### Note 1. Summary of Significant Accounting Policies

#### Basis of Presentation and Organization

First Republic Bank ("First Republic" or the "Bank") is a California-chartered commercial bank and trust company headquartered in San Francisco with deposits insured by the FDIC. First Republic has operated for 37 years and the current legal entity has been operating since July 1, 2010. Our consolidated financial statements include First Republic and the following wholly-owned subsidiaries: FRIM, FRSC, FRTC Delaware, FRTC Wyoming and FRLC. All significant intercompany balances and transactions have been eliminated.

The accompanying consolidated financial statements are unaudited, but in the opinion of management, reflect all adjustments necessary for a fair presentation of the Bank's results for the periods presented. All such adjustments were of a normal and recurring nature. These consolidated financial statements have been prepared in accordance with GAAP for interim financial information and with the instructions to the Quarterly Report on Form 10-Q adopted by the FDIC. These consolidated financial statements, and notes thereto, for the year ended December 31, 2021, included in the Bank's Annual Report on Form 10-K filed with the FDIC (the "2021 Form 10-K"). Operating results for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for a full year or any future period.

#### Nature of Operations

First Republic and its subsidiaries offer private banking, private business banking and private wealth management. First Republic specializes in delivering exceptional, relationship-based service and provides a complete line of products, including residential, commercial and personal loans, deposit services, and private wealth management, including investment, brokerage, insurance, trust and foreign exchange services. Services are offered through preferred banking or wealth management offices primarily in San Francisco, Palo Alto, Los Angeles, Santa Barbara, Newport Beach and San Diego, California; Portland, Oregon; Boston, Massachusetts; Palm Beach, Florida; Greenwich, Connecticut; New York, New York; Jackson, Wyoming; and Bellevue, Washington.

First Republic originates real estate secured loans and other loans. Real estate secured loans are secured by single family residences, multifamily buildings, and commercial real estate properties and include loans to construct such properties. A substantial majority of the real estate loans that First Republic originates are secured by properties located close to one of its offices. First Republic originates business loans, loans secured by securities and other types of collateral and personal unsecured loans primarily to meet the non-mortgage needs of First Republic's clients. Most of these loans are also made to borrowers in the geographic areas served by the Bank's offices.

First Republic offers its clients various wealth management services. First Republic provides investment management services through FRIM, which earns fee income from the management of equity securities, fixed income securities, balanced portfolios, and alternative investments for its clients. The Trust Company provides trust and custody services. FRSC is a registered broker-dealer that performs brokerage and investment activities for clients. The Bank offers insurance solutions through FRSC. The Bank also offers money market mutual funds to clients through third-party providers and conducts foreign exchange activities on behalf of clients.

### Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentation.

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

### Accounting Standards Adopted in 2022

During the nine months ended September 30, 2022, the Bank adopted the following ASUs issued by the FASB:

# ASU 2020-04—Reference Rate Reform (ASC 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting and subsequent related ASU

Under ASC 848, entities can elect not to apply certain modification accounting requirements to contracts affected by reference rate reform if 1) the contract references LIBOR or another reference rate expected to be discontinued, 2) the modified terms either directly replace or have the potential to replace the rate expected to be discontinued, and 3) any contemporaneous changes either change or have the potential to change the amount and timing of cash flows solely related to the replacement of the reference rate. Contract modifications meeting such criteria can be accounted for as a continuation of the existing contract.

The Bank adopted this guidance effective January 1, 2022. This guidance was adopted prospectively with no impact to the Bank's consolidated financial statements. Upon adoption, all eligible loan contract modifications made prior to December 31, 2022 are accounted for as continuations of the existing loan contracts.

The Bank previously had loans that determined the amount of interest by reference to COFI, which the FHLB of San Francisco ceased calculating and publishing on January 31, 2022. In February 2022, the Bank transitioned outstanding loans indexed to COFI to COFI Repl Index, which is based on Federal COFI plus/minus a spread adjustment equal to the five-year historical median spread between COFI and Federal COFI.

The Bank has loans that reference certain tenors of USD LIBOR, which will cease to be published or cease to be representative after June 30, 2023. In consideration of the timing of the discontinuation of LIBOR, the FASB is expected to issue final guidance to extend the applicable date of ASC 848 to December 31, 2024. The Bank is continuing the assessment of outstanding loans indexed to LIBOR.

#### Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. Actual results could differ from these estimates. Material estimates subject to change include those related to ACL, fair value measurements and income taxes.

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Interest receivable on debt securities available-for-sale	\$	6	\$	4
Interest receivable on debt securities held-to-maturity	\$	169	\$	177

### Credit Quality

The Bank uses external ratings from third party rating agencies, such as Standard & Poor's ("S&P") and Moody's Investors Service ("Moody's"), to determine the credit quality of each security at purchase and to monitor the credit quality of securities in the portfolio on an ongoing basis. For certain securities that do not have an external rating at the security level, an implied external rating is used. This includes securities explicitly or implicitly guaranteed by the Federal Government, securities that are pre-refunded by the issuer or securities that are rated at only the issuer level. For tax-exempt nonprofit debentures and certain tax-exempt municipal securities that do not have an external or implied external rating. Rating changes and creditworthiness of all securities are reviewed at least on a quarterly basis. The ratings are described below, with the S&P rating first and the corresponding Moody's rating indicated parenthetically.

The credit quality indicators for the securities in the held-to-maturity portfolio range from the highest credit rating of AAA (Aaa) to BB (Ba), which reflect the strong overall credit quality of the investment portfolio. The following are descriptions of each credit quality indicator:

- AAA (Aaa) rated securities are considered to be of the highest quality, and reflect the lowest level of credit risk of an obligor.
- AA (Aa) rated securities vary slightly from the AAA (Aaa) rated securities, but are still considered to be of very high quality, and reflect very low credit risk of an obligor.
- A (A) rated securities reflect low credit risk of an obligor, given the likelihood that such an obligor will be more impacted by an adverse economic environment than an AA (Aa) rated obligor.
- BBB (Baa) rated securities reflect moderate credit risk of an obligor, given that such an obligor is assumed to be more susceptible to an adverse economic environment than an A (A) rated obligor.
- BB (Ba) rated securities reflect slightly more than moderate credit risk of an obligor, given that economic uncertainties may result in deterioration of the obligor's ability to meet commitments in the future.

The following tables present the amortized cost of debt securities held-to-maturity by credit quality indicator:

	Held-to-maturity											
(\$ in millions)	AAA (Aaa)		a) AA (Aa)		A (A)		BBB (Baa)		BB (Ba)			Total

Agency commercial MBS		(1)		863						(1)		863	12		
Total	\$	(27)	\$	1,976	\$	(25)	\$	627	\$	(52)	\$	2,603	567		
	_		_		_		_		_						

For available-for-sale debt securities that experienced a decline in fair value below amortized cost, the Bank concluded that it does not intend to nor would it be required to sell any of the securities prior to recovery of the amortized cost. Due to their explicit or implicit guarantee by the Federal Government, the Bank's agency residential MBS and agency commercial MBS have no expected credit losses. Therefore, no ACL was recognized on available-for-sale debt securities as of both September 30, 2022 and December 31, 2021.

### Debt Securities Held-to-Maturity

The Bank's held-to-maturity U.S. Government-sponsored agency securities, agency residential MBS and agency commercial MBS are considered to not have expected credit losses due to the explicit or implicit guarantee by the Federal Government. Therefore, no ACL has been recognized on these securities.

Held-to-maturity debt securities with similar risk characteristics are pooled when developing the ACL. The Bank's ACL on its held-to-maturity securities of U.S. states and political subdivisions (including tax-exempt municipal securities, tax-exempt nonprofit debentures and taxable municipal securities) and corporate debt securities is determined by expert judgment, which is based on historical ratings-based average probabilities of default and industry average LGD to determine expected credit losses over the life of the securities.

The following table presents the activity in the ACL on held-to-maturity debt securities:

	Allowance for Credit Losses

#### Other Disclosures

The Bank pledges investment securities at the Federal Reserve Bank to maintain the ability to borrow at the discount window, or at a correspondent bank as collateral to secure trust funds and public deposits. At September 30, 2022, the carrying value of investment securities pledged was \$5.49 billion, of which \$5.46 billion was unencumbered and available to support additional borrowings.

### Contractual Maturities

The following tables present contractual maturities of debt securities available-for-sale and heldto-maturity. Actual maturities for certain U.S. Government agency securities, U.S. Governmentsponsored agency securities and municipal securities may occur earlier than their stated contractual maturities because the note issuers may have the right to call outstanding amounts ahead of their contractual maturities. In addition, the remaining contractual principal maturities for MBS do not consider prepayments. Expected remaining maturities for MBS can differ from contractual maturities because borrowers have the right to prepay their mortgage obligations, with or without penalties, prior to contractual maturity.

Less: Allowance for credit losses Loans, net	\$	(760) 158,007	\$	(694) 134,262

Real estate loans are secured by single family, multifamily and commercial real estate properties and generally mature over periods of up to thirty years. At September 30, 2022 and December 31, 2021, 52% and 51%, respectively, of the total loan portfolio was secured by California real estate. At September 30, 2022 and December 31, 2021, 59% and 61%, respectively, of single family mortgages fully and evenly amortize until maturity following an initial interest-only period of generally ten years.

As of September 30, 2022, the Bank had pledged \$94.1 billion of loans to secure borrowings of \$11.0 billion from the FHLB, although only \$15.1 billion of collateral was required in connection with the outstanding FHLB advances.

The components of amortized cost for loans exclude interest receivable since the Bank elected to present interest receivable within other assets on the consolidated balance sheets. The following table presents interest receivable on loans held for investment:

(\$ in millions)	Sep	tember 30, 2022	De	cember 31, 2021

### Credit Quality

The Bank's primary credit quality indicator for loans is its internal loan risk grades. The Bank maintains a loan risk grading system that takes into consideration regulatory guidelines and incorporates a number of considerations, such as a borrower's financial condition, adequacy of collateral, and other factors that may impact a borrower's ability to repay the loan. The Bank's internal loan grades apply to all loans and are as follows:

Pass—These loans are performing substantially as agreed, with no current identified material weakness in repayment ability. Any credit or collateral exceptions existing with respect to the loan should be minimal and immaterial, in the process of correction, and not such that they could subsequently impair credit quality and introduce risk of collection.

Special Mention—These loans have potential weaknesses and deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the Bank's credit position at some future date. However, these loans do not expose the Bank to sufficient risk to warrant adverse classification.

Substandard—These loans are inadequately protected by the current worth and paying capacity of the obligor or of the collateral pledged, if any. These loans have a well-defined weakness that jeopardizes the liquidation of the debt.

# NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Doubtful—These loans have weaknesses that make collection or liquidation in full highly improbable. The possibility of some loss is extremely high, but because of certain important and reasonable specific pending factors that may work to the advantage and strengthening of the loan, its classification as a loss is deferred until a more exact status may be determined.

The majority of the Bank's loan portfolio is secured by real estate. A decline in real estate values can negatively impact our ability to recover our investment should the borrower become delinquent. We safeguard against this risk by rarely exceeding an LTV ratio of 80% with respect to real estate lending.

We perform regular monitoring and annual reviews of our loan portfolio to identify and evaluate any deterioration in primary and/or secondary sources of repayment, including evaluations of the borrower's financial condition and value of the collateral. Annual reviews of residential real estate and other loans include an analysis of payment history, collateral value and credit scores. Annual reviews of our larger income property and business loans include analysis of financial statements of the property and/or borrower to determine the current ability to repay outstanding obligations. Updates to risk grades are made, as needed, upon completion of reviews.

For loans that are criticized or classified, the Bank's Special Assets Committee reviews loan grades, reserves and accrual status on a quarterly or more frequent basis. This review includes an evaluation of the market conditions, the property's trends, the borrower and guarantor status, the level of reserves required and loan accrual status.

Additionally, we have an independent, third-party review performed on our loan grades and our credit administration functions each year. The results of the third-party review are presented to the Audit Committee of the Board. These asset review procedures provide management with additional information for assessing and affirming our asset quality.

### Other Real Estate Owned and Residential Mortgage Loans in the Process of Foreclosure

As of both September 30, 2022 and December 31, 2021, the Bank did not have any residential real estate owned (acquired through foreclosure).

The carrying value of residential mortgage loans in the process of foreclosure was \$13 million and \$6 million at September 30, 2022 and December 31, 2021, respectively.

#### Vintage

The following tables present loan balances by credit quality indicator and vintage year of origination or the year of modification if such modifications meet the criteria to be considered a new loan under ASC 310-20, "Nonrefundable Fees and Other Costs." For revolving lines of credit that converted to term loans, if the conversion involved a credit decision, such loans are included in the origination year in which the credit decision was made. If revolving lines of credit converted to term loans without a credit decision, such lines of credit are included in the "Revolving lines of credit converted to term" column in the following tables.

### Allowance for Credit Losses on Loans

The Bank estimates its ACL using quantitative models, expert judgment, qualitative factors and individual assessments. The Bank's estimate incorporates individual loan and/or property level characteristics, macroeconomic forecasts and historical loss rates to determine expected credit losses over the life of its loans. Loans with similar risk characteristics within each class are pooled when developing the allowance, and loans that do not share similar risk characteristics are individually assessed. As of September 30, 2022, the total ACL on loans was \$760 million, and \$728 million was the portion of the ACL attributable to loans with similar risk characteristics, compared to a total ACL on loans of \$694 million as of December 31, 2021, of which \$653 million was attributable to loans with similar risk characteristics. The following is a discussion of the models, expert judgment, qualitative factors and individual assessments the Bank uses to determine its ACL.

### Quantitative Models

For residential real estate, income property, tax-exempt business, and other business loans, expected credit losses are determined by PD/LGD models. For other secured and certain unsecured loans, expected credit losses are determined by loss rate models.

The quantitative models incorporate forward-looking macroeconomic information over a reasonable and supportable period of two years, and a reversion period of one year, after which the Bank reverts to its historical loss rate for the remaining life of the loan. These models also account for prepayments (or repayments) during the life of the loan. The Bank currently uses a single macroeconomic scenario in estimating expected credit losses. On a quarterly or more frequent basis, the Bank's EFC discusses and approves the macroeconomic forecast scenario used for these models and determines whether any changes to the reasonable and supportable period, as well as reversion period, are necessary.

During the reasonable and supportable period, the quantitative models determine estimated loss amounts based on the macroeconomic forecast scenario, contractual maturity dates, prepayment (or repayment) projections and, in most cases, loan specific risk characteristics. Prepayment (or repayment) projections are either developed based on historical experience or modeled using the macroeconomic forecast scenario, contractual maturity dates, and loan specific risk characteristics. Macroeconomic forecasts include various factors, but the most impactful to our loan portfolios are residential home price indices, commercial real estate price indices, apartment price indices, unemployment rates, and interest rates, which impact prepayment (or repayment) estimates. The macroeconomic forecast scenario selected by the EFC as of September 30, 2022 forecasts an appreciation in residential, apartment, and commercial real estate prices and higher interest rates during the reasonable and supportable period. Compared to the scenario as of December 31, 2021, the current scenario forecasts a reduction in residential real estate price appreciation and a higher interest rate environment due to the continued tightening of monetary policy.

For PD/LGD models, loan specific risk characteristics include LTV and credit scores for residential real estate, LTV and debt service coverage ratios for income property loans and tax-exempt business loans, and risk grade and past due status for other business loans. PD/LGD models estimate the likelihood that a loan will default and measure the loss the Bank would incur if that loan defaults. Estimated losses are calculated using the product of PD and LGD to produce a loss rate. For other secured and certain unsecured loans, the loss rate models use the relationship between historical losses, historical macroeconomic factors, and forward-looking macroeconomic information to determine an expected loss rate.

Subsequent to the reasonable and supportable period, the Bank reverts to its historical loss rate and historical prepayment (or repayment) speed on a straight-line basis over the reversion period of one year.

# NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

After the reversion period, the Bank's historical loss rate and historical prepayment (or repayment) speed are used to estimate expected credit losses for the remaining life of the loan. These rates are based on the average net charge-offs and average prepayment (or repayment) speeds, respectively, over a 12-year historical period. The historical period used by the Bank is reviewed at least annually.

### Expert Judgment

For capital call lines of credit and the majority of unsecured loans, expected credit losses are determined by expert judgment. The Bank uses expert judgment to estimate credit losses for these loan types because a quantitative model would not appropriately reflect the specific loan characteristics or other factors that could result in loan losses, specifically, idiosyncratic risks or risks related to newer loan products, not already reflected in the historical loss experience. Expected loan losses are based on credit attributes specific to each loan type. For capital call lines of credit, such attributes used to estimate a lifetime loss rate include loan commitment size and expected line utilization. For unsecured loans, such attributes include external publicly available credit metrics for similar products.

### **Qualitative Factors**

The Bank also maintains a portion of the overall allowance that is comprised of adjustments to historical loss information resulting from asset-specific risk characteristics and current economic conditions. These adjustments are developed using a systematic methodology and are based on loss rates derived using a more adverse macroeconomic forecast scenario than the scenario used for the quantitative models and the Bank's historical loss rates, as well as qualitative factors that are not reflected in the quantitative models or expert judgment, but are likely to impact the measurement of estimated credit losses. The qualitative factors are evaluated on a portfolio by portfolio basis and are intended to address considerations including, but not limited to: the nature and volume of the Bank's loan portfolio changes, the existence and effects of credit concentrations, problem loan trends, lending policies and procedures, and other external factors, such as competition and the legal and regulatory environment.

### Individually Assessed Stock Secured Loans

The Bank applies the collateral maintenance practical expedient to estimate credit losses on its stock secured loan portfolio. Since the underlying collateral is required to be continually adjusted to maintain a fair value greater than or equal to the loan's amortized cost, no expected credit losses are recognized unless the fair value of the collateral is less than the amortized cost of the loan. Expected credit losses are measured at the individual loan level on the excess of amortized cost over the fair value of the collateral.

### Other Individually Assessed Loans

Loans that do not share similar risk characteristics with the other loans in their class are not pooled, but are individually assessed. The following discussion describes these individually assessed loans.

*Collateral Dependent Loans:* The Bank considers loans (1) for which the repayment is expected to be provided substantially through the operation or sale of collateral and the borrower is experiencing financial difficulty, or (2) where foreclosure is probable to be collateral dependent. Expected credit losses are measured at the individual loan level. If the fair value of the collateral, net of selling costs, is less than the loan's amortized cost, the Bank recognizes expected credit losses in the amount of the difference. At September 30, 2022, the Bank's collateral dependent loans were fully collateralized and primarily secured by residential real estate.

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

*TDR Loans:* The Bank grants concessions in TDRs when a borrower is experiencing financial difficulties. TDR loans that are collateral dependent follow the assessment described under "Collateral Dependent Loans" above. For TDR loans that are not collateral dependent, expected credit losses are measured at the individual loan level and are based on expected future cash flows. If the present value of expected future cash flows, discounted at the loan's effective interest rate, is less than the loan's amortized cost, the Bank recognizes expected credit losses in the amount of the difference.

*Criticized or Classified Loans:* For criticized or classified loans (that are not collateral dependent or TDRs), expected credit losses are also individually assessed based on consideration of individual risk characteristics that affect the collectability of the loan but are not reflected in the quantitative model.

### PPP Loans

Loans originated by the Bank under the PPP are 100% guaranteed by the SBA. Due to this explicit guarantee, PPP loans are considered not to have any expected credit losses. Therefore, no ACL has been recognized on these loans.

### Provision (Reversal of Provision) for Credit Losses and Changes in the Allowance for Credit Losses

The following table presents information related to the provision (reversal of provision) for credit losses:

		Quarte Septen		Nine Months Ended September 30,				
(\$ in millions)		2022		2021		2022		2021

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

As of September 30, 2022, the total ACL on loans was \$760 million, compared to \$729 million as of June 30, 2022 and \$694 million as of December 31, 2021. The increase in the total ACL on loans as of September 30, 2022 compared to June 30, 2022 was primarily due to loan growth. The increase in total ACL on loans as of September 30, 2022 compared to December 31, 2021 was primarily due to loan growth, which was partially offset by a reduction in ACL due to the improvements in individually assessed loans.

### Allowance for Credit Losses on Unfunded Loan Commitments

To estimate the ACL on unfunded loan commitments, the Bank determines the probability of funding based on historical utilization statistics for unfunded loan commitments. Expected credit losses are determined based on the dollar amounts expected to fund, and the loss rates that are calculated using the same assumptions as the associated funded balance. The loss rate represents expected credit losses over the life of the loans. The increases in the ACL on unfunded loan commitments as of September 30, 2022 compared to June 30, 2022 and December 31, 2021 were primarily due to an increase in unfunded commitments. The following table presents the changes in the ACL on unfunded loan commitments:

		At or for th Ended Sep		At or for the Nine Month Ended September 30,					
(\$ in millions)	_	2022	 2021		2022	2021

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

During the quarters and nine months ended September 30, 2022 and 2021, TDRs were primarily modified through interest rate reductions, repayment plans and extensions of the maturity date. The following table presents loans modified in TDRs during the periods indicated:

	 Quarte Septen	r En ibei	ded 30,	Nine Months Ended September 30,					
(\$ in millions)	 2022		2021		2022		2021		
Residential real estate Single family	\$ 1	\$	10	\$	2	\$	10		
Other Unsecured	_		_		1		_		
Total	\$ 1	\$	10	\$	3	\$	10		

TDRs that were modified during the twelve months ended September 30, 2022 and 2021 for which there was a subsequent payment default totaled \$3 million for the quarter and nine months ended September 30, 2022, and \$29 million for the quarter and nine months ended September 30, 2021. These TDRs consisted of single family loans and HELOCs. The ACL on these loans was individually assessed at the loan level and was based on the collateral dependent methodology.

