EAGLE POINT CREDIT COMPANY

QUARTERLY UPDATE – 3Q 2021

NOVEMBER 16, 2021

IMPORTANT INFORMATION

This report and the information and views included herein do not constitute investment advice, or a recommendation or an offer to enter into any transaction with Eagle Point Credit Company Inc. (the “Company”) or any of its affiliates. This report is provided for informational purposes only, does not constitute an offer to sell securities of the Company or a solicitation of an offer to purchase any such securities, and is not a prospectus. From time to time, the Company may have a registration statement relating to one or more of its securities on file with the Securities and Exchange Commission (“SEC”). Any registration statement that has not yet been declared effective by the SEC, and any prospectus relating thereto, is not complete and may be changed. Any securities that are the subject of such a registration statement may not be sold until the registration statement filed with the SEC is effective.

This presentation is solely for the use of the intended recipient(s). The information and its contents are the property of Eagle Point Credit Management LLC and/or the Company. Any unauthorized dissemination, copying or use of this presentation is strictly prohibited and may be in violation of law. This presentation is being provided for informational purposes only.

Investors should read the Company’s prospectus and SEC filings (which are publicly available on the EDGAR Database on the SEC website at <http://www.sec.gov>) carefully and consider their investment goals, time horizons and risk tolerance before investing in the Company. Investors should consider the Company’s investment objectives, risks, charges and expenses carefully before investing in securities of the Company. There is no guarantee that any of the goals, targets or objectives described in this report will be achieved. An investment in the Company is not appropriate for all investors. The investment program of the Company is speculative, entails substantial risk and includes investment techniques not employed by traditional mutual funds. An investment in the Company is not intended to be a complete investment program. Shares of closed-end investment companies, such as the Company, frequently trade at a discount from their net asset value, which may increase investors’ risk of loss. **Past performance is not indicative of, or a guarantee of, future performance.** The performance and certain other portfolio information quoted herein represents information as of dates noted herein. Nothing herein shall be relied upon as a representation as to the future performance or portfolio holdings of the Company. Investment return and principal value of an investment will fluctuate, and shares, when sold, may be worth more or less than their original cost. The Company’s performance is subject to change since the end of the period noted in this report and may be lower or higher than the performance data shown herein.

Neither Eagle Point Credit Management LLC nor the Company provides legal, accounting or tax advice. Any statement regarding such matters is explanatory and may not be relied upon as definitive advice. Investors should consult with their legal, accounting and tax advisers regarding any potential investment. The information presented herein is as of the dates noted herein and is derived from financial and other information of the Company, and, in certain cases, from third party sources and reports (including reports of third party custodians, CLO collateral managers and trustees) that have not been independently verified by the Company. As noted herein, certain of this information is estimated and unaudited, and therefore subject to change. We do not represent that such information is accurate or complete, and it should not be relied upon as such. This report does not purport to be complete and no obligation to update or revise any information herein is being assumed.

Information contained on our website is not incorporated by reference into this report and you should not consider information contained on our website to be part of this report or any other report we file with the SEC.

ABOUT EAGLE POINT CREDIT COMPANY

The Company is a non-diversified, closed-end management investment company. The Company’s primary investment objective is to generate high current income with the secondary objective to generate capital appreciation, primarily through investment in equity and junior debt tranches of CLOs. The Company is externally managed and advised by Eagle Point Credit Management LLC. The Company makes certain unaudited portfolio information available each month on its website in addition to making certain other unaudited financial information available on its website (www.eaglepointcreditcompany.com). This information includes (1) an estimated range of the Company’s NII and realized capital gains or losses per share of common stock for each calendar quarter end, generally made available within the first fifteen days after the applicable calendar month end, (2) an estimated range of the Company’s NAV per share of common stock for the prior month end and certain additional portfolio-level information, generally made available within the first fifteen days after the applicable calendar month end, and (3) during the latter part of each month, an updated estimate of NAV, if applicable, and, with respect to each calendar quarter end, an updated estimate of the Company’s NII and realized capital gains or losses per share for the applicable quarter, if available.

FORWARD-LOOKING STATEMENTS

These materials may contain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Statements other than statements of historical facts included in this presentation may constitute forward-looking statements and are not guarantees of future performance or results and involve a number of risks and uncertainties. Actual results may differ materially from those in the forward-looking statements as a result of a number of factors, including those described in the prospectus and the Company’s other filings with the SEC. The Company undertakes no duty to update any forward-looking statement made herein. All forward-looking statements speak only as of the date of this presentation.

