Unless another currency is specified, the word 'dollar' or symbol '\$' in this document means US dollar and the word 'cent' or symbol 'c' means one-hundredth of one US dollar.

Unless the context requires, within the document, 'China' refers to the People's Republic of China and, for the purposes of this document only, excludes Hong Kong Special Administrative Region (Hong Kong), Macau Special Administrative Region (Macau) and Taiwan. 'Korea' or 'South Korea' refers to the Republic of Korea. Asia includes Australia, Bangladesh, Brunei, Cambodia, India, Indonesia, Laos, Malaysia, Myanmar, Nepal, Philippines, Singapore, Sri Lanka, Thailand, Vietnam, China, Hong Kong, Japan, Korea, Macau and Taiwan; Africa includes Botswana, Côte d'Ivoire, Egypt, Ghana, Kenya, Mauritius, Nigeria, South Africa, Tanzania, Uganda and Zambia. The Middle East includes Bahrain, Iraq, Oman, Pakistan, Qatar and Saudi Arabia and the UAE. Europe includes Belgium, Falkland Islands, France, Germany, Jersey, Luxembourg, Poland, Sweden, Türkiye and the UK. The

Americas includes Argentina, Brazil, Colombia and the US.

Within the tables in this report, blank spaces indicate that the number is not disclosed, dashes indicate that the number is zero and 'nm' stands for not meaningful. Standard Chartered PLC is incorporated in England and Wales with limited liability, and is headquartered in London.

The Group's head office provides guidance on governance and regulatory standards. Standard Chartered PLC stock codes are: HKSE 02888 and LSE STAN.LN.

Page 02

Standard Chartered PLC - full-year and fourth quarter 2025 results

All figures are presented on an underlying basis and comparisons are made to 2024 on a constant currency basis, unless otherwise stated. A reconciliation of restructuring and other items excluded from underlying results is set out on pages 32 - 35.

[Bill Winters, Group Chief Executive, said:](#)

"2025 was another year of strong momentum. We achieved an underlying return on tangible equity of 14.7%, exceeding our three-year plan a full year early. We have made a good start to the year and continue to benefit from a supportive business environment. We are seeing robust growth in our larger markets, and structural shifts in global trade and investment play to our distinctive strengths serving our clients' cross-border and affluent banking needs. We have increased our full year dividend per share by 65% and are announcing a new share buyback of 1.5 billion."

[Selected information on FY'25 financial performance with comparisons to FY'24 unless otherwise stated](#)

- Operating income of 20.9bn, up 6%; up 8% excluding notable items¹
 - Net interest income (NII) up 1% to 11.2bn
 - Non NII up 13% to 9.7bn, largely driven by Wealth Solutions, Global Banking and Global Markets
 - Wealth Solutions up 24% with double-digit growth in both Investment Products and Bancassurance
 - Global Banking up 15%, driven by higher origination and distribution volumes, and increased capital markets activity
 - Global Markets up 12%, mostly driven by flow income
- Operating expenses up 4% to 12.3bn, driven by targeted investments for business growth partly offset by efficiency saves
- Credit impairment charge of 676m; Wealth & Retail Banking (WRB) charge of 595m down 28m mainly from unsecured portfolio optimisation. Corporate & Investment Banking (CIB) charge of 4m was up 124m due to non-repeat of prior year releases.
- Restructuring and other charges of 937m include 531m related to the Fit for Growth programme
- Underlying profit before tax of 7.9bn, up 18%; reported profit before tax of 7.0bn, up 18%
- Return on Tangible Equity (RoTE) of 14.7%, up 300bps; Reported RoTE of 11.9%
- Balance sheet remains strong, liquid and well diversified with underlying loans and advances to customers up 5% and underlying customer deposits up 12%
- Risk-weighted assets (RWA) up 11bn to 258bn; Credit risk RWA up 2.8bn, Market risk RWA up 2.4bn, and Operational RWA up 5.7bn as the annual change is now recognised in Q4 instead of Q1 the subsequent year, resulting in two operational risk RWA increases in 2025
- The Group remains strongly capitalised with a Common Equity Tier 1 (CET1) ratio 14.1% (31.12.24: 14.2%)
 - 1.5bn share buyback starting imminently is expected to reduce CET1 ratio by approximately 58bps
 - Proposed final dividend of 1,092m or 49 cents per share will result in a full-year dividend of 1.38bn or 61 cents per share, up 65%

- Underlying earnings per share (EPS) increased 37% or 61.6 cents to 229.7 cents; Reported EPS increased 38% or 54.1 cents to 195.4 cents
- Tangible net asset value per share of 17.30 up 12% or 189 cents

Selected information on Q4'25 financial performance with comparisons to Q4'24 unless otherwise stated

- Operating income of 4.8bn broadly flat; up 3% excluding notable items and the reclassification²
 - Nil down 1% at ccy to 3.0bn, up 3% excluding the reclassification
 - Non Nil up 1% to 1.9bn, up 2% excluding notable items; growth in Wealth Solutions and Global Banking partly offset by lower episodic income in Global Markets
- Operating expenses of 3.4bn up 4%, up 7% excluding the reclassification
- Credit impairment charge of 145m with 156m from WRB and a 46m net release in CIB
- Underlying profit before tax of 1.2bn, up 19%.

- 1 Notable items relating to Ghana hyperinflation and revaluation of FX positions in Egypt
- 2 Reclassification of deposit insurance to expenses

Page 03

Standard Chartered PLC - full-year and fourth quarter 2025 results continued

Outlook and guidance

Building on the performance delivered in the year, the Group continues to expect client activity to be shaped by structural shifts in the global economy. These trends, which include a more multi-aligned world, increasing digitisation of money, and rising wealth participation in markets, are expected to persist.

We will host a capital markets event in May of this year where we will describe how these trends position the Group for the next phase of growth, as well as detailing the expected financial outcomes.

Our 2026 guidance is as follows:

- Reported operating income growth year-on-year to be around the bottom end of 5-7 per cent range at constant currency
 - Within which, net interest income³ expected to be broadly flat year-on-year at constant currency
- Reported cost to be broadly flat in constant currency including the final year of Fit for Growth charges
- Statutory RoTE to be greater than 12 per cent

- 3 Net interest income is adjusted for trading book funding cost, treasury currency management activities, and financial guarantee fees on interest earning assets

Information per ordinary share⁸			
Earnings per share ⁴ - underlying	229.7	168.1	61.6
- reported	195.4	141.3	54.1
Net asset value per share ⁵	2,007	1,781	226
Tangible net asset value per share ⁵	1,730	1,541	189
Number of ordinary shares at period end (millions)	2,247	2,408	(7)

1 Variance is better/(worse) other than assets, liabilities and risk-weighted assets. Change is percentage points difference between two points rather than percentage change for total capital ratio (%), Common Equity Tier 1 ratio (%), net interest margin (%), advances-to-deposits ratio (%), liquidity coverage ratio (%), leverage ratio (%), cost-to-income ratio (%) and return on ordinary shareholders' tangible equity (%).

2 Profit/(loss) attributable to ordinary shareholders is after the deduction of dividends payable to the holders of non-cumulative redeemable preference shares and Additional Tier 1 securities classified as equity.

3 When calculating this ratio, total loans and advances to customers excludes reverse repurchase agreements and other similar secured lending, excludes approved balances held with central banks, confirmed as repayable at the point of stress and includes loans and advances to customers held at fair value through profit and loss. Total customer accounts include customer accounts held at fair value through profit or loss.

4 Represents the underlying or reported earnings divided by the basic weighted average number of shares.

5 Calculated on period end net asset value, tangible net asset value and number of shares.

6 Net interest margin is calculated as adjusted net interest income divided by average interest-earning assets, annualised.

7 Reported performance/results within the annual report means amounts reported under UK-adopted International Accounting Standards and International Financial Reporting Standards.

8 Change is cents difference between the two periods for earnings per share, net asset value per share and tangible net asset value per share. Number of ordinary shares at period end is percentage difference between the two periods.

9 Net interest income has been re-presented in line with the RNS on Re-Presentation of Financial Information

Net interest income has been re-presented in line with the IASB's reclassification of financial information issued on 2 April 2025 to reflect the reclassification of funding cost mismatches to non NII.

Page 05

Group Chair's statement

2025 marked my first year as Chair of Standard Chartered, and I am acutely aware of the responsibility this entails. As I stepped into this role, I did so with a profound respect for my predecessor, José Viñals, who during his tenure, provided steady, principled leadership through a period of exceptional change for the global banking system and the Group.

Our strategy has never been clearer. We combine our differentiated cross-border capabilities and leading wealth management expertise to connect clients to growth opportunities across Asia, Africa and the Middle East. Across the business we are aligned to our strategic direction, having simplified our structure to ensure we meet the needs of our globally-minded clients, whether they are corporates, financial institutions, individuals or families. Our capital position and liquidity are robust, our risk discipline is well-embedded, and we have proven our renewed ability to generate sustainable returns, as evidenced by 2025 being the strongest year of financial performance since the financial crisis.

Those achievements form a solid foundation on which we now build. But as we move forward, we do so in the knowledge that the world is transforming. We must ensure our approach continues to reflect our environment, by evaluating and balancing the risks and opportunities presented by an ever changing landscape.

The friction and fracturing of our operating context

Our ability to remain agile and proactive is of paramount importance. This is what our clients seek when partnering with us, and it is what our people seek in working for Standard Chartered. We helped our clients navigate the shifting geopolitical and geoeconomic sands of 2025 to deliver a robust performance. And, while worldwide growth and business pragmatism have thus far prevailed, we remain acutely aware that ongoing disruption is altering both clients' needs and our consideration of risk.

Power continues to be projected less through formal institutions and established norms and more through economic leverage, technological capability and control of strategic resources. As such, the ability to sustain growth is increasingly determined by access - to capital, to data, to energy, to supply chains, and to reliable networks. While many factors are reshaping the global landscape, we must cut through the noise and identify those trends that are most relevant to our clients, markets and communities, and that play to our distinctive competitive advantages. Bill explains some of these trends in his review; I will highlight the following:

- First is the promise of technology, much of which is materialising in the form of enhanced productivity. Technological advancement has radically changed the industrial landscape and with it the business models, investment decisions and competitive strengths of both incumbents and new entrants alike. Many of the largest corporates today are themselves technology companies or otherwise heavily reliant on it as an enabler.
- Second, a broad digital transformation of finance, and the banking system in particular, is already underway. Adoption is accelerating, integration is deepening, and the boundary between financial services and technology continues to blur. Digital assets, tokenisation and the future of money are no longer theoretical. They are becoming embedded in real-world use cases - in trade, in payments and in capital markets - demanding both innovation and rigorous risk management from global banks.
- Third, and related to the first two factors, is the contest for strategic resources that underpin the adoption of AI and data-intensive technologies. This is driving unprecedented demand for data centres, reliable energy and critical minerals, further reshaping geopolitics, supply chains and investment priorities, and reinforcing the strategic value of resilience, access and partnership. It offers significant advantage to those markets that can responsibly capitalise on their natural resources. Such an endowment, if well-stewarded, can present significant opportunity for economic and social development, so we must endeavour to play a role that facilitates such outcomes.

Against this backdrop, global governance is in focus. Financial regulators are shifting from policy consultation and design towards implementation and enforcement - while still recognising their role in stimulating further economic growth. As regulatory convergence and coordination is sought, even if challenging to achieve, as a Group we must retain the ability to act decisively, particularly if we wish to capitalise on our leadership position in digital assets and in

our advocacy for a model of banking that is more transparent, secure and immediate.

In engaging in these trends, our conduct at Standard Chartered must be underpinned by trust, discipline and accountability, enabling clear decisions in complex markets. Good conduct provides certainty to clients, supports prudent risk-taking, and strengthens confidence across our markets, directly contributing to sustainable growth and long-term success globally.

Page 06

Group Chair's statement continued

Maintaining strategic discipline and focus

The Group Management Team, under Bill's leadership, continues to show that our distinctive strategy is effective, agile and resilient to the external environment. And the strong financial performance outlined in the financial review later in this report reflects our sharper focus and our improved discipline in execution. The role of the Board is to maintain this momentum and to translate our clear strategic intent into sustained outcomes.

The Board's confidence in management is grounded in consistent delivery, sound judgement and their understanding of the risks inherent in operating across our markets. The Board remains rigorous in its oversight, challenging assumptions and decisions and ensuring that performance is sustainable and within our risk appetite. This balance - between trust and scrutiny - is essential to good governance, particularly in a volatile global environment.

I believe resilience matters as much as ambition. A central priority for the Board will therefore remain safeguarding the Group's financial strength, risk discipline and regulatory standing, ensuring that the extraordinary growth opportunities we face are pursued with care and that trade-offs are made transparently.

Relevance - to clients and to society - will also be central to our approach. Standard Chartered operates in markets that are critical to global growth and development, and we play an important role in facilitating trade, investment and financial inclusion. Our commitment to sustainability and responsible finance is integral to our franchise and long-term value creation. This is not about pursuing objectives in isolation but about recognising that strong financial performance and positive social impact are mutually reinforcing when approached with discipline and integrity.

Such an approach is deeply valued by our clients, and it is often cited as their reason for both choosing and remaining with us. And, over the last year in particular, this has been highlighted as an example of true differentiation from our global peers.

Culture as a strategic asset

In a global institution spanning diverse markets and regulatory regimes, culture is not an abstract concept; it is a strategic asset. As Chair, I experienced this firsthand during market visits in 2025 to Malaysia, Hong Kong, Singapore, the UAE, Mainland China, and the US. While our footprint is diverse it is our inclusive, collaborative, client-centric culture that sets us apart from our peers and serves as a valuable anchor of continuity.