### Note 5. Mortgage Banking Activities

The Bank retains the MSRs on substantially all loans sold. The following table presents information related to loans serviced for others, MSRs, and net loan servicing fees:

		At or for t Ended Se			At or for the Nine Months Ended September 30,					
(\$ in millions)		2022	2021			2022		2021		
Loans serviced for others: Balance at beginning of period Loans sold Repayments Loans purchased Loans repurchased Balance at end of period	\$	3,919 	\$	5,640 17 (540) — 5,117	\$	4,677 5 (998) (51) (1) 3,632	\$	7,094 65 (2,042) — 5,117

Total <sup>(2)</sup>	Ş	1	\$		Ş	4	Ş	3		

<sup>(1)</sup> Included in other assets on the consolidated balance sheets.

<sup>(2)</sup> Included in other income, net on the consolidated statements of income and comprehensive income.

Refer to Note 8, "Goodwill and Intangible Assets," for disclosures of the gross carrying value, accumulated amortization, valuation allowance and carrying value of MSRs.

### Note 6. Variable Interest Entities

The Bank's involvement with VIEs includes its interests in tax credit investments, other investments and securitizations. The Bank consolidates a VIE when it is the primary beneficiary. The Bank is the primary beneficiary if it has a controlling financial interest, which includes both the power to direct the activities that most significantly impact the VIE and a variable interest that could potentially be significant to the VIE. The discussion below provides information about our variable interests. Since the Bank is not the primary beneficiary of any of its VIEs, it does not consolidate these interests.

The Bank has a variable interest in a securitization trust related to its retention of a 5% interest in the investment securities issued in a securitization of single family loans. The retained investments consist of senior and subordinated tranches and an interest-only strip, and are classified as either available-for-sale or held-to-maturity debt securities.

The Bank has variable interests in low-income housing tax credit funds that are designed to generate a return primarily through the realization of federal tax credits. These investments are typically limited partnerships in which the general partner, other than the Bank, holds the power over significant activities of the VIE.

The Bank has variable interests in other investments, which are accounted for under the equity method.

In addition, the Bank has a variable interest related to its reimbursement obligation to Freddie Mac for certain losses from the securitization of multifamily loans.

All assets and liabilities recorded associated with transactions with VIEs are not consolidated. The following table summarizes the assets and liabilities recorded on the consolidated balance sheets associated with transactions with VIEs:

	Unconsolidated VIEs						
(\$ in millions)		ember 30, 2022	December 31, 2021				
Assets:							
Debt securities	\$	8	\$	10			
Tax credit investments		1,285		1,220			
Other investments		117		77			
Total Assets		1,410		1,307			
Liabilities:							
Unfunded commitments—tax credit investments		628		540			
Unfunded commitments—other investments		55		18			
Total Liabilities		683		558			
Net Assets	\$	727	\$	749			

The Bank's exposure to loss with respect to VIEs that are not consolidated includes the Bank's investment in these assets of \$1.4 billion and \$1.3 billion at September 30, 2022 and December 31, 2021, respectively. The Bank's exposure to loss related to the reimbursement obligation is 12% of the multifamily loans securitized in 2018, or \$30 million at both September 30, 2022 and December 31, 2021.

### Note 7. Leases

The Bank primarily leases corporate, preferred banking and wealth management offices, as well as equipment, with remaining lease terms ranging from 1 year to 19 years. The majority of our office leases include one or more options to extend the lease term, primarily up to 5 years at a time. From time to time, the Bank may also enter into subleases with third parties for certain leased real estate properties.

The following tables present information related to leases:

(\$ in millions)	Sep	tember 30, 2022	Dec	cember 31, 2021
Supplemental balance sheet information: Lease assets <sup>(1)</sup> Lease liabilities <sup>(1)</sup>	\$ \$	1,452 1,548	\$ \$	1,332 1,405

Refer to Note 5, "Mortgage Banking Activities," for further information about MSRs.

### Note 9. Borrowings

The Bank uses FHLB advances primarily as a funding source for long-term debt, and, in certain cases, for short-term borrowings. Other sources of funding include federal funds purchased, senior notes and subordinated notes. Short-term borrowings have an original maturity of one year or less. Long-term debt has an original maturity in excess of one year. The following table presents the carrying values, interest expense and components of short-term borrowings and long-term debt:

					Interest Expense							
		Carryin	g Val	ue		Quarter Septer			Ni		nths Ended nber 30,	
(\$ in millions)	Se	September 30, 2022		cember 31, 2021 2022 2021		2021	2022		2	2021		
Short-term borrowings:												
Federal funds purchased	\$		\$	_	\$	2	\$	_	\$	2	\$	—
FHLB advances		5,100				45		_		54		_
Total <sup>(1)</sup>		5,100		_		47		_		56		
Long-term debt:												
FHLB advances		5,900		3,700		21		28		41		104
Senior notes <sup>(2)</sup>		500		998		3		6		13		18
Subordinated notes <sup>(2)</sup>		779		779		9		9		27		27
Total long-term debt		7,179		5,477		33		43		81		149
Total borrowings	\$	12,279	\$	5,477	\$	80	\$	43	\$	137	\$	149

<sup>(1)</sup> At September 30, 2022, the weighted average interest rate of our short-term borrowings, which consisted of short-term FHLB advances, was 3.03% At December 31, 2021, the Bank had no short-term borrowings.

(2) Carrying value represents the principal balance, net of unamortized issuance discounts and deferred issuance costs. Interest expense includes amortization of issuance discounts and deferred issuance costs, which are amortized over the contractual or estimated life using a level yield methodology.

#### FHLB Advances

FHLB advances may be either adjustable-rate in nature or fixed for a specific term. At September 30, 2022, the Bank had \$5.1 billion of short-term FHLB advances. At September 30, 2022, all of the long-term FHLB advances were fixed-rate for a specific term. At September 30, 2022, the contractual maturities and weighted average contractual rates of long-term FHLB advances were as follows:

	Se	September 30, 20			
(\$ in millions)		mount	Rate		
FHLB advances maturing in:					
October 1 - December 31, 2022	\$	_	— %		
2023		2,525	1.80 %		
2024		2,175	2.17 %		
2025		800	0.88 %		
2026		400	0.65 %		
2027 and thereafter			— %		
Total	\$	5,900	1.73 %		

The Bank had no prepaid FHLB advances for the quarter and nine months ended September 30, 2022, compared to \$1.3 billion and \$4.1 billion for the quarter and nine months ended September 30, 2021, respectively. Prepayment penalties for FHLB advances, which are included in other noninterest expense, were \$2 million and \$13 million for the quarter and nine months ended September 30, 2021, respectively.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

In connection with outstanding FHLB advances, at September 30, 2022 and December 31, 2021, the Bank owned FHLB stock of \$342 million and \$115 million, respectively. At both September 30, 2022 and December 31, 2021, the Bank was required to own FHLB stock at least equal to 2.7% of outstanding FHLB advances.

### Senior Notes and Subordinated Notes

The following table presents the principal balances, carrying values, coupon rates, optional redemption dates and maturity dates of the Bank's unsecured, term, fixed-to-floating rate senior notes, and fixed-rate subordinated notes as of September 30, 2022. The 2.500% Senior Notes due 2022 with a principal balance of \$500 million were redeemed in the second quarter of 2022, and, therefore, were no longer outstanding as of September 30, 2022.

	September 30, 2022													
(\$ in millions)		ncipal lance	Ca Va	rrying llue <sup>(1)</sup>	Rate	Optional Redemption Date <sup>(2)</sup>	Maturity Date <sup>(3)</sup>							
Senior notes: Fixed-to-floating rate, issued February 2020	\$	500	\$	500	1.912% (4)	February 12, 2023	February 12, 2024							
Subordinated notes: Fixed-rate, issued August 2016 Fixed-rate, issued February 2017	\$ \$	400 400	\$ \$	389 390	4.375 % 4.625 %	February 1, 2046 August 13, 2046	August 1, 2046 February 13, 2047							

 $^{\mbox{(1)}}$  Principal balance, net of unamortized issuance discounts and deferred issuance costs.

 $^{\mbox{\tiny (2)}}$  The Bank has the option to redeem these notes prior to their maturity at the dates specified.

 $^{\scriptscriptstyle (3)}$  Unless previously redeemed, the notes will mature at the dates specified.

(4) Interest is paid at a fixed rate of 1.912% per annum from February 12, 2020 through February 12, 2023, and is paid based on a floating rate of compounded SOFR plus 0.620% beginning February 12, 2023.

### Available Borrowing Capacity

Our unused, available borrowing capacity at the FHLB and the Federal Reserve Bank discount window at September 30, 2022 was \$57.0 billion and \$4.0 billion, respectively. This available borrowing capacity is supported by pledged loans at the FHLB and investment securities at the Federal Reserve Bank.

### Note 10. Derivative Financial Instruments

The Bank has freestanding derivative assets and liabilities and currently does not have any derivatives designated as hedging instruments. The Bank recognizes all derivatives on the balance sheet at fair value, with changes in fair value recognized in earnings. The Bank has elected to present its derivative assets and derivative liabilities on a gross basis on its balance sheet. The Bank does not conduct proprietary trading activities in derivative instruments for its own account.

The Bank has derivative assets and liabilities consisting of foreign exchange contracts executed with clients. In these transactions, the Bank offsets the client exposure with another financial institution counterparty, such as a major investment bank or a large commercial bank. The Bank does not retain significant foreign exchange risk. The Bank does retain credit risk, both to the client and the financial institution counterparty, which is evaluated and managed by the Bank in the normal course of its operations. In addition, the Bank has foreign exchange contracts associated with client deposits denominated in various foreign currencies. Management does not currently anticipate non-performance by any of the counterparties.
The amounts presented in the following table include foreign exchange contracts with both the client and the financial institution counterparties:

		Sep	er 30, 2			Dec	embe					
		Fair Value								Fair	Value	
(\$ in millions)	Cor	tional or ntractual mount		vative ets <sup>(1)</sup>		ivative ilities <sup>(1)</sup>	Cor	tional or ntractual mount		vative ets <sup>(1)</sup>		ivative lities <sup>(1)</sup>
Foreign exchange contracts	\$	5,639	\$	72	\$	77	\$	5,505	\$	37	\$	31

<sup>(1)</sup> Derivative assets are included in other assets and derivative liabilities are included in other liabilities on the consolidated balance sheets.

The credit risk associated with these derivative instruments is the risk of non-performance by the counterparties to the contracts. The Bank's counterparty credit exposure is equal to the amount reported as a derivative asset on the Bank's balance sheet. To mitigate this risk, the Bank enters into master netting and bilateral collateral agreements with certain counterparties. These agreements allow the Bank to settle its derivative contracts with such counterparties on a net basis and to offset the net derivative exposure against the related collateral in the event of default.

The following table presents additional information related to the Bank's foreign exchange derivative contracts:

	1	Fotal	Su	tracts Not ubject to Master Netting ingements		(	Contr	acts Su	bject	to Mast	er N	etting Aı	rrang	jements

<sup>(1)</sup> Collateral presented in the table above is limited to the amount required to settle the net derivative position and does not include any excess collateral.

## Note 11. Fair Value Measurements

The Bank uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Under ASC 820, "Fair Value Measurement," fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Debt securities available-for-sale, mutual funds, marketable equity securities and derivative instruments are recorded at fair value on a recurring basis. Additionally, from time to time, the Bank may be required to record other assets at fair value on a nonrecurring basis, which typically involve adjustments of individual assets or application of the lower-of-cost-or-market accounting. Nonrecurring fair value adjustments of loans are generally based on the fair value of the underlying collateral of the loan, adjusted for certain factors such as estimated costs to sell and current market conditions. Nonrecurring fair value adjustments of loans held for sale, MSRs and other real estate owned result from the application of lower-of-cost-or-market accounting.

Although management uses its best judgment in estimating fair value, there are inherent weaknesses in any estimates that are made at a discrete point in time based on relevant market data, information about the financial instruments and other factors. Estimates of fair value of instruments without quoted market prices are subjective in nature and involve various assumptions that are matters of judgment. Changes in the assumptions used could significantly affect these estimates.

The estimated fair values presented neither include nor give effect to the values associated with the Bank's existing client relationships, lending and deposit office networks, or certain tax implications related to the realization of unrealized gains or losses.

## Fair Value Hierarchy

Under ASC 820, the Bank groups its assets and liabilities at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

- Level 1—Valuation is based on quoted prices for identical instruments traded in active markets.
- Level 2—Valuation is based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market.
- Level 3—Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

It is the Bank's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements, in accordance with the fair value hierarchy of ASC 820.

## Recurring Fair Value Measurements

The following is a description of valuation methodologies used for assets and liabilities recorded at fair value on a recurring basis.

Available-for-sale debt securities: For most debt securities, the Bank uses quoted prices obtained through third-party valuation sources. Valuation techniques are generally based on observable market inputs appropriate for the type of security being measured. In some instances, prices are obtained from dealer quotes. The fair value of tax-exempt nonprofit debentures and certain municipal securities is determined using estimated future cash flows or other model-based valuation methods using inputs similar to market pricing, adjusted for liquidity risk. For level 3 taxable municipal securities, the Bank estimates the fair value using discounted expected future cash flows and applies a liquidity risk yield premium to account for liquidity considerations since the bond is not publicly traded. The weighted average liquidity risk yield premium, which is a significant unobservable input, was 50 bps as of both September 30, 2022 and December 31, 2021. An unfavorable change in the general business and credit environments could cause an increase in the liquidity risk yield premium, resulting in a decrease in the fair value of the investment. In addition, the Bank's management considers interest rate reset frequency, spread to index, market yield curves and the underlying bond rating at the time of valuation.

*Equity securities measured at fair value:* The Bank's mutual funds and marketable equity securities are valued using quoted market prices from the active exchange on which the securities are traded. Mutual funds are valued using the NAV per share using quoted market prices.

*Derivatives:* Derivative assets and liabilities consist of foreign exchange contracts. The Bank uses current market prices to determine the fair value of foreign exchange contracts.

#### Nonrecurring Fair Value Measurements

The following is a description of valuation methodologies used in estimating the fair value of assets measured at fair value on a nonrecurring basis.

*Loans:* The fair value of loans with nonrecurring fair value adjustments is generally based on the fair value of the underlying collateral, primarily real estate, adjusted for certain factors such as estimated costs to sell and current market conditions.

*MSRs:* The fair value of MSRs is based on a present value calculation of expected future cash flows, with assumptions regarding prepayments, discount rates, cost to service, escrow account earnings, contractual servicing fees and ancillary income.

The following table presents the assets measured at fair value on a nonrecurring basis that were held on the balance sheet:

(\$ in millions)	Le	vel 1	Le	vel 2	Le	vel 3		otal

## Note 12. Commitments and Contingencies

In the ordinary course of business, the Bank enters into transactions that involve financial instruments with off-balance sheet risks to meet the financing needs of the Bank's clients. These financial instruments include commitments to disburse additional funds on existing loans and lines of credit and commitments issued under standby letters of credit. Such instruments involve elements of credit risk and interest rate risk. These financial instruments are subject to the same underwriting standards as on-balance sheet instruments. The Bank generally requires collateral or other security to support instruments with credit risk. The maximum credit risk for such commitments will generally be lower than the contractual amount because a significant portion of these commitments is not expected to be fully used or will expire without being used by the client.

The Bank's commitments to disburse additional funds on existing loans and lines of credit are legally binding lending commitments, which are available for funding as long as there is no violation of any of several credit or other established conditions. Standby letters of credit are conditional lending commitments issued by the Bank to guarantee the performance of a client to a third party. Commitments to disburse additional funds and standby letters of credit generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since these commitments may expire without being drawn, the total commitment amounts do not necessarily represent future cash requirements. At September 30, 2022 and December 31, 2021, the Bank had commitments to disburse additional funds on existing loans and lines of credit of \$47.9 billion and \$38.5 billion, respectively, and had undisbursed standby letters of credit of \$1.3 billion and \$1.1 billion, respectively.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

In connection with the securitization of loans with Freddie Mac, the Bank has an obligation to reimburse Freddie Mac for losses up to \$30 million, or 12%, of the multifamily loans securitized. There was no liability for estimated losses related to this reimbursement obligation at September 30, 2022 and December 31, 2021, and the Bank has experienced no cumulative losses through September 30, 2022. The remaining unpaid principal balance of multifamily loans securitized was \$47 million and \$71 million at September 30, 2022 and December 31, 2021, respectively.

The Bank has been named as a defendant in legal actions arising in the ordinary course of business, none of which, in the opinion of management, are material.

## Note 13. Preferred Stock

At September 30, 2022, the Bank was authorized to issue 25,000,000 shares of preferred stock, par value \$0.01 per share, of which 3,632,500 shares were issued and outstanding. Each share of preferred stock has a liquidation preference of \$1,000. The following table presents the authorized, issued and outstanding shares and carrying value for each series of the Bank's preferred stock:

		Sep	tember 30, 20	22		Dec	ember 31, 202	21	
(in millions, except share amounts)	Dividend Rate	Shares Authorized	Shares Issued and Carrying Outstanding Value		Shares Authorized	Shares Issued and Outstanding		rrying /alue	
Series H Preferred Stock	5.125 %	200,000	200,000	\$	200	200,000	200,000	\$	200
Series I Preferred Stock	5.50 %	300,000	300,000		300	300,000	300,000		300

Total			3,632,500	\$	3,633		3,632,500	\$	3,633

Dividends on each series of preferred stock are payable quarterly in arrears when, as and if declared by the Board (or a duly authorized committee of the Board). If declared, dividends on the Series H Preferred Stock and Series I Preferred Stock are paid each March 30, June 30, September 30 and December 30. Additionally, dividends on the Series J Preferred Stock, Series K Preferred Stock, Series L Preferred Stock, Series M Preferred Stock and Series N Preferred Stock are paid each January 30, April 30, July 30 and October 30.

The following table presents dividends on the Bank's preferred stock:

Total	\$	40			\$	25			\$	118			\$	67			

## Note 14. Common Stock and Stock Plans

#### Common Stock

At September 30, 2022, the Bank was authorized to issue 400,000,000 shares of common stock, par value \$0.01 per share. At September 30, 2022, the Bank had 182,903,656 shares issued and outstanding. In August 2022, the Bank sold 2,587,500 shares of common stock in an underwritten offering, which added approximately \$402 million to common equity.

#### First Republic Bank Employee Stock Purchase Plan

Under the Bank's ESPP, the Bank is authorized to sell shares of common stock to its employees who are regularly employed for 20 hours or more per week. See Note 18 in Part II, "Item 8. Financial Statements and Supplementary Data" of our 2021 Form 10-K for additional description of the ESPP. At September 30, 2022, the Bank had 387,848 shares reserved for future purchase under the ESPP.

#### First Republic Bank 2017 Omnibus Award Plan

In May 2022, the Bank amended the 2017 Omnibus Award Plan to increase the number of shares reserved for issuance by an additional 3,500,000 shares. Stock awards outstanding were not affected by the amendment, and the terms of the award plan prior to the amendment will remain effective for such awards.

Under the Bank's 2017 Omnibus Award Plan, the Bank is authorized to grant shares of common stock in the form of stock options, stock appreciation rights, shares of restricted stock, RSUs or PSUs to its employees, officers and directors. Upon termination of service, unvested awards are generally forfeited. At September 30, 2022, the Bank had 3,976,720 shares reserved for future stock award grants under the 2017 Omnibus Award Plan.