1. The CSLLI tracks the investable universe of the US dollar-denominated leveraged loan market. The performance of an index is not an exact representation of any particular investment, as you cannot invest directly in an index. Similarly, since 2001, from a total return perspective, the S&P/LSTA Leveraged Loan Index experienced only two down full calendar years (2008 and 2015 with returns of -29.1% and -0.7%, respectively). The S&P/LSTA Leveraged Loan Index is a market value-weighted index designed to measure the performance of the U.S. leveraged loan market based upon weightings, spreads and interest payments.

INTRODUCTION TO ECC

Track Record: Common Stock Total Return and Price to Book Ratio

For the period of October 7, 2014 – October 29, 2021:

- ECC generated a total return¹ of 77.15% versus 72.62% for the S&P BDC Index² (annualized net total return of 8.43% for ECC versus 8.03% for the S&P BDC Index)
- ECC traded at an average premium to book value of 11.3% while the S&P BDC Index² traded at an average discount of -7.0%

Value of \$100 Invested

Price to Book Ratio³

Past performance is not indicative of, or a guarantee of, future performance.

1. Total return is calculated as the percent change in the value of \$100 invested in ECC common stock at the time of the Company's IPO and assumes that any dividends or distributions are reinvested at the applicable payment date. Future results may vary and may be higher or lower than those shown.
2. The S&P BDC Index is designed to track leading business development companies (BDCs) that trade on NYSE and NASDAQ and satisfy market capitalization and equity requirements. Although ECC is not a BDC, BDCs generally invest in high yielding credit investments, as does ECC. In addition, similar to ECC, BDCs generally elect to be classified as a regulated investment company under the U.S. Internal Revenue Code of 1986, as amended, which generally requires an investment company to distribute its taxable income to shareholders. You cannot invest directly in an index.
3. Price to book is calculated as price per share divided by book value per share, which for ECC, reflects management's reported estimate of book value for periods where final determined book values are not available. Future results may vary and may be higher or lower than those shown.

INVESTMENT PROCESS

Private Equity Approach to Fixed Income Investing

Eagle Point employs a process that we believe is more akin to a private equity-style investment approach than to the typical process used by many investors in fixed income securities

Investment Strategy and Process

- Proactive sourcing of investment opportunities
- Utilization of our methodical and rigorous investment analysis and due diligence process
- Involvement at the CLO formation and structuring stage enables us to influence the key terms and conditions of the investment for significant primary market investments
- Ongoing monitoring and diligence

Objective of the Process

- Outperformance relative to the CLO market
 - In the primary market, we seek to invest in CLO securities that have the potential to outperform other similar CLO securities issued within the respective vintage period

Note: Reflects the Adviser's current opinions and investment process only, which are subject to change without notice. There is no assurance that the Company will achieve its objective or that the Adviser's investment process will achieve its desired results.

CLO EQUITY OVERVIEW

CLO EQUITY OVERVIEW

Why Invest in CLO Equity?

We believe that CLO equity provides an attractive way to obtain exposure to loans

Distribution of CLO Equity IRRs U.S. CLOs (2002 – 2011 Vintages)¹

- CLO equity has historically generated strong absolute returns with a low loss rate

CLO Equity Attributes

- Potential for strong absolute and risk-adjusted returns
- Expected shorter duration high-yielding credit investment with potential for high quarterly cash distributions
- Expected protection against rising interest rates²
- Expected low-to-moderate correlation over the long-term with fixed income and equity

Past performance is not indicative of, or a guarantee of, future performance.

Source: Compiled by Eagle Point based on data from Intex, Bloomberg, and Moody's Investors Service. As of November 2, 2017.

