

« More Energy, Less Emissions »

PARIS--(BUSINESS WIRE)--

TotalEnergies (Paris:TTE) (LSE:TTE) (NYSE:TTE) publishes today its [Sustainability & Climate 2026 Progress Report](#), which presents the progress achieved in the implementation of its 2025 transition strategy, notably regarding Company's emissions reduction. This report supplements the sustainability report that will be integrated into the Universal Registration Document in application of the CSRD¹.

Regarding its first growth pillar, Oil & Gas, the Company continues to pursue responsible investment in low-emissions and low breakeven oil and gas projects that support competitive production, whose carbon intensity has further decreased in 2025:

- Operated² methane emissions (100%³) have been reduced in 2025 by 65% compared to 2020, the Company exceeding its reduction target of 60%, ahead of its trajectory to reach a 80% reduction by 2030.
- Operated² Scope 1+2 emissions (100%³) totaled 33.1 Mt in 2025, vs 46 Mt in 2015, outperforming the initial target of 37 Mt for the year.
- Greenhouse gas emissions from operated oil & gas facilities (Scope 1+2 100%³) decreased by 38% versus 2015.
- New projects commissioned in Brazil and the United States in 2025 contributed to reduce the average emissions intensity (Scope 1+2) to below 16 kg CO₂e/boe, establishing a new benchmark for future Company's projects (versus less than 17 kg CO₂e/boe in 2025).

On its second growth pillar, Integrated Power, the Company's net electricity production reached 48 TWh in 2025, equivalent to approximately 10% of the Company's hydrocarbon output. This growth contributed to a 18.6% reduction in the lifecycle carbon intensity of energy products sold by the Company in 2025 compared with 2015, exceeding the 17% target set for the year.

These results underscore once again the robustness of the Company's integrated multi-energy model and confirm the relevance of a strategy designed to combine growth in the energy supply, competitiveness, and emissions reduction.

Report presentation at 2:00 PM (Paris time)

The *Sustainability & Climate 2026 Progress Report* will be presented online today by Mr. Aurélien Hamelle, President Strategy & Sustainability. The presentation will be followed by a Q&A session. The event will be webcast on the totalenergies.com website from 2:00 PM (Paris time). The presentation and the report will be available on the website.

About TotalEnergies

TotalEnergies is a global integrated energy company that produces and markets energies: oil and biofuels, natural gas, biogas and low-carbon hydrogen, renewables and electricity. Our more than 100,000 employees are committed to provide as many people as possible with energy that is more reliable, more affordable and more sustainable. Active in about 120 countries, TotalEnergies places sustainability at the heart of its strategy, its projects and its operations.