#### Restricted Stock Units

RSUs have time-based vesting requirements ("Time RSUs") or both time-based and performancebased vesting requirements ("Performance RSUs"). The following table presents information related to Performance RSUs and Time RSUs:

	Ре	rfor	mance RS	SUs	Time RSUs							
	Number of Awards	Weighted Average Grant Date Fair Value		Weighted Average Remaining Contractual Term	Number of Awards	A Gr	eighted verage ant Date air Value	Weighted Average Remaining Contractual Term				
Nonvested awards as of December 31, 2021	3,019,706	\$	137.32		471,506	\$	137.93					
Granted	1,141,381	\$	146.90		186,914	\$	163.55					
Vested	(810,575)	\$	126.27		(232,433)	\$	125.99					
Forfeited	(180,131)	\$	139.67		(3,435)	\$	135.35					
Nonvested awards as of September 30, 2022	3,170,381	\$	143.46	3.3 years	422,552	\$	155.85	1.8 years				

The total fair value of Performance RSUs and Time RSUs that vested in the nine months ended September 30, 2022 was \$118 million and \$38 million, respectively.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

#### Performance Share Units

The following table presents information related to PSUs:

	Number of Awards	ې Gr	leighted werage ant Date air Value	Weighted Average Remaining Contractual Term
Nonvested awards as of December 31, 2021	1,022,225	\$	129.17

## Note 18. Revenue from Contracts with Customers

#### Revenue Recognition

The following table presents revenue from contracts with customers, disaggregated by revenue stream, as well as other noninterest income:

		Quarte Septen				Ended 30,		
(\$ in millions)		2022		2021		2022		2021
Noninterest income:								
Revenue from contracts with customers:								
Investment management fees	\$	142	\$	149	\$	471	\$	404
Brokerage and investment fees		31		20		80		48
Insurance fees		6		6		13		12
Trust fees		7		6		21		18
Deposit fees		7		7		21		20
Other		1		1		5		5
Total revenue from contracts with customers		194		189		611		507
Other sources of noninterest income		60		62		157		166
Total noninterest income	\$	254	\$	251	\$	768	\$	673

The Bank earns revenues from contracts with customers primarily for performing investment management, brokerage, sales of insurance and annuity policies, trust and deposit services. Most of the Bank's contracts with customers are open-ended, and the Bank provides services on an ongoing basis for an unspecified contract term. For these ongoing services, the fees are variable, since they are dependent on factors such as the value of underlying AUM, AUA or volume of transactions. The Bank recognizes revenue over the period services are provided to customers and when the uncertainties that determine the amount of revenue are resolved, and the actual fees are known or can be estimated. For certain services that are provided at a specific point in time, the Bank recognizes revenue in full at the time such services are provided.

## Contract Balances and Receivables

The Bank records contract liabilities, or deferred revenue, when payments from customers are received or due in advance of providing services to customers. The Bank generally receives payments for its services during the period or at the time services are provided and, therefore, does not have deferred revenue balances at period end.

Receivables from contracts with customers were \$30 million and \$22 million at September 30, 2022 and December 31, 2021, respectively, and consist primarily of investment management, brokerage and trust receivables, which are included in other assets on the consolidated balance sheets.

## Note 19. Segment Reporting

ASC 280-10, "Segment Reporting," requires that a public business enterprise report certain financial and descriptive information about its reportable operating segments on the basis that is used internally for evaluating segment performance and deciding how to allocate resources to segments. The Bank's two reportable segments are Commercial Banking and Wealth Management.

The principal business activities of the Commercial Banking segment are gathering deposits (retail deposit gathering and private banking activities), originating and servicing loans (primarily real estate secured mortgage loans) and investing in investment securities. The primary sources of revenue for this segment are: interest earned on loans and investment securities, fees earned in connection with loan and deposit services, and income from investments in life insurance. Principal expenses for this segment are interest incurred on interest-bearing liabilities, including deposits and borrowings, general and administrative costs and provision for credit losses.

The principal business activities of the Wealth Management segment are (i) the investment management activities of FRIM, which manages investments for individuals and institutions in equity securities, fixed income securities, balanced portfolios, and alternative investments; (ii) our money market mutual fund activities through third-party providers and the brokerage activities of FRSC (these two activities collectively, "Brokerage and Investment"); (iii) sales of life insurance policies and annuity contracts through FRSC; (iv) trust and custody services provided by the Trust Company; and (v) our foreign exchange activities conducted on behalf of clients. The primary sources of revenue for this segment are investment management fees, brokerage and investment fees, insurance fees, trust fees and foreign exchange fee income. In addition, the Wealth Management segment earns a deposit accounts. The Wealth Management segment segment segment activities are personnel-related costs and other general and administrative expenses.

Provision for income taxes for the segments is presented based on the segment's contribution to total consolidated provision for income taxes. Tax preference items are allocated to the segment responsible for the related investments resulting in the tax preference item.

The reconciling items for revenues include fees for managing the Bank's investment portfolio by FRIM and intercompany management fees related to the training and licensing of the Bank's licensed representatives by FRSC. The reconciling items for assets include subsidiary funds on deposit with the Bank and any intercompany receivable that is reimbursed at least on a quarterly basis.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note 20. Subsequent Events

The Bank evaluated the effects of events that have occurred subsequent to the quarter ended September 30, 2022. There have been no material subsequent events that would require recognition in our consolidated financial statements as of or for the quarter and nine months ended September 30, 2022 or disclosure in the notes to the financial statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

# Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

## Introduction

We earn income from the following principal areas: (1) net interest income, which is our largest source of income, and which constitutes the difference between the interest income that we receive from interest-earning assets, such as loans and investment securities, and the interest expense that we pay on interest-bearing liabilities, such as deposits and borrowings; (2) fee income from wealth management activities, including investment management, brokerage, insurance, trust and foreign exchange; (3) fees for deposit services; (4) loan and related fees, including late charge income, loan-related processing fees, prepayment penalties on sold loans, and payoff fees; and (5) income from investments in life insurance. We currently operate our business through two business segments: Commercial Banking and Wealth Management.

Averages presented are daily averages unless otherwise indicated.

## Information Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Statements in this Quarterly Report that are not historical facts are hereby identified as "forward-looking statements" for the purpose of the safe harbor provided by Section 21E of the Exchange Act. Any statements about our expectations, beliefs, plans, predictions, forecasts, objectives, assumptions or future events or performance are not historical facts and may be forward-looking. These statements are often, but not always, made through the use of words or phrases such as "anticipates," "believes," "can," "could," "may," "predicts," "potential," "should," "will," "estimates," "plans," "projects," "continuing," "ongoing," "expects," "intends" and similar words or phrases. Accordingly, these statements are only predictions and involve estimates, known and unknown risks, assumptions and uncertainties. Our actual results could differ materially from those expressed or anticipated in such forward-looking statements as a result of risks and uncertainties more fully described under Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2021 (the "2021 Form 10-K") and in any of the Bank's subsequent Exchange Act filings.

Forward-looking statements involving such risks and uncertainties include, but are not limited to, statements regarding:

- Projections of loans, assets, deposits, liabilities, revenues, expenses, tax liabilities, net income, net interest income, net interest margin, capital expenditures, liquidity, dividends, capital structure, investments or other financial items;
- Forecasts of future economic conditions generally and in our market areas in particular, including expectations relating to interest rates and inflation, which may affect the ability of borrowers to repay their loans and the value of real property or other property held as collateral for such loans;
- Expectations regarding the banking and wealth management industries;
- Descriptions of plans or objectives of management for future operations, products or services;
- Our opportunities for growth and our plans for expansion (including opening new offices);
- Expectations about the performance of any new offices;
- Projections about the amount and the value of intangible assets;
- Future provisions for credit losses on loans and debt securities, as well as for unfunded loan commitments;
- Changes in nonperforming assets;
- Expectations regarding the impact and duration of COVID-19;

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

- Expectations regarding our executive transitions;
- Projections about future levels of loan originations or loan repayments;
- Projections regarding costs, including the impact on our efficiency ratio; and
- Descriptions of assumptions underlying or relating to any of the foregoing.

Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to:

- Economic and market conditions, including volatility in the financial and securities markets, which may negatively impact the valuation of our investment securities portfolio, credit losses on our loans and debt securities, and the performance of our wealth management business;
- Inflation;
- Interest rate risk and credit risk;
- Significant competition to attract and retain banking and wealth management customers, from both traditional and non-traditional financial services and technology companies;
- Our ability to recruit and retain key managers, employees and board members;
- Natural or other disasters, including earthquakes, wildfires, pandemics or acts of terrorism affecting the markets in which we operate;
- The adverse effects of climate change on our business, clients and counterparties;
- The negative impacts and disruptions resulting from COVID-19 on our colleagues and clients, the communities we serve and the domestic and global economy, which may have an adverse effect on our business, financial position and results of operations;
- Our ability to maintain and follow high underwriting standards;
- Real estate prices generally and in our markets;
- Our geographic and product concentrations;
- Demand for our products and services;
- Developments and uncertainty related to the future use and availability of some reference rates;
- The regulatory environment in which we operate, our regulatory compliance and future regulatory requirements, which may result in costs, fees, penalties, business restrictions, reputational harm or other adverse consequences;
- Any changes to liquidity and regulatory capital requirements applicable to us, including
  more stringent liquidity requirements and heightened capital requirements applicable if
  we become a Category III banking organization under the FDIC's regulations by reporting
  \$250 billion or more in total consolidated assets or \$75 billion or more in weighted shortterm wholesale funding, nonbank assets or off-balance sheet exposure, based on a four
  quarter trailing average;
- Legislative and regulatory actions affecting us and the financial services industry, such as the Dodd-Frank Act, including increased compliance costs, limitations on activities and requirements to hold additional capital, as well as changes to the Dodd-Frank Act pursuant to the EGRRCPA;
- Changes in federal, state or local tax laws;
- Our ability to avoid litigation and its associated costs and liabilities;
- Future FDIC special assessments or changes to regular assessments;
- Fraud, cybersecurity and privacy risks; and
- Custom technology preferences of our customers and our ability to successfully execute on initiatives relating to enhancements of our technology infrastructure, including client-facing systems and applications.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

All forward-looking statements are necessarily only estimates of future results, and there can be no assurance that actual results will not differ materially from expectations, and, therefore, you are cautioned not to place undue reliance on such statements. Any forward-looking statements are qualified in their entirety by reference to the factors discussed throughout this Quarterly Report, the 2021 Form 10-K and our other public filings under the Exchange Act. Further, any forward-looking statement speaks only as of the date on which it is made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events.

## **Non-GAAP Financial Measures**

Our management uses and believes that investors benefit from using certain non-GAAP measures of our financial performance, which include tangible book value per common share, return on average tangible common shareholders' equity, and net interest income on a fully taxable-equivalent basis. Management believes that tangible book value per common share and return on average tangible common shareholders' equity are useful additional measures to evaluate our performance and capital position without the impact of goodwill and other intangible assets and preferred stock. In addition, to facilitate relevant comparisons of net interest income from taxable and tax-exempt interestearning assets, when calculating yields and net interest margin, we adjust interest income on taxexempt securities and tax-advantaged loans so such amounts are fully equivalent to interest income on taxable sources. We believe that these non-GAAP financial measures, when taken together with the corresponding GAAP financial measures, provide meaningful supplemental information that is not otherwise required by GAAP or other applicable requirements. These non-GAAP financial measures should be considered in addition to, not as a substitute for, financial measures prepared in accordance with GAAP. A reconciliation of the non-GAAP calculation of the financial measure to the most comparable GAAP financial measure is presented in relevant tables under "-Liquidity and Capital Resources—Return on Average Common Shareholders' Equity and Return on Average Tangible Common Shareholders' Equity," "-Liquidity and Capital Resources-Book Value per Common Share and Tangible Book Value per Common Share," and "Results of Operations—Quarter and Nine Months Ended September 30, 2022, Compared to Quarter and Nine Months Ended September 30, 2021—Net Interest Income and Net Interest Margin."

<sup>(1)</sup> Ratios are annualized.

 $^{\scriptscriptstyle (2)}$  Return on average assets is the ratio of net income to average assets.

<sup>(3)</sup> Return on average common shareholders' equity is the ratio of net income available to common shareholders to average common shareholders' equity.

<sup>(4)</sup> Refer to table in "—Liquidity and Capital Resources—Return on Average Common Shareholders' Equity and Return on Average Tangible Common Shareholders' Equity" for a reconciliation of this non-GAAP financial measure to the most comparable GAAP measure.
 <sup>(5)</sup> Efficiency ratio is the ratio of noninterest expense to the sum of net interest income and noninterest income.

<sup>(6)</sup> Refer to table in "—Liquidity and Capital Resources—Book Value per Common Share and Tangible Book Value per Common Share" for a reconciliation of this non-GAAP financial measure to the most comparable GAAP measure.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

## Key Factors Affecting Our Business and Financial Statements

#### **Business Environment**

During the third quarter of 2022, macroeconomic conditions, including ongoing volatility in the capital markets, continued increases in interest rates and ongoing inflationary pressures, along with geopolitical concerns, such as the war in Ukraine, created uncertainty and volatility in the global economy and in our market areas. In response to these pressures, the Federal Reserve announced further increases in interest rates during the quarter. In general, interest rates for mortgage loans reached their highest point in over a decade.

Although COVID-19-related restrictions and regulations have eased in our market areas, we continue to actively monitor COVID-19 developments and to focus on the health and safety of our colleagues and clients. We continue to follow applicable guidelines and ordinances throughout our organization. Any future actions taken by U.S. or other governmental authorities may result in regulatory uncertainty and may impose additional restrictions or requirements. While regulatory and legislative responses to COVID-19 have not had a materially negative impact on our business to date, we cannot predict the impact of any current or future regulatory or legislative responses on our business.

The economic outlook remains uncertain, reflecting concerns about inflation, further interest rate increases, supply chain disruptions, and COVID-19 developments. We continue to closely monitor economic conditions, and the potential impacts of substantially higher future interest rates and other economic conditions on our cost of funding, our ACL, and on demand for our products and services.

While we have adjusted some of our near-term expectations due to current market conditions, we remain confident in our strategy over the long-term. However, worsening macroeconomic conditions or new COVID-19 related restrictions could affect our business, including, among other things, by impacting inflation, interest rate increases, the demand for our products and services, and changes in regulation. Any of these factors, among others, could have adverse impacts on our operations and profitability in future periods.

See Part I, "Item 1A. Risk Factors" in our 2021 Form 10-K for additional discussion of risks we face in our business.

#### Interest Rates

Net interest income is our largest source of income and is the difference between the interest income on interest-earning assets, such as loans and investment securities, and the interest expense incurred on interest-bearing liabilities, such as deposits and borrowings. The level of net interest income is driven by the volume, pricing and mix of interest-earning assets and interest-bearing liabilities which, in turn, may be impacted by external factors such as local economic conditions, competition for loans and deposits, the monetary policy of the FOMC, market liquidity and interest rates, or other factors.

The rates paid on our interest-bearing deposits and short-term borrowings are largely based on short-term interest rates, the level of which is driven primarily by the FOMC's actions. However, the yields generated by our loans and securities are typically driven by short-term and longer-term interest rates, which are set by the market, or, at times influenced by the FOMC's actions, and generally vary from day to day. The level of net interest income is therefore influenced by movements in such interest rates and the magnitude or pace at which such movements occur. Declines in the yield curve or prolonged periods of flat or inverted yield curve could have an adverse impact on our net interest margin, net interest income, or both. The FOMC's actions have meaningfully influenced the interest-rate environment, which continues to impact our net interest margin.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For additional information, see Part I, "Item 1A. Risk Factors—Market and Interest Rate Risk—We are subject to interest rate risk and fluctuations in interest rates may negatively impact our net interest income" in our 2021 Form 10-K and "Item 3. Quantitative and Qualitative Disclosures About Market Risk—Interest Rate Risk Management" in this Quarterly Report on Form 10-Q.

#### Regulatory and Supervisory Matters

Our results of operations are affected by the regulatory environment and requirements imposed on us by regulators. The extensive regulation and supervision that govern our business continue to evolve as the legal and regulatory framework changes and as our business grows. As described in our 2021 Form 10-K under Part I, "Item 1. Business—Supervision and Regulation—Capital Requirements," we are subject to regulatory requirements specifying minimum amounts and types of capital that we must maintain. In addition, although we are not yet subject to the LCR or NSFR, we nevertheless maintain on-balance sheet liquidity and a portfolio of HQLA. It is possible that, as a result of continued growth of the Bank, we will become subject to more stringent capital and liquidity requirements. If our continued growth causes us to report \$250 billion or more in total consolidated assets or \$75 billion or more in weighted short-term wholesale funding, nonbank assets or off-balance sheet exposure, based on a trailing four-quarter average, we will be a Category III banking organization under the FDIC's regulations and subject to enhanced capital and liquidity requirements under the Basel III Capital Rules and the LCR and NSFR rules. As a result of becoming subject to the LCR and NSFR rules, we would be required to increase our holdings of HQLA and change the composition of our funding, which could adversely affect our net interest income and net interest margin. Further, if we become a Category III banking organization, we will be subject to heightened capital requirements, including the supplementary leverage ratio and countercyclical capital buffer, in addition to the capital conservation buffer.

As described in our 2021 Form 10-K under Part I, "Item 1. Business—Supervision and Regulation— Premiums for Deposit Insurance and Assessments," our deposits are insured by the FDIC to the fullest extent permitted by law, and we are subject to deposit insurance assessments to maintain the DIF. In October 2022, the FDIC approved a final rule applicable to all insured depository institutions to increase initial base deposit insurance assessment rate schedules uniformly by 2 bps, beginning in the first quarterly assessment period of 2023. The new assessment rate schedules will remain in effect unless and until the reserve ratio of the DIF meets or exceeds 2 percent in order to support growth in the DIF. Progressively lower assessment rate schedules will take effect when the reserve ratio reaches 2 percent, and again when it reaches 2.5 percent. The increase in the deposit insurance assessment rate will result in an increase in the Bank's FDIC assessment expense beginning in the first quarter of 2023.

In addition to these regulatory and supervisory matters, our results of operations may be affected by other legislative developments or reforms, including the potential impact of recent tax legislation, and additional disclosure, risk management or other requirements implemented by our regulators or other governmental authorities. The adoption, details and timing of any such changes are uncertain, and the impact of any changes or developments cannot be predicted.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

## **Critical Accounting Policies and the Impact of Accounting Estimates**

Our discussion and analysis of our financial condition and results of operations are based on our financial statements, which have been prepared in accordance with GAAP. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures. On an ongoing basis, we evaluate our estimates, including those related to ACL on loans. We base these estimates on our historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. We consider the significant accounting policy below to be a critical accounting policy and estimate because of the significance to our financial condition and results of operations and the difficult and subjective judgments, assumptions and estimates involved. Actual results may differ from these estimates under different assumptions or conditions.

#### Allowance for Credit Losses on Loans

The Bank estimates its ACL using quantitative models, expert judgment, qualitative factors and individual assessments to determine the expected credit losses over the life of its loans. Loans with similar risk characteristics within each class are pooled when developing the allowance, and loans that do not share similar risk characteristics are individually assessed. For a complete description of the accounting policies for determining the Bank's ACL on loans, see Note 4 in "Item 1. Financial Statements" in this Quarterly Report on Form 10-Q and Note 1 in Part II, "Item 8. Financial Statements and Supplementary Data" of our 2021 Form 10-K.

Estimated loss amounts determined by the Bank's quantitative models are based on the macroeconomic forecast scenario, contractual maturity dates, prepayment (or repayment) projections and, in most cases, loan specific risk characteristics over a reasonable and supportable period and a reversion period, after which the Bank reverts to its historical loss rate for the remaining life of the loan. The models also account for prepayments during the life of the loan.

For residential real estate, income property, tax-exempt business, and other business loans, expected credit losses are determined by PD/LGD models. For other secured and certain unsecured loans, expected credit losses are determined by loss rate models. The Bank's ACL measured using these quantitative models is sensitive to various factors, but the most impactful are residential home price indices, commercial real estate price indices, apartment price indices, unemployment rates, and interest rates.

The ACL determined by the quantitative models and associated qualitative reserve represents the largest portion of the Bank's total ACL on loans. To illustrate the impact of changes in these key variables to the Bank's ACL, the Bank performed a hypothetical sensitivity analysis that forecasted pessimistic trends in these variables over the two-year reasonable and supportable period. The following table presents the key variables used in estimating the Bank's ACL on loans for the period ended September 30, 2022 and the more pessimistic forecasted variables in the hypothetical sensitivity analysis.

		30, 2022 ACL mic Forecast	Hypothetical Pessimistic Macroeconomic Forecas			
Key ACL variables	Year 1	Year 2	Year 1	Year 2		
Home price index growth (decline)	3.4%	(0.6)%	(11.2)%	3.8%		
Commercial real estate price index growth (decline)	6.0%	4.3%	(10.6)%	(2.7)%		
Apartment price index growth (decline)	6.4%	1.0%	(1.4)%	7.4%		
Unemployment rate	3.7%	3.7%	7.9%	6.4%		
3-year CMT	3.43%	3.25%	2.61%	1.91%		

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The impact of this hypothetical pessimistic forecast would result in a net increase of \$37 million, or approximately 5%, in the Bank's total ACL on loans as of September 30, 2022, primarily driven by a \$58 million increase in ACL from the quantitative models, partially offset by a \$21 million decrease in the qualitative reserve.

The hypothetical analysis is intended to illustrate the impact of adverse changes in the macroeconomic environment and is not intended to reflect the full nature and extent of potential future change in the ACL or even what the ACL would be under these adverse economic circumstances. It is difficult to estimate how potential changes in any one of the quantitative inputs or qualitative factors might affect the overall ACL and the Bank's current assessments may not reflect the potential future impact of changes to those inputs or factors.

## **Current Accounting Developments**

The following ASUs have been issued by the FASB, but were not yet effective as of September 30, 2022:

# ASU 2022-02—Financial Instruments—Credit Losses (ASC 326): Troubled Debt Restructurings and Vintage Disclosures

The amendments eliminate the accounting guidance on TDRs for entities that have adopted CECL and require enhanced disclosures about certain loan modifications made to borrowers experiencing financial difficulty.