Standard Chartered's valued behaviours - do the right thing, never settle and better together - are central to how we manage risk, serve clients and build trust. The Board will continue to focus on how these behaviours are reinforced through leadership, incentives and everyday decision-making, and on ensuring that the tone from the top is consistently reflected throughout the organisation.

In fulfilling its responsibilities, the Board must maintain a balance and diversity of perspectives, skills and experience and remain engaged, informed and forward-looking in its oversight. During the year, Phil Rivett succeeded me as Senior Independent Director when I took the role of Chair in May. Phil also became Chair of the Board Risk Committee in August, with Jackie Hunt taking over as Chair of the Audit Committee in September.

Pete Burrill was appointed as interim Group Chief Financial Officer in February, succeeding Diego De Giorgi, who stepped down as Executive Director and GCFO. The Board thanks Diego for his contribution and wishes him well for the future.

The Board, as part of its core governance mandate, continues to focus on long term succession planning for the Board and its Committees and provides oversight of detailed executive and senior management succession plans, ensuring the Group remains well positioned to deliver the strategy and long term objectives.

Looking ahead with confidence

As Chair, I intend to act as a steward of this remarkable institution - to preserve its strengths, to support its continued improvement, and to help ensure that Standard Chartered remains relevant and trusted for the long term.

Reflecting the Board's confidence in the Group's future prospects, we are pleased to recommend an increased full-year dividend of 61 cents per share (a 65 per cent increase) and are announcing a further share buyback of 1.5 billion, in addition to the 2.8 billion already announced over the course of 2025.

I would like to thank our clients for their trust, our colleagues for their extraordinary commitment, and our shareholders for their continued support. Together, we are building a stronger, more resilient and even more distinctive Standard Chartered - one that will continue to deliver sustainable performance and value creation in the years ahead.

Maria Ramos

Group Chair, Standard Chartered PLC

24 February 2026

Page 07

Group Chief Executive's statement

Our performance in recent years has been strong in both absolute terms and relative to many of our peers. This is reflected in key metrics such as the value of our client franchise, financial results, and share price.

We have taken advantage of a generally supportive business environment. Shifts in trade and investment driven by geopolitical changes have worked in our favour, and growth remains strong in our key markets.

We built additional momentum in 2025, leveraging our distinct competitive advantages, and intend to capitalise on this in the years to come, having exceeded our 13 per cent Return on Tangible Equity (RoTE) milestone a year earlier than guided.

Navigating a period of extraordinary change

We recognise that short-term results alone are not sufficient in banking; lasting success comes from building long-term resilience - for our clients, our communities and our own organisation. Sustainable performance comes from adapting to structural change and turning that into distinctive client value.

We continually assess the structural shifts shaping the future of finance - some of which I explore below - and refine our strategic response to ensure that our current momentum translates into long-term value. The strengths that have fuelled our recent progress will continue to support our success and adaptability as a financial services company, even as markets evolve.

1. The emergence of a multipolar and multi aligned world

The global marketplace is rapidly changing, with growth, capital and innovation more widely distributed and geopolitical alignment more fluid. As alliances form around specific trade, security and investment priorities, this creates new opportunities but also increased complexity in financing, supply chains, procurement, and logistics for clients operating internationally.

- We help our clients navigate change by using our strong local presence across Asia, Africa and the Middle East to facilitate secure and compliant trade, investment and wealth flows.
- Our investment over decades to develop these capabilities gives us a structural competitive advantage.
- In relation to China, for example - which is neither converging with other financial systems nor isolating itself, but developing its own capital markets, payment rails and international linkages - we have built a leading RMB franchise in many of the markets in which we operate.

2. Digital transformation and evolving client expectations

Money is becoming digital, programmable and increasingly interoperable across systems.

Distributed ledger technology, tokenisation and new settlement models are already reshaping payments, securities issuance and settlement, custody and liquidity management. These changes raise fundamental questions about where trust and value will ultimately reside. History suggests that financial innovation does not eliminate clients' need for banks; it changes the form that banking takes.

- We have built market-leading digital asset capabilities, supporting clients across trading, custody, settlement and tokenisation in a compliant and scalable way.
- Our approach is pragmatic, applying distributed ledger technology where it solves real problems - particularly in cross-border payments, liquidity management and market infrastructure - rather than pursuing novelty for its own sake.
- We are modernising our financial plumbing while preserving the trust on which the system depends, partnering where necessary with those that share this vision.

Digital-first banking models have reshaped client expectations across all segments, with clients increasingly prioritising convenience and consistency over physical interaction. Such models are cheaper to run and easier to scale, raising industry benchmarks for simplicity and speed.

- Through our uniquely diversified digital banking portfolio across our markets, we serve distinct customer segments while enhancing offerings in our core businesses. These experiences have improved customer satisfaction and productivity across our Wealth & Retail Banking (WRB) business.
- We are equally committed to advancing digital engagement with our Corporate & Investment Banking (CIB) clients, investing in new platforms, portals and digital channels, making it easier for them to access services, manage transactions and engage with us securely and efficiently.

Page 08

Group Chief Executive's statement continued

3. The changing role of banks in serving the real economy

Banks are increasingly acting as service providers, credit originators and intermediaries, connecting borrowers and investors rather than holding risk alone.

The post-financial crisis capital rules strengthened the system but made bank capital more expensive for some activities and changed the critical role of banks in serving the real economy. The role of non-bank financial institutions in the provision of credit, pricing and liquidity, significantly outpacing that of banks. This is not cyclical - it reflects a lasting reallocation of risk and capital that comes along with banks having governments as lenders of last resort.

- These trends play directly to our strengths. We provide value to borrowers and investors through credit origination, warehousing, structuring and distribution, rather than balance-sheet accumulation alone.
- This is driving greater demand for cross-border hedging and liquidity solutions, which we capture as valuable 'flow' business in our Global Markets franchise.
- Our experience across our unique geographic footprint allows us to originate assets in markets, sectors and corridors where others cannot. That origination capability sits at the intersection of our corporate, institutional and wealth businesses, allowing us to connect borrowers, sponsors and investors in ways that are difficult to replicate.

4. Rising wealth participation is reshaping capital markets

Affluent individuals and corporates are moving beyond deposits into equities, bonds and funds, while governments and regulators promote infrastructure and private sector growth. Capital markets across our footprint are transforming rapidly. Economies that once relied on bank lending and physical assets are shifting towards more accessible and sophisticated financial systems. This is not cyclical yield-chasing, but a structural change in how wealth is built, preserved and transferred.

Technology is an accelerator, enabling broader participation and making capital markets integral to everyday economic life - unlocking new channels for savings, generational wealth transfer, investment and risk management.

- As capital markets expand, our ability to provide trusted advice and innovative solutions becomes a critical differentiator, ensuring we capture growth while helping clients navigate complexity.
- Wealth continues to grow rapidly across our footprint with the largest opportunities concentrated in our top markets, and this expansion is becoming increasingly international. Our affluent business is both large and high returning, driven by clients' growing need to manage and grow their assets, and by our position as a top wealth manager in Asia.

We differentiate ourselves by combining deep local market capabilities with global wealth and capital markets products and services, allowing our clients to improve returns and funding costs.

5. The transition economy and sustainable finance

The global transition to a lower-carbon economy will significantly affect capital allocation for decades. But, as we saw in 2025, it will not follow a straight path. What has changed is the pace and pattern of the transition itself - more urgent because of accelerating climate impacts, more volatile because of geopolitical and energy market shocks, and more centred on emerging markets where capital is scarcest and where credible transition pathways, not just green solutions, are now essential.

Asia, Africa and the Middle East will account for most of the future global population growth, energy demand and infrastructure investment. For these regions, the challenge is not whether to grow, but how to grow - balancing development, affordability and sustainability.

- We have built one of the leading sustainable finance franchises across our footprint, precisely because we operate where the transition is most dynamic and most consequential.
- Our role extends beyond financing renewable energy to supporting modernised grids, electrified transport, emerging industries, sustainable trade and adaptation - often in markets where capital is scarce and risk is misunderstood.

Sustainable finance, in this context, is not an overlay. It is a growth opportunity and core capability that combines local knowledge, cross-border capabilities, structuring expertise and long-term client relationships.

Taking the trends above together, they reinforce the logic of our strategy. We focus on areas where cross-border connectivity matters, where clients value insight, access and trust. When we describe Standard Chartered as a super-connector, we mean something specific. We sit at the centre of the world's most important trade and capital corridors and help clients move money, manage risk, exchange ideas and deploy capital across borders that others cannot serve effectively.

Group Chief Executive's statement continued

[Further progress executing our distinctive strategy](#)

Our robust performance in 2025 reflected the disciplined execution of our strategy to maximise our areas of strongest competitive advantage:

- Serving our international corporate, institutional and individual clients with our differentiated **cross-border** products and services.
- Helping our **affluent** customers manage their wealth in our markets across Asia, Africa and the Middle East.

We specialise in providing creative solutions to complex issues for these sophisticated and internationally oriented clients. As Pete, our interim Group Chief Financial Officer, will explain in more detail, we made good progress in both respects in 2025. I would like to take this opportunity to thank Diego for his valuable contribution during his tenure. Pete brings extensive sectoral experience and provides valuable continuity to the leadership of our finance function.

Our distinctive model relies on the quality and resilience of our people. Our achievements in 2025 are a direct result of their extraordinary commitment and ingenuity, and I want to thank them for their dedication and for embracing the challenges and opportunities of a rapidly changing world. I am most proud that people who are the best at what they do choose to work at Standard Chartered, bringing their expertise and insights to help us deliver an increasingly distinctive client proposition. As we strive for excellence and deepen our role as a super-connector, it is the collective spirit and drive of our people that will define our next chapter.

Our ongoing focus on serving our clients in the most productive way - through continuous transformation of our technology, adoption of advanced data skills (including AI), simplification of our processes, and disciplined expense management - has served us well. Initiatives such as Fit for Growth and other ongoing transformation programmes are enabling us to grow income at a faster rate than expenses while simultaneously enhancing the resilience of our functions. Our transformation is not limited to operational improvements; it is also underpinning a profound cultural shift. We are building a bank that is agile, seamless and truly client-centric, where collaboration and innovation are not just aspirations but embedded in our daily practice.

just aspirations but embedded in our daily practice.

[Continuity of strategy under our new Chair](#)

This year marks an important transition in our leadership, as Maria Ramos succeeded José Vínals as Chair. We are grateful to José for his steady guidance and commitment, which have been instrumental in steering the bank through a dynamic period. Maria's appointment brings both continuity and fresh perspective; she is exceptionally well placed to guide us through the next chapter. For further detail on her vision and priorities, I encourage you to read Maria's statement, where she sets out her objectives.

[Looking ahead: this is \(still\) our time](#)

This year, we and our clients confronted a global economy and international system at what felt like an inflection point. Trends previously considered medium-term have accelerated. Trust and incrementalism - a belief that tomorrow will be a slightly modified version of today - have given way to a more substantial re-think. In response, markets and key actors are re-wiring their financial systems' connectivity, security alliances, trading routes and infrastructure, and technological dependencies.

Our unique business model with its trusted network of deeply-rooted local franchises has always thrived in febrile environments, and we expect the prevailing conditions to continue for the foreseeable future. Our strategy is designed to enable us to endure change, to support clients as the world becomes more complex and as their own needs evolve, and to ensure that we remain relevant, resilient and trusted over the long term. We allocate capital, talent and technology accordingly - and we are equally deliberate about what we choose not to do.

We remain committed to sharing our success with our shareholders and will continue to actively manage our capital position with this objective in mind. We are therefore announcing a further share buyback programme of 1.5 billion, to commence imminently.

This bank has been transformed in the last ten years, from a traditional, broad-based commercial bank into a focused, structurally more profitable, and distinctly positioned international institution. But what got us here will not get us to where we want to be over the next decade. We will explain more about our plans at our capital markets event in May of this year, where we will describe our next phase of growth and the expected financial effects of our plans.

Bill Winters

Group Chief Executive

24 February 2026

Group Chief Financial Officer's review

We delivered strong performance in 2025 reflecting sustained successful execution of our cross-border and affluent banking strategy which helped our clients navigate an uncertain external environment. The continued strategic focus on areas of our distinctive competitive advantage helped us deliver an underlying return on tangible equity of 14.7 per cent in 2025, surpassing our 13 per cent underlying return on tangible equity target a year earlier than planned.

[Summary of financial performance](#)

All commentary that follows is on an underlying basis and comparisons are made to the equivalent period in 2024 on a constant currency basis, unless otherwise stated. 2024 included items totalling 295 million (2025: 1 million loss) relating to gains on revaluation of FX positions in Egypt and a hyperinflationary accounting adjustment in Ghana (the notable items).

Our operating income grew by 6 per cent to 20.9 billion or 8 per cent excluding the notable items, driven by record performance in Wealth Solutions and Global Markets and strong double-digit growth in Global Banking. Operating expenses grew by 4 per cent, disciplined cost management enabled us to generate positive income-to-cost jaws of 2 per cent, or 4 per cent excluding the impact of notable items. Credit impairment charges were 676 million, equivalent to

an annualised loan-loss rate of 19 basis points, with asset quality remaining resilient in the face of a volatile global environment. Underlying profit before tax of 7.9 billion was up 18 per cent, and underlying earnings per share of 229.7 cents, increased 37 per cent benefitting from a reduction in share count as well as the increase in profitability.

The Group remains well capitalised and highly liquid with a strong and diverse deposit base. The liquidity coverage ratio of 155 per cent reflects disciplined asset and liability management. The Common Equity Tier 1 (CET1) ratio of 14.1 per cent is above the Group's target range of 13 per cent to 14 per cent, enabling the Board to announce a further 1.5 billion share buyback programme to commence imminently.

