Notes to Editors:

Transense is headquartered in Oxfordshire, UK and its shares are traded on AIM, a market operated by the London Stock Exchange (AIM: TRT). The Company develops and supplies advanced sensor technology and measurement solutions used by some of the world's leading companies to improve performance, efficiency, and safety in demanding, mission critical applications. Transense currently operates through two active business segments:

SAWsense - designs, supplies and licences advanced sensor solutions based on proven, patent protected Surface Acoustic Wave (SAW) technology to world leading companies in aerospace, automotive, and industrial machinery (including robotics), enabling improved efficiency and performance of their products. Key customers include GE Aerospace, Airbus, Motion Applied (formerly McLaren Applied), and several other confidential OEMs and Tier One automotive, aerospace and industrial machinery suppliers.

Translogik - develops smart, connected commercial vehicle tyre inspection equipment to many of the world's leading tyre suppliers, fleet operators and service centres. Enabling accurate measurement and digital capture of safety-critical tyre condition data, used to reduce operating costs, improve safety and provide audit records for regulatory compliance. Key customers include Bridgestone, Goodyear, Continental and Prometeon (Pirelli), leading independent providers of vehicle fleet maintenance management software, and a growing list of international territory distribution partners.

In addition, Transense earns residual royalty income from Bridgestone iTrack - a tyre monitoring system for off-highway vehicles that was developed by Translogik. The associated sales, support and development infrastructure were sold to Bridgestone Corporation, the world's largest tyre producer, in June 2020, and the intellectual property was licensed exclusively to Bridgestone under a ten-year deal expiring in 2030.