Under the amendments, entities should apply the existing accounting guidance for loan refinancing and restructuring to determine whether a modification results in a new loan or a continuation of an existing loan, rather than applying the accounting guidance for TDRs. For modifications in the form of interest rate reductions, principal forgiveness, other-thaninsignificant payment delays or term extensions made to borrowers experiencing financial difficulty, enhanced disclosures include information about the type and magnitude of modifications and the degree of their success in mitigating potential credit losses in the 12months following the modification.

Additionally, the amendments require entities to present current-period gross write-offs by year of origination in their vintage disclosures.

The amendments are effective for interim and annual periods beginning January 1, 2023. The amendments should be applied prospectively, with an option to use a modified retrospective approach for amendments related to TDRs. If this option is elected, a cumulative effect adjustment to retained earnings in the period of adoption representing any change in ACL for TDRs should be recognized.

Upon adoption, the Bank will no longer apply TDR accounting to loan modifications and will disclose additional information about modifications made to borrowers experiencing financial difficulty. The Bank will also disclose the current period gross write-offs in its vintage disclosures. The Bank is currently assessing the accounting and disclosures impact of the amendments to its financial statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

## **Financial Highlights**

## Assets

• At September 30, 2022, total assets were \$205.1 billion, a 13% increase compared to \$181.1 billion at December 31, 2021 and a 19% increase compared to \$172.6 billion at September 30, 2021. Asset growth was driven primarily by growth in loans and investments, partially offset by decreases in cash.

## Investments

- At September 30, 2022, total investment securities were \$31.6 billion, a 23% increase compared to \$25.7 billion at December 31, 2021 and a 31% increase compared to \$24.2 billion at September 30, 2021. Total investment securities represented 15% of total assets at September 30, 2022, compared to 14% at both December 31, 2021 and September 30, 2021. The increases in investment securities were primarily due to purchases of agency commercial MBS and municipal securities, partially offset by calls and paydowns. For additional discussion regarding our investment portfolio, see "—Balance Sheet Analysis—Investments."
- Our holdings of assets that are considered HQLA, including eligible cash, totaled \$27.5 billion at September 30, 2022, compared to \$30.4 billion at December 31, 2021 and \$28.6 billion at September 30, 2021. At September 30, 2022, HQLA represented 14% of average total assets for the third quarter of 2022.

## Loans

- At September 30, 2022, loans were \$158.8 billion, an 18% increase compared to \$135.0 billion at December 31, 2021 and a 24% increase compared to \$128.4 billion at September 30, 2021. Loans increased from December 31, 2021 primarily as a result of growth in single family, multifamily and commercial real estate loans, partially offset by a decrease in capital call lines of credit, and increased during the last twelve months primarily as a result of growth in single family, multifamily, commercial real estate, stock secured and other business loans. For additional discussion regarding our loan portfolio, see "—Balance Sheet Analysis—Loan Portfolio."
- Average loan balances were \$155.0 billion for the third quarter of 2022, an increase of 23% compared to \$125.9 billion for the third quarter of 2021, and were \$146.2 billion for the nine months ended September 30, 2022, compared to \$120.5 billion for the nine months ended September 30, 2021, an increase of 21%.
- Our single family mortgage loans, including HELOCs, were \$97.1 billion and represented 61% of total loans at September 30, 2022, compared to \$79.4 billion, or 59% of total loans at December 31, 2021 and \$75.9 billion, or 59% of total loans at September 30, 2021.
- Loan origination volume was \$18.0 billion for the third quarter of 2022, compared to \$15.5 billion for the third quarter of 2021, an increase of 16%, and was \$57.8 billion for the nine months ended September 30, 2022, compared to \$47.9 billion for the nine months ended September 30, 2021, an increase of 21%. Loan originations increased for the quarter ended September 30, 2022 primarily due to an increase in multifamily lending, and increased for the nine months ended September 30, 2022 primarily due to increases in single family, multifamily and commercial real estate lending.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

## **Deposits and Funding**

- Total deposits were \$172.4 billion at September 30, 2022, an increase of 10% compared to \$156.3 billion at December 31, 2021, and an increase of 19% compared to \$145.3 billion at September 30, 2021. Deposits were our primary source of funding and represented 93% of our funding base at September 30, 2022, compared to 97% at December 31, 2021 and 94% at September 30, 2021. Deposits increased as a result of expanding existing client relationships, referrals from existing clients, and new deposit clients. We continue to emphasize building banking relationships through checking and other transaction deposit accounts. See "— Balance Sheet Analysis—Deposit Gathering" for additional information.
- Average total deposit balances were \$165.3 billion for the third quarter of 2022, an increase of 15% from \$143.1 billion for the third quarter of 2021, and were \$162.5 billion for the nine months ended September 30, 2022, an increase of 21% from \$134.0 billion for the nine months ended September 30, 2021.
- The following table presents percentages of our deposit base, which consist of checking deposits, other liquid deposits including money market checking and money market savings and passbooks, and CDs:

Checking, Other Liquid Deposits and CDs as a % of Total Deposits	September 30, 2022	December 31, 2021	September 30, 2021
Checking	64 %	72 %	69 %
Other liquid deposits	27	23	26
CDs	9	5	5
Total	100 %	100 %	100 %

• The following table presents percentages of business and consumer deposits:

Business and Consumer Deposits as a % of Total Deposits	September 30, 2022	December 31, 2021	September 30, 2021
Business deposits	63 %	60 %	62 %
Consumer deposits	37	40	38
Total	100 %	100 %	100 %

- Total deposits had an average rate paid of 0.41% for the third quarter of 2022 and 0.19% for the nine months ended September 30, 2022, compared to 0.06% for the third quarter of 2021 and 0.07% for the nine months ended September 30, 2021.
- Other sources of funding at September 30, 2022 included short-term FHLB advances of \$5.1 billion and long-term FHLB advances of \$5.9 billion, compared to long-term FHLB advances of \$3.7 billion at December 31, 2021 and \$7.7 billion at September 30, 2021. See "— Balance Sheet Analysis—Borrowings" for additional information.
- Average total funding costs (total deposits and borrowings) were 0.55% for the third quarter of 2022 and 0.28% for the nine months ended September 30, 2022, compared to 0.17% for the third quarter of 2021 and 0.20% for the nine months ended September 30, 2021.

## Capital Markets Activity

• In August 2022, we sold 2,587,500 shares of common stock in an underwritten public offering. Net proceeds, after underwriting discounts and estimated expenses, were \$402 million.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

## Capital, Book Value per Common Share and Tangible Book Value per Common Share

- Our Tier 1 leverage ratio at September 30, 2022 was 8.59%. We continue to exceed regulatory guidelines for well-capitalized institutions. See "—Liquidity and Capital Resources— Regulatory Capital Components and Ratios" for further discussion of capital ratios and our capital requirements.
- Book value per common share was \$73.74 at September 30, 2022, an 8% increase from December 31, 2021 and an 11% increase during the last twelve months.
- Tangible book value per common share was \$72.54 at September 30, 2022, an 8% increase from December 31, 2021 and an 11% increase during the last twelve months.

## Dividends

- Cash dividends paid in the third quarter of 2022 were \$0.27 per share of common stock to shareholders of record as of July 28, 2022, compared to \$0.22 in the third quarter of 2021. Cash dividends paid in the nine months ended September 30, 2022 were \$0.76 per share of common stock, compared to \$0.64 in the nine months ended September 30, 2021.
- On October 14, 2022, we declared a cash dividend for the third quarter of 2022 of \$0.27 per share, which is payable on November 10, 2022 to shareholders of record as of October 27, 2022. Any future payment of dividends will be subject to ongoing regulatory oversight and Board approval.

## Wealth Management Assets

 Wealth management AUM and AUA were \$249.5 billion at September 30, 2022, compared to \$279.4 billion at December 31, 2021, a decrease of 11%, and \$251.7 billion at September 30, 2021, a slight decrease. The decreases in AUM and AUA were driven by market decline, partially offset by net client inflow. See "—Results of Operations—Quarter and Nine Months Ended September 30, 2022, Compared to Quarter and Nine Months Ended September 30, 2021—Noninterest Income—Wealth Management Fees" and "—Business Segments" for additional information.

## Effective Tax Rate

 The Bank's effective tax rate was 21.6% and 22.6% for the quarter and nine months ended September 30, 2022, compared to 21.4% and 20.2% for the quarter and nine months ended September 30, 2021. See "—Results of Operations—Quarter and Nine Months Ended September 30, 2022, Compared to Quarter and Nine Months Ended September 30, 2021— Provision for Income Taxes" for additional information.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

# Results of Operations—Quarter and Nine Months Ended September 30, 2022, Compared to Quarter and Nine Months Ended September 30, 2021

#### Overview

Net income for the quarter and nine months ended September 30, 2022 was \$445 million and \$1.3 billion, compared to \$370 million and \$1.1 billion for the quarter and nine months ended September 30, 2021, respectively, an increase of 20% for the quarter and an increase of 19% for the nine months. The increases were primarily due to higher net interest income, partially offset by higher noninterest expense. Additionally, the increase for the nine months ended September 30, 2022 was due to higher noninterest income, partially offset by a higher provision for credit losses. Diluted EPS for the quarter and nine months ended September 30, 2022 were \$2.21 and \$6.38, compared to \$1.91 and \$5.66 for the quarter and nine months ended September 30, 2021, respectively, an increase of 16% for the quarter and an increase of 13% for the nine months.

Net income for the Commercial Banking segment was \$377 million and \$1.1 billion for the quarter and nine months ended September 30, 2022, compared to \$310 million and \$933 million for the quarter and nine months ended September 30, 2021, respectively, an increase of 22% for the quarter and an increase of 15% for the nine months. The Wealth Management segment's net income for the quarter and nine months ended September 30, 2022 was \$68 million and \$211 million, compared to \$60 million and \$145 million for the quarter and nine months ended September 30, 2022 was \$68 million and \$211 million, compared to \$60 million and \$145 million for the quarter and nine months. For a discussion of segment results, see "—Business Segments."

#### Net Interest Income and Net Interest Margin

Net interest income for the quarter and nine months ended September 30, 2022 was \$1.3 billion and \$3.7 billion, compared to \$1.1 billion and \$3.0 billion for the quarter and nine months ended September 30, 2021, respectively, an increase of 21% for the quarter and an increase of 22% for the nine months.

Net interest margin represents net interest income on a fully taxable-equivalent basis divided by total average interest-earning assets. Net interest margin for the quarter and nine months ended September 30, 2022 was 2.71% and 2.73%, compared to 2.65% and 2.67% for the quarter and nine months ended September 30, 2021, respectively. The increases were due to increases in average yields on interest-earning assets, partially offset by increases in average funding costs.

On an average basis, interest-earning assets and interest-bearing liabilities for the third quarter of 2022 increased 17% and 19% from the third quarter a year ago, respectively. For the nine months ended September 30, 2022, average interest-earning assets and interest-bearing liabilities increased 19% and 12% from the nine months ended September 30, 2021, respectively. Average noninterest-bearing checking deposit balances, a significant source of our funding, increased 15% for the third quarter of 2022 and increased 27% for the nine months ended September 30, 2022.

## Yields/Rates (Fully Taxable-Equivalent Basis)

The following tables present the distribution of average assets, liabilities and equity, interest income and resulting yields on average interest-earning assets, and interest expense and rates on average interest-bearing liabilities on a fully taxable-equivalent basis. Nonaccrual loans are included in the average balances of loans and in the calculation of average loan yields.

#### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(continued from previous page)

Note: Certain prior period amounts have been reclassified to conform to the current period presentation.

<sup>(1)</sup> Interest income on tax-exempt securities and loans has been adjusted to the fully taxable-equivalent basis using the statutory federal income tax rate in effect for each respective period presented.

<sup>(2)</sup> Yields/rates are annualized.

<sup>(3)</sup> Refer to supplemental information in this table for average balances, interest expense and rates for total deposits (interest-bearing and noninterest-bearing).

<sup>(4)</sup> Refer to supplemental information in this table for average balances, interest expense and rates for total deposits (interest-bearing and noninterest-bearing) and borrowings.

(5) Net interest spread represents the average yield on interest-earning assets less the average rate on interest-bearing liabilities.

<sup>(6)</sup> Net interest margin represents net interest income on a fully taxable-equivalent basis divided by total average interest-earning assets.
<sup>(7)</sup> Fully taxable-equivalent net interest income is considered a non-GAAP financial measure, and is reconciled to GAAP net interest income in this table.

Interest Income

The following table presents interest income and fully taxable-equivalent interest income:

	Quarter Ended September 30,			Nine M En Septen	dec	1	% Change Quarter Ended September 30,	% Change Nine Months Ended September 30,	
(\$ in millions)	2022		2021		2022		2021	2022 vs. 2021	2022 vs. 2021
Interest income:									
Loans	\$ 1,269	\$	947	\$	3,365	\$	2,733	34 %	23 %
Investments	219		161		608		459	36 %	33 %
Cash and cash equivalents	27		5		43		11	417 %	287 %
Other <sup>(1)</sup>	3		5	_	7		15	(36)%	(54)%
Total interest income	\$ 1,518	\$	1,118	\$	4,023	\$	3,218	36 %	25 %
Fully taxable-equivalent interest income:									
Loans	\$ 1,275	\$	954	\$	3,386	\$	2,754	34 %	23 %
Investments	\$ 254	\$	193	\$	706	\$	549	33 %	29 %

 $^{\scriptscriptstyle (1)}$  Represents dividends on FHLB stock.

Total interest income consists of interest income on loans and investments, interest income on cash and cash equivalents, and FHLB stock dividends. The increase in interest income for the third quarter of 2022 was the result of an increase of 17% in average interest-earning assets, which were \$191.5 billion, compared to \$163.1 billion for the third quarter of 2021, and an increase in the average yield on interest-earning assets to 3.23% from 2.81% for the third quarter of 2021. The increase for the nine months ended September 30, 2022 was the result of an increase of 19% in average interest-earning assets, which were \$183.7 billion, compared to \$154.6 billion for the nine months ended September 30, 2021, and an increase in the average yield on interest-earning assets to 2.99% from 2.86% for the nine months ended September 30, 2021.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### Loans

Interest income on loans for the quarter and nine months ended September 30, 2022 increased due to continued loan growth and increases in the average yield as a result of increases in interest rates. Average loan balances increased 23% for the third quarter of 2022 and increased 21% for the nine months ended September 30, 2022. The average yield on loans was 3.26% for the third quarter of 2022, compared to 3.00% for the third quarter of 2021, and was 3.07% for the nine months ended September 30, 2022, compared to 3.03% for the nine months ended September 30, 2022. The average yield on loans varies based on the volume, mix and pricing of the loan portfolio.

Interest income on loans included prepayment penalty fees of \$4 million and \$17 million for the quarter and nine months ended September 30, 2022, compared to \$5 million and \$14 million for the quarter and nine months ended September 30, 2021, respectively. The increase in these fees for the nine months was primarily due to higher prepayments on multifamily and commercial real estate loans.

Our yield on loans is affected by a number of factors: market interest rates, the level of adjustablerate loan indices, interest rate floors and caps, the repayment rate of loans, portfolio mix and the level of nonaccrual loans. Our weighted average contractual loan rate (on a fully taxable-equivalent basis) was 3.42% at September 30, 2022, compared to 2.97% at December 31, 2021 and 3.00% at September 30, 2021. For ARMs, the yield is also affected by the timing of changes in the loan rates, which generally lag market rate changes. At September 30, 2022, approximately 22% of our total loans were adjustable-rate or mature within one year, compared to 26% at December 31, 2021 and 25% at September 30, 2021, respectively.

#### Investments

Interest income on investments increased for the quarter and nine months ended September 30, 2022 primarily due to higher average investment balances, partially offset by decreases in the average yield. Average investment balances increased 33% for the third quarter of 2022 and increased 38% for the nine months ended September 30, 2022. The increases were primarily due to investment purchases, partially offset by calls and paydowns. The average yield on investment securities for the third quarter of 2022 was 3.24%, compared to 3.26% for the third quarter of 2021, and was 3.13% for the nine months ended September 30, 2022, compared to 3.35% for the nine months ended September 30, 2022, were primarily the result of lower yields on new purchases of agency commercial and residential MBS beginning in the fourth quarter of 2021.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

## Interest Expense

The following table presents interest expense:

		er Ended nber 30,		Nine Months Ended September 30,		% Change Quarter Ended September 30,	% Change Nine Months Ended September 30,
(\$ in millions)	2022	2022 2021		2022 20		2022 vs. 2021	2022 vs. 2021
Interest expense:							
Deposits:							
Interest-bearing checking	\$ 27	\$ 1	\$	33	\$5	NM	558 %
Money market checking	65	6		83	20	NM	325 %
Money market savings and passbooks	47	7		65	19	644 %	246 %
CDs	30	9		45	31	239 %	47 %
Total interest expense on deposits	169	23		226	75	657 %	206 %
Borrowings:							
Short-term FHLB advances	47			56	—	100 %	100 %
Long-term FHLB advances	21	28		41	104	(28)%	(62)%
Senior notes	3	6		13	18	(56)%	(29)%
Subordinated notes	9	9		27	27	0 %	0 %
Total interest expense on borrowings	80	43		137	149	84 %	(8)%
Total interest expense	\$ 249	\$ 66	\$	363	\$ 224	280 %	63 %

Note: Variances that are not meaningful (NM) are not presented in the table above.

Total interest expense consists of interest expense on deposits and borrowings. The increase in interest expense for the third quarter of 2022 was the result of an increase in the average cost of interest-bearing liabilities to 0.93% for the third quarter of 2022 from 0.29% for the third quarter of 2021, and an increase of 19% in average interest-bearing liabilities for the third quarter of 2022. The increase for the nine months ended September 30, 2022 was the result of an increase in the average cost of interest-bearing liabilities to 0.49% for the nine months ended September 30, 2022 from 0.34% for the nine months ended September 30, 2021, and an increase of 12% in average interest-bearing liabilities for the nine months ended September 30, 2022.

## Deposits

Interest expense on deposits increased for the quarter and nine months ended September 30, 2022 due to increases in average rates paid on deposits and growth in average deposit balances. The average interest rate paid on total deposits was 0.41% and 0.06% for the third quarter of 2022 and 2021, and was 0.19% and 0.07% for the nine months ended September 30, 2022 and 2021, respectively. The average rates paid on deposits were impacted by the level of the federal funds rate, which averaged 2.39% and 1.23% for the quarter and nine months ended September 30, 2022, respectively, compared to 0.25% for both the quarter and nine months ended September 30, 2021.

*Interest-bearing checking.* Interest expense on checking deposits increased for the quarter and nine months ended September 30, 2022 due to increases in average rates paid on interest-bearing checking deposits and increases in average balances.

*Total checking (interest-bearing and noninterest-bearing).* The average interest rate paid on total checking deposits was 0.09% and 0.04% for the quarter and nine months ended September 30, 2022, compared to less than 0.01%, and 0.01% for the quarter and nine months ended September 30, 2021, respectively. Average total checking deposit balances increased 18% for the third quarter of 2022 and increased 27% for the nine months ended September 30, 2022.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

*Money market checking*. Interest expense on money market checking deposits increased for the quarter and nine months ended September 30, 2022 due to increases in average rates paid. Additionally, interest expense on money market checking deposits increased for the nine months ended September 30, 2022 due to an increase in the average balance. The average interest rate paid on money market checking deposits was 1.19% and 0.52% for the quarter and nine months ended September 30, 2022, compared to 0.11% and 0.13% for the quarter and nine months ended September 30, 2021, respectively. Average money market checking deposit balances increased 6% for the nine months ended September 30, 2022.

*Money market savings and passbooks.* Interest expense on money market savings and passbooks deposits increased for the quarter and nine months ended September 30, 2022 due to increases in average rates paid and increases in average balances. The average interest rate paid on money market savings and passbooks deposits was 1.01% and 0.48% for the quarter and nine months ended September 30, 2022, compared to 0.16% and 0.17% for the quarter and nine months ended September 30, 2021, respectively. Average money market savings and passbooks deposit balances increased 18% for the third quarter of 2022 and increased 22% for the nine months ended September 30, 2022.

*CDs.* Interest expense on CDs increased for the quarter and nine months ended September 30, 2022 due to increases in average rates paid. Additionally, interest expense on CDs increased for the quarter ended September 30, 2022 due to an increase in the average balance. The average interest rate paid on CDs was 1.26% and 0.76% for the quarter and nine months ended September 30, 2022, compared to 0.46% and 0.51% for the quarter and nine months ended September 30, 2021, respectively. Average CD balances increased 24% for the third quarter of 2022 and decreased slightly for the nine months ended September 30, 2022.