Net interest income (NII) of 11.2 billion was up 1 per cent, as the benefit from higher volumes and improved balance sheet mix was partly offset by the impact of lower interest rates leading to margin compression, albeit pass-through rates remain robustly managed.

Non NII of 9.7 billion increased 13 per cent or 17 per cent excluding the notable items. This was driven by record performance in Wealth Solutions from continued momentum in new clients onboarding and growth in net new money, strong performance in Global Banking from higher origination and distribution volumes and robust growth in Global Markets from client flow income. Ventures realised a 238 million gain from the Solv India transaction.

Operating expenses of 12.3 billion increased 4 per cent. This was largely driven by continued investments into business growth initiatives, including strategic hiring of Relationship Managers in Wealth & Retail Banking (WRB) and coverage bankers in Corporate & Investment Banking (CIB) and higher performance related compensation reflecting a combination of strong profitability, share price increases and a change in regulation which enabled the acceleration of deferred bonuses. This was partly offset by efficiency saves, primarily linked to the Fit for Growth programme. The cost-to-income ratio improved by 1 percentage point to 59 per cent.

Credit impairment charge of 676 million represents a loan loss rate of 19 basis points, in line with the prior year. WRB impairment of 595 million was down 28 million, reflecting portfolio optimisation actions. The 59 million charge in Ventures was down 14 million year-on-year as delinquency rates improved in Mox. CIB impairment was a net charge of 4 million, up 124 million from the non-repeat of prior year releases.

Other impairment of 42 million decreased by 546 million year-on-year primarily due to lower software asset write-offs.

Profit from associates and joint ventures was up 42 per cent to 71 million mainly reflecting higher profits at China Bohai Bank.

Restructuring, FFG, Debit Valuation Adjustment (DVA) and other items totalled 937 million (2024: 797 million). Restructuring of 320 million reflects the impact of actions to simplify technology platforms and business exits (2024: 285 million). Charges to structurally improve productivity through the Fit for Growth programme totalled 531 million (2024: 156 million). Movements in DVA were a negative 31 million (2024: negative 24 million) while Other Items were a 55 million charge (2024: 332 million).

Taxation was 1.9 billion on reported basis, with an underlying effective tax rate of 25.3 per cent down 5.3 per cent year-on-year reflecting a favourable change in the geographic mix of profits, reduced impact of deferred tax not recognised for UK losses and beneficial adjustments for prior period items.

Underlying RoTE increased by 300 basis points to 14.7 per cent reflecting increased profits, a lower underlying effective tax rate, and gains on SC Ventures equity investments recognised through fair value movements in other comprehensive income. Reported RoTE increased 220 basis points to 11.9 per cent from an 18 per cent increase in profit before tax and 6 per cent drop-in tax rate.

Underlying basic earnings per share (EPS) increased 61.6 cents or 37 per cent to 229.7 cents and reported EPS increased 54.1 cents or 38 per cent to 195.4 cents.

Group Chief Financial Officer's review continued

A final ordinary dividend per share of 49 cents has been proposed taking the full-year dividend to 61 cents per share, a 65 per cent increase year-on-year. The Group completed a 1.5 billion share buyback programme during the first half of the year and the 1.3 billion share buyback programme announced on 31 July 2025 was completed on 26 January

2026. The increased dividend, along with a new share buyback programme of 1.5 billion to be commenced imminently, takes the total shareholder distributions announced since the full-year 2023 results to 9.1 billion.

Guidance

In 2026, the Group's reporting will move from an underlying to a reported basis, and our 2026 guidance below is set on this basis:

- Reported operating income growth year-on-year to be around the bottom end of 5-7 per cent range at constant currency.
 - Within which, net interest income¹ expected to be broadly flat year-on-year at constant currency.
- Reported cost to be broadly flat in constant currency including the final year of Fit for Growth charges.
- Statutory RoTE to be greater than 12 per cent.

Pete Burrill

Interim Group Chief Financial Officer

24 February 2026

1 Net interest income is adjusted for trading book funding cost, treasury currency management activities, and financial guarantee fees on interest earning assets.

1 Products have been re-presented in line with the RNS on Re-Presentation of Financial Information issued on 2 April 2025 with no change in total income

2 Comparisons presented on the basis of the current period's transactional currency rate, ensuring like-for-like currency rates between the two periods

The operating income by product commentary that follows is on an underlying basis and comparisons are made to the equivalent period in 2024 on a constant currency basis, unless otherwise stated. 2024 included items totalling 295 million (2025: 1 million loss) relating to gains on revaluation of FX positions in Egypt and a hyperinflationary accounting adjustment in Ghana (the notable items).

Transaction Services income decreased 7 per cent as growth in Securities & Prime Services was more than offset by lower Payments & Liquidity and Trade & Working Capital income. Payments & Liquidity income decreased 10 per cent, driven by the impact of lower interest rates and margin compression, albeit passthrough rates continued to be tightly managed and there was strong growth in balances. Securities & Prime Services income grew 7 per cent due to higher fee from increase in custody balances. Trade & Working Capital income was down 1 per cent as growth in fees was offset by lower average volumes and margin compression.

Global Banking income increased 15 per cent as Lending & Financial Solutions grew 13 per cent from strong pipeline execution which led to higher origination and distribution volumes and increased carry income. Capital Market & Advisory income was up 26 per cent on the back of increased bond fees and Mergers & Acquisitions transactions.

Global Markets income increased 12 per cent driven by continued strong growth in flow income which grew 15 per cent primarily from Financial Institutions clients and increased Rates and Credit trading volumes. Episodic income grew 3 per cent from higher macro trading income.

Wealth Solutions income was up 24 per cent, driven by a 28 per cent increase in Investment Products income and 12 per cent increase in Bancassurance. This was driven by continued momentum in affluent new-to-bank onboarding, with 275,000 clients onboarded in 2025, and 52 billion of affluent net new money, equivalent to 14 per cent growth of assets under management.

Deposits & Mortgages income decreased 2 per cent. The benefit from higher deposit volumes and proactive pricing actions was more than offset by the impact of lower interest rates, while Mortgages income increased year-on-year supported by margin expansion from lower funding cost and higher volumes in a few select markets.

CCPL & Other Unsecured Lending income remained flat as an increase in margins was partly offset by lower volumes resulting from portfolio optimisation actions.

Ventures income more than doubled year-on-year. Digital Banks income was up 53 million driven by higher Deposit volumes and fee income as they continue to grow their customer base. SCV income was up 179 million mainly from a 238 million gain from the Solv India transaction.

Treasury & other performance improved by 183 million as the benefit in Treasury from the repricing of longer dated assets was partly offset by the non-repeat of the notable items.

Financial review continued

Profit before tax by client segment

1 Underlying profit before taxation has been re-presented in line with the RNS on Re-Presentation of Financial Information issued on 2 April 2025 to reflect the reallocation of Treasury income and certain costs across segments

2 Comparisons presented on the basis of the current period's transactional currency rate, ensuring like-for-like currency rates between the two periods

The client segment commentary that follows is on an underlying basis and comparisons are made to the equivalent period in 2024 on a constant currency basis, unless otherwise stated. 2024 included items totalling 295 million (2025: 1 million loss) relating to gains on revaluation of FX positions in Egypt and a hyperinflationary accounting adjustment in Ghana (the notable items).

Corporate & Investment Banking (CIB) profit before taxation increased 9 per cent. Income grew 4 per cent with a record performance in Global Markets and strong double-digit growth in Global Banking partly offset by lower Transaction Services. Expenses were 2 per cent higher, mainly from investments in business initiatives, while credit impairment was a net charge of 4 million compared to a 120 million net release in 2024. The other impairment decreased by 284 million year-on year due to non-repeat of software asset write-offs.

Wealth & Retail Banking (WRB) profit before taxation increased 14 per cent. Income grew by 6 per cent, driven by a record performance in Wealth Solutions. Expenses increased 5 per cent, mainly from increased investment spend on business initiatives including strategic hiring of relationship managers. The credit impairment charge of 595 million was down 28 million from portfolio optimisation actions across in unsecured lending portfolios. The other impairment charge decreased 108 million compared to 2024 due to non-repeat of software asset write-offs.

Ventures loss before tax decreased by 218 million to 167 million mainly from higher income of 232 million. Digital Banks income increased by 53 million driven by continued growth in customers and volumes. while SCV income increased by 179 million supported by a 238 million gain from the Solv India transaction. Expenses remained flat as costs were well controlled, while the 59 million credit impairment charge was down 14 million year-on-year as delinquency rates have improved in Mox.

Central & other items (C&O) loss before tax improved by 81 million year-on year. Treasury benefited from the repricing of longer dated assets; this was in part offset by the nonrepeat of the notable items. Other impairments were lower by 159 million reflecting non-repeat of prior year software asset write-offs.

Adjusted net interest income and margin

1 Variance is better/(worse), other than assets and liabilities which is increase/(decrease)

2 Adjusted net interest income has been re-presented in line with the RNS on Re-Presentation of Financial Information issued on 2 April 2025 to reflect the reclassification of funding cost mismatches to non NII. Adjusted net interest income is reported net interest income less trading book funding cost, Treasury currency management

activities, cash collateral and prime services

- 3 Change is the basis points (bps) difference between the two periods rather than the percentage change. Net interest margin has been re-presented due to the revision to Adjusted net interest income as outlined in footnote 2
- 4 Adjusted net interest income divided by average interest-earning assets, annualised

Page 15

Financial review continued

Adjusted net interest income was up 1 per cent compared to 2024 as the benefit from higher volumes and improved balance sheet mix was partly offset by the impact of lower rates and margins. Net interest margin was 3 basis points lower as the impact of falling rates and margin compression was partially offset by better asset and deposit mix.

Average interest-earning assets were up 2 per cent compared to 2024 driven by growth in Global Banking, Mortgages and Wealth Lending partially offset by reduction in Treasury assets and Trade and Working Capital. Gross yields decreased 69 basis points compared to the prior year due to the fall in benchmark interest rates. Average interest-bearing liabilities increased 8 per cent on the prior year from strong growth in customer accounts, primarily in WRB Term and CASA deposits. The rate paid on liabilities decreased 79 basis points compared with the average in the prior year, reflecting the impact of interest rate movements and improved liability mix.

1 FFG (Fit for Growth) charge previously reported within Restructuring has been re-presented as a separate item

2 Net loss on businesses disposed of/ held for sale 2024 includes 172 million primarily relating to recycling of FX translation losses from reserves into P&L on the sale of Zimbabwe, 26 million loss on sale of Angola, 19 million loss on Sierra Leone and 15 million loss on the Aviation business disposal

3 Other items include 100 million charge relating to Korea equity-linked securities (ELS) portfolio

The Group's reported performance is adjusted for profits or losses of a capital nature, amounts consequent to investment transactions driven by strategic intent, other infrequent and/ or exceptional transactions that are significant or material in the context of the Group's normal business earnings for the period and items which management and investors would ordinarily identify separately when assessing underlying performance period-by-period.

Restructuring charges of 320 million, reflect the impact of actions to transform the organisation to improve productivity, primarily additional redundancy charges, simplifying technology platforms and business exits.

During 2025 charges related to the Fit for Growth programme totalled 531 million. Movements in the Debit Valuation Adjustment (DVA) were a negative 31 million driven by the tightening of the Group's asset swap spreads.

Other items charge of 45 million reflect mainly a 113 million gains on the sale of property, charges booked for the participation in a compensation scheme recommended by the Korean Financial Supervisory Service and the settlement of a legal case relating to section 90A of the UK Financial Service Market Act.

1 Variance is increase/(decrease)comparing current reporting period to prior reporting periods

2 The Group excludes 8,474 million held with central banks (30 September 2025: 8,956 million, 30 June 2025: 14,239 million and 31 December 2024: 19,187 million) that has been confirmed as repayable at the point of stress. Advances exclude repurchase agreement and other similar secured lending of 8,243 million (30 September 2025: 6,162 million, 30 June 2025: 4,189 million and 31 December 2024: 9,660 million) and include loans and advances to customers held at fair value through profit or loss of 12,355 million (30 September 2025: 9,421 million, 30 June 2025: 8,119 million and 31 December 2024: 7,084 million). Deposits include customer accounts held at fair value through

profit or loss of 19,414 million (30 September 2025: 24,545 million, 30 June 2025: 24,958 million and 31 December 2024: 21,772 million)

The Group's balance sheet remains strong, liquid and well diversified:

Loans and advances (L&A) to customers increased 2 per cent, or 6 billion, to 287 billion as at 31 December 2025. Excluding a 7 billion increase from currency translation and the 14 billion reduction in Treasury and securities backed loans held to collect, the underlying growth was 13 billion or 5 per cent. The underlying growth is primarily driven by Global Banking in CIB and Wealth Lending and Mortgages in WRB.

Customer accounts of 530 billion increased by 66 billion or 14 per cent. Excluding a 8 billion increase from currency translation, customer accounts increased by 58 billion, or 12 per cent. This was primarily driven by a 31 billion increase in WRB term and CASA deposits from targeted campaigns and a focus on attracting new to bank affluent clients and net new money. There was also a 13 billion increase in Transaction Services from CASA inflows and a 7 billion increase in corporate term deposits from Treasury management activities. Deposit from banks increased by 21 per cent reflecting balance sheet management activities across a number of markets.

Other assets increased by 64 billion from 31 December 2024, with a 14 billion increase in cash and balances with central banks, a 22 billion increase in investment securities primarily debt securities, a 22 billion increase in non-financial assets mainly an increase in precious metals inventory and price, and a 18 billion increase in financial assets held at fair value through profit or loss. The increases were partly offset by a 16 billion reduction in derivative financial instruments.