1. This chart shows certain performance data for CLO 1.0 vintages. For this purpose, CLO 1.0 vintages are defined as US broadly syndicated cash flow CLOs that were originated from 2002 to 2011. Information for later vintage CLOs is not as complete and is therefore not shown. The figures presented in this report do not reflect any projections regarding the returns of any investment strategy and all returns earned on CLO investments will be reduced by any applicable expenses and management fees. Actual performance of a CLO investment will vary and such variance may be material and adverse, including the potential for full loss of principal. In particular, ECC is only invested in CLOs issued after 2011 (the CLO 2.0 period) and no representation is being made with respect to the historical or future performance of such later issued CLOs. CLO investments involve multiple risks, including unhedged credit exposure to companies with speculative-grade ratings, the use of leverage and pricing volatility. The analysis was prepared by Eagle Point based on its proprietary analysis of data sourced from Intex, Bloomberg, Moody's Investors Service, and proprietary CLO Manager presentations. While the data and information contained in this report have been obtained from sources that Eagle Point considers reliable, Eagle Point has not independently verified all such data and does not represent or warrant that such data and information are accurate or complete, and thus they should not be relied upon as such. In addition, for purposes of this analysis, IRRs were calculated at the CLO level net of all CLO-related expenses and some of such IRRs have certain inherent limitations as they are calculated based on certain underlying assumptions, which may under or over compensate for the impact, if any, of certain market factors and financial risk, such as lack of liquidity, macroeconomic factors and other similar factors. The IRR calculations assume an initial cash investment equal to the par balance of the equity tranche. For redeemed CLOs, the equity IRR is based on reported Intex cash flows or manager reported realized returns where Intex data was not available. For active CLOs, the equity IRR is based on reported Intex cash flows and assumes a terminal equity value equal to the CLO's NAV as at November 2, 2017. Such assumptions may not be reflective of actual market conditions in the past, present or future. **Additional information relating to this analysis is available upon request.**
2. The Adviser expects CLO equity to provide some measure of protection against rising interest rates when LIBOR is greater than the LIBOR floor on a CLO's underlying assets (which can typically range from 0.00% to 1.00% depending on the loan). However, CLO equity is also subject to other forms of interest rate risk.

CLO EQUITY OVERVIEW

Senior Secured Loans are the Raw Materials of CLOs

Senior	Senior position in a company's capital structure
Secured	First lien security interest in a company's assets
Floating Rate	Mitigates interest rate risk associated with fixed rate bonds ¹
Low LTV	Senior secured loans often have a loan-to-value ratio of approximately 40-60% ²

However, CLO equity is also subject to other forms of interest rate risk.
2. Loan-to-value is typically based on market values as determined in an acquisition, by the public in the case of publicly traded companies, or by private market multiples and other valuation methodologies in the case of private companies.
3. No representation is being made as to the applicability of historical relative recovery rates for future periods.