Average total deposit balances increased 15% for the third quarter of 2022 and increased 21% for the nine months ended September 30, 2022. The following table presents average deposit balances by deposit type as a percentage of average total deposits:

	Quarter I Septemb		Nine Months Ended September 30,		
Average Deposits by Type as a % of Average Total Deposits	2022	2021	2022	2021	
Checking	70 %	68 %	71 %	68 %	
Money market checking	13 %	15 %	13 %	15 %	
Money market savings and passbooks	11 %	11 %	11 %	11 %	
CDs	6 %	6 %	5 %	6 %	

At September 30, 2022, our total deposits were \$172.4 billion, compared to \$145.3 billion at September 30, 2021, an increase of 19%, and the weighted average contractual rate paid on total deposits was 0.75% and 0.06%, respectively. We will continue to focus on growth in our core deposit base to fund a significant percentage of our future asset growth. In addition to deposits, we may use other sources of funding, such as federal funds purchased, FHLB advances, unsecured term senior notes or unsecured term subordinated notes, which are generally higher in cost.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### Borrowings

Interest expense on borrowings increased for the quarter ended September 30, 2022 primarily due to an increase in average short-term FHLB advances and an increase in the average cost of long-term FHLB advances, partially offset by a decrease in average long-term FHLB advances. Interest expense on borrowings decreased for the nine months ended September 30, 2022 primarily due to a decrease in average long-term FHLB advances and a decrease in the average cost of long-term FHLB advances, partially offset by an average short-term FHLB advances.

Interest expense on short-term FHLB advances increased for the quarter and nine months ended September 30, 2022 due to higher average balances, which increased 100% for both the quarter and nine months ended September 30, 2022. The average cost of short-term FHLB advances was 2.36% for the quarter ended September 30, 2022 and 2.04% for the nine months ended September 30, 2022.

Interest expense on long-term FHLB advances decreased for the quarter ended September 30, 2022 due to a decrease in the average balance, partially offset by an increase in the average cost of long-term FHLB advances. Interest expense on long-term FHLB advances decreased for the nine months ended September 30, 2022 due to a decrease in the average balance and a decrease in the average cost of long-term FHLB advances. Average long-term FHLB advances decreased 38% for the third quarter of 2022 and decreased 56% for the nine months ended September 30, 2022. Average long-term FHLB advances as a proportion of total average interest-bearing liabilities were 5% and 4% for the quarter and nine months ended September 30, 2021, respectively. The average cost of long-term FHLB advances was 1.49% and 1.29% for the third quarter of 2022 and 2021, respectively, and was 1.21% and 1.38% for the nine months ended September 30, 2022 and 2021, respectively.

## Provision (Reversal of Provision) for Credit Losses

The following table presents information related to the provision (reversal of provision) for credit losses:

		Quarte Septen			Nine Months Ended Quarter Ended				% Change Quarter Ended September 30,	% Change Nine Months Ended September 30,		
(\$ in millions)	2	2022		2021		2022		021	2022 vs. 2021	2022 vs. 2021		
Provision (reversal of provision) for credit losses:	Ċ		Å		Å	0	Å	0	(10)0(	(0)0/		
Debt securities held-to-maturity	Ş	_	Ş	_	Ş	2	Ş	2	(13)%	(9)%		
Loans		32		32		68		35	2 %	94 %		
Unfunded loan commitments		4		2		7		(2)	93 %	NM		
Total	\$	36	\$	34	\$	77	\$	35	7 %	117 %		

Note: Variances that are not meaningful (NM) are not presented in the table above.

The provision for credit losses for the quarter and nine months ended September 30, 2022 was primarily driven by loan growth. In addition, the provision for the nine months ended September 30, 2022 was partially reduced by improvements in individually assessed loans. The provision for the quarter and nine months ended September 30, 2021 was primarily driven by loan growth and an increase in ACL due to qualitative considerations, partially reduced by improvements in economic conditions. The macroeconomic forecasts, historical loss rates, and historical prepayment (or repayment) speeds used in determining the ACL, under different conditions or using different assumptions or estimates, could result in significantly different changes in the ACL. It is difficult to estimate how potential changes in specific factors might affect the overall ACL and current results may not reflect the potential future impact of macroeconomic forecast changes.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

## Noninterest Income

The following table presents noninterest income:

						% Change Quarter Ended September 30,	% Change Nine Months Ended September 30,			
(\$ in millions)	2	2022		2021		2022		2021	2022 vs. 2021	2022 vs. 2021
Noninterest income:										
Investment management fees	\$	142	\$	149	\$	471	\$	404	(5)%	17 %
Brokerage and investment fees		34		23		89		55	54 %	64 %
Insurance fees		6		6		13		12	— %	10 %
Trust fees		7		6		21		18	12 %	16 %
Foreign exchange fee income		25		26		73		64	(4)%	15 %
Deposit fees		7		7		21		20	4 %	6 %
Loan and related fees		10		8		29		24	23 %	15 %
Income from investments in life insurance		23		20		48		58	14 %	(18)%
Other income, net				6		3		18	(100)%	(83)%
Total noninterest income	\$	254	\$	251	\$	768	\$	673	2 %	14 %

Noninterest income increased for the quarter ended September 30, 2022 primarily due to higher brokerage and investment fees, partially offset by lower investment management fees. Noninterest income increased for the nine months ended September 30, 2022 primarily due to higher wealth management fees, partially offset by decreases in income from investments in life insurance and other income.

## Wealth Management Fees

Wealth management fees consist of fees earned for the management or administration of clients' assets, as well as commissions and trading revenues generated from the execution of client-related brokerage and investment activities, revenue earned from selling life insurance and annuity policies and fees earned for assisting clients with foreign exchange transactions. For additional information on the AUM and AUA for the entities comprising the Wealth Management segment, see "—Business Segments."

Investment management fees. We provide traditional portfolio management and customized client portfolios through FRIM. We earn fee income from the management of equity securities, fixed income securities, balanced portfolios, and alternative investments for our clients. The decrease in investment management fees for the quarter was primarily driven by the level and mix of AUM, which was impacted by adverse market conditions. The increase in investment management fees for the nine months was primarily driven by growth in AUM. Investment management fees vary with the amount of assets managed and the type of services and investments chosen, which are impacted by market conditions. Generally, higher fees are earned for managing equity securities than for managing a fixed income portfolio. In addition, since our investment management fees are generally based on AUM levels as of the beginning of a quarterly period, the timing of fluctuation in AUM levels also impacts the level of fees. Changes in FRIM's AUM for the quarter and nine months ended September 30, 2022 compared to the same periods a year ago are presented in the following table:

#### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

		r Ended nber 30,	Nine Months Ended September 30,		
(\$ in millions)		2021	2022	2021	
FRIM AUM:					
Balance at beginning of period	\$ 100,204	\$ 99,459	\$ 109,130	\$ 83,596	
Net client flow	3,781	822	11,002	8,333	
Market appreciation (decline)	(3,860)	824	(20,007)	9,176	
Balance at end of period	\$ 100,125	\$ 101,105	\$ 100,125	\$ 101,105	

The future level of investment management fees depends on the level and mix of AUM, type of services and investments, market conditions and our ability to attract new clients.

*Brokerage and investment fees.* We perform brokerage and investment activities for clients through FRSC. We offer brokerage services for equity securities, mutual funds, exchange-traded funds, unit investment trust, alternative investments, hedging strategies, treasury securities, municipal bonds, other fixed income securities, money market mutual funds and other shorter-term liquid investments. The increases in brokerage and investment fees for the quarter and nine months ended September 30, 2022 were primarily due to higher fees from money market mutual funds as a result of rising interest rates. Changes in client assets in brokerage accounts through FRSC and in third-party money market mutual funds for the quarter and nine months ended September 30, 2022

	Quarte Septen	r Ended 1ber 30,		ths Ended nber 30,
(\$ in millions)		2021	2022	2021
Brokerage AUA:				
Balance at beginning of period	\$ 116,979	\$ 112,359	\$ 128,258	\$ 88,059
Net client flow	5,967	2,945	16,166	15,623
Market appreciation (decline)	(3,647)	489	(25,125)	12,111
Balance at end of period	\$ 119,299	\$ 115,793	\$ 119,299	\$ 115,793
Money market mutual funds AUA:				
Balance at beginning of period	\$ 10,510	\$ 13,109	\$ 23,673	\$ 9,003
Net client flow	381	4,965	(12,782)	9,071
Balance at end of period	\$ 10,891	\$ 18,074	\$ 10,891	\$ 18,074

Brokerage and investment fees are based on the volume and type of transaction activity, conditions in the securities markets, level of money market mutual fund balances and rates, and our ability to attract new clients, and will vary in the future based on these factors.

*Insurance fees.* We earn revenue from selling life insurance and annuity policies to our clients through FRSC. Insurance fees consist of initial commissions when a policy is sold and subsequent commissions each year that a policy is renewed. Such fees vary based on the level of sales of insurance and annuity products and our ability to attract new clients. There is no underwriting risk for the Bank from the sale of insurance products.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

*Trust fees.* The Trust Company specializes in personal trusts and custody services and operates in California, Oregon, Washington, New York, Massachusetts, Delaware, Florida, Wyoming and Connecticut. The Trust Company draws new trust clients from our Preferred Banking and wealth management client base, as well as from outside of our organization. Changes in AUA for the quarter and nine months ended September 30, 2022 compared to the same periods a year ago are presented in the table below:

(\$ in millions)		Quarte Septen			Nine Months Ended September 30,			
		2022	2021			2022	2021	
Trust AUA:								
Balance at beginning of period	\$	14,994	\$	11,496	\$	13,695	\$	9,910
Net client flow		169		465		1,677		1,320
Market appreciation (decline)		107		259		(102)		990
Balance at end of period	\$	15,270	\$	12,220	\$	15,270	\$	12,220
Custody AUA:								
Balance at beginning of period	\$	4,099	\$	4,439	\$	4,687	\$	3,889
Net client flow		12		104		318		79
Market appreciation (decline)		(168)		(10)		(1,062)		565
Balance at end of period	\$	3,943	\$	4,533	\$	3,943	\$	4,533

Trust fees are primarily based on the level and mix of AUA and will vary in the future based on these factors.

*Foreign exchange fee income.* Foreign exchange fee income represents fees we earn from transacting foreign exchange business on behalf of our clients. The increase in foreign exchange fee income for the nine months was primarily driven by higher transaction volume from both existing and new clients.

We execute foreign exchange trades with clients and then offset those trades with other financial institution counterparties, such as major investment banks or large commercial banks. We do not retain significant foreign exchange risk associated with these transactions, as the trades with the client and the financial institution counterparty are matched on our books. We do retain credit risk, both to the client and the counterparty institution, which is evaluated and managed by us in the normal course of our operations. In addition, we have foreign exchange contracts associated with client deposits denominated in various foreign currencies.

#### Other Noninterest Income

Loan and related fees. Loan and related fee income includes: late charge income, which generally increases with growth in the average loan and servicing portfolios; loan related processing or commitment fees that vary with market conditions and origination volumes; prepayment penalties on sold loans; and payoff fees that vary with loan repayment activity and market conditions such as the general level of longer-term interest rates.

Income from investments in life insurance. Income from investments in life insurance reflects the adjustments in carrying value of the underlying investments to their cash surrender value, including life insurance investments related to the Bank's Deferred Compensation Plan. In addition to purchases of additional investments, which impacted the level of income compared to the same periods a year ago, the quarter and nine months ended September 30, 2022 included a decrease in cash surrender value of \$5 million and \$21 million, respectively, from market depreciation in certain life insurance investments related to the Bank's Deferred Compensation Plan. These decreases in income were offset by corresponding decreases in the deferred compensation expense included in salaries and employee benefits.
MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The total book value of the Bank's portfolio of these tax-exempt investments was \$3.4 billion and \$2.6 billion at September 30, 2022 and 2021, respectively. The increase in the portfolio was primarily due to additional purchases of investments in life insurance.

*Other income, net.* Other income, net includes net loan servicing fees, gain (loss) on investment securities and other operating income. The following table presents the main components of net other income:

		Quarte Septen			Nine Months Ended September 30,			
(\$ in millions)		022	2021		2022		2021	
Other income, net:								
Loan servicing fees, net	\$	1	\$	_	\$	4	\$	3
Gain (loss) on investment securities		(1)		2		(6)		4
Other operating income		_		4		5		11
Total other income, net	\$	_	\$	6	\$	3	\$	18

### Noninterest Expense

The following table presents noninterest expense:

		Quarte Septen			Nine Months Ended September 30,		% Change Quarter Ended September 30,	% Change Nine Months Ended September 30,	
(\$ in millions)	2	022	2	021	2022 2021		2022 vs. 2021	2022 vs. 2021	
Noninterest expense:									
Salaries and employee benefits	\$	557	\$	514	\$	1,684	\$ 1,459	8 %	15 %
Information systems		124		91		345	263	36 %	31 %
Occupancy		73		67		212	188	9 %	13 %
Professional fees		31		27		81	74	12 %	9 %
Advertising and marketing		19		14		48	43	36 %	12 %
FDIC assessments		17		14		47	39	26 %	22 %
Other expenses		98		71		281	215	39 %	31 %
Total noninterest expense	\$	919	\$	798	\$	2,698	\$ 2,281	15 %	18 %

The increases in noninterest expense for the quarter and nine months ended September 30, 2022 were primarily attributed to continued investments in our business expansion, including hiring additional colleagues to support our growth and information systems initiatives, as well as higher travel and entertainment expense due to an increase in events held in person.

Noninterest expense was reduced by certain general and administrative costs that have been capitalized, which primarily were compensation costs directly related to loan originations. We capitalized loan origination costs of \$84 million and \$271 million for the quarter and nine months ended September 30, 2022, compared to \$69 million and \$214 million for the quarter and nine months ended September 30, 2021, respectively. The amount of capitalized costs varies directly with the volume of loan originations and the costs incurred to make new loans. The capitalized costs are reported as net deferred loan fees and costs (within loans) on our balance sheet and are amortized to interest income over the contractual life of the loans.

Our efficiency ratio, the ratio of noninterest expense to the sum of net interest income and noninterest income, was 60.3% for the third quarter of 2022, compared to 61.3% for the third quarter of 2021, and was 60.9% for the nine months ended September 30, 2022, compared to 62.2% for the nine months ended September 30, 2022.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Salaries and employee benefits. Salaries and employee benefits is the largest component of noninterest expense and includes the cost of salaries, incentive compensation, deferred compensation, share-based compensation, benefit plans, health insurance and payroll taxes, which have collectively increased as we hired additional personnel to support our growth and our enhanced regulatory infrastructure. The increases in salaries and employee benefit expenses for the quarter and nine months ended September 30, 2022 were attributed to the continued expansion of the franchise resulting in the addition of new personnel to support increased lending activities, deposit growth and expansion of wealth management, as well as increases in incentive compensation, which also varies based on our business activity. These increases were partially offset by decreases in deferred compensation expense. At September 30, 2022, we had 7,114 full-time equivalent employees, including temporary employees and independent contractors, a 16% increase from 6,154 at September 30, 2021.

Information systems. These expenses include payments to vendors that provide software and services on an outsourced basis, costs related to supporting and developing digital platforms, costs associated with telecommunications for ATMs, office activities and internal networks, and depreciation and amortization expense associated with these costs. The increases in information systems expenses for the quarter and nine months ended September 30, 2022 were primarily due to continued technology initiatives to upgrade our systems, enhance the client experience and support our growth.

*Occupancy*. Occupancy costs increased for the quarter and nine months ended September 30, 2022 primarily due to expanding our office space in existing markets for new employees, increased rental costs in certain locations and rental costs for additional banking office locations. We expect the level of occupancy costs to vary with the number of offices and our staffing levels.

*Professional fees.* Professional fees include legal services required to complete certain transactions, resolve legal matters or delinquent loans, and the cost of loan review professionals, co-sourced internal audit, external auditors and other consultants, including consulting services dedicated to technology initiatives. The increases for the quarter and nine months ended September 30, 2022 were primarily due to increases in consulting services supporting various technology initiatives.

Advertising and marketing. We advertise in various forms of media, including digital media, newspapers, radio, and television, primarily to support growth in our Preferred Banking offices and for advertising and marketing initiatives. Advertising and marketing expenses vary based on the number of marketing initiatives, level of advertising costs and costs associated with holding client events to support our growth. The increases for the quarter and nine months ended September 30, 2022 were primarily due to increases in costs associated with holding client events to support our growth and advertising costs, partially offset by decreases in deposit-related promotions.

*FDIC assessments*. FDIC assessments increased for the quarter and nine months ended September 30, 2022 primarily due to growth in the assessment base as a result of the growth in average total assets.

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

*Other expenses.* Other expenses include costs related to lending and deposit activities, client service, hiring, training, charitable contributions, insurance, prepayment penalties on FHLB advances, and other costs related to expanding operations. The increases in travel and entertainment were the result of increased activity, including as a result of the lessening of COVID-19 related restrictions, compared to the same periods a year ago. Other operating expenses include employee wellness and event costs, business taxes, cash management, postage, and other miscellaneous expenses and fees. The following table presents the main components of other expenses:

		Quarte Septen		Nine Months Ended September 30,

Total other expenses	\$	98	\$ 71	\$	281	\$	215

### Provision for Income Taxes

The provision for income taxes varies from statutory rates due to the amount of income for financial statement and tax purposes and the rates charged by federal and state authorities.

The Bank's effective tax rate varies based on the level of tax credit investments, tax-exempt securities, tax-advantaged loans, investments in life insurance and the amount of excess tax benefits from exercise or vesting of share-based awards. The slight increase for the quarter was primarily the result of lower excess tax benefits upon vesting of stock awards, partially offset by a tax refund from an amended tax return. The increase for the nine months was primarily the result of lower excess tax benefits upon vesting of stock awards.

The following table presents additional information about the effective tax rate:

	Quarter   Septemb		Nine Months Ended September 30,		
Effective Tax Rate	2022	2021	2022	2021	
Effective tax rate, prior to excess tax benefits—stock awards and tax refund from an amended tax return	23.3 %	23.2 %	23.6 %	22.5 %	
Excess tax benefits—stock awards	(0.6)	(1.8)	(0.6)	(2.3)	
Tax refund from an amended tax return	(1.1)		(0.4)		
Effective tax rate	21.6 %	21.4 %	22.6 %	20.2 %	

The number of RSUs and PSUs vested impact the amount of excess tax benefits recorded as a reduction in provision for income taxes. See Note 14 in "Item 1. Financial Statements" for additional information regarding excess tax benefits recognized for stock awards. See Note 16 in "Item 1. Financial Statements" for additional information regarding income taxes.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### **Business Segments**

We currently conduct our business through two reportable business segments: Commercial Banking and Wealth Management.

The principal business activities of the Commercial Banking segment are gathering deposits (retail deposit gathering and private banking activities), originating and servicing loans (primarily real estate secured mortgage loans) and investing in investment securities. The primary sources of revenue for this segment are: interest earned on loans and investment securities, fees earned in connection with loan and deposit services, and income from investments in life insurance. Principal expenses for this segment are interest incurred on interest-bearing liabilities, including deposits and borrowings, general and administrative costs and provision for credit losses.

The principal business activities of the Wealth Management segment are (i) the investment management activities of FRIM, which manages investments for individuals and institutions in equity securities, fixed income securities, balanced portfolios, and alternative investments; (ii) our money market mutual fund activities through third-party providers and the brokerage activities of FRSC (these two activities collectively, "Brokerage and Investment"); (iii) sales of life insurance policies and annuity contracts through FRSC; (iv) trust and custody services provided by the Trust Company; and (v) our foreign exchange activities conducted on behalf of clients. The primary sources of revenue for this segment are investment management fees, brokerage and investment fees, insurance fees, trust fees and foreign exchange fee income. In addition, the Wealth Management segment earns a deposit earnings credit for client deposit accounts that are maintained at the Bank, including sweep deposit accounts. The Wealth Management segment's principal expenses are personnel-related costs and other general and administrative expenses. For complete segment information, see Note 19 in "Item 1. Financial Statements."

### **Commercial Banking**

	 Quarte Septen		N	Nine Months Ended September 30,		% Change Quarter Ended September 30,	% Change Nine Months Ended September 30,

Net income	\$ 377	\$ 310	\$	1,068	\$	933	22 %	15 %

The following table presents the operating results of the Bank's Commercial Banking segment:

Net interest income for Commercial Banking increased for the quarter and nine months ended September 30, 2022 primarily due to growth in average interest-earning assets and increases in net interest margin.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The provision for credit losses for the quarter and nine months ended September 30, 2022 was primarily driven by loan growth. In addition, the provision for the nine months ended September 30, 2022 was partially reduced by improvements in individually assessed loans. The provision for the quarter and nine months ended September 30, 2021 was primarily driven by loan growth and an increase in ACL due to qualitative considerations, partially reduced by improvements in economic conditions. The macroeconomic forecasts, historical loss rates, and historical prepayment (or repayment) speeds used in determining the ACL, under different conditions or using different assumptions or estimates, could result in significantly different changes in the ACL. It is difficult to estimate how potential changes in specific factors might affect the overall ACL and current results may not reflect the potential future impact of macroeconomic forecast changes.

Noninterest income for Commercial Banking decreased for the nine months ended September 30, 2022, primarily driven by lower income from investments in life insurance, which reflects decreases in cash surrender value from market depreciation in certain life insurance investments.

Noninterest expense for Commercial Banking increased for the quarter and nine months ended September 30, 2022 primarily due to continued investments in our business expansion, including hiring additional colleagues to support our growth and information systems initiatives, as well as higher travel and entertainment expense due to an increase in events held in person.