Other liabilities decreased 1 per cent or 4 billion from 31 December 2024, with a 14 billion decrease in derivative balances partly offset by an increase of 4 billion in financial liabilities held at fair value through profit and loss and a 8 billion increase in debt securities in issue.

The advances-to-deposits ratio dropped around 2 percentage points year-on-year to 51.4 per cent. The point-in-time LCR of 155 per cent increased 17 percentage points year-on-year due to balance sheet growth and ongoing Treasury liquidity management actions. It remains well above the minimum regulatory requirement of 100 per cent.

Risk-weighted assets

1 Variance is increase/(decrease) comparing current reporting period to prior reporting periods

Financial review continued

Total risk-weighted assets (RWA) of 258 billion increased 11 billion or 4 per cent in comparison to 31 December 2024.

Credit risk RWA increased by 2.8 billion to 192.1 billion. This was driven by an increase of 6.4 billion in asset growth, quality and mix, a 1.0 billion increase in derivatives and a 3.9 billion increases from foreign currency translation. The increase was partly offset by a decrease of 7.4 billion from optimisation actions and 1.1 billion reduction from model changes.

Operational risk RWA increased by 5.7 billion to 35.2 billion driven by an increase in average income as measured over a rolling three-year time horizon. 2025 includes a 3.1 billion increases relating to average income for the years 2022 to 2024 and a 2.6 billion increase relating to the average income for the years 2023 to 2025 as the Group is now performing the annual operational risk RWA computation in the fourth quarter of the current year rather than the first quarter of the following year.

Market risk RWA increased by 2.4 billion to 30.7 billion driven mainly by increase in specific interest rate risk from

higher credit trading.

Capital base and ratios

	31.12.25 million	30.09.25 million	Change %	30.06.25 million	Change %	31.12.24 million	Change ¹ %

Leverage ratio (%) ²	4.7	4.6	8bps	4.7	(1)bps	4.8	(11)bps

1 Variance is increase/(decrease) comparing current reporting period to prior reporting periods

2 Change is percentage points difference between two points rather than percentage change

The Group's CET1 ratio of 14.1 per cent was 12 basis points lower year-on-year and is 3.9 percentage points above the Group's latest regulatory minimum requirement. The Group's Pillar 2A reduced in 2025 post a supervisory review resulting in a 22-basis points reduction in the Group's CET1 requirement.

There was 206 basis points of CET1 accretion from underlying profits, and a further 19 basis points uplift primarily from fair value gains on other comprehensive income, FX, software intangibles and regulatory capital adjustments. This was partly offset by 46 basis points drop from an increase in RWAs.

The Group completed the 1.5 billion share buyback programme announced with the full year 2024 results on 30th July 2025, purchasing 98.2 million shares. The Group subsequently announced a 1.3 billion share buyback programme on 31 July 2025 concurrently with the half year 2025 results, and as of 31 December 2025, the Group had spent 1.1 billion purchasing 53.1 million ordinary shares. Whilst the 1.3 billion share buyback was completed on 26 January 2026 purchasing 62.2 million shares, the entire 1.3 billion is deducted from CET1 in the reporting period. The 2025 share buybacks reduced the CET1 ratio by 113 basis points.

The Board has recommended a final dividend of 49 cents per share or 1,092 million resulting in a total 2025 ordinary dividend of 61 cents a share or 1.38 billion. This, combined with the payments due to AT1 and preference shareholders cost approximately 78 basis points.

The Board has announced a share buyback for up to a maximum consideration of 1.5 billion to further reduce the number of ordinary shares in issue by cancelling the repurchased shares. The terms of the buyback will be published, and the programme will start shortly and is expected to reduce the Group's CET1 ratio in the first quarter of 2026 by 58 basis points.

The Group's UK leverage ratio of 4.7 per cent remains significantly above its minimum requirement of 3.7 per cent.

CIB supports local and large corporations, governments, banks and investors with their transaction services, banking and financial markets' needs. We provide differentiated cross-border capabilities to over 17,000 clients in some of the world's fastest-growing economies and most active trade corridors.

Segment overview

Our strong and deep local presence enables us to co create bespoke financing solutions and connect our clients multilaterally to investors, suppliers, buyers and sellers. Our products and services enable our clients to move capital, manage risk and invest to create wealth. Our clients represent a large and important part of the economies we serve. CIB is at the heart of the Group's shared purpose to drive commerce and prosperity through our unique diversity

serve. CIB is at the heart of the Group's shared purpose to drive commerce and prosperity through our unique diversity.

We are also committed to promoting sustainable finance in our markets and channelling capital to where the impact will be greatest. We are delivering on our ambition to support sustainable economic growth, increasing support and funding for financial offerings that have a positive impact on our communities and environment.

Supplementary financial information continued

Business focus

- Deliver sustainable growth for clients by leveraging our unique network to facilitate trade, capital and investment flows across our footprint markets.
- Generate high-quality returns by improving income mix, growing capital-lite income, expanding our wallet share, and driving balance sheet velocity, while maintaining disciplined risk management.
- Be a digital-first and data-driven bank that delivers enhanced client experiences.
- Accelerate our sustainable finance offering to our clients through product innovation and enabling transition to a low-carbon future.

Progress

- Our underlying income performance was driven by our diversified product suite, expanded client solutions and optimised resource allocation by focusing on clients whose cross-border needs played directly to our strengths. Our cross-border income was 61.5 per cent of total CIB income with growth across strategic corridors.
- We increased the share of income from our financial institution income as a percentage of total CIB income, from 51 per cent in 2024 to 54 per cent in 2025. Client Digital Transaction Initiation stood at 72.1 per cent (2024: 68.3 per cent) largely in Cash, Trade and FX. Client experience remained at the centre of our digital transformation, with our Customer Satisfaction Score improving to 76.5 per cent (2024: 71.6 per cent).
- We have delivered 1.07 billion sustainable finance income, achieving our target of 1 billion income by 2025, and have mobilised 157 billion against our commitment to mobilise 300 billion of sustainable finance by 2030.

Performance highlights

- Underlying profit before tax of 5,875 million increased by 9 per cent at constant currency driven by higher income, and lower impairment charge partially offset by higher operating expenses.
- Underlying operating income of 12,394 million increased by 4 per cent at constant currency primarily driven by strong performance in Global Markets and Global Banking. Global Markets increased 12 per cent driven by continued strong growth in flow income (up 15 per cent) and growth in episodic income (3 per cent). Global Banking increased 15 per cent due to higher origination and distribution volumes from strong pipeline execution, coupled with increased Capital Markets activities. Transaction Services income decreased 7 per cent as growth in Securities & Prime Services was offset by lower Payments & Liquidity and Trade & Working Capital incomes.
- Underlying operating expenses were up by 2 per cent at constant currency largely due to strategic business investments and higher performance-related pay.
- Credit impairment was a net charge of 4 million as the gross impairments were offset by recoveries. Other impairment decreased by 284 million year-on-year due to non-repeat of software asset write-offs.
- RWAs of 175.9 billion were up 6.5 billion, mainly driven by higher operational and market RWA. Credit RWA increase from asset growth was offset by RWA optimisation actions.

WRB continues to build on strong momentum, reinforcing our position as a leading international wealth manager across Asia, Africa and the Middle East. Our trusted brand, deep local presence and expansive global network are our core differentiators. Clients choose us for our expertise, personalised solutions and stability, enabling us to capture strong structural tailwinds driving cross-border wealth flows

Segment overview

We serve individuals and small and medium businesses by directly addressing their international and wealth needs. We focus on the affluent spectrum, encompassing Private, Priority Private, Priority and Premium Banking clients, offering them a comprehensive product suite spanning: deposits, payments, financing, advisory, investments and bancassurance. In particular, our open architecture allows us to collaborate with partners to bring best-in-class and first-to-market wealth solutions to our clients.

In Personal Banking, we focus on engaging emerging affluent clients early in their wealth journey. By partnering with them as their first or primary wealth advisor, we grow with them as they progress along the affluent continuum, cultivating a strong pipeline of our future affluent clients.

For our small and medium business clients, we provide an integrated offering through the Small and Medium Enterprise (SME) segment that covers both their business operations and personal wealth needs. Many of these fast-growing companies particularly value our international network for their cross border needs.

WRB is closely integrated with the Group's other client segments. We support entrepreneurs from our Private Bank with one-stop solutions for their corporate banking needs, offer employee banking services to CIB clients and serve as a source of high-quality liquidity for the Group.

Business focus

- Lead in international wealth management - We will capitalise on our position as a leading international wealth manager, by capturing wealth flows across key global corridors, particularly for Global Chinese and Global Indian clients, in Asia, Africa and the Middle East. We will leverage our unique advantages: our client continuum, global network and deep expertise in wealth solutions.
- Deliver hyper-personalised, advisory-led wealth solutions - We will provide a differentiated client experience through hyper-personalised advisory-led propositions. This will be powered by a best-in-class open architecture solutions platform, enhanced by data and AI.
- Accelerate investment in our growth engines - To drive growth and market share, we will accelerate investment in our core enablers: our affluent frontline teams, our wealth and digital platforms, our client centres, and our brand and marketing initiatives.
- Serve entrepreneurial and SME owner clients - We will comprehensively serve SME business owners and international entrepreneurs whose personal and business finances are deeply interconnected. Our proposition for them will be anchored in integrated solutions for cash, trade, cross-border connectivity and wealth management.
- Continue reshaping our mass retail business - Building on our progress, we will continue to reshape our mass retail business. Our focus remains on building a strong pipeline of future affluent and international banking clients, while actively optimising low returning, single-product relationships and geographies.

Progress

- Ranked #3 wealth manager in Asia based on Asian Private Banker rankings for 2024¹. Affluent AUM stood at 447 billion as of 31 December 2025.
- Strong momentum in client growth with 275,000 NTB affluent clients and affluent NNM² reaching 52 billion, representing 14 per cent of AUM.
- Up-tiered 307,000 individual clients through our wealth continuum across and within the personal and affluent segments, by tailoring our propositions and service models to the needs of our clients.
- Continued to invest in the hiring of affluent relationship managers and wealth specialists, uplift digital capabilities and build new client centres; opened seven new client centres in 2025, taking the total to 18.
- Continued to digitise and enhance the wealth client journeys with new self-service capabilities, streamline processes, and build more comprehensive portfolio advisory capabilities for both clients and frontline teams.
- Launched three funds managed by SC Variable Capital Company and expanded our differentiated wealth solutions, such as our exclusive Signature Select and Signature CIO funds, with the combined AUM from Standard Chartered exclusive funds crossing 8 billion.
- Recognised for excellence in private banking, digital wealth and other capabilities, with 40 industry awards received

Formed in 2022, the Ventures client segment is a consolidation of SC Ventures and its related entities as well as the Group's two majority-owned digital banks - Mox in Hong Kong and Trust in Singapore.

Segment overview

SC Ventures builds and invests in breakthrough ventures, in and beyond banking. It provides a platform for organisations to drive innovation and transformation. The SC Ventures platform currently represents a diverse portfolio of almost 30 ventures and more than 30 investments.

Mox, a cloud-native, mobile-only digital bank, was launched in Hong Kong as a joint venture with HKT, PCCW and Trip.com in September 2020. It penetrated over 10 per cent of Hong Kong's total bankable population, and Mox Credit Card is ranked as the seventh-largest credit card portfolio among all Hong Kong retail banks¹.

Trust Bank is a digital retail bank, launched in Singapore in 2022 in partnership with FairPrice Group. It has over one million customers, making it the fourth largest retail bank in Singapore.

Business focus

- **SC Ventures'** focus is on building and scaling new business models across three high-conviction themes of Digital Banking & Lifestyle, Trade & Supply Chains and Digital Assets, enabled by AI, Web3/Blockchain, ESG and Quantum. We do this by connecting ecosystems, partners and clients to create value and new sources of revenues, providing optionality for the Bank. In addition, SC Ventures identifies partners, and makes minority investments in companies that provide technology capabilities, which can then be integrated into the Bank and Ventures.
- **Mox** aims to become a leading digital bank, focusing on cards, digital lending, deposits, wealth management and insurance. Mox plans to enhance its offering with a broader range of digital financial solutions to cater to customer needs in a competitive market.

1 According to TransUnion's Market Insights and Intelligence Dashboard (MID) for the period from January to December 2025.

Supplementary financial information continued

- **Trust Bank** aims to establish itself as one of the main retail banks in Singapore, and gain wallet share by capitalising on its market-leading customer experience. Key near-term priorities are to continue to innovate in core banking products including savings and lending, deepen engagement with existing customers and to broaden its wealth management proposition.

Progress

- In 2025, SC Ventures maintained positive momentum, further enhancing its business performance. It launched four new ventures, raised funds amid a challenging environment, and expanded its geographical reach. Across SC Ventures subsidiaries, the customer base grew by 57 per cent year-on-year to reach nearly 1.1 million.

SC Ventures completed the sale of Solv India to Jumbotail, one of India's leading B2B marketplaces. The combined business is now one of the largest B2B e-commerce platforms in India. As a result of the transaction, SC Ventures reported a gain of 0.2 billion in its second quarter 2025 results.

SC Ventures' portfolio of compliant and bank-grade digital asset platforms continues to prove our commitment to building infrastructure that will enable institutional adoption. During the year, Zodia Markets successfully raised 18.3 million¹ in a Series A funding round, in addition to significantly expanding its client base.

- In 2025, Mox continued its strong growth trajectory, achieving a robust 15 per cent year-on-year increase in customer base and reaching approximately 750,000 customers.

