FILTRONIC PLC
("Filtronic" or the "Company")

8.0m contract win with US Company

8.0m contract win with a US company for Filtronic's Amplifier technology

Filtronic plc (AIM: FTC), the designer and manufacturer of advanced RF solutions for the space, aerospace and defence, and telecoms infrastructure markets, has been awarded an 8.0m (£6.0m) contract to develop, manufacture and qualify a range of high-performance system level products.

The contract commences in March 2026 and is expected to complete in 2027.

Under the agreement, the Company will design, develop, produce and qualify amplifiers, expanding the Company's offering in satellite communications. Filtronic will incorporate its proprietary high-power solid-state amplifier technology based on GaN technology and specialised Integrated Circuit (Monolithic Microwave Integrated Circuits) technology.

About Filtronic:

Filtronic is at the leading edge of advanced microelectronics globally, specialising in the design and manufacture of mission-critical communication networks. Operating from two global manufacturing sites and three engineering centres of excellence, the company delivers solutions that span the full RF spectrum. An extensive patent portfolio highlights Filtronic's ongoing drive for innovation and technological leadership.

With a track record of over 45 years', Filtronic's technology is trusted across high-performance sectors including space, aerospace, defence, telecoms infrastructure and critical communications. The company develops core IP building blocks and transforms them into highly customised solutions for high-growth target markets. Filtronic's expertise enables seamless data transmission, delivering greater bandwidth, lower latency and enhanced connectivity.

Filtronic has successfully coupled this engineering expertise with investment in state-of-the-art production equipment that enables the rapid transition of a turn-key solution from product development to full scale, high quality manufacturing, at volume. The strategic markets of LEO space, aerospace and defence are the focus of current product development programmes, where Filtronic can add significant value, realise long term sustainable margins and deliver shareholder value.

Operating globally and headquartered in Sedgefield, UK, Filtronic is listed on the AIM market of the London Stock Exchange.
