Strong Asset Quality

Credit quality remains very strong. Nonperforming assets were at a very low 7 basis points of total assets at June 30, 2022. The Bank had modest net loan charge-offs of only \$1.3 million for the quarter.

During the second quarter, the Bank recorded a provision for credit losses of \$31 million, which was primarily driven by loan growth.

Capital Strength

The Bank's Tier 1 leverage ratio was 8.59% at June 30, 2022, compared to 8.70% at March 31, 2022.

Continued Franchise Growth

Loan Originations

Loan originations were \$22.0 billion for the quarter, our best quarter ever. This was up 31.1% from the same quarter a year ago, primarily due to increases in single family and multifamily lending.

Single family loan originations were 48% of the total loan origination volume for the quarter and had a weighted average loan-to-value ratio of 61%. In addition, multifamily and commercial real estate loans originated were 14% of total originations and had a weighted average loan-to-value ratio of 52%.

Loans totaled \$151.5 billion at June 30, 2022, up 23.1% compared to a year ago. Our loan growth was primarily due to increases in single family, multifamily, stock secured and capital call lines of credit, partially offset by a decrease in loans under the Small Business Administration's Paycheck Protection Program ("PPP").

Investments

Total investment securities at June 30, 2022 were \$31.2 billion, a 2.9% increase compared to the prior quarter and a 36.1% increase compared to a year ago.

High-quality liquid assets, including eligible cash, totaled \$28.2 billion at June 30, 2022, and represented 14.7% of quarterly average total assets.

Deposit Growth and Funding

Total deposits increased to \$165.6 billion, up 23.0% compared to a year ago. Deposits were our primary source of funding at June 30, 2022, and represented 93% of our funding base.

At June 30, 2022, checking deposit balances were 71.6% of total deposits.

Other sources of funding at June 30, 2022 included short-term and long-term FHLB advances, which totaled \$11.0 billion, up 22.2% compared to a year ago.

Deposits had an average rate paid of 9 basis points during the quarter, and average total funding costs were 16 basis points during the quarter.

Wealth Management

Total wealth management assets were \$246.8 billion at June 30, 2022, down 10.0% compared to the prior quarter and up 2.5% compared to a year ago. The decrease in wealth management assets for the quarter was due to market decline. The increase in wealth management assets for the year was due to net client inflow, partially offset by market decline.

Wealth management revenues totaled \$232 million for the quarter, up 26.4% compared to last year's second quarter. Such revenues represented 15.4% of the Bank's total revenues for the quarter.

Wealth management assets at June 30, 2022 included investment management assets of \$100.2 billion, brokerage assets and money market mutual funds of \$127.5 billion, and trust and custody assets of \$19.1 billion.

Income Statement and Key Ratios

Revenue Growth

Total revenues were \$1.5 billion for the quarter, up 22.6% compared to the second quarter a year ago.

Net Interest Income Growth

Net interest income was \$1.2 billion for the quarter, up 24.1% compared to the second quarter a year ago. The increase in net interest income resulted primarily from growth in average interest-earning assets and the increase in net interest margin.

Net Interest Margin

The net interest margin increased to 2.80% in the second quarter, from 2.68% in the prior quarter. The increase was due to lower average cash balances, as well as average yields on interest-earning assets increasing more than the offsetting increase in average funding costs.

Noninterest Income

Noninterest income was \$263 million for the quarter, up 16.0% compared to the second quarter a year ago. The increase was primarily driven by higher wealth management fees, partially offset by a decrease in income from investments in life insurance.

Noninterest Expense and Efficiency Ratio

Noninterest expense was \$913 million for the quarter, up 19.7% compared to the second quarter a year ago, primarily due to continued investments in our business expansion, including hiring additional colleagues to support our growth and information systems initiatives, as well as higher travel and entertainment.

The efficiency ratio was 60.5% for the quarter, compared to 62.0% for last year's second quarter.

Income Taxes

The Bank's effective tax rate for the second quarter of 2022 was 23.4%, compared to 17.4% for the second quarter a year ago. The increase was primarily the result of lower excess tax benefits upon vesting of stock awards.

Non-GAAP Financial Measures

Our management uses and believes that investors benefit from using certain non-GAAP measures of our financial performance, which include tangible book value per common share, return on average tangible common shareholders' equity, and net interest income on a fully taxable-equivalent basis. Management believes that tangible book value per common share and return on average tangible common shareholders' equity are useful additional measures to evaluate our performance and capital position without the impact of goodwill and other intangible assets and preferred stock. In addition, to facilitate relevant comparisons of net interest income from taxable and tax-exempt interest-earning assets, when calculating yields and net interest margin, we adjust interest income on tax-exempt securities and tax-advantaged loans so such amounts are fully equivalent to interest income on taxable sources. We believe that these non-GAAP financial measures, when taken together with the corresponding GAAP financial measures, provide meaningful supplemental information that is not otherwise required by GAAP or other applicable requirements. These non-GAAP financial measures should be considered in addition to, not as a substitute for, financial measures prepared in accordance with GAAP. A reconciliation of the non-GAAP calculation of the financial measure to the most comparable GAAP financial measure is presented in relevant tables in this document.

Explanatory Note

Some amounts presented within this document may not recalculate due to rounding.