Mox continued to achieve strong performance, supported by an engaged customer base, delivering 21 per cent year on year growth in deposits. Unsecured loan balances grew 115 per cent year-on-year, benefitting from client acquisition and deepening, and including the impact of an acquisition of unsecured loans from Standard Chartered Hong Kong. Mox Card has been used in nearly 157 million transactions to date and has rewarded a total of 1.8 billion Asia Miles to date. By the first half of 2025, Mox's market share had reached 24 per cent (was ranked number 1) and 25 per cent (was ranked number 2) in lending and deposits respectively, among all Hong Kong digital banks.

Mox was recognised for its excellence by various global named agencies, such as the Top 100 Digital Banks and was rated number one in Hong Kong in Neobank Ranking 2025 by The Banker, Best Digital Bank in Hong Kong by the Asian Banker and Digital Bank of the Year - Hong Kong by Asian Banking and Finance.

Mox has established a strong connection with Hong Kong customers since its launch - the bank's app is currently the highest-rated digital banking app in Hong Kong, achieving a score of 4.8 out of 5 in the Apple App Store.

In 2025 Mox launched Mox Insure, offering personal accident and travel insurance products. Mox also expanded offerings such as personalised portfolio investment under its digital wealth platform, Mox Invest, creating a strong foundation for revenue diversification.

- Trust Bank continued its strong growth in 2025, with customer numbers up 15 per cent year-on-year reaching more than one million customers, taking its share of the adult population in Singapore beyond 20 per cent.

The bank delivered robust financial performance with credit card spend growing 39 per cent and unsecured loan balances rising 67 per cent year-on-year, driven by new capabilities introduced over the past year. The bank continued to strengthen the quality of its funding base, with about one-third of total balances coming from customers who credit their salary to their Trust savings account.

During 2025, Trust Bank was named Singapore's Best Digital Bank for Consumers by Euromoney and the top mobile banking app for a digital bank globally by The Digital Banker. The bank made strong progress on AI adoption, driving productivity gains and enhanced customer experience.

In Q1 2025, Trust Bank launched its digital wealth platform, TrustInvest, initially with a fund proposition. This was followed by a US stocks and ETFs trading platform in Q4 2025 and creates a strong foundation for revenue diversification.

Performance highlights

- Underlying loss before tax decreased by 218 million to 167 million, primarily driven by higher income. Income rose by 232 million to 415 million, driven primarily by a 238 million gain from the Solv India transaction.
- Operating expenses were flat as business growth was offset by Solv India deconsolidation and efficiencies related to staff, marketing and vendor costs.
- Credit impairment decreased by 14 million to 59 million, reflecting a reduction in delinquencies in Mox, driven by continuous improvement in both contractual and bankruptcy write-offs, partially offset by an increase in Trust in line with the growth in the asset book.
- Ventures equity investments recognised 269 million gains, net of tax, in the year, through fair value movements in other comprehensive income.

Group Chief Risk Officer's review

The Group's strong performance in 2025 is underpinned by our commitment to effective risk management and a strong track record of managing risks during periods of volatile macroeconomic and geopolitical conditions.

We proactively manage risk in a changing world.

Managing risk

2025 saw the emergence of a multipolar global economy, with recent geopolitical shocks, industrial policy, and protectionist measures accelerating fragmentation in trade, technology, and capital flows. Heightened trade tensions from US tariffs were a focal point during the year, and although this tapered in the second half, uncertainties remain. Constant fluctuations in policy changes and escalating conflicts led to increased economic uncertainty, market volatility and elevating refinancing risks across emerging markets, among other factors. Throughout the year, we maintained a proactive approach to risk management and remained anticipatory in addressing emerging risks. We monitored the business through our well-established risk frameworks and practices, such as stress tests and portfolio reviews, highlighting any potential concentrations to be acted upon. We conducted thorough assessments of trade linkages and identified vulnerable countries and sectors. Beyond trade tensions, we closely monitored secondary impacts and categorised country risks through our Country Risk Early Warning System. We strengthened our stress-testing capabilities by increasing the number of management stress tests conducted. The Group continues to monitor direct exposures to countries involved in conflicts and the resultant secondary effects. We also remain vigilant in managing risks from escalating conflicts by continuously monitoring sovereign risks and scanning for topical and emerging threats.

We are seeing an evolution in the exchange of value through new forms of digital money via decentralised systems using distributed ledger technology that offer an alternative to traditional payments. Financial institutions such as digital-native banks as well as corporates are increasingly looking to innovations such as stablecoins to take advantage of their potential benefits, which include faster settlement, programmability and more efficient cross-border payments.

Digital assets such as stablecoins bring about new risk vectors. As we increase our digital assets activity across the Group, we remain focused on understanding how these risks may materialise, and evolving our relevant risk frameworks accordingly, and in compliance with relevant legislative and regulatory regimes.

Banks are increasingly shifting from balance-sheet lenders to credit intermediaries as private credit expands, reflecting regulatory constraints and the growing role of non-bank capital. This evolution redistributes risks beyond the banking sector, requiring enhanced oversight and underscoring the value of disciplined credit underwriting.

Corporate & Investment Banking (CIB)

Corporate and Investment Banking (CIB) Our CIB credit portfolio remained resilient amid volatile market conditions, with overall good asset quality as evidenced by our largely investment-grade corporate portfolio (31 December 2025: 74 per cent; 31 December 2024: 74 per cent). In consideration of the macroeconomic challenges, we have been pre-emptive in assessing potential impacts of a potential trade war escalation by conducting extensive stress tests and portfolio reviews across vulnerable countries, sectors and clients. While the risk of re-escalation in global tariffs has moderated, we continue to update our assessments based on latest developments and take timely risk mitigating actions as appropriate. Outside tariffs, we remain vigilant in monitoring geopolitical risks, including conflicts in Ukraine and the Middle East, and various US policy risks, and their impact across geographies, commodity prices and clients, as well as sovereign risks across our global footprint. The Group's exposure to data centres and private credit is subject to defined portfolio limits, stringent underwriting standards, concentration sub-caps and regular portfolio reviews. We continued to de-risk in China and Hong Kong commercial real estate, and have limited exposures to US regional banks and insurance companies.

Our CIB Traded Risk increased during 2025, as evidenced by the higher average Value at Risk (VaR) (31 December 2025: trading 25.4 million and non-trading 47.0 million; 31 December 2024: trading 21.1 million and non-trading 34.2 million). The higher non-trading VaR was driven by market volatility combined with a VaR model enhancement to make the model more responsive to market volatility and larger US agency bonds inventory in the CIB non-trading portfolio. While elevated, the increased risk remained within risk appetite (RA) during the period. Stress tests were used extensively to detect any emerging issue in terms of Market Risk or Counterparty Credit Risk, with mitigating actions taken where required. There were no margin call issues with our collateralised counterparties, including hedge funds. Concentration Risk is monitored tightly and contained by limits. Velocity of assets in the trading book is enforced via tight ageing limits. We remain vigilant and are continuously enhancing our modelling and stress-testing capabilities in anticipation of further market volatility.

Group Chief Risk Officer's review continued

Wealth & Retail Banking (WRB)

The WRB credit portfolio continued to demonstrate resilience amid the economic uncertainties and geopolitical challenges. Portfolio management actions have continued to be dynamically adjusted in the last 18 months in response to the challenging and rapidly changing macroeconomic and operating conditions, with scenario testing being utilised to manage the uncertainties. As a result of credit portfolio actions taken, we are seeing signs of credit performance improvement. We remain focused on proactive risk management across credit origination, portfolio management and collections to manage the risks of a challenging and uncertain economic environment and associated market volatility on the WRB portfolios. We are also refining our portfolio strategy in our consumer unsecured lending and digital partnerships portfolios to selectively reduce exposure and to drive better profitability. Our end to end Credit Risk management actions are aligned for the successful execution of the pivot to the 'affluent' segment. While the WRB strategy leverages on the market-wide global growth in demand for wealth management services, an essential component of our competitiveness will be our risk management approach, which remains grounded in core principles and our long-held market expertise while also adapting to new risks presented by the dynamic global landscape.

Treasury Risk

Liquidity remained resilient across the Group and major legal entities (31 December 2025 liquidity coverage ratio (LCR): 155 per cent; 31 December 2024: 138 per cent) with a surplus to both RA and regulatory requirements. We are focused on proactively managing our capital, Interest Rate Risk in the Banking Book (IRRBB) and liquidity risks, including increasing our access to contingent funding sources as appropriate, and enhancing our framework for managing Treasury Risks in volatile market scenarios. The Group remains well capitalised with CET1 ratio at 14.1 per cent (31 December 2024: 14.2 per cent) while the Leverage ratio was 4.7 per cent (31 December 2024: 4.8 per cent).

Our risk management approach

[Our Enterprise Risk Management Framework \(ERMF\) sets out the principles and minimum requirements for risk management and governance across the Group.](#)

The ERMF is complemented by frameworks, policies and standards that are mainly aligned to the principal risk types (PRTs) and is embedded across the Group, including its branches and subsidiaries¹.

The ERMF enables the Group to manage enterprise-wide risks, with the objective of maximising risk-adjusted returns while remaining within our RA.

Principal risk types and risk appetite

PRTs are those risks that are inherent in our strategy and business model and have been formally defined in the Group's ERMF. These risks are managed through distinct risk type frameworks (RTFs) that are approved by the Group Chief Risk Officer (GCRO). The table below details the Group's current PRTs, definitions and our RA statements.

Principal risk types	Definition	Risk appetite statement
Credit Risk	Potential for loss due to failure of a counterparty to meet its agreed obligations to pay the Group.	The Group manages its credit exposures following the principle of diversification across products, geographies, client segments and industry sectors.
Traded Risk	Potential for market or counterparty credit risk losses resulting from activities undertaken by the Group in fair valued financial market instruments.	The Group should control its financial markets activities to ensure that market and counterparty credit risk losses do not cause material damage to the Group's franchise.
Treasury Risk	Potential for insufficient capital, liquidity, or funding to support our operations, the risk of reductions in earnings or value from movements in interest rates impacting banking book items and the potential for losses from a shortfall in the Group's pension plans.	The Group should maintain sufficient capital, liquidity and funding to support its operations, and an interest rate profile that ensures that the reductions in earnings or value from movements in interest rates impacting banking book items do not cause material damage to the Group's franchise. In addition, the Group should ensure that its pension plans are adequately funded.
Operational and Technology Risk	Potential for loss resulting from inadequate or failed internal processes, technology events, human error, or from the impact of external events (including legal risks).	The Group aims to mitigate and control Operational and Technology risks, to seek to ensure that events, including any related to conduct of business matters, do not cause the Group material harm as a result of business disruption, financial loss or reputational damage.
Information and Cyber Security (ICS) Risk	Risk to the Group's assets, operations, and individuals due to the potential for unauthorised access, use, disclosure	The Group aims to mitigate and control ICS risks to ensure that incidents do not cause the Group material harm, business disruption, financial loss or

Principal risk types	Definition	Risk appetite statement
	unauthorised access, use, disclosure, disruption, modification, or destruction of information assets and/or information systems.	material harm, business disruption, financial loss or reputational damage, recognising that while incidents are unwanted, they cannot be entirely avoided.

Group Chief Risk Officer's review continued

Principal risk types	Definition	Risk appetite statement
Financial Crime Risk ²	Potential for legal or regulatory penalties, material financial loss or reputational damage resulting from the failure to comply with applicable laws and regulations relating to international sanctions, anti-money laundering and anti-bribery and corruption, and fraud.	The Group has no appetite for breaches of laws and regulations related to financial crime, recognising that while incidents are unwanted, they cannot be entirely avoided.
Compliance Risk	Potential for penalties or loss to the Group or for an adverse impact to our clients or stakeholders or to the integrity of the markets we operate in through a failure on our part to comply with laws, or regulations.	The Group has no appetite for breaches of laws and regulations related to regulatory non-compliance, recognising that while incidents are unwanted, they cannot be entirely avoided.
Environmental, Social and Governance and Reputational (ESGR) Risk	Potential or actual adverse impact on the environment and/or society, the Group's financial performance, operations, or the Group's name, brand or standing, arising from environmental, social or governance factors, or as a result of the Group's actual or perceived actions or inactions.	The Group aims to measure and manage financial and non-financial risks arising from climate change, reduce emissions in line with our net zero strategy and protect the Group from material reputational damage by upholding responsible conduct and striving to do no significant environmental and social harm.
Model Risk	Potential loss that may occur because of decisions or the risk of misestimation that could be principally based on the output of models, due to errors in the development, implementation, or use of such models.	The Group has no appetite for material adverse implications arising from misuse of models or errors in the development or implementation of models, while accepting some model uncertainty.

1 The Group's ERMF and system of internal control applies only to wholly controlled subsidiaries of the Group, and not to associates, joint ventures or structured entities of the Group.

2 Fraud forms part of the Financial Crime RA Statement but, in line with market practice, does not apply a zero-tolerance approach.

Topical and Emerging Risks

[Topical Risks](#) refer to themes that may have emerged but are still evolving rapidly and unpredictably. [Emerging Risks](#) refer to unpredictable and uncontrollable outcomes from certain events that may have the potential to adversely impact our business.

As part of our risk identification process, we have updated our Topical and Emerging Risks (TERs) from those disclosed in the 2025 Half Year Report. Below is a summary of the TERs, and the actions we are taking to mitigate them based on our current knowledge and assumptions.

The list of TERs is not exhaustive and there may be additional risks that could have an adverse effect on the Group. Our mitigation approach for these risks may not eliminate them but demonstrates our awareness and attempts to mitigate or manage their impact.

[Macroeconomic and geopolitical considerations](#)

There is a complex interconnectedness between risks due to the direct influence of geopolitics on macroeconomics, as well as the global or concentrated nature of key supply chains. A more complex, differently integrated and generally more volatile global landscape could challenge cross-border business models but also provide new business opportunities.

The Group is exposed to these risks directly through investments, infrastructure and employees, and also indirectly through its clients. While the primary impact is financial, there may be other ramifications such as reputational, compliance or operational considerations.