Provision for income taxes for Commercial Banking increased for the quarter and nine months ended September 30, 2022 primarily due to higher pre-tax income.

### Wealth Management

The following table presents the operating results of the Bank's Wealth Management segment:

0/ Change

% Changa Nina

		Quarte Septen			Nine Months Ended September 30,		% Change Quarter Ended September 30,	Months Ended September 30,						
(\$ in millions)	2	2022		2022 202		2021	2022		2022 2021		2021		2022 vs. 2021	2022 vs. 2021
Net interest income	\$	97	\$	50	\$	275	\$	137	95 %	101 %				
Noninterest income		218		223		683		592	(2)%	15 %				
Noninterest expense Income before provision for income		218		189		659		527	16 %	25 %				
taxes		97		84		299		202	16 %	49 %				
Provision for income taxes		29		24		88		57	20 %	55 %				
Net income	\$	68	\$	60	\$	211	\$	145	15 %	46 %				

Net interest income for Wealth Management is earned from Wealth Management client deposits with the Bank, for which Wealth Management earns a deposit earnings credit and fees for Wealth Management sweep deposit accounts. The deposit earnings credit and fees vary based on the amounts, allocated credit rates, and type of Wealth Management client deposits. Net interest income increased primarily as a result of growth in Wealth Management client deposits, including sweep deposit accounts, as well as a result of credit rate changes.

Wealth Management client deposits totaled \$20.8 billion and \$18.5 billion at September 30, 2022 and 2021, respectively, including sweep deposits. Wealth Management client deposits, including sweep accounts, averaged \$21.5 billion and \$18.8 billion for the third quarter of 2022 and 2021, respectively, and averaged \$21.1 billion and \$18.0 billion for the nine months ended September 30, 2022 and 2021, respectively. As noted above, Wealth Management is allocated a deposit earnings credit and fees as net interest income, which is included in the Wealth Management results. Annualized net interest income as a percentage of the average deposits generated by Wealth Management represented 1.79% for the third quarter of 2022, compared to 1.05% for the third quarter of 2021, and 1.75% for the nine months ended September 30, 2022, compared to 1.02% for the nine months ended September 30, 2021.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The allocated earnings credit represents only a portion of the total net interest income generated by these deposits for the Bank. The Bank's holistic approach to generating a full relationship with our clients is reflected in the total impact that these Wealth Management deposits have to the Bank's overall net interest income. The Bank's consolidated net interest margin was 2.71% and 2.65% for the third quarter of 2022 and 2021, respectively, and 2.73% and 2.67% for the nine months ended September 30, 2022 and 2021, respectively. Using this overall net interest margin and the average Wealth Management deposits for each respective period, the Wealth Management deposits, on a consolidated basis, contributed net interest income of \$147 million and \$125 million for the third quarter of 2022 and 2021, respectively, and \$430 million and \$360 million for the nine months ended September 30, 2022 and 2021, respectively.

Noninterest income for Wealth Management decreased slightly for the quarter ended September 30, 2022 primarily due to lower investment management fees, partially offset by higher brokerage and investment fees. Noninterest income for Wealth Management increased for the nine months ended September 30, 2022 primarily due to higher investment management fees and brokerage and investment fees. Investment management fees vary with the amount of assets managed and the type of services and investments chosen, which are impacted by market conditions. In addition, since our investment management fees are generally based on AUM levels as of the beginning of a quarterly period, the timing of fluctuation in AUM levels also impacts the level of fees. The future level of investment management fees depends on the level and mix of AUM, type of services and investment fees vary based on the volume and type of transaction activity, conditions in the securities markets, level of money market mutual fund balances and rates, and our ability to attract new clients, and will vary in the future based on these factors.

Noninterest expense for Wealth Management increased for the quarter and nine months ended September 30, 2022 primarily due to higher salaries and employee benefits, which reflect the overall growth in our business and the addition of new wealth managers, as well as the level of incentive compensation, which also varies based on our business activity.

Provision for income taxes for Wealth Management increased for the nine months ended September 30, 2022 primarily due to higher pre-tax income.

AUM and AUA, in aggregate, decreased slightly compared to September 30, 2021 due to market decline partially offset by net client inflow. Our Wealth Management strategy is focused on both managing investment portfolios for our clients and keeping custody of such assets in brokerage accounts at FRSC. By providing multiple services, we are able to better develop a full Wealth Management and banking relationship, as well as the ability to gather deposits, including sweep accounts. As described above, client deposits from Wealth Management generate net interest income for the Bank. Certain Wealth Management client assets that are held or managed by different areas within our Wealth Management business generate multiple revenue streams for the Bank. As a result of having these client assets served by different areas with multiple revenue streams, such assets are included in more than one type of Wealth Management asset category in the following table.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following table presents the AUM and AUA by the entities comprising our Wealth Management segment:

(\$ in millions)	Sep	otember 30, 2022	June 30, 2022	March 31, 2022		Dee	cember 31, 2021	September 30, 2021		
First Republic Investment Management	\$	100,125	\$ 100,204	\$	108,771	\$	109,130	\$	101,105	
Brokerage and investment:

#### **Balance Sheet Analysis**

#### Investments

The following table presents the investment portfolio:

(\$ in millions)	Sept	tember 30, 2022	Dec	ember 31, 2021
Debt securities available-for-sale:				
Agency residential MBS	\$	2,070	\$	1,829
Other residential MBS		11		15
Agency commercial MBS		1,220		1,490
Securities of U.S. states and political subdivisions—taxable		47		47
Total	\$	3,348	\$	3,381
Debt securities held-to-maturity:				
U.S. Government-sponsored agency securities	\$	165	\$	100
Agency residential MBS		1,877		1,380
Other residential MBS		8		9
Agency commercial MBS		5,414		2,719
Securities of U.S. states and political subdivisions:				
Tax-exempt municipal securities		17,586		15,011
Tax-exempt nonprofit debentures		70		72
Taxable municipal securities		1,726		1,632
Corporate debt securities		1,412		1,378
Total		28,258		22,301
Less: Allowance for credit losses		(11)		(9)
Debt securities held-to-maturity, net	\$	28,247	\$	22,292
Equity securities (fair value):				
Mutual funds and marketable equity securities	\$	22	\$	28

The total combined investment securities portfolio (consisting of available-for-sale, held-tomaturity and equity securities, excluding any ACL) represented 15% and 14% of total assets at September 30, 2022 and December 31, 2021, respectively.

The weighted average duration of the available-for-sale portfolio was 4.3 and 3.9 years at September 30, 2022 and December 31, 2021, respectively. The weighted average duration of the held-to-maturity portfolio was 10.8 and 10.6 years at September 30, 2022 and December 31, 2021, respectively.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

At September 30, 2022, the tax-exempt and taxable municipal securities had an average credit rating of AA and the portfolio was well-diversified with an average issuer position of approximately \$39 million. The tax-exempt nonprofit debentures are securities issued through state and local agencies where we have a banking relationship with nonprofit entities. The debentures are reviewed, approved and monitored by our business banking group, similar to business loans.

### Allowance for Credit Losses on Debt Securities

As of September 30, 2022, no ACL was recognized on available-for-sale debt securities.

As of September 30, 2022, the ACL on held-to-maturity debt securities totaled \$11 million and consisted primarily of the ACL on securities of U.S. states and political subdivisions (including taxexempt municipal securities and taxable municipal securities). The ACL on these securities is determined by expert judgment, which is based on historical ratings-based average probabilities of default and industry average LGD to determine expected credit losses over the life of the securities. No ACL is recognized on held-to-maturity U.S. Government-sponsored agency securities, agency residential MBS and agency commercial MBS due to the explicit or implicit guarantee by the Federal Government.

Total	\$ 54,119	\$30,547	\$32,928	\$13,098	\$6,492	\$ 1,919	\$19,664	\$158,767	100 %
% by location at September 30, 2022	34 %	19 %	21 %	8 %	4 %	1%	13 %	100 %	
% by location at December 31, 2021	36 %	20 %	20 %	8 %	4 %	1%	11 %	100 %	

At September 30, 2022 and December 31, 2021, 52% and 51%, respectively, of total loans were secured by real estate properties located in California. Future economic or political conditions, natural disasters (including the increasing prevalence or intensity of natural disasters as a result of the effects of climate change), disruptions and instability caused by COVID-19 or other developments in California could adversely affect the value of real estate secured mortgage loans.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Bank's loan portfolio includes: (1) adjustable-rate loans tied to Prime, LIBOR, COFI Repl Index, and other reference rates such as 12-month average of 1-year CMT, which are currently adjustable; (2) hybrid-rate loans, for which the initial rate is fixed for a period from one year to as many as ten years, and thereafter the rate becomes adjustable; and (3) fixed-rate loans, for which the interest rate does not change through the life of the loan. The following table presents our loan portfolio at September 30, 2022, by rate type:

			Adju	ustable Ra	te						
(\$ in millions)	Prime	LIBOR		COFI Repl Index		Other	Total		Hybrid Rate	Fixed Rate	Total

<sup>(1)</sup> As a result of the discontinuation of COFI, the Bank transitioned loans formerly indexed to COFI to the COFI Repl Index in February 2022.

At September 30, 2022, included in the hybrid-rate and fixed-rate loan portfolios are \$3.7 billion, or 2% of the total loan portfolio, that either (1) mature within one year or (2) are within one year of adjusting from the initial fixed-rate period.

Many of our loan products determine the amount of interest by reference to certain benchmark rates or indices. The FHLB of San Francisco ceased calculating and publishing COFI on January 31, 2022. Additionally, in March 2021, the FCA announced the dates that panel bank submissions for all LIBOR settings will cease, after which the respective LIBOR settings will no longer be provided by any administrator, including the cessation of the one-week and two-month USD LIBOR tenors after December 31, 2021 and all other USD LIBOR tenors after June 30, 2023. In March 2022, President Biden signed the LIBOR Act into law. The LIBOR Act provides a statutory framework to replace USD LIBOR with a benchmark rate based on SOFR for contracts governed by U.S. law that have no fallbacks or fallbacks that would require the use of a poll or LIBOR-based rate. Under the LIBOR Act, the Board of Governors of the Federal Reserve must adopt rules to identify the applicable SOFR-based

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

replacement rate. In July 2022, the Board of Governors of the Federal Reserve released proposed rules, which would identify different SOFR-based replacement rates for derivative contracts, cash instruments such as floating-rate notes and preferred stock, consumer loans and certain government-sponsored enterprise contracts. The Bank ceased offering new loans indexed to COFI in the first half of 2018 and to LIBOR in the first half of 2019. In lieu of COFI or LIBOR, new loan originations are currently indexed to Prime or a 12-month average of 1-year CMT. As the replacement index for COFI, the Bank selected COFI Repl Index, which is based on Federal COFI plus/minus a spread adjustment equal to the five-year historical median spread between COFI and Federal COFI. In February 2022, the Bank transitioned outstanding loans indexed to COFI to this new index. The Bank is continuing the assessment of its outstanding loans indexed to LIBOR.

### **Residential real estate**

Residential real estate includes single family, HELOCs and single family construction loans.

### Single Family

Our single family loans include loans that have an initial interest-only period. Subsequent to the initial interest-only period, these loans fully and evenly amortize until maturity. Underwriting standards for all such loans require substantial borrower net worth, substantial post-loan liquidity, excellent credit scores and significant down payments. As part of our underwriting standards, we verify the ability of the borrowers to repay our loans. The following table presents our single family loan portfolio that fully and evenly amortizes until maturity following an initial interest-only period of generally ten years:

	Septemb	er 30, 2022	Decembe	er 31, 2021
(\$ in millions)	Unpaid Principal Balance	% of Total Single Family	Unpaid Principal Balance	% of Total Single Family
Interest-only single family	\$ 55,635	59 %	\$ 46,620	61 %

At September 30, 2022, interest-only home loans had a weighted average LTV of 56%, based on appraised value at the time of origination, and had credit scores averaging 765 at origination. At September 30, 2022, interest-only home loans with an LTV at origination of more than 80% comprised less than 1% of the unpaid principal balance of our single family loan portfolio.

The following table presents LTV information at origination for all single family loans:

		September 30, 2022				
(\$ in millions)	Unpaid Principal Balance		% of Total			
LTV at Origination						
Less than or equal to 60%	\$	47,931	51.0 %			
Greater than 60% to 70%		28,594	30.5			
Greater than 70% to 80%		16,906	18.0			
Greater than 80%		468	0.5			
Total	\$	93,899	100.0 %			

We do not originate single family loans with the characteristics generally described as "subprime" or "high cost." Subprime loans are typically made to borrowers with little or no cash reserves and poor or limited credit. Often, subprime loans are underwritten using limited documentation. Over the past two years, the single family loans originated by us had a weighted average credit score of 769, and all of our home loans were underwritten using full documentation.

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Home Equity Lines of Credit

Our single family HELOC product requires the payment of interest each month on the outstanding balance. During the first ten years of the loan term, principal amounts may be repaid or drawn at the borrower's option; thereafter, the unpaid principal balance fully and evenly amortizes over a period of fifteen years. We underwrite HELOCs based on the same standards as single family home loans. As a result, our delinquency and loss experience on HELOCs has been similar to the experience for single family loans.

For HELOCs that are in second lien position, the LTVs in the table below are presented on a CLTV basis, including the total HELOC commitment and any balance on a first residential mortgage. As of September 30, 2022, 39% of HELOCs are in first lien position, and 50% of HELOCs are in second lien position behind a first residential mortgage originated by us, including loans subsequently sold to investors, based on total commitment.

The following table presents CLTV information at origination for HELOCs:

		September 30, 2022								
(\$ in millions)	Unpaid Principal Balance		Con	Total nmitment	% of Unpaid Principal Balance					
CLTV at Origination										
Less than or equal to 60%	\$	1,945	\$	7,633	70.7 %					
Greater than 60% to 70%		591		1,884	21.5					
Greater than 70% to 80%		201		451	7.3					
Greater than 80%		15		16	0.5					
Total	\$	2,752	\$	9,984	100.0 %					

#### Single Family Construction

Our single family construction loan portfolio includes loans to individual clients for the construction and ownership of single family homes. These loans are typically disbursed as construction progresses and can be converted into a permanent mortgage loan once the property is occupied. At September 30, 2022 and December 31, 2021, the unpaid principal balance of single family construction loans was \$1.2 billion and \$996 million, respectively, and the total commitment was \$2.7 billion and \$2.0 billion, respectively.

### Income property

Income property includes multifamily, commercial real estate and multifamily/commercial construction loans.

### Multifamily

The following table presents the unpaid principal balance of all multifamily loans and multifamily loans (excluding lines of credit), for which interest-only payments may be made for a period of up to ten years, depending upon the borrower, specific underwriting criteria and terms of the loans:

		Unpaid Princ	cipal l	Balance
(\$ in millions)	Sep	tember 30, 2022	De	cember 31, 2021
Multifamily	\$	20,346	\$	15,960
Multifamily—interest-only <sup>(1)</sup>	\$	10,892	\$	7,518

<sup>(1)</sup> Excludes lines of credit.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

At September 30, 2022, interest-only multifamily loans (excluding lines of credit) had a weighted average LTV of 51% based on the appraised value at the time of origination.

Additionally, certain multifamily lines of credit allow for interest-only payments for an initial period. The following table presents the unpaid principal balance, total commitment, and percentage of interest-only lines of credit secured by the equity in multifamily real estate:

			Septe	mber 30, 2	022			Dece	mber 31, 20	021
(\$ in millions)	Pri	npaid ncipal lance		Total nmitment	% of Total Multifamily	Pri	npaid incipal lance	Cor	Total nmitment	% of Total Multifamily
Multifamily lines of credit—interest-only	\$	851	\$	1,477	4.2 %	\$	432	\$	827	2.7 %

At September 30, 2022, interest-only multifamily lines of credit had a weighted average LTV of 54% based on the appraised value at the time of origination.

### Commercial Real Estate

The following table presents the unpaid principal balance of all commercial real estate loans and commercial real estate loans (excluding lines of credit) for which interest-only payments may be made for a period of up to ten years, depending upon the borrower, specific underwriting criteria and terms of the loans:

Commercial real estate	Unpaid Principal Balance							
(\$ in millions)	Se	ptember 30, 2022	D	ecember 31, 2021				
Commercial real estate	\$	10,044	\$	8,537				
Commercial real estate—interest-only <sup>(1)</sup>	\$	3,826	\$	2,886				

<sup>(1)</sup> Excludes lines of credit.

At September 30, 2022, interest-only commercial real estate loans (excluding lines of credit) that allow for interest-only payments had a weighted average LTV of 46% based on the appraised value at the time of origination.

Additionally, certain commercial real estate lines of credit allow for interest-only payments for an initial period. The following table presents the unpaid principal balance, total commitment, and percentage of interest-only lines of credit secured by the equity in commercial real estate:

			Septe	mber 30, 2	022	December 31, 2021					
(\$ in millions)	Pri	npaid ncipal lance		Total mitment	% of Total Commercial Real Estate	Pri	npaid ncipal lance	Cor	Total nmitment	% of Total Commercial Real Estate	
Commercial real estate lines of credit— interest-only	\$	440	\$	935	4.4 %	\$	442	\$	939	5.2 %	

At September 30, 2022, interest-only commercial real estate lines of credit had a weighted average LTV of 44% based on the appraised value at the time of origination.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Multifamily/Commercial Construction

Our multifamily/commercial construction loan portfolio includes loans for the construction and ownership of other types of properties other than owner-occupied single family homes. These loans are typically disbursed as construction progresses and can be converted into a permanent mortgage loan once the property is occupied. At September 30, 2022 and December 31, 2021, the unpaid principal balance of multifamily/commercial construction loans was \$2.1 billion and \$1.9 billion, respectively, and the total commitment was \$3.9 billion and \$3.4 billion, respectively.

#### **Business**

Business loans include capital call lines of credit, tax-exempt, other business and PPP loans. Business loans provide funding for investment opportunities, bridge capital calls from investors, and meet working capital cash flow requirements and various other financing needs of our business and non-profit clients.

The business loan portfolio is comprised primarily of capital call lines to private equity and venture capital funds, and loans to independent schools and other non-profit organizations, which include social service organizations, the performing arts and museums. In addition, we provide operating lines of credit and term loans to other business clients to meet their working capital needs.

The following table presents our business lines of credit by type:

Included within business lines of credit are capital call lines of credit, which are credit facilities that enable private equity and venture capital funds to bridge the timing between funding investments and receiving funds from limited partner capital calls. As of September 30, 2022, the unpaid principal balance and total commitment for capital call lines of credit was \$9.4 billion and \$29.5 billion, respectively, resulting in a utilization rate for these lines of credit of 31.8% at September 30, 2022.

The following table presents our business term loans by type:

	ι	Unpaid Principal Balance

### PPP Loans

We originated PPP loans from April 2020 to June 2021, until the program ceased new loan originations. PPP loans had a remaining unpaid principal balance of \$30 million at September 30, 2022.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### Other

Other loans include stock secured, other secured and unsecured loans. The following table presents the unpaid principal balance and total commitment for these loans:

	September 30, 2022					Decemb	oer 31	er 31, 2021	
(\$ in millions)	Pi	Unpaid Principal Total Balance Commitment		Unpaid Principal Balance					
Stock secured	\$	4,245	\$	11,536	\$	3,430	\$	9,273	
Other secured		3,000		6,467		2,456		5,053	
Unsecured		3,010		4,411		3,080		4,347	
Total	\$	10,255	\$	22,414	\$	8,966	\$	18,673	

#### Stock Secured

Stock secured loans consist of loans that allow clients to borrow money against eligible marketable securities for a wide range of purposes, including, but not limited to: home renovations, business opportunities and general liquidity.

#### Other Secured

Other secured loans primarily consist of professional loan program loans, including term loans and lines of credit, which offer individuals an ability to borrow for capital and partnership requirements. Such loans had an unpaid principal balance of \$2.9 billion and \$2.3 billion at September 30, 2022 and December 31, 2021, respectively, and total commitments of \$6.2 billion and \$4.8 billion, respectively.

#### Unsecured

Unsecured loans primarily consist of household debt refinance loans, including term loans and personal lines of credit, which are made to refinance existing household debt and access additional financing at fixed interest rates. Such loans had an unpaid principal balance of \$2.1 billion at both September 30, 2022 and December 31, 2021, and total commitments of \$2.7 billion and \$2.5 billion at September 30, 2022 and December 31, 2021, respectively.

In addition, unsecured loans include other unsecured lines of credit, which are originated to meet the non-mortgage needs of our clients. Such loans generally have a shorter term to maturity, are adjustable with the prime rate and are subject to annual or more frequent review.

