Ore Reserves". The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcement and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed, with the exception of process flow sheet matters currently being addressed as outlined in the ASX Release dated 25 November 2025 "Chair Address - Annual General Meeting 2025".

The Häggån Project Resource Estimate was prepared by a Competent Person in accordance with the JORC Code (2004 Edition) (see ASX Release dated 22 August 2012 "Outstanding Häggån uranium resource expands to 800 million pounds" and ASX Release dated 10 October 2019 "Häggån Battery Metal Project Resource Upgrade Estimate Successfully Completed"). The uranium Mineral Resource is currently in the process of being converted to a resource estimate in accordance with the JORC Code (2012 Edition) and to incorporate uranium assay information from exploration drilling subsequent to ASX Release: 22 Aug 2012 - Outstanding Häggån Uranium Resource Expands to 800 Million Pounds. No reinterpretation or estimation has been completed during the conversion process so far. A full summary of the Resource methodology and validation, which is currently being independently reviewed and validated by the Competent Person, will be included in the relevant JORC tables attached to the future announcement of the JORC 2012 compliant resource.

The Company confirms that the material assumptions underpinning the Häggån Project Production Targets and the associated financial information derived from the Häggån production target as outlined in the Aura Energy ASX Announcement dated 5 Sept 2023 "Scoping Study Confirms Scale and Optionality of Häggån" continue to apply and have not materially changed.

In respect to Resource statements, there is a low level of geological confidence associated with inferred mineral resources and there is no certainty that further exploration work will result in the determination of indicated measured resource or that the production target will be realised.