Expanding array of global tensions and transition of the international order

The global geopolitical landscape has shifted from a rules-based international order to a system driven by relative power dynamics. Fluid political and economic alliances are evolving, with the landscape further complicated by ongoing

power dynamics. Fluid political and economic alliances are evolving, with the landscape further complicated by ongoing conflicts, e.g., in Ukraine and the Middle East.

In the near term, geopolitical fragmentation is also hampering collaboration on key global challenges. The erosion of international rules and the organisations that underpin them could undermine coordination efforts on structural global issues, such as climate risk mitigation, or ad hoc emergencies. The dismantling of some international development organisations may also impact future cooperation efforts, including on combatting the potential spread of future pandemics. These trends are prompting reform at multinational institutions, albeit the pace is slow.

National interests are returning more visibly, with national security or prosperity goals re-shaping engagement within and between countries. Domestic political volatility is increasing across numerous markets. Internationally, alliances are reorganising. Importantly, the US's use of tariffs to achieve both economic and political goals, rollbacks of policy in areas such as Environmental, Social, and Governance (ESG), and direct interventions in global conflicts have all changed the macroeconomic and geopolitical landscape. Some of these actions have caused fractures between the US and traditional allies, leaving many long-standing bilateral relationships in a state of flux.

Page 38

Group Chief Risk Officer's review continued

The positioning of 'middle powers' is complex and evolving, with a rise in 'mini-lateral' groups of countries that are ideologically or geographically aligned. The negotiating power of these alliances is strengthened where they are in strategic areas or involve the control of key resources.

The Group may be impacted by direct exposure to countries engaged in conflicts, as well as by second-order effects on its clients and markets such as agricultural commodities, oil and gas. The sanctions landscape is also becoming increasingly complex, with potential divergence across regimes requiring heightened awareness in running a compliant, global operation.

The malicious use of AI-enabled disinformation could further undermine trust in the political process. Terrorism and cyber warfare are also ongoing threats, with unpredictability exacerbated by the wider range of ideologies at play and enhanced capabilities to disrupt infrastructure in rival countries.

Macroeconomic uncertainty including potential price bubbles

While many tariff deals have been struck between the US and the rest of the world, the average global tariff level has increased significantly relative to a year ago. The potential for change remains, with the US administration applying additional tariffs in response to non-economic issues or to achieve leverage in other areas.

Despite this, global trade has broadly readjusted and financial markets have not been adversely impacted. The relative alignment between the US and China is a major factor. However, dislocation risks persist, and headwinds are brewing in export-reliant locations such as South East Asia. Friction has also been seen around the export of rare earth metals from China. Potential uncertainty has driven a 'debasement trade' shift to hard assets, with the price of gold increasing by 65 per cent in 2025.

Although the interest rate cut cycle has begun, the short-term trajectory remains uncertain. Tariffs, supply chain disruption, strong labour markets and higher deficits could be inflationary, leading to higher rates. In contrast, aggressive cuts could further fuel inflation. Developed markets have diminished fiscal flexibility to react due to their high debt levels and social burdens. There are growing concerns in Europe, where fiscal weakness in France and government instability in Germany threaten to undermine the European Union's strongest members and the integrity of the bloc. Volatile interest rates could also impact the Group's net interest income outlook.

The global landscape remains challenging for businesses, with structural spending still a risk while volatility remains. As other cost pressures such as the ESG transition or keeping up with technological advances build, companies may start to feel a squeeze, especially if interest rates do not fall as rapidly as expected.

Tariff volatility, policy unpredictability and uncertainty over the continued independence of the Fed could impact investor perceptions of risk-free assets across global markets, and encourage a gradual and steady diversification. In an extreme case, the rest of the world could reduce trade with the US, which could result in further weakening of the US dollar, challenging its status as the global reserve currency, or risk premia on traditionally risk-free assets such as US Treasuries. However, these are unlikely to materialise in the short term.

One potential headwind for global markets could be a downturn caused by the bursting of the perceived AI bubble, with valuations of key players and significant investment from private credit players in the sector drawing some concern. A correction would have implications to the broader economy, with sectors such as energy, construction and commercial real estate all highly dependent on AI infrastructure growth, particularly data centres. Conversely, the AI race is fueling growth in demand for semiconductor chips, whose availability and price are becoming a concern. Concentration risk in sectors with an AI or semiconductor nexus needs to be monitored.

The private credit sector is also under greater scrutiny, with concerns over default rates and increasing connectedness

The private credit sector is also under greater scrutiny, with concerns over default rates and increasing interconnectedness with traditional banks and the insurance industry. Lack of regulation or transparency, and lower underwriting standards all heighten inherent risks and make the segment more susceptible to downturns and other threats such as fraud.

While idiosyncratic risks remain, emerging markets are generally seeing improved sentiment as debt restructurings have progressed and acute sovereign default risks have receded in certain presence markets. Multilateral support mechanisms, alongside bilateral funding, have helped to shore up external positions in several emerging markets. Trends such as de-dollarisation and disintermediation through alternative payment channels may have a larger impact in emerging markets, and how credit risk is managed in such centres.

Supply chain issues and key material shortages

Geopolitical volatility, shifts towards protectionism, and ongoing conflicts have complicated the operation of global supply chains. Countries are 'de-risking' through diversifying their supply chains. This includes tactics such as reducing reliance on rivals or concentrated suppliers, looking to either re-industrialise or make use of near-shoring and friend-shoring production, and forming entirely new relationships.

The growing need for minerals and rare earth elements to power future technologies can be leveraged to achieve economic or political aims by restricting access. This can bolster the negotiating influence of refiners and producers such as China, Indonesia and some African markets.

However, AI applications could provide additional supply chain robustness, as inefficiencies are reduced by predictive analytics around supply and demand, weather patterns and maintenance requirements.

[How these risks are mitigated](#)

- We conduct portfolio reviews and stress tests at Group, country, business and asset class level, with regular reviews of vulnerable sectors.
- We have a structural hedging programme to mitigate the impact of volatile interest rates.
- We run daily market risk stress scenarios to assess the impact of unlikely but plausible market shocks.

Page 39

Group Chief Risk Officer's review continued

- We run a suite of management scenarios with differing severities to assess their impact on key RA metrics.
- We have a dedicated country risk team that closely monitors sovereign risk.
- We maintain a diversified portfolio across products and geographies, with specific RA metrics to monitor concentrations.
- Increased scrutiny is applied when onboarding clients in sensitive industries and ensuring compliance with sanctions.
- We maintain underwriting principles for specialised product and industry segments, detailing transaction-level origination standards and sub-segment caps supported by regular portfolio reviews.
- We regularly review our supply chains and third-party arrangements to improve operational resilience.
- We actively review and test our crisis management and business continuity plans.

[ESG considerations](#)

Evolving ESG dynamics

Stakeholder scrutiny on ESG commitments and practices continues. Regulators are implementing standards, reporting requirements and timelines that can vary significantly, leading to further complexity in ensuring compliance across different jurisdictions.

Greenwashing risk remains heightened, with both regulator and non-governmental organisation scrutiny on market integrity. The Group maintains its external commitments to achieve net zero targets and mobilise sustainable financing amid shifting global attitudes.

Economic pressures and geopolitical tensions such as increased tariffs may push companies to consider deprioritising their climate transition. In addition, the cost of managing the climate impacts from more frequent extreme weather events is increasing, with the burden disproportionately borne by developing markets, which in turn lowers their ability to invest in transition infrastructure.

Frontier technologies such as quantum computing and AI may also come with substantial energy and water demands. These need to be understood, particularly the impact on companies' ability to deliver against sustainability targets.

Environmental risks such as loss of biodiversity pose incremental challenges to food, health systems and energy security. Modern slavery and human rights concerns are increasingly in focus, expanding beyond direct operations to extended supply chains.

How these risks are mitigated

- Climate Risk considerations are embedded across relevant principal risk types. We perform client-level Climate Risk assessments and set adequate mitigants or controls where relevant.
- We have delivered on our commitment to be net zero in our own operations (Scope 1 and 2 emissions) by the end of 2025 and intend to maintain this going forward.
- We embed our values through our Position Statements and a list of prohibited activities. We also maintain ESGR standards to identify, assess and manage risks when providing services to clients.
- Management of greenwashing risks is integrated into our ESGR RTF, ESGR policies, Sustainable Finance Frameworks, and relevant product and marketing standards.
- Detailed portfolio reviews and stress tests are conducted to assess the resilience of our clients and operations to climate-related physical and transition risks.
- Suppliers¹ that are identified as presenting higher risks of modern slavery are subject to a risk assessment.

New business structures, channels and competition

Competitive disruption

Sources of disruption and disintermediation to traditional finance are increasing, with more established fintech and private credit sectors being joined by increasing use cases for digital assets. Stablecoins could provide alternative payment and deposit channels, with adoption expected to be most prevalent in emerging markets where local currencies are highly volatile. This could lead to deposit outflows from traditional banking products.

While there is increasing regulatory scrutiny on alternative financing providers, such as the Bank of England's proposed stress test for the private credit market, there is still a governance gap that could put banks at a competitive disadvantage.

Financiers that can harness technology can rapidly improve their market share, as the concept of a hyper-personalised 'segment of one' is increasing in prominence, and may change marketing, client service and distribution channels.

The proactive management of the impact of AI and more nascent technologies such as quantum computing may lead to sunk costs into projects that are ultimately not required or do not become part of daily operations.

1 By suppliers we are referring to external third parties (vendors) that have a commercial arrangement with the Group for the provision of goods and/or services. Examples of suppliers include landlords, management consultants, and IT service providers.

Group Chief Risk Officer's review continued

Rapid adoption of AI

The expansion of AI capabilities is increasingly pervasive and pivotal to business operations across industries.

Traditional finance faces adoption challenges in complying with existing regulation and governance standards. Cost pressures and lack of key skills in the industry could hamper a swift transition.

The increased use of partnerships with specialist tech providers is operationally efficient, although it increases third-party and model risks and requires enhanced due diligence to ensure secure adoption.

The integration of more sophisticated insights utilising big data and AI could enhance the services offered to clients. However, if such capabilities are widely available it may impact banks' ability to differentiate. AI also has implications on broader considerations such as the ethical use of data and protecting privacy and security, and the increase in 'shadow AI' or the use of unauthorised AI channels or tools.

There has been a large increase in the use of AI in fraud, scams and spreading misinformation. AI powered deepfakes and autonomously generated malware are changing the nature of cyber threats, in particular increasing the speed of attack. However, the availability and maturity of security and controls continues to lag development of the technology.

itself.

There are also potential societal and economic impacts from replacement of jobs, which may be concentrated in some sub-sectors and disproportionately impact junior positions and youth entering the workforce. Leveraging the benefits of augmented AI while managing these risks will be a core part of the Group's business model.

Cyber, data and operational resilience

An expanding digital footprint and integration of smarter AI systems increases inherent cyber and operational risk, with more opportunities for cybercriminals to gain entry or access to corporate assets, including infrastructure such as cloud and third-party enabled services. These threats extend to our clients, with the Group at risk of financial loss if they are materially affected.

Reliance on third parties for critical processes is an increasing regulatory focus and can introduce significant risks if these third parties fail to deliver or face operational issues. As supply chains become more complex and digital, security risks are shifting down to 4th and nth party. This increased interconnectedness is likely to further reduce the tolerance for errors and outages.

Ongoing geopolitical tensions increase the risk of conflict spilling into the cyber domain, including cyber risks from nation-state actors seeking to disrupt operations, access sensitive information, or gain strategic advantage. The scale and sophistication of threats continues to increase, with ransomware a persistent concern. The barriers to entry for attacks is reducing, and malicious actors are embracing new wave technology with increased potency, such as AI. In the longer term, advances in quantum computing could threaten encryption, one of the core aspects of security, which will necessitate a complex global transition to enhance data architecture. There are also growing data sovereignty requirements to localise data, systems and operations, with data increasingly recognised as being at the centre of global trade.

The adoption of new technologies, products or business models requires clear operating models and risk frameworks. It is essential to upskill our people to develop in-house capabilities to manage associated risks. People, process and technology agendas must be viewed holistically to effectively implement new infrastructure and reduce the risk of obsolescence.

How these risks are mitigated

- We continuously monitor and evaluate emerging technology trends, business models and opportunities.
- We have enhanced governance for evolving areas, such as the Digital Asset Risk Committee.
- We have instituted an AI Safety Council which evaluates and assesses AI solutions prior to use.
- We apply a tiered approach to evaluate AI systems, proportionate to the associated risks.
- We are partnering with central banks and other stakeholders on digital currency and stablecoin projects around the world.
- We manage data and information security risks through our Compliance and Information and Cyber Security (ICS) RTFs. We maintain a global Group Data Conduct Policy.
- The Group continues to invest in its resilience capabilities, with a focus on regulatory compliance, as well as ensuring the continued operational stability of the Bank.
- The Group is focused on uplifting its global data centre footprint, enhancing technology to reduce obsolescence, assuring its use of third parties and building response and recovery capabilities.
- We prioritise security and robust testing in the design of our products and services, including implementing encryption, phishing resistance and stringent access controls to safeguard user data.
- The Group has implemented a 'defence-in-depth' ICS control environment strategy to protect, detect and respond to known and emerging ICS threats.
- We upskill colleagues on the human aspect of ICS risk, underpinned by our colleague Code of Conduct and Ethics. We also assign mandatory ICS learning, phishing exercises and role-specific training.
- The Group's Incident Response processes include 24/7 security event monitoring, triage and analysis.
- New risks are identified through the New Initiatives Risk Assessment and Third-Party Risk Management policy and standards.

