**About Fulcrum Metals PLC**

Fulcrum Metals PLC (AIM: FMET) is an AIM listed technology led natural resources company focused on recovery of precious metals from mine tailings (previously milled and processed ore) in Canada using environmentally friendly leaching technology developed by Extrakt Process Solutions LLC and its associates (together "Extrakt"). Fulcrum's initial projects are the tailing sites of the former Teck-Hughes and Sylvanite gold mines in the Kirkland Lake mining camp of Ontario. In addition, the Company has interests in a portfolio of highly prospective mineral exploration and development projects in both Ontario and Saskatchewan Canada.

Fulcrum has an exclusive licence to use Extrakt's proven leaching technology on gold mine waste sites in the Timmins and Kirkland Lake mining camps of Ontario. These are two of Canada's biggest gold camps with a historical production above 110Moz over the past 100 years, leaving and more than 70 documented legacy mine waste sites. Fulcrum thus has the opportunity to become a significant, environmentally friendly, near term gold producer.