CLO EQUITY OVERVIEW

Loan Market Repayment Rate

Loan repayments provide capital for reinvestment within CLOs

Annual Repayment Rate

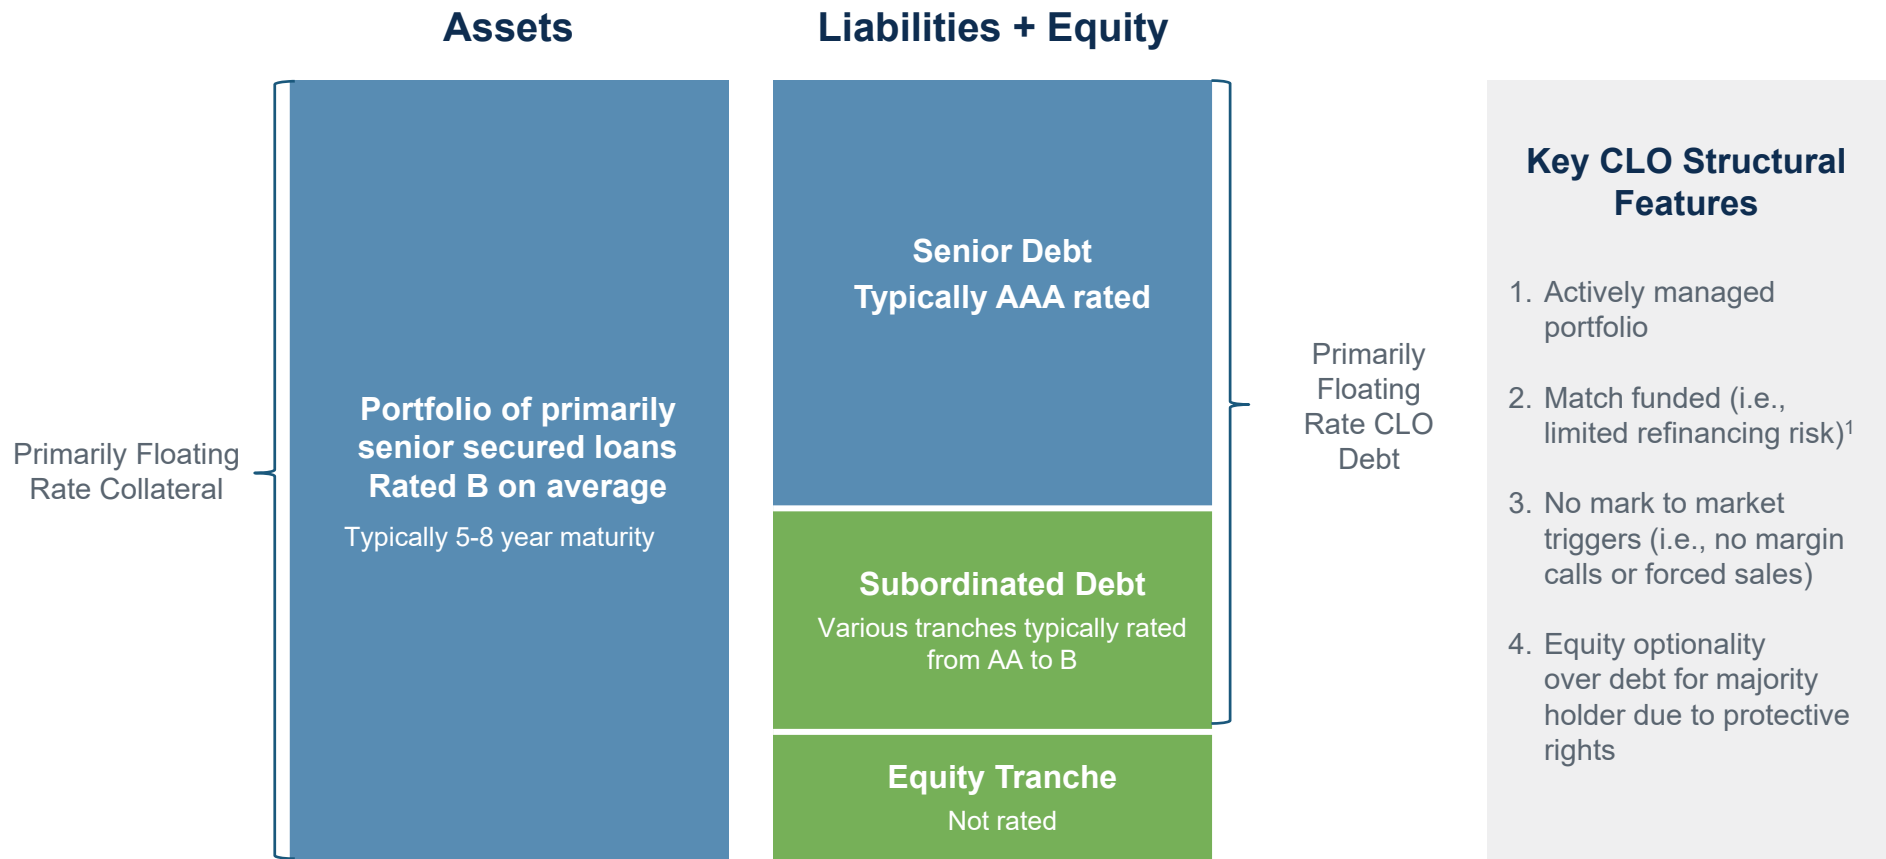

Source: S&P LCD. Data as of September 30, 2021.

CLO EQUITY OVERVIEW

CLOs are Securitizations of a Portfolio of Senior Secured Loans

ECC invests primarily in the equity and subordinated debt tranches

The CLO structure highlighted on this page is a hypothetical structure, and the structure of CLOs in which the Company invests may vary from the example.

1. Since a CLO's indenture typically requires that the maturity dates of a CLO's assets (typically 5 to 8 years from the date of issuance of a senior secured loan) be shorter than the maturity date of the CLO's liabilities (typically 12 to 13 years), CLOs generally do not face refinancing risk on the CLO debt. However, CLO investors do face reinvestment risk with respect to a CLO's underlying portfolio. In addition, in most CLO transactions, CLO debt investors are subject to prepayment risk in that the holders of a majority of the equity tranche can direct a call or refinancing of a CLO, which would cause the CLO's outstanding CLO debt securities to be repaid at par.