Group Chief Risk Officer's review continued

- We identify security threats to third parties and deliver threat intelligence and briefings to strategic clients to enhance our service and relationships.

• We have initiated a post-quantum cryptography programme to manage the bank-wide transition to post-quantum

- we have initiated a post quantum cryptography programme to manage the bank-wide transition to post-quantum encryption standards.
- We test the effectiveness of our crisis management and continuity strategies through a series of severe but plausible disruption scenarios.
- We have implemented pan-bank stress testing for our important business services to ensure vulnerabilities are effectively identified and remediated.
- We have improved operational resilience monitoring capabilities to identify potential vulnerabilities quickly and put in place necessary remediations and controls.

Regulatory considerations

Regulatory evolution and fragmentation

Amid other changes in regulation, we are seeing a rise in consultations relating to digital assets, with potential inconsistent standards across jurisdictions raising risks around legal enforceability, ownership and capital treatment. There is also greater regulatory interest in the use of AI and its ethical application in decision-making. As technologies get more complex, we also see increased focus on consumer protection, particularly with ageing populations and a rise in populist agendas.

In many Western jurisdictions, competitiveness and growth are becoming more pressing issues for regulatory authorities. Such policymaking comes at a natural tension with resilience considerations, as seen in the divergence in timing and approach of Basel 3.1 adoption across the US, UK and some Asian markets. Other areas of divergence include ESG regulation, and extraterritorial and localisation requirements, including data sovereignty.

While some deregulation can be beneficial, an uncoordinated global regime makes it challenging to manage cross-border activities, with additional complexity and cost.

How these risks are mitigated

- We actively monitor regulatory developments and respond to consultations either bilaterally with regulators and external legal advisors or through well-established industry bodies.
- We track evolving country-specific requirements and actively collaborate with regulators to support important initiatives.
- We are leveraging new technology to identify and map new regulations.
- We remain focussed on protecting consumers by proactively identifying and mitigating risks such as scams, phishing and impersonation

Demographic considerations

Skills and the competition for talent

Evolving client expectations and rapid technological development are transforming the workplace, accelerating changes to how people work, connect and collaborate. The future workforce will continue to augment, with a focus on ensuring that human and technical skills intertwine effectively.

Workforce expectations also continue to evolve, with health, wellbeing and purpose becoming top focuses for talent attraction. Maintaining an EVP that caters for multiple generations with differing priorities is a key challenge in building a high-performing, integrated employee base.

Flexible working is an increasingly important factor for colleagues and an overall positive factor in workforce experience. However, there are risks around potential lack of development opportunities from face-to-face interaction, especially for more junior employees. The role of people leaders will continue to evolve to enable the right balance for both individuals and teams.

Demographic and migration trends

Developed markets' budgets will be increasingly strained by ageing populations, and nationalistic policies on issues such as immigration could exacerbate the problem. Conversely, emerging markets are experiencing fast-growing, younger workforces. Population growth will put pressure on key resources to fully capitalise on the 'demographic dividend'. Existing fiscal and social vulnerabilities may also hinder emerging markets' ability to turbocharge their growth.

Population displacement is rising, which may increase the fragility of societal structures in vulnerable centres. Large scale movement could cause social unrest and accelerate the spread of future pandemics. The ability to react to such external scenarios may be diminished due to broader declines in international institutions and reduced global cooperation.

Societal unrest continues to increase, and the threat of terrorist activity and political violence has also heightened over the past 12 months.

Net population growth for the 21st century will be in less-developed countries. Proactively planning for these demographic shifts will be essential in maintaining an efficient global business model

Group Chief Risk Officer's review continued

How these risks are mitigated

- Our People Strategy builds a future-ready, multi generational workforce through structured re-skilling and mobility programmes; this enables prompt redeployment as roles evolve, and also mitigates the demographic risks of shrinking and ageing populations.
- We have an internal Talent Marketplace which enables colleagues to sign up for projects to access diverse experiences and career opportunities.
- We place an emphasis on skills and identifying talent to accelerate, and how to deploy them in areas with the highest impact for our clients and the business.
- We emphasise frequent two-way feedback through performance and development conversations to embed a culture of continuous learning and development.
- We provide support and resources to help balance productivity, collaboration and wellbeing, with more than 60 per cent of our employees working flexibly.
- Our Human Rights Position Statement outlines our commitment to maintain a safe, supportive, diverse and inclusive workplace, and to support social and economic development in the communities in which we operate.

Jason Forrester

Total Group ^{3,4}	420,117	121,993	298,124	193,115	90,602	283,717	581,841

- 1 Maximum on balance sheet exposure includes FVTPL amount of High Carbon sector is 2,202 million (31 December 2024: 749 million).
- 2 Includes on balance sheet FVTPL amount of 62,795 million (31 December 2024: 58,519 million) for Corporate & Investment Banking loans to customers.
- 3 Total Group includes net loans and advances to banks and net loans and advances to customers held at amortised cost of 43,901 million (31 December 2024: 43,593 million) and 286,788 million (31 December 2024: 281,032 million) respectively and loans to banks and loans and advances to customers held at FVTPL of 36,673 million (31 December 2024: 36,967 million) and 62,798 million (31 December 2024: 58,525 million) respectively. Refer to Loans and advances by client segment table.
- 4 Agriculture is a further sector for which the Group set a net zero target in 2025 (see net zero section). The value chain in scope for this sector incorporates from pre-farm production (fertiliser) to post-farm processing (food traders, processors and wholesales). The total outstanding loan exposure to this sector is 11,239 million (31 December 2024: 11,866m) with financial guarantees of 1,908 million (31 December 2024: 2,177m) and undrawn commitments of 10,977 million (31 December 2024: 8,796m) Whilst there is a net zero target on this sector and transition risk is a consideration, the sector is not considered a traditional high carbon sector as not linked to heavy industry and the consumption of energy.
- 5 The ratio of total high carbon sector lending to the Group's total assets is 5.9 % (31 December 2024: 5.8%), which is the high carbon sector and agriculture sector balances over the total Group balance sheet.

Movements in risk-weighted assets

RWA increased by 11.0 billion, or 4.4 per cent, from 31 December 2024 to 258.0 billion. This was due to the increase in Credit Risk RWA of 2.8 billion, Market Risk RWA of 2.4 billion and Operational Risk RWA of 5.7 billion.

Corporate & Investment Banking

Credit Risk RWA increased by 0.7 billion, or 0.6 per cent, from 31 December 2024 to 125.4 billion due to:

- 2.7 billion increase from foreign currency translation
- 1.3 billion increase mainly due to deterioration in asset quality from sovereign downgrades and other client grade moves
- 1.7 billion decrease from changes in asset growth and mix

... billion decrease from changes in asset growth and mix

- 5.0 billion decrease from optimisation actions
- 3.3 billion increase from asset growth
- 1.3 billion decrease from industry-wide regulatory changes to align IRB model performance
- 0.3 billion decrease from exit of business in Cameroon.

Wealth & Retail Banking

Credit Risk RWA decreased by 2.7 billion, or 5.6 per cent, from 31 December 2024 to 45.1 billion mainly due to:

- 3.4 billion decrease from changes in asset growth and mix
- 0.5 billion decrease mainly due to improvement in asset quality
- 0.1 billion decrease from exit of business in Gambia
- 1.0 billion increase from foreign currency translation
- 0.2 billion increase from industry-wide regulatory changes to align IRB model performance.

Ventures

Ventures is comprised of Mox Bank Limited, Trust Bank and SC Ventures. Credit Risk RWA increased by 2.1 billion, or 94.0 per cent from 31 December 2024 to 4.4 billion from asset balance growth from Mox Bank Limited and SC Ventures.

Capital review continued

Central & other items

Central & other items RWA mainly relate to the Treasury Market's liquidity portfolio, equity investments and current and deferred tax assets.

Credit Risk RWA increased by 2.7 billion, or 18.4 per cent, from 31 December 2024 to 17.4 billion mainly due to:

- 1.9 billion increase from changes in asset growth and mix
- 0.6 billion increase due to deterioration in asset quality mainly from sovereign downgrades and other client grade moves
- 0.2 billion increase from foreign currency translation.

Market Risk

Total Market Risk RWA increased by 2.4 billion, or 8.4 per cent, from 31 December 2024 to 30.7 billion mainly due to a 2.1 billion increase in Standardised Approach (SA) Specific Interest Rate Risk RWA due primarily to increases in the Credit Trading Portfolio.

Operational Risk

Operational Risk RWA increased by 5.7 billion, or 19.5 per cent, from 31 December 2024 to 35.2 billion, primarily driven by an increase in average income measured over a rolling three-year time horizon. The Group has brought forward the annual refresh of Operational Risk RWA with RWA increase recognised in Q4'25 rather than Q1'26, as earlier guided, resulting in two operational risk RWA increases in 2025.

1 Includes capital reserve of 5 million (31 December 2024: 5 million), capital redemption reserve of 538 million (31 December 2024: 457 million) and merger reserve of 17,111 million (31 December 2024: 17,111 million).

2 Includes actuarial (loss)/gain, net of taxation on Group defined benefit schemes.

3 December 2024 movement includes realisation of translation adjustment loss from sale of SCB Zimbabwe Limited (190 million), SCB Angola S.A. (31 million), SCB Sierra Leone Limited (25 million) transferred to other operating income.

4 Mainly includes movements related to Ghana hyperinflation.

5 Movements are primarily from non-controlling interest (refer note 29).

6 During 2024, the Group announced the following share buybacks: a share buyback of up to 1,000 million in February 2024, which was completed in June 2024; and a share buyback of up to 1,500 million in July 2024, which was completed in January 2025 (refer note 28 for share buyback announced in July 2024).

7 During 2025, the Group announced the following share buybacks: a share buyback of up to 1,500 million in February 2025, which was completed in July 2025; and a share buyback of up to 1,300 million in July 2025, which was completed in January 2026 (refer note 28).

8 Includes 348 million (31 December 2024: 72 million) mark-to-market gain on equity instruments (net of tax), 103 million (31 December 2024: 174 million) relating to transfer of gain on sale of equity investment to retained earnings and reversal of deferred tax liability 9 million (31 December 2024: 76 million reversal of deferred tax asset). For movement in deferred tax refer Note 10.

9 Includes 103 million (31 December 2024: 174 million) gain on sale of equity investment in other comprehensive income reserve transferred to retained earnings partly offset by 9 million (31 December 2024: 13 million) capital gain tax.

10 All the amounts are net of tax.

Note 28 includes a description of each reserve.

The notes form an integral part of these financial statements and are available in the Annual Report 2025.

Financial statements continued

Basis of preparation

The consolidated and Company financial statements have been prepared on a going concern basis and under the historical cost convention, as modified by the revaluation of cash-settled share-based payments, fair value through other comprehensive income, and financial assets and liabilities (including derivatives) at Fair value through profit or loss.

The consolidated financial statements are presented in United States dollars (\$), being the presentation currency of the Group and functional currency of the Company, and all values are rounded to the nearest million dollars, except when otherwise indicated.

Going concern

These financial statements were approved by the Board of directors on 24 February 2026. The directors have made an assessment of the Group's ability to continue as a going concern. This assessment has been made having considered the current macroeconomic and geopolitical headwinds, including:

- Review of the Group Strategy and Corporate Plan, including the annual budget.
- An assessment of the actual performance to date, loan book quality, credit impairment, legal and regulatory matters, compliance matters, recent regulatory developments.
- Consideration of stress testing performed, including the Group Recovery Plan (RP) which include the application of stressed scenarios. Under the tests and through the range of scenarios, the results of these exercises and the RP demonstrate that the Group has sufficient capital and liquidity to continue as a going concern and meet minimum regulatory capital and liquidity requirements.
- Analysis of the capital position of the Group, including the capital and leverage ratios, and Internal Capital Adequacy Assessment Process (ICAAP), which summarises the Group's capital and risk assessment processes, assesses its capital requirements and the adequacy of resources to meet them.
- Analysis of the funding and liquidity position of the Group, including the Internal Liquidity Adequacy Assessment Process (ILAAP), which considers the Group's liquidity position, its framework and whether sufficient liquidity resources are being maintained to meet liabilities as they fall due, was also reviewed. Further, funding and liquidity was considered in the context of the risk appetite metrics, including the LCR ratio.
- The level of debt in issue, including redemptions and issuances during the year, debt falling due for repayment in the next 12 months and further planned debt issuances, including the appetite in the market for the Group's debt.
- The Group's portfolio of debt securities held at amortised cost.
- A detailed review of all principal risks as well as topical and emerging risks.

Based on the analysis performed, the directors confirm they are satisfied that the Group has adequate resources to continue in business for a period of at least 12 months from 24 February 2026.

For this reason, the Group continues to adopt the going concern basis of accounting for preparing the financial statements.

The maturity distributions are presented in the above table on the basis of contractual maturity dates. The weighted average yield for each range of maturities is calculated by dividing the annualised interest income for the year by the book amount of debt securities at that date.

Average balance sheets and yields and volume and price variances

Average balance sheets

For the purposes of calculating net interest margin the following adjustments are made:

- Reported net interest income is adjusted to remove interest expense on amortised cost liabilities used to provide funding to the financial markets business.
- Financial instruments measured at fair value through profit or loss are classified as non-interest earning.
- Premiums on financial guarantees purchased to manage interest earning assets are treated as interest expense In

the Group's view this results in a net interest margin that is more reflective of banking book performance.

Page 60

Other supplementary financial information continued

The following tables set out the average balances for the Group's assets and liabilities for the periods ended 31 December 2025 and

31 December 2024 under the revised definition of net interest margin. For the purpose of these tables, average balances have been determined on the basis of daily balances, except for certain categories, for which balances have been determined less frequently.

The Group does not believe that the information presented in these tables would be significantly different had such balances been determined on a daily basis.