#### **Lines of Credit**

The following table presents the utilization percentages for lines of credit by type:

Utilization Percentage	September 30, 2022	June 30, 2022	March 31, 2022	December 31, 2021	September 30, 2021
Home equity lines of credit	27.0 %	27.1 %	26.7 %	27.5 %	26.5 %
Single family construction	42.4 %	44.7 %	49.2 %	50.1 %	51.5 %
Multifamily	57.6 %	60.7 %	54.2 %	52.4 %	41.9 %
Commercial real estate	47.4 %	40.5 %	43.5 %	47.0 %	50.0 %

Other secured	42.9 %	41.7 %	43.9 %	44.8 %	43.4 %
Unsecured	48.8 %	47.6 %	46.8 %	47.0 %	47.2 %

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Loan Originations

Our strategy is to originate relationship-based loans. While we emphasize loans secured by single family residences, we also selectively originate multifamily mortgages, commercial real estate mortgages and other loans, including business loans. We focus on originating specific loan types in our primary markets. The majority of our mortgage loans are secured by properties located in close proximity to one of our offices. Some single family loans are originated for sale in the secondary market. From the inception of our predecessor institution in mid-1985 through September 30, 2022, we have originated \$442.2 billion of loans, of which \$36.1 billion have been sold to investors.

Loan originations include newly originated loans, newly originated lines of credit (based on total commitment), refinanced loans and increases in loan commitment amounts resulting from loan modifications. The following table presents loan originations:

	Quarter Ended September 30,					iths Ended nber 30,		
(\$ in millions)		2022		2021	2022		2021	
Residential real estate

Total residential real estate		8,092		7,870		29,346		25,108
Income property								
Multifamily		2,658		1,199		6,697		3,092
Commercial real estate		1,141		725		2,523		1,497
Multifamily/commercial construction		410		356		1,286		939
Total income property		4,209		2,280		10,506		5,528
Business								
Capital call lines of credit		3,232		3,129		9,348		9,181
Tax-exempt		178		38		360		460
Other business		598		533		2,214		2,079
PPP		_		_				725
Total business		4,008		3,700		11,922		12,445
Other								
Stock secured		791		753		2,842		2,239
Other secured		563		547		2,044		1,584
Unsecured		333		304		1,115		1,022
Total other		1,687		1,604		6,001		4,845
Total loans originated	\$	17,996	\$	15,454	\$	57,775	\$	47,926

Total loan originations were \$18.0 billion for the third quarter of 2022, compared to \$15.5 billion for the third quarter of 2021, an increase of 16%, and were \$57.8 billion for the nine months ended September 30, 2022, compared to \$47.9 billion for the nine months ended September 30, 2022, compared to \$47.9 billion for the nine months ended September 30, 2021, an increase of 21%. Loan originations increased primarily due to increases in multifamily lending for the quarter, and primarily due to increases in single family and multifamily lending for the nine months. The volume and type of loan originations depend on the level of interest rates, the demand for loans in our markets and other economic conditions.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following table presents the weighted average LTVs for new loans secured by real estate originated during each of the periods indicated based on the appraised value at the time of origination. The single family loan category also includes loans originated and subsequently sold to investors.

	Quarter Ended						
LTVs for New Originations	September 30, 2022	June 30, 2022	March 31, 2022	December 31, 2021	September 30, 2021		
Single family	63 %	61 %	58 %	59 %	60 %		
Home equity lines of credit <sup>(1)</sup>	49 %	50 %	50 %	52 %	50 %		
Single family construction	51 %	56 %	55 %	55 %	55 %		
Multifamily	54 %	53 %	54 %	51 %	51 %		
Commercial real estate	45 %	48 %	51 %	48 %	41 %		
Multifamily/commercial construction	54 %	55 %	54 %	52 %	55 %		

<sup>(1)</sup> Presented on a CLTV basis, including the first residential mortgage and a second lien, where applicable.

The weighted average LTVs in all categories have remained consistent and conservative over the periods and are indicative of the high quality of the Bank's underwriting standards.

The following table presents the weighted average borrower's credit scores for home loans originated during each of the periods indicated. The single family loan category also includes loans originated and subsequently sold to investors.

	Quarter Ended								
Weighted Average Credit Scores	September 30, 2022	June 30, 2022	March 31, 2022	December 31, 2021	September 30, 2021				
Single family	770	771	769	768	769				
Home equity lines of credit	773	772	765	774	772

Total	100 %	100 %	100 %	100 %	100 %				

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Portfolio LTVs

We have approved a limited group of third-party appraisers to appraise all of the properties on which we make loans. Certain larger single family loans require two appraisals (with the lower value used for underwriting purposes). Our practice is to seldom exceed an 80% LTV on single family loans and an 80% CLTV on HELOCs. LTV ratios generally decline as the size of the loan increases. At origination, we generally do not exceed a 75% LTV on multifamily loans and a 70% LTV on commercial real estate loans.

The following table presents the weighted average LTVs based on the appraised value at the time of origination for our entire portfolio of loans secured by real estate at the dates indicated:

Portfolio LTVs	September 30, 2022	June 30, 2022	March 31, 2022	December 31, 2021	September 30, 2021
Single family <sup>(1)</sup>	58 %	58 %	58 %	58 %	58 %
Home equity lines of credit <sup>(2)</sup>	49 %	50 %	50 %	50 %	50 %
Single family construction	56 %	56 %	56 %	56 %	56 %
Multifamily	52 %	51 %	51 %	51 %	51 %
Commercial real estate	46 %	46 %	46 %	46 %	46 %
Multifamily/commercial construction	55 %	55 %	54 %	54 %	54 %

<sup>(1)</sup> Includes any loans held for sale, when applicable.

<sup>(2)</sup> Presented on a CLTV basis, including the first residential mortgage and a second lien, where applicable.

We either retain originated home loans in our loan portfolio or sell the loans in whole loan or loan participation arrangements, either in the secondary market or in loan securitizations. Loan sales are highly dependent upon market conditions. We have retained in our loan portfolio both ARMs and intermediate-fixed rate loans. As interest rates rise, payments on ARMs increase, which may be financially burdensome to some borrowers and could increase the risk of default. Our ARMs provide for a life cap above the initial interest rate, thereby protecting borrowers from unlimited interest rate increases. As part of our standard underwriting guidelines, borrowers undergo a qualification process for an ARM loan assuming an interest rate that is higher than the initial rate.

### Asset Quality

We place an asset on nonaccrual status when any installment of principal or interest is 90 days or more past due (except for single family loans that are well secured and in the process of collection) or when management determines the ultimate collection of all contractually due principal or interest to be unlikely. Restructured loans for which we grant payment or interest rate concessions because of a borrower's financial difficulties (i.e., TDRs) are placed on nonaccrual status until collectibility improves and a satisfactory payment history is established, generally by the receipt of at least six consecutive timely payments.

Our collection policies are highly focused with respect to both our portfolio loans and loans serviced for others. We have policies requiring prompt notification of delinquency and initiation of corrective measures. Our practice is to attempt to resolve problem assets quickly, including (as appropriate) collections, modifications, pursuit of foreclosure, or the sale of such problem assets as rapidly as possible at prices available in the prevailing market. For certain properties, we may make repairs and engage management companies in order to reach stabilized levels of occupancy prior to asset disposition. We believe our collection and foreclosure procedures comply with all applicable laws and regulations. We currently have a low level of loans in foreclosure.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Nonaccrual and Other Information

The following table presents total nonaccrual loans, other real estate owned, the ratio of nonperforming assets to total assets, accruing loans 90 days or more past due and restructured accruing loans:

(\$ in millions)	ember 30, 2022	Dec	ember 31, 2021
Nonperforming assets: Nonaccrual loans Other real estate owned	\$ 120	\$	139
Total nonperforming assets	\$ 120	\$	139
Nonperforming assets to total assets	0.06 %		0.08 %
Accruing loans 90 days or more past due	\$ —	\$	—
Restructured accruing loans	\$ 12	\$	13

See Note 4 in "Item 1. Financial Statements" for information related to interest income on nonaccrual loans for the quarters and nine months ended September 30, 2022 and 2021.

Of the loans on nonaccrual status, \$50 million were current at September 30, 2022, compared to \$52 million at December 31, 2021.

The future level of nonperforming assets depends upon a number of factors, including the performance of borrowers under loan terms, the timing of the sale of future other real estate owned properties and economic conditions nationally and in our primary markets.

### Allowance for Credit Losses on Loans

The Bank estimates its ACL on loans using quantitative models, expert judgment, qualitative factors and individual assessments. The Bank's estimate incorporates individual loan and/or property level characteristics, macroeconomic forecasts and historical loss rates to determine expected credit losses over the life of its loans. Loans with similar risk characteristics within each class are pooled when developing the allowance, and loans that do not share similar risk characteristics are individually assessed.

For a complete description of the accounting policies for determining the Bank's ACL on loans, see Note 4 in "Item 1. Financial Statements" in this Quarterly Report on Form 10-Q and Note 1 in Part II, "Item 8. Financial Statements and Supplementary Data" of our 2021 Form 10-K. In addition, see Note 4 in "Item 1. Financial Statements" for information related to changes in the ACL for loans. For further discussion of the Bank's ACL on loans, see "—Critical Accounting Policies and the Impact of Accounting Estimates—Allowance for Credit Losses on Loans."

### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following table presents our net loan charge-offs, ACL on loans, average total loans, total loans and total nonaccrual loans, as well as ratios related to these measures:

	At or for the Quarter Ended September 30,					At or for the Nine Month Ended September 30,				
(\$ in millions)		2022		2021		2022		2021		
Net loan charge-offs Allowance for credit losses on loans Average total loans	\$	1 760 155,002	\$ \$ \$		\$ \$ \$	2 760 146,164	\$ \$ \$	2 668 120,451		
Total loans Total nonaccrual loans Ratios:	· · ·	158,767 120	\$ \$	128,375 127	\$ \$	158,767 120	\$ \$	128,375 127		
Net loan charge-offs to average total loans (annualized)		0.00 %		0.00 %		0.00 %		0.00 %		
Nonaccrual loans to total loans		0.08 %		0.10 %		0.08 %		0.10 %		
Total loans Nonaccrual loans		0.48 % 635.3 %		0.52 % 524.4 %		0.48 % 635.3 %		0.52 % 524.4 %		

### Allowance for Credit Losses on Unfunded Loan Commitments

The Bank also records an ACL on unfunded loan commitments, which is based on the same assumptions as funded loans and also considers the probability of funding. For a complete description of the accounting policies for determining the Bank's ACL on unfunded loan commitments, see Note 4 in "Item 1. Financial Statements" in this Quarterly Report on Form 10-Q and Note 1 in Part II, "Item 8. Financial Statements and Supplementary Data" of our 2021 Form 10-K. In addition, see Note 4 in "Item 1. Financial Statements" for information related to changes in the ACL on unfunded loan commitments.

#### Mortgage Banking Activities

In addition to originating loans for our own portfolio, we conduct mortgage banking activities. We have sold whole loans and participations in loans in the secondary market and in loan securitizations. We originate, on a direct flow basis, single family mortgages that are priced and underwritten to conform to previously agreed-upon criteria prior to loan funding and are delivered to the investor shortly after funding. We have also identified secondary market sources that seek to acquire loans of the type we originate for our loan portfolio.

The level of loan originations, loan sales and gain on loan sales depend upon market conditions and the interest rate environment, as well as our pricing and ALM strategies. The level of future loan originations, loan sales and gain on loan sales will depend on overall credit availability, the interest rate environment, the strength of the general economy, local real estate markets and the housing industry, and conditions in the secondary loan sale market.

In connection with loan sales, we retain all the loan servicing in order to maintain the primary contact with our clients and to generate recurring fee income. We retain MSRs on loans that we sell to institutional investors and governmental agencies. We generally do not provide any financial or performance guarantees to the investors who purchase our loans and the purchasers do not have any recourse to the Bank on the loans that we have sold. In accordance with secondary market standards, we make customary representations and warranties related to the origination and documentation of sold loans. We have not been required to make any significant loan repurchases or incur any other significant costs subsequent to the sale of loans for any breach of these customary representations and warranties.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As of September 30, 2022, the Bank has an obligation to reimburse Freddie Mac for losses up to \$30 million, or 12% of the multifamily loans securitized in 2018. As of September 30, 2022, the weighted average LTV of those loans was 54% based on the appraised value at the time of origination. There was no liability for estimated losses related to this reimbursement obligation at September 30, 2022, and the Bank has experienced no cumulative losses on the loans within this securitization through September 30, 2022. The remaining unpaid principal balance of multifamily loans securitized was \$47 million at September 30, 2022, compared to \$71 million at December 31, 2021 and \$252 million at the time of securitization in 2018.

In connection with single family loans securitized in 2020, the Bank retained a 5% interest in the investment securities issued in the securitization, which consist of senior and subordinated tranches and an interest-only strip. The carrying value of the securities was \$8 million as of September 30, 2022, compared to \$10 million as of December 31, 2021. There have been no cumulative losses on the loans within the securitization through September 30, 2022. The remaining unpaid principal balance of single family loans securitized was \$168 million at September 30, 2022, compared to \$195 million at December 31, 2021 and \$300 million at the time of securitization in 2020.

Mortgage loans serviced for investors decreased to \$3.6 billion at September 30, 2022, from \$5.1 billion at September 30, 2021, due to repayments in the servicing portfolio exceeding loan sales over the past twelve months. The average servicing portfolio was \$3.7 billion and \$4.2 billion for the quarter and nine months ended September 30, 2022, compared to \$5.5 billion and \$6.1 billion for the quarter and nine months ended September 30, 2021, respectively, a decrease of 31% for the quarter and a decrease of 32% for the nine months. The overall annualized repayment speed experienced on loans serviced was 22% and 28% for the quarter and nine months ended September 30, 2022, compared to 33% and 36% for the quarter and nine months ended September 30, 2022, compared to 33% and 36% for the quarter and nine months ended September 30, 2021, respectively. At September 30, 2022, MSRs were \$12 million (33 bps of loans serviced), compared to \$18 million (35 bps of loans serviced) at September 30, 2021.

Our loan origination policies and consistent underwriting standards have resulted in a low historical loan loss experience on single family loans sold in the secondary market. Since our inception in 1985, we have experienced cumulative net loan losses of only \$10 million on single family loans sold. At September 30, 2022, single family loans serviced for investors that are 90 days or more past due were \$5 million, or 14 bps of such loans serviced.

### **Deposit Gathering**

We obtain funds from depositors by offering consumer and business checking, money market and passbook accounts, and term CDs. Our accounts are federally insured by the FDIC up to the maximum limit. At September 30, 2022, our total deposits were \$172.4 billion, a 10% increase from \$156.3 billion at December 31, 2021, as we continued to expand relationships with existing clients and acquire new deposit clients, both business and consumer. Estimated uninsured deposits totaled \$119.1 billion and \$116.7 billion as of September 30, 2022 and December 31, 2021, respectively. Estimates of uninsured deposits are based on the methodologies and assumptions used in our Consolidated Reports of Condition and Income ("Call Report") filings.

Core deposits, which include checking accounts, money market accounts, savings accounts and CDs (excluding CDs greater than \$250,000 and all brokered deposits), provide a stable source of low cost funding. Core deposits totaled \$160.3 billion and \$151.5 billion at September 30, 2022 and December 31, 2021, respectively, and represented 93% and 97% of total deposits at September 30, 2022 and December 31, 2021, respectively. Total deposits included \$4.9 billion of brokered deposits at September 30, 2022, compared to \$851 million at December 31, 2021. The weighted average contractual rate paid on brokered deposits was 3.05% and 0.02% at September 30, 2022 and December 31, 2021, respectively.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our deposit base consists of: (1) Preferred Banking deposits, which are placed by clients who enter into deposit relationships directly with a relationship manager, business banker, preferred banker or wealth management professional; (2) deposits from Preferred Banking Offices, which are retail locations that gather deposits and service all of our clients; (3) wealth management sweep deposits, which primarily consist of deposits swept from clients' brokerage or other investment accounts; and (4) other deposits, which primarily consist of brokered deposits, municipal deposits, and other deposits that are not attributable to any specific deposit location.

The following table presents deposits by channel, and by region in which the accounts are domiciled:

(\$ in millions)	September 30, 2022		Dec	ember 31, 2021
Preferred Banking:				
Northern California	\$	46,023	\$	41,464

Money market savings and passbooks		11,183		11,341
CDs		13,327		5,788
Subtotal		64,398		63,270
Percent of total deposits		37 %		40 %
Total deposits	\$	172,382	\$	156,321

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

At September 30, 2022, the weighted average contractual rate paid on CDs was 2.25%, and the weighted average remaining maturity of CDs was 5.3 months. The contractual maturities and weighted average contractual rate of our CDs were as follows:

		September	30, 2022
_(\$ in millions)	-	Amount	Rate
CDs maturing in:			
October 1 - December 31, 2022	\$	4,090	1.92 %
2023		11,497	2.39 %
2024		226	1.75 %
2025		74	1.76 %
2026		24	0.67 %
2027 and thereafter	_	21	0.73 %
Total	\$	15,932	2.25 %

We fund a portion of our assets with CDs that have balances greater than the FDIC insurance limit of \$250,000. At September 30, 2022, our CDs having balances greater than the FDIC insurance limit by account totaled \$5.2 billion, and the maturities of such CDs are presented in the following table:

(\$ in millions)	Sept	ember 30, 2022
Remaining maturity:		
Three months or less	\$	879
Over three through six months		3,198
Over six through twelve months		894
Over twelve months		220
Total	\$	5,191

#### Borrowings

Our other sources of funding include both short-term and long-term borrowings. Short-term borrowings, which include federal funds purchased and short-term FHLB advances, have an original maturity of one year or less. Long-term debt, which includes long-term FHLB advances, senior notes and subordinated notes, has an original maturity in excess of one year. The level and mix of short-term and long-term borrowings vary based on funding needs and market conditions. The following table presents the carrying values and weighted average contractual rates of short-term borrowings and long-term debt:

		Carryin	g Valu	Je	Rate			
(\$ in millions)		tember 30, 2022	Dee	cember 31, 2021	September 30, 2022	December 31, 2021		
Short-term borrowings:								
FHLB advances	\$	5,100	\$		3.03 %	— %		
Long-term debt:								
FHLB advances	\$	5,900	\$	3,700	1.73 %	0.95 %		
Senior notes		500		998	1.91 %	2.21 %		
Subordinated notes		779		779	4.50 %	4.50 %		
Total long-term debt	\$	7,179	\$	5,477	2.05 %	1.69 %		

The increases in short-term and long-term borrowings were driven primarily by new FHLB advances, which were utilized as additional sources of funding for the nine months ended September 30, 2022. In addition, the 2.500% Senior Notes due 2022 with a principal balance of \$500 million were redeemed in the second quarter of 2022, and, therefore, were no longer outstanding as of September 30, 2022.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As of September 30, 2022, the weighted average remaining maturity of long-term FHLB advances was 1.6 years.

See Note 9 in "Item 1. Financial Statements" for further discussion of borrowings.

At September 30, 2022, we had \$57.0 billion of unused, available borrowing capacity at the FHLB supported by pledged loans. In addition, we had \$4.0 billion of unused, available borrowing capacity at the Federal Reserve Bank discount window collateralized by pledged investment securities. This unused, available borrowing capacity at the FHLB and the Federal Reserve Bank discount window equaled 30% of total assets.

### **Liquidity and Capital Resources**

Liquidity refers to our capacity to meet our cash and collateral obligations and to manage both expected and unexpected cash flows without adversely impacting the operations or financial health of the Bank. Our traditional funding sources consist primarily of deposits, borrowings and equity. Other sources of liquidity consist of liquid assets such as cash and cash equivalents, as well as marketable, highly liquid securities and loans.

### Liquidity Risk Management

We engage in various activities to manage our liquidity risk, including maintaining a diversified set of funding sources and holding sufficient liquid assets to meet our cash flow and funding needs. Liquidity and funding-related risk policies and limits are established within our Liquidity Risk Management Policy, which is approved by the Board at least annually. Liquidity risk is actively monitored and managed by the Treasury department, Chief Financial Officer and senior management through the Bank Enterprise Risk Management Committee, with independent oversight provided by the Board through the Directors' Enterprise Risk Management Committee. In addition, we maintain a contingency funding plan and perform scenario-based stress-testing to ensure resilience in case of expected and unexpected future events.

#### Sources of Liquidity

Refer to "—Balance Sheet Analysis—Deposit Gathering" and "—Balance Sheet Analysis— Borrowings" for further discussion of the composition of deposit and borrowing sources. In addition, we issue preferred stock and common stock as funding sources, which are also components of regulatory capital. Refer to "—Regulatory Capital Components and Ratios," as well as Notes 13 and 14 in "Item 1. Financial Statements" for additional discussion of the Bank's preferred and common stock.

As discussed in Part I, "Item 1A. Risk Factors—We are subject to liquidity risk, which could impair our ability to fund various obligations" in our 2021 Form 10-K, our access to funding sources in amounts adequate to finance our activities or on terms that are acceptable to us could be impaired by factors that affect us specifically or the financial services industry or economy generally. Management believes that the sources of available liquidity are well-diversified and adequate to meet all reasonably foreseeable short-term and long-term demands.

### HQLA

At September 30, 2022, assets that are considered HQLA, including eligible cash, were \$27.5 billion, or 14% of average total assets for the third quarter of 2022. HQLA include \$11.7 billion of municipal securities.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### **Cash Requirements**

Our short-term liquidity requirements primarily relate to operating expenses, financing of shortterm assets, and payments relating to ongoing commitments and obligations due within one year. Our long-term liquidity requirements primarily relate to loan originations, investment purchases, the funding of long-term assets, and the meeting of ongoing commitments and obligations due in excess of one year. For additional discussion, see "—Commitments and Contractual Obligations."