1. Certain of the information contained herein is unaudited. The information shown above is derived from the Company's 2021 Semiannual Report and 2020 Annual Report, and interim quarterly unaudited financial statements and/or other related financial information and is a graphical presentation for information previously provided on page 22.

2. Dollar amounts are per share of common stock and are based on a daily weighted average of shares of common stock outstanding for the period.

3. "Recurring Portfolio Cash Distributions Received" include quarterly distributions from CLO equity and debt investments and distributions from loan accumulation facilities in excess of capital invested and exclude funds received from CLOs called. Such distributions will vary from period to period and may be adversely affected by developments in the market. No representation is being made that such distributions will continue in the future at the same levels or at all, and nothing herein constitutes a guarantee of future distributions.

4. See note 8 on page 22.

5. To date, a portion of common stock distributions has been estimated to be a return of capital as noted under the Tax Information section on the Company's website. The actual components of the Company's distributions for U.S. tax reporting purposes can only be finally determined as of the end of each fiscal year of the Company and are thereafter reported on Form 1099-DIV. A distribution comprised in whole or in part by a return of capital does not necessarily reflect the Company's investment performance and should not be confused with "yield" or "income". Future distributions may consist of a return of capital. **Not a guarantee of future distributions or yield.**

1. The summary of portfolio investments and cash shown is based on the estimated fair value of the underlying positions and cash net of pending trade settlements as of September 30, 2021.

2. The information presented herein is on a look-through basis to the collateralized loan obligation, or "CLO", equity and related investments (i.e., loan accumulation facilities) held by the Company as of September 30, 2021 (except as otherwise noted) and reflects the aggregate underlying exposure of the Company based on the portfolios of those investments. The data is estimated and unaudited and is derived from CLO trustee reports received by the Company relating to September 2021 and from custody statements and/or other information received from CLO collateral managers and other third party sources. Information relating to the market price of underlying collateral is as of month end; however, with respect to other information shown, depending on when such information was received, the data may reflect a lag in the information reported. As such, while this information was obtained from third party data sources, September 2021 trustee reports and similar reports, other than market price, it does not reflect actual underlying portfolio characteristics as of September 30, 2021 and this data may not be representative of current or future holdings. The weighted average remaining reinvestment period information is based on the fair value of CLO equity investments held by the Company at the end of the reporting period.

3. We obtain exposure in underlying senior secured loans indirectly through CLOs and related investments.

4. Credit ratings shown are based on those assigned by Standard & Poor's Rating Group, or "S&P," or, for comparison and informational purposes, if S&P does not assign a rating to a particular obligor, the weighted average rating shown reflects the S&P equivalent rating of a rating agency that rated the obligor provided that such other rating is available with respect to a CLO equity or related investment held by us. In the event multiple ratings are available, the lowest S&P rating, or if there is no S&P rating, the lowest equivalent rating, is used. The ratings of specific borrowings by an obligor may differ from the rating assigned to the obligor and may differ among rating agencies. For certain obligors, no rating is available in the reports received by the Company. Such obligors are not shown in the graphs and, accordingly, the sum of the percentages in the graphs may not equal 100%. Ratings below BBB- are below investment grade. Further information regarding S&P's rating methodology and definitions may be found on its website (www.standardandpoors.com). This data includes underlying portfolio characteristics of the Company's CLO equity and loan accumulation facility portfolio.

- Industry categories are based on the S&P industry categorization of each obligor as reported in CLO trustee reports to the extent so reported. Certain CLO trustee reports do not report the industry category of all of the underlying obligors and where such information is not reported, it is not included in the summary look-through industry information shown; if they were reflected, they would represent 5.1%. As such, the Company's exposure to a particular industry may be higher than that shown if industry categories were available for all underlying obligors. In addition, certain underlying obligors may be re-classified from time to time based on developments in their respective businesses and/or market practices. Accordingly, certain underlying borrowers that are currently, or were previously, summarized as a single borrower in a particular industry may in current or future periods be reflected as multiple borrowers or in a different industry, as applicable.
