The interim financial statements as of and for the quarter ended March 31, 2012 are attached at the end of this Quarterly Update. The financial statements provided at the end of this update are as follows:

Item 4. Management's Discussion and Analysis or Plan of Operation.

A. Plan of Operation.

We have incurred significant operating losses to date and we have a significant loss carry forward. These losses are directly attributable to the fact that we were required to spend significant sums of money developing and testing our products, conducting market research, identifying proper channels of distribution, traveling to trade shows, investing in conventions, and taking such steps as necessary in order for us to bring our products to market.

B. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Our core business model is to become the premier direct sales company in the world. We expect to continue to execute our distributor network or multiple revenue streams from thousands of independent distributors that currently market the Youngevity®, JavaFit®, and other brands in our network marketing organization. We also have commercial sales through our roasting unit, CLR Roasters.

In addition to becoming the premier direct sales company in the world, we intend to focus on continued international expansion. We have been in more than 50 countries for years, most through the "Not-for-Resale" only market.

Since the merger, we have also welcomed into the family a few new companies through acquisition. We acquired Financial Destination, Inc. in October 2011. The acquisition was our largest to date based on overall sales volume. We believe these groups of network marketers and unique product lines will enhance the overall experience and growth of AL International, Inc. throughout 2012.

Financials for the 3 month reporting period ended March 31, 2012, as compared to the same period in the prior year, are as follows:

- Net sales were $16,478,067 for the 3 months ended March 31, 2012, versus $1,454,732 for the three months ended March 31, 2011;
- Cost of sales were $4,757,500 for the 3 months ended March 31, 2012, versus $1,311,394 for the three months ended March 31, 2011;
- Gross profit was $11,720,567 for the 3 months ended March 31, 2012, versus $399,404 for the three months ended March 31, 2011;
- Operating expenses were $11,801,821 for the 3 months ended March 31, 2012, versus $534,999 for the three months ended March 31, 2011;
- Loss from operations were $81,255 for the three months ended March 31, 2012, versus $100,407 for the three months ended March 31, 2011; and
- Net loss was $130,818 for the three months ended March 31, 2012 versus $135,595 for the three months ended March 31, 2011.

The increase in revenues was primarily due to the recording of additional sales that resulted from the reverse merger that formed AL International, Inc. on July 11, 2011. Additionally, the consolidated revenue has grown organically at just over 40% over Q4 2011.

Cost of sales for the three months ended March 31, 2012 were $4,757,500, compared to $1,311,394 for the same period in the prior year, an increase of $3,446,106. The increase in costs of sales was primarily due to the increase in purchasing that was required to support the revenue increase that is outlined in the paragraph immediately above.
Gross profit was $11,720,567 for the 3 months ended March 31, 2012 compared to $399,404 for the three months ended March 31, 2011, an increase of $11,321,163. Net loss was $130,818 for the three months ended March 31, 2012 versus $135,595 for the three months ended March 31, 2011. Net loss was essentially flat between the two periods.

AL INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization

On July 11, 2011, Javalution Coffee Company, a Florida corporation ("Javalution"), acquired all of the outstanding stock of AL Global Corporation, a California corporation ("AL Global"). For accounting purposes, the acquisition has been treated as a recapitalization of AL Global with AL Global as the acquirer (reverse acquisition). On August 1, 2011 Javalution was reincorporated as AL International, Inc. a Delaware corporation (the "Company").The historical financial statements prior to July 11, 2011 are those of Javalution Coffee Company, the OTC trading Symbol JCOF.

The Company develops and distributes health and nutrition products through its global independent direct sales network, also known as multi-level marketing, and manufactures coffee products which are sold to commercial customers. The Company operates two business segments, its direct sales segment and its commercial coffee segment.

2. Summary of Significant Accounting Policies

Consolidation

The accompanying financial statements include the accounts of the Company and its wholly-owned subsidiaries AL Global Corporation, CLR Roasters LLC, Financial Destination, Inc., Youngevity Australia Pty. Ltd., Youngevity NZ Ltd. and variable interest entities AL Corporation Holding Pte. Ltd., DrinkACT Philippines, Inc. All inter-company accounts and transactions between the entities have been eliminated in consolidation.

Use of Estimates

The Company prepared its consolidated financial statements and related disclosures in conformity with accounting principles generally accepted in the United States of America ("GAAP"). In preparing these statements the Company is required to use estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses. Actual results could differ materially from those estimates and assumptions. On an ongoing basis the Company reviews its estimates, including those related to allowances for inventory obsolescence, sales returns, income taxes and tax valuation reserves.