1 Adjusted net interest income has been re-presented in line with the RNS on Re-Presentation of Financial Information issued on 2 April 2025 to reflect the reclassification of funding cost mismatches and treasury currency management activities to non-net interest income (non NII). Adjusted NII is reported NII less trading book funding cost, treasury currency management activities, cash collateral and prime service.

Volume and price variances

The following table analyses the estimated change in the Group's net interest income attributable to changes in the average volume of interest-earning assets and interest-bearing liabilities, and changes in their respective interest rates for the years presented. Volume and rate variances have been determined based on movements in average balances and average exchange rates over the year and changes in interest rates on average interest-earning assets and average interest-bearing liabilities.

Annual General Meeting (AGM)

The AGM will be held on Thursday, 7 May 2026 at 11.00am UK time (6.00pm Hong Kong time). Further details regarding the format, location and business to be transacted at the meeting will be disclosed within the 2026 Notice of AGM.

Interim results

The interim results will be announced to the London Stock Exchange and the Stock Exchange of Hong Kong Limited and put on the Company's website.

Country-by-country reporting

In accordance with the requirements of the Capital Requirements (country-by-country reporting) Regulations 2013, the Group will publish additional country-by-country information in respect of the year ended 31 December 2025, on or before 31 December 2026. We have also published our UK tax strategy.

Pillar 3 reporting

In accordance with the Pillar 3 disclosure requirements, the Group has published the Pillar 3 disclosures in respect of the year ended 31 December 2025.

ShareCare

ShareCare is available to shareholders on the Company's UK register who have a UK address and bank account. It allows you to hold your Standard Chartered PLC shares in a nominee account. Your shares will be held in electronic form, so you will no longer have to worry about keeping your share certificates safe. If you join ShareCare, you will still be invited to attend the Company's AGM and you will receive any dividend at the same time as everyone else. ShareCare is free to join and there are no annual fees to pay.

Donating shares to ShareGift

Shareholders who have a small number of shares often find it uneconomical to sell them. An alternative is to consider donating them to the charity ShareGift (registered charity 1052686), which collects donations of unwanted shares until there are enough to sell and uses the proceeds to support UK charities. There is no implication for capital gains tax (no gain or loss) when you donate shares to charity, and UK taxpayers may be able to claim income tax relief on the value of their donation.

Bankers' Automated Clearing System

Dividends can be paid straight into your bank or building society account.

Registrars and shareholder enquiries

If you have any enquiries relating to your shareholding and you hold your shares on the UK register, please contact our registrar at investorcentre.co.uk. Alternatively, please contact Computershare Investor Services PLC, The Pavilions, Bridgwater Road, Bristol, BS99 6ZZ or call the shareholder helpline number on 0370 702 0138. If you hold your shares on the Hong Kong branch register and you have enquiries, please contact Computershare Hong Kong Investor Services Limited, 17M Floor, Hopewell Centre, 183 Queen's Road East, Wan Chai, Hong Kong.

Page 64

Shareholder information continued

Substantial shareholders

The Company and its shareholders have been granted partial exemption from the disclosure requirements under Part XV of the Securities and Futures Ordinance (SFO). As a result of this exemption, shareholders, directors and chief executives, no longer have an obligation under Part XV of the SFO (other than Divisions 5, 11 and 12 thereof) to notify the Company of substantial shareholding interests, and the Company is no longer required to maintain a register of interests of substantial shareholders under section 336 of the SFO, nor a register of directors' and chief executives' interests under section 352 of the SFO. The Company is, however, required to file with The Stock Exchange of Hong Kong Limited any disclosure of interests made in the UK.

Taxation

The Company has a Group-wide policy on tax strategy and governance, which details that we seek to apply our approach to tax in all jurisdictions in which we operate and are committed to paying all taxes legally due. This policy is approved by the Board annually and is available on our website sc.com/regulatory-disclosures.

No tax is currently withheld from payments of dividends by Standard Chartered PLC. Shareholders and prospective purchasers should consult an appropriate independent professional adviser regarding the tax consequences of an investment in shares in light of their particular circumstances, including the effect of any national, state or local laws.

Chinese translation

If you would like a Chinese language version of the 2025 Annual Report, please contact Computershare Hong Kong Investor Services Limited, 17M Floor, Hopewell Centre, 183 Queen's Road East, Wan Chai, Hong Kong.

二〇二五年年報之中文譯本可向香港中央證券登記有限公司索取，地址：香港灣仔皇后大道東183號合和中心17M樓。

Shareholders on the Hong Kong branch register who have asked to receive corporate communications in either Chinese or English can change this election by contacting Computershare. If there is any inconsistency between the English version of this document and any translation of the English version, the English version shall prevail.

Electronic communications

If you hold your shares on the UK register and in future you would like to receive the Annual Report electronically rather than by post, please register online at: www.investorcentre.co.uk. Click on 'register now' and follow the instructions. You will need to have your Shareholder or ShareCare reference number to hand. You can find this on your share certificate or ShareCare statement. Once you have registered and confirmed your email communication preference, you will receive future notifications via email enabling you to submit your proxy vote online. In addition, as a member of

Investor Centre, you will be able to manage your shareholding online and change your bank mandate or address information.

[Important notices](#)

[Forward-looking statements](#)

The information included in this document may contain 'forward-looking statements' based upon current expectations or beliefs as well as statements formulated with assumptions about future events. Forward-looking statements include, without limitation, projections, estimates, commitments, plans, approaches, ambitions and targets (including, without limitation, ESG commitments, ambitions and targets). Forward-looking statements often use words such as 'may', 'could', 'will', 'expect', 'intend', 'estimate', 'anticipate', 'believe', 'plan', 'seek', 'aim', 'continue' or other words of similar meaning to any of the foregoing. Forward-looking statements may also (or additionally) be identified by the fact that they do not relate only to historical or current facts.

By their very nature, forward-looking statements are subject to known and unknown risks and uncertainties and other factors that could cause actual results, and the Group's plans and objectives, to differ materially from those expressed or implied in the forward-looking statements. Readers should not place reliance on, and are cautioned about relying on, any forward-looking statements.

There are several factors which could cause the Group's actual results and its plans and objectives to differ materially from those expressed or implied in forward-looking statements. The factors include (but are not limited to): changes in global, political, economic, business, competitive and market forces or conditions, or in future exchange and interest rates; changes in environmental, geopolitical, social or physical risks; legal, regulatory and policy developments, including regulatory measures addressing climate change and broader sustainability-related issues; the development of standards and interpretations, including evolving requirements and practices in ESG reporting; the ability of the Group, together with governments and other stakeholders to measure, manage, and mitigate the impacts of climate change and broader sustainability-related issues effectively; risks arising out of health crises and pandemics; risks of cyber-attacks, data, information or security breaches or technology failures involving the Group; changes in tax rates or policy; future business combinations or dispositions; and other factors specific to the Group, including those identified in Standard Chartered PLC's Annual Report and the financial statements of the Group. To the extent that any forward-looking statements contained in this document are based on past or current trends and/or activities of the Group, they should not be taken as a representation that such trends or activities will continue in the future.

Shareholder information continued

No statement in this document is intended to be, nor should be interpreted as, a profit forecast or to imply that the earnings of the Group for the current year or future years will necessarily match or exceed the historical or published earnings of the Group. Each forward-looking statement speaks only as of the date that it is made. Except as required by any applicable laws or regulations, the Group expressly disclaims any obligation to revise or update any forward-looking statement contained within this document, regardless of whether those statements are affected as a result of new information, future events or otherwise.

Please refer to Standard Chartered PLC's Annual Report and the financial statements of the Group for a discussion of certain of the risks and factors that could adversely impact the Group's actual results, and cause its plans and objectives, to differ materially from those expressed or implied in any forward-looking statements.

[Non-IFRS performance measures and alternative performance measures](#)

The Group financial statements have been prepared in accordance with UK-adopted international accounting standards and International Financial Reporting Standards (IFRS) as adopted by the European Union. Standard Chartered PLC's financial statements have been prepared in accordance with UK-adopted international accounting standards (IAS) as applied in conformity with section 408 of the Companies Act 2006. This document may contain financial measures and ratios not specifically defined under IFRS or IAS and/or alternative performance measures as defined in the European Securities and Market Authority guidelines. Such measures may exclude certain items which management believes are not representative of the underlying performance of the business and which distort period-on-period comparison. These measures are not a substitute for IAS or IFRS measures and are based on a number of assumptions that are subject to uncertainties and change. Please refer to the Annual Report and the financial statements of the Group for further information, including reconciliations between the underlying and reported measures.

Financial instruments

Nothing in this document shall constitute, in any jurisdiction, an offer or solicitation to sell or purchase any securities or other financial instruments, nor shall it constitute a recommendation or advice in respect of any securities or other financial instruments or any other matter.

Caution regarding climate and environment related information

Some of the climate and environment related information in this document is subject to certain limitations, and therefore the reader should treat the information provided, as well as conclusions, projections and assumptions drawn from such information, with caution. The information may be limited due to a number of factors, which include (but are not limited to): a lack of reliable data; a lack of standardisation of data; and future uncertainty. The information includes externally sourced data that may not have been verified. Furthermore, some of the data, models and methodologies used to create the information is subject to adjustment which is beyond our control, and the information is subject to change without notice.

General

You are advised to exercise your own independent judgement (with the advice of your professional advisers as necessary) with respect to the risks and consequences of any matter contained in this document. The Group, its affiliates, directors, officers, employees or agents expressly disclaim any liability and responsibility for any decisions or actions which you may take and for any damage or losses you may suffer from your use of or reliance on the information contained in this document.

Basis of preparation and caution regarding data limitations

This section is specifically relevant to, among others, the sustainability and climate models, calculations and disclosures throughout this report. The information contained in this document has been prepared on the following basis:

- i. disclosures in the Strategic report, Financial review, Sustainability review, Directors' report, Risk review and Capital review and Supplementary information are unaudited unless otherwise stated;
- ii. all information, positions and statements set out in this document are subject to change without notice;
- iii. the information included in this document does not constitute any investment, accounting, legal, regulatory or tax advice or an invitation or recommendation to enter into any transaction;
- iv. the information included in this document may have been prepared using models, methodologies and data that are subject to certain limitations. These limitations include: the limited availability of reliable data, data gaps and the nascent nature of the methodologies and technologies underpinning this data; the limited standardisation of data (given, among other things, limited international coordination on data and methodology standards); and future uncertainty (due, among other things, to changing projections relating to technological development and global and regional laws, regulations and policies, and the current inability to make use of strong historical data);
- v. models, external data and methodologies used in information included in this document are or could be subject to adjustment which is beyond our control;
- vi. any opinions and estimates should be regarded as indicative, preliminary and for illustrative purposes only. Expected and actual outcomes may differ from those set out in this document (as explained in the 'Forward-looking statements' section above);
- vii. some of the related information appearing in this document may have been obtained from public and other sources and, while the Group believes such information to be reliable, it has not been independently verified by the Group and no representation or warranty is made by the Group as to its quality, completeness, accuracy, fitness for a particular purpose or noninfringement of such information;
- viii. for the purposes of the information included in this document, a number of key judgements and assumptions have been made. It is possible that the assumptions drawn, and the judgement exercised may subsequently turn out to be inaccurate. The judgements and data presented in this document are not a substitute for judgements and analysis made independently by the reader;

Shareholder information continued

- ix. any opinions or views of third parties expressed in this document are those of the third parties identified, and not of the Group, its affiliates, directors, officers, employees or agents. By incorporating or referring to opinions and views of third parties, the Group is not, in any way, endorsing or supporting such opinions or views;
- x. while the Group bears primary responsibility for the information included in this document, it does not accept responsibility for the external input provided by any third parties for the purposes of developing the information included in this document;
- xi. the data contained in this document reflects available information and estimates at the relevant time;
- xii. where the Group has used any methodology or tools developed by a third party, the application of the

- methodology or tools (or consequences of its application) shall not be interpreted as conflicting with any legal or contractual obligations and such legal or contractual obligations shall take precedence over the application of the methodology or tools;
- xiii. where the Group has used any underlying data provided or sourced by a third party, the use of the data shall not be interpreted as conflicting with any legal or contractual obligations and such legal or contractual obligations shall take precedence over the use of the data;
 - xiv. this Important Notice is not limited in applicability to those sections of the document where limitations to data, metrics and methodologies are identified and where this Important Notice is referenced. This Important Notice applies to the whole document;
 - xv. further development of reporting, standards or other principles could impact the information included in this document or any metrics, data and targets included in this document (it being noted that ESG reporting and standards are subject to rapid change and development); and
 - xvi. while all reasonable care has been taken in preparing the information included in this document, neither the Group nor any of its affiliates, directors, officers, employees or agents make any representation or warranty as to its quality, accuracy or completeness, and they accept no responsibility or liability for the contents of this information, including any errors of fact, omission or opinion expressed.

You are advised to exercise your own independent judgement (with the advice of your professional advisers as necessary) with respect to the risks and consequences of any matter contained in this document.

The Group, its affiliates, directors, officers, employees or agents expressly disclaim any liability and responsibility for any decisions or actions that you may take and for any damage or losses you may suffer from your use of or reliance on the information contained in this document.

Copyright in all materials, text, articles and information contained in this document (other than third-party materials, text, articles and information) is the property of, and may only be reproduced with permission of an authorised signatory of, the Group.

Copyright in materials, text, articles and information created by third parties and the rights under copyright of such parties are hereby acknowledged. Copyright in all other materials not belonging to third parties and copyright in these materials as a compilation vests and shall remain at all times copyright of the Group and should not be reproduced or used except for business purposes on behalf of the Group or save with the express prior written consent of an authorised signatory of the Group.
