About TheraCryf

TheraCryf plc is a biotechnology company developing new medicines for addiction and other neuropsychiatric disorders, areas of significant unmet medical need.

The Group's lead programme is a novel, best-in-class orexin-1 receptor antagonist being developed as a potential treatment for addiction, including binge eating, alcohol and other substance use disorders.

The programme has already been heavily de-risked for both safety/tolerability and efficacy in previous testing and is fully funded through final pre-clinical trials to clinical readiness, with regulatory submissions for first in man studies targeted for 2026.

TheraCryf also has a dopamine transporter (DAT) modulator programme addressing fatigue of brain origin, including fatigue associated with multiple sclerosis, chemotherapy and narcolepsy. The Group also has a legacy, grant-funded, oncology programme in glioblastoma with SFX-01.

The Company is a public limited company listed on the London Stock Exchange under the name "TheraCryf plc".

The Group operates a capital-light, virtual development model advancing programmes to early clinical or proof-of-concept stage before partnering with commercially focused pharmaceutical and biotechnology companies.

TheraCryf's headquarters and registered office are at Alderley Park, Cheshire.