Cash and Cash Equivalents

The Company considers only its monetary liquid assets with original maturities of three months or less as cash and cash equivalents.

Accounts Receivable

The Company's accounts receivable as of March 31, 2012 consist primarily of receivables from CLR Rosters division. The Company considers the collectability of its accounts receivable based on historical experience and specific identification. No reserve has been recorded as of March 31, 2012.

Inventory
Inventory is stated at the lower of cost or market value. Cost is determined using the first-in, first-out method. The company has capitalized payments to its contract manufacturers for the acquisition of raw materials and commencement of the manufacturing and packaging of the Company's product.

Property and Equipment
Property and equipment are recorded at cost. Depreciation is provided in amounts sufficient to relate the cost of depreciable assets to operations over the estimated useful lives of the related assets. The straight-line method of depreciation and amortization is followed for financial statement purposes. Leasehold improvements are amortized over the shorter of the life of the respective lease or the useful life of the improvements. Estimated service lives range from three to ten years. When such assets are sold or otherwise disposed of, the cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in operations in the period of disposal. The cost of normal maintenance and repairs is charge to expense as incurred. Significant expenditures that increase the useful life of an asset are capitalized and depreciated over the estimated useful life of the asset.

Goodwill and Intangible Assets
Goodwill and intangible assets with indefinite lives are not amortized, but rather are assessed for impairment annually and on the occurrence of an event that indicates impairment may have occurred. Intangible assets with estimable useful lives are amortized using a straight-line method over the estimated useful lives of the assets.
The Company completed its annual goodwill and indefinite-lived intangible assets impairment assessments for the years ended December 31, 2011.

Revenue Recognition
The Company ships the majority of its product directly to the consumer via UPS and receives substantially all payments for these sales in the form of credit card charges. Revenue is recognized upon passage of title and risk of loss to customers when product is shipped from the fulfillment facility. Sales revenue and a reserve for estimated returns are recorded when product is shipped.

Product Return Policy
All products, except for food products and commercial coffee products are returnable within the first 30 days following receipt by the customer and the customer is refunded at 100% of the sales price, subject to adherence to an advance return authorization procedure. Returned product must be in unopened resalable condition. Commercial coffee products are returnable only if defective. The Company establishes the returns reserve based on historical experience.

Shipping and Handling
Shipping and handling costs associated with inbound freight and freight out to customers including independent distributors are included in cost of sales. Shipping and handling fees charged to all customers are included in sales.

Distributor Incentives
Distributor incentives expenses include all forms of commissions, compensation and other incentives paid to our Distributors.

Selling, General and Administrative
Selling, general and administrative expenses include wages and benefits, depreciation and amortization, rents and utilities, distributor event costs, advertising and professional fees, marketing and research and development expenses.
Comprehensive Income

Comprehensive income is defined as all changes in equity from "non-owner" sources. The components of comprehensive income include the total of net income and currency translation adjustments.

Recently Adopted Accounting Pronouncements
In December 2010, the Financial Accounting Standards Board (the "FASB") issued updated authoritative guidance relating to the accounting for intangibles. The guidance modifies the steps for testing the carrying amount of goodwill and other intangibles, to determine if it is more likely than not than impairment exists. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. The Company adopted the guidance January 1, 2011 and its application had no impact on the Company's consolidated financial statements.

In December 2010, the FASB issued updated authoritative guidance relating to disclosure of supplementary pro forma information for business combinations. The guidance specifies that, if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The updated guidance also expands the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring, pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue earnings. The guidance is effective prospectively for business combinations for which the acquisitions date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. The Company adopted the guidance January 1, 2011.

3. Business Combinations: None

4. Stockholders Equity

The Company is authorized to issue 600,000,000 shares of common stock and 100,000,000 shares of preferred stock, each with a par value of $0.001 per share after giving effect to the 1 for 2 reverse split in August, 2011.

Preferred Stock
The Holders of Series A Convertible Preferred Stock ("Series A Preferred") shall be entitled to receive a cumulative dividend at a rate of 8.0% per year, payable annually in cash or shares of the Company's common stock at the Company's election. Effective August 5, 2011, there was a reverse split of the common stock where two shares became one share. The Company issued 165 shares of common stock in connection with the split. The conversion rate of the Series A Preferred was adjusted from four share to two shares.