### Cash Flows

The following table presents the Bank's net cash provided by or used for operating, investing and financing activities, as well as cash balances for the periods indicated:

		At or for the Nine Months Ended September 30,					
(\$ in millions)		2022		2021			
Net cash provided by operating activities	\$	228	\$	223			
Net cash used for investing activities	\$	(30,600)	\$	(21,235)			
Net cash provided by financing activities	\$	22,957	\$	28,196			
Cash and cash equivalents at the end of period	\$	5,532	\$	12,279			

Net cash used for investing activities consisted primarily of loan originations and purchases of investment securities. The increase in investing outflows for the nine months ended September 30, 2022, compared to the nine months ended September 30, 2021, was primarily attributable to growth in loan originations and the investment portfolio. Net cash provided by financing activities consisted primarily of growth in deposits, and for the nine months ended September 30, 2022, additional short-term and long-term borrowings. Lower cash financing inflows for the nine months ended September 30, 2022, compared to the nine months ended September 30, 2021, was primarily the result of lower growth in deposits, offset by an increase in short-term and long-term FHLB advances. For additional information about the Bank's sources and uses of cash, refer to the Consolidated Statements of Cash Flows in "Item 1. Financial Statements."

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Commitments and Contractual Obligations

In the ordinary course of business, we enter into transactions that involve financial instruments with off-balance sheet risks to meet the financing needs of our clients. These financial instruments include commitments to disburse additional funds on existing loans and lines of credit and commitments issued under standby letters of credit. Such instruments involve elements of credit risk and interest rate risk. Since these commitments may expire without being drawn, the total commitment amounts do not necessarily represent future cash requirements. See Note 12 in "Item 1. Financial Statements" for additional information regarding the Bank's lending commitments at September 30, 2022.

In addition to the commitments described above, the Bank enters into other contractual obligations in the ordinary course of business. Certain of these obligations, such as deposits, FHLB advances, senior notes, subordinated notes, unfunded commitments on tax credit investments and other investments, and lease liabilities are recorded as liabilities in the consolidated financial statements.

As discussed in Note 12 in "Item 1. Financial Statements," in connection with the securitization of loans with Freddie Mac, the Bank has an obligation to reimburse Freddie Mac for losses up to \$30 million, or 12% of the multifamily loans securitized. At September 30, 2022, there was no liability for estimated losses related to this reimbursement obligation.

The following table presents information regarding our significant contractual obligations at September 30, 2022, and expected timing of payments for these obligations. Deposit obligations categorized as "indeterminate maturity" include all deposits other than CDs. Our deposit and borrowing obligations in the following table exclude contractual interest. Lease liabilities represent undiscounted lease payments over the lease term and exclude leases signed but not yet commenced.

	Contractual Payments by Period								
(\$ in millions)		Less Than 1 Year		Thereafter		Indeterminate Maturity		Total	
Deposits	\$	15,133	\$	799	\$	156,450	\$1	72,382	
FHLB advances	\$	7,125	\$	3,875	\$	_	\$	11,000	
Senior notes	\$	—	\$	500	\$	—	\$	500	
Subordinated notes	\$	—	\$	800	\$	_	\$	800	
Unfunded commitments—tax credit and other investments Lease liabilities	\$ \$	263 184	\$ \$	420 1,647	\$ \$		\$ \$	683 1,831	

See Notes 7 and 9 in "Item 1. Financial Statements" for additional information regarding leases and borrowings presented in the table above.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Regulatory Capital Components and Ratios

The following table presents the Bank's components of regulatory capital, average assets, and RWAs, as defined by regulatory capital rules:

(\$ in millions)	Sep	otember 30, 2022	Dee	cember 31, 2021
Regulatory Capital Components				
Shareholders' equity	\$	17,119	\$	15,898
CECL Capital Rule retained earnings adjustments <sup>(1)</sup>		43		58
Preferred stock		(3,633)		(3,633)
Goodwill and other intangible assets, net of DTLs		(187)		(194)
DTAs that arise from tax credit carryforwards, net of DTLs		(93)		(115)
Accumulated other comprehensive loss		337		31
CET1 capital		13,586		12,045
Preferred stock		3,633		3,633
Additional Tier 1 capital		3,633		3,633
Tier 1 capital		17,219		15,678
Tier 2 capital instruments—subordinated notes <sup>(2)</sup>		779		779
Qualifying ACL <sup>(3)</sup> CECL Capital Rule ACL adjustments <sup>(1)</sup>		802		727
CECL Capital Rule ACL adjustments <sup>(1)</sup>		(45)		(60)
Tier 2 capital		1,536		1,446
Total risk-based capital	\$	18,755	\$	17,124
Assets				
Average assets	\$	200,443	\$	178,911
CECL Capital Rule average assets adjustments <sup>(1)</sup>		43		58
Average assets after adjustments	\$	200,486	\$	178,969
RWAs	\$	146,448	\$	124,825
CECL Capital Rule DTAs adjustments <sup>(1)</sup>	•	(4)	•	(5)
RWAs after adjustments	\$	146,444	\$	124,820

<sup>(1)</sup> Beginning in 2020, amounts reflect the Bank's election to delay the estimated impact of the CECL ACL methodology on its regulatory capital, average assets and RWAs over a five-year transition period ending December 31, 2024. <sup>(2)</sup> Subordinated notes mature in 2046 and 2047.

<sup>(3)</sup> Includes the ACL on loans, held-to-maturity debt securities and unfunded loan commitments.

At September 30, 2022 and December 31, 2021, the Bank's noncumulative perpetual preferred stock was 21% and 23% of Tier 1 capital, respectively.

We may, from time to time, issue additional common stock, preferred stock, or other forms of capital or debt instruments depending on market conditions and subject to any required regulatory approvals. During the nine months ended September 30, 2022, the Bank sold 2,587,500 new shares of common stock in an underwritten public offering, which added \$402 million to common equity.

A "capital conservation buffer" of 2.5% of RWAs is also required under the Basel III Capital Rules. The capital conservation buffer is designed to absorb losses during periods of economic stress. Banking institutions with a CET1 capital ratio above the minimum requirement but below the capital conservation buffer will face constraints on dividends, equity repurchases and compensation based on the amount of the shortfall and "eligible retained income" (that is, the greater of net income for the four calendar quarters preceding the current calendar quarter, net of any distributions and associated tax effects not already reflected in net income, and the average of net income for the four calendar quarters preceding the current calendar quarter).

#### MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our capital ratios exceeded all applicable regulatory requirements at September 30, 2022 for wellcapitalized institutions, and our capital conservation buffer exceeded the minimum requirement of 2.5%. The following table presents our capital ratios and regulatory requirements:

			Regulatory Requirements				
Capital Ratios <sup>(1)</sup>	September 30, 2022	December 31, 2021	Well- Capitalized Ratio	Minimum Capital Ratio	Minimum Capital Conservation Buffer <sup>(2)</sup>		
Tier 1 leverage ratio (Tier 1 capital to average assets)	8.59 %	8.76 %	5.00 %	4.00 %	— %		
CET1 capital to RWAs	9.28 %	9.65 %	6.50 %	4.50 %	2.50 %		
Tier 1 capital to RWAs Total capital to RWAs	11.76 % 12.81 %	12.56 % 13.72 %	8.00 % 10.00 %	6.00 % 8.00 %	2.50 % 2.50 %		

<sup>(1)</sup> Beginning in 2020, ratios reflect the Bank's election to delay the estimated impact of the CECL ACL methodology over a five-year transition period ending December 31, 2024.

<sup>(2)</sup> As of September 30, 2022, our capital conservation buffer was 4.78%, which exceeded the minimum requirement of 2.5% required to be held by banking institutions.

### Return on Average Common Shareholders' Equity and Return on Average Tangible Common Shareholders' Equity

The following table presents the components of return on average common shareholders' equity and return on average tangible common shareholders' equity:

Return on Average Common Shareholders' Equity and Return on		r Ended 1ber 30,		ths Ended ber 30,
Average Tangible Common Shareholders' Equity <sup>(1), (2)</sup>	2022	2021	2022	2021
(\$ in millions)				
Average common shareholders' equity (a) Less: Average goodwill and other intangible assets Average tangible common shareholders' equity (b)	\$13,257 (219) \$13,038	\$11,544 (224) \$11,320	\$12,773 (220) \$12,553	\$10,989 (225) \$10,764
Net income available to common shareholders (c)	\$ 405	\$ 345	\$ 1,161	\$ 1,011
Return on average common shareholders' equity (c) / (a) Return on average tangible common shareholders' equity (c) / (b)	12.12 % 12.33 %	11.87 % 12.10 %	12.16 % 12.37 %	12.30 % 12.56 %

<sup>(1)</sup> Return on average tangible common shareholders' equity is considered a non-GAAP financial measure, and is reconciled to GAAP return on average common shareholders' equity in this table.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

# Book Value per Common Share and Tangible Book Value per Common Share

The following table presents the components of book value per common share and tangible book value per common share:

Book Value per Common Share and Tangible Book Value per Common Share <sup>(1)</sup>	September 30, 2022			December 31, 2021		ptember 30, 2021
(in millions, except per share amounts)						
Total shareholders' equity Less: Preferred stock		17,119 (3,633)	\$	15,898 (3,633)	\$	14,802 (2,893)
Total common shareholders' equity (a) Less: Goodwill and other intangible assets		13,486 (219)		12,265 (222)		11,909 (223)
Total tangible common shareholders' equity (b)	\$	13,267	\$	12,043	\$	11,686
Number of shares of common stock outstanding (c)		183		179		179
Book value per common share (a) / (c) Tangible book value per common share (b) / (c)		73.74 72.54	\$ \$	68.34 67.10	\$ \$	66.44 65.19

<sup>(1)</sup> Tangible book value per common share is considered a non-GAAP financial measure, and is reconciled to GAAP book value per common share in this table.

### QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

### Item 3. Quantitative and Qualitative Disclosures About Market Risk.

#### Interest Rate Risk Management

We seek to measure and manage the potential impact of changes in interest rates on our net interest income and net interest margin, known as interest rate risk. Interest rate risk is primarily driven by assets and liabilities that mature or reset at different times, on a different basis, in unequal amounts, or which may have different embedded optionality. The Bank's Board approves policies and limits governing the management of interest rate risk at least annually. Our ALM and Investment Committees further establish risk management guidelines and procedures within the broader policies and limits established by the Bank's Board. Compliance with these policies and limits is reported to the Bank's Board on an ongoing basis and decisions on the management of interest rate risk are made as needed. We utilize a variety of interest rate risk management tools to evaluate our interest rate risk.

We may manage interest rate risk by altering the mix of loans, such as adjustable-rate loans, hybrid ARMs, or fixed-rate loans, which we originate or elect to retain. We may also change the composition and characteristics of our investment portfolio. We may also vary the degree to which we utilize different funding sources, such as checking and savings accounts, CDs with various maturity terms, laddered maturity fixed-rate FHLB advances and unsecured, term, fixed-rate senior notes, fixed-to-floating rate senior notes and fixed-rate subordinated notes. We may also utilize short-term borrowings to fund short-term assets or bridge temporary funding needs.

In addition to the volume, mix and pricing of interest-earning assets and interest-bearing liabilities, our net interest income and net interest margin may also be affected by factors such as changes in federal, state or local regulations, competition, market conditions, levels of loan sales and repayment rates, levels of cash held on the balance sheet, overall growth of assets and liabilities, general interest rate trends, including movements in interest rates and the shape of the yield curve, basis risk, level and cost of wholesale funding, market rates of new capital or debt offerings and any nonaccrual loans. Our net interest margin may also be affected by our overall business model or strategy. See "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations—Key Factors Affecting Our Business and Financial Statements—Interest Rates" for discussion of the FOMC's actions.

#### Balance Sheet Overview

Our net interest income and net interest margin may be affected by the mix of interest-earning assets and interest-bearing liabilities. The Bank has earning assets with reset periods or maturity of less than one year totaling \$40.9 billion, or 21% of total earning assets at September 30, 2022. Of these earning assets, the Bank has loans which are currently adjustable and reprice with indices or mature within one year totaling \$34.3 billion, or 22% of the total loan portfolio at September 30, 2022. The loan portfolio that reprices at least quarterly to market rate indices, such as Prime or LIBOR, totaled \$24.3 billion, or 15% of the total loan portfolio at September 30, 2022. The loan portfolio with lagging indices, such as the COFI Repl Index or CMT, totaled \$6.2 billion, or 4% of the total loan portfolio at September 30, 2022. Additionally, the loan portfolio that either (1) matures within one year or (2) is within one year of adjusting from the initial fixed-rate period totaled \$3.7 billion, or 2% of the total loan portfolio at September 30, 2022. In addition, at September 30, 2022, the Bank held \$5.0 billion in cash and \$1.6 billion in investment securities (collectively, 18% of total cash and investment securities), that reprice to market rates at least quarterly or are currently projected to be called or mature in less than one year.

### QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Total checking deposits were \$110.6 billion, or 64% of total deposits at September 30, 2022. Total checking deposits include both noninterest-bearing checking accounts and interest-bearing checking accounts, which currently pay a nominal rate of interest, but exclude money market checking accounts. We do not expect the rate paid on interest-bearing checking deposits to fluctuate much with changes in overall interest rates, consistent with our history. The rates paid on money market savings, money market checking and passbook deposit accounts generally move directionally with changes in short-term prevailing interest rates and may be subject to competitive pricing pressure. Money market savings, money market checking and passbook deposit accounts together totaled \$45.8 billion, or 27% of total deposits at September 30, 2022. CDs were \$15.9 billion, or 9% of total deposits and had a weighted average remaining maturity of 5.3 months at September 30, 2022.

We utilize long-term FHLB advances as a source of fixed-rate, term funding to help manage our overall interest rate risk. Such advances totaled \$5.9 billion at September 30, 2022 and had a weighted average remaining maturity of 1.6 years. We may also utilize short-term borrowings to fund short-term assets or bridge temporary funding needs. Such borrowings totaled \$5.1 billion at September 30, 2022. In addition, the Bank has also issued unsecured, term, fixed-to-floating rate senior notes and fixed-rate subordinated notes. At September 30, 2022, the senior notes had a carrying value of \$500 million and the subordinated notes had a carrying value of \$779 million. The maturity dates and optional redemption dates for the senior and subordinated notes are discussed in Note 9 in "Item 1. Financial Statements."

### Net Interest Income Simulation

In addition to evaluating our current balance sheet, we also perform simulations to measure and evaluate our potential net interest income exposure to changes in interest rates. Based on the results of such analyses, we may make changes to our asset/liability mix, to draw down short or long-term advances with the FHLB, to issue long-term senior notes or long-term subordinated notes, to sell or securitize loans, to enter into interest rate exchange agreements or to otherwise seek to better protect ourselves against potential adverse effects from changes in interest rates.

We use a simulation model to measure and evaluate our net interest income risk exposure. We run various hypothetical interest rate scenarios at least guarterly and compare these results against a scenario with no changes in interest rates. Our net interest income simulation model incorporates various assumptions, which management believes to be reasonable but which may have a significant impact on results, such as: (1) the timing, direction and magnitude of changes in interest rates, (2) the yield curve evolution and shape, (3) repricing and maturing characteristics, other than contractual, for market rate sensitive instruments, (4) non-interest bearing checking deposit balance behavior and the possibility of shifts in preference between non-interest bearing and interest-bearing products or nondeposit alternatives, (5) varying sensitivities of financial instruments due to differing underlying rate indices or relevant spreads, (6) loan prepayment speeds for different interest rate and market scenarios, (7) the effect of interest rate floors, periodic loan caps and lifetime loan caps, (8) the levels of cash held on our balance sheet and (9) overall growth, product mix and repayment rates of assets and liabilities. Because of limitations inherent in any approach used to measure interest rate risk, simulation results are not intended as a precise forecast of the actual effect of a change in market interest rates on our results, but rather to better understand the direction, timing and magnitude of interest rate risk exposure and plan and execute the appropriate ALM strategies.

Potential changes to our net interest income in hypothetical rising and declining rate scenarios, measured over a two-year period beginning September 30, 2022, are presented in the following table. The projections assume both (a) instantaneous parallel shifts upward of 100 and 200 bps and instantaneous parallel shifts downward of the yield curve of 100 bps occurring immediately ("Shock") and (b) gradual parallel shifts upward and downward of the yield curve in even increments over the first twelve months, followed by rates being held constant thereafter ("Ramp"). In downward shifts of the yield curve, interest rates are not modeled to decline lower than 0%.

### QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

	Estimated Increase (Decrease) in Net Interest Income					
Change in Market Interest Rates	Twelve Months Ending September 30, 2023	Twelve Months Ending September 30, 2024				
Shock:						
+200 bps immediately	1.7 %	(1.7)%				
+100 bps immediately	1.5 %	(0.5)%				
-100 bps immediately	0.3 %	0.6 %				
Ramp:						
+200 bps over next 12 months	2.0 %	(2.6)%				
+100 bps over next 12 months	1.5 %	(0.9)%				
-100 bps over next 12 months	0.2 %	0.8 %				

The Bank's net interest income sensitivity position is a combined result of the existing balance sheet and future growth projections as of September 30, 2022 and indicates that assets are expected to overall reprice or roll off at a pace marginally faster than that of liabilities over the course of the next 12 months. This would generally be beneficial to net interest income in hypothetical parallel rising rate environments. In the 12-month period following thereafter, liabilities are expected to reprice or roll off at or about the same pace or marginally faster than assets. Consequentially, it is a parallel decline in rates during that period, which would positively impact net interest income.

With respect to deposit balances, we model non-interest bearing and interest-bearing checking balances, which exclude money market checking, to gradually trend below the current level of 64% of total deposits over the two-year horizon.

The results of this earnings simulation analysis are hypothetical, and a variety of factors might cause actual results to differ substantially from what is depicted. For example, if the timing and magnitude of interest rate changes differ from our projections or theoretical scenarios, our net interest income might vary significantly. Non-parallel yield curve shifts, such as a steepening, flattening, or inversion of the yield curve or changes in interest rate spreads, would also cause our net interest income to be different from that depicted. Actual results could also differ from those projected if we grow assets and liabilities faster or slower than estimated, if we experience a net outflow of deposit liabilities, if the size, frequency, or timing of actual cash flows differ from contractual cash flows, or if our mix of assets and liabilities otherwise changes materially. Actual results could also differ from those projected if we experience repayment speeds in our loan portfolio substantially different from those assumed in the simulation model.

Finally, these simulation results do not contemplate all the actions that we may undertake in response to potential or actual changes in interest rates, such as changes to our loan, investment, deposit, funding, or hedging strategies.

We may decide to take further action depending on subsequent interest rate and economic developments, the growth rates and mix of loans and deposits, the future level of loan repayments, purchases of investment securities, and changes in other assets.

### Item 4. Controls and Procedures.

### **Evaluation of Disclosure Controls and Procedures**

As required by Securities and Exchange Commission rules, we carried out an evaluation of the effectiveness of the design and operation of our "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) under the Exchange Act as of the end of the period covered by this report. Our management, including our principal executive officer and principal financial officer, supervised and participated in the evaluation. Based on that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures, as of September 30, 2022, were effective.

### **Changes in Internal Control Over Financial Reporting**

There was no change in our internal control over financial reporting during the quarter ended September 30, 2022 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

### **PART II - OTHER INFORMATION**

#### Item 1. Legal Proceedings.

There are no material pending legal proceedings to which we or any of our subsidiaries is a party or to which any of our property is subject. We are subject to ordinary routine litigation incidental to our business but we believe the results of such matters will not have a material effect on our business or financial condition.

#### Item 1A. Risk Factors.

There are risks, many beyond our control, which could cause our results to differ significantly from management's expectations. For a description of these risks, please see the risk factors previously described in Part I, "Item 1A. Risk Factors" in our 2021 Form 10-K. Any of the risks described in our 2021 Form 10-K or in this Quarterly Report on Form 10-Q could, by itself or together with one or more other factors, materially and adversely affect our business, results of operations or financial condition. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, results of operations or financial condition.

### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

#### **Recent Sales of Unregistered Securities**

During the third quarter of 2022, we sold 53,637 shares of common stock to eligible employees under our ESPP for aggregate cash consideration of \$7 million. These sales were exempt from registration under the Securities Act of 1933, as amended (the "Securities Act"), pursuant to Section (3)(a)(2) thereof because the sales involved securities issued by a bank.

During the third quarter of 2022, we granted 36,069 RSUs, net of forfeitures, that have time-based vesting requirements. In addition, we granted 14,771 RSUs, net of forfeitures, that vest over time, provided certain performance criteria are achieved. These awards were granted to certain officers and employees, and had an aggregate grant date fair value of \$8 million. We did not receive any cash consideration in connection with these grants. These grants were exempt from registration under the Securities Act, pursuant to Section (3)(a)(2) thereof, because the grants involved securities issued by a bank.

In August 2022, we sold 2,587,500 shares of common stock as part of an underwritten public offering. The aggregate public offering price was \$406 million, and the aggregate underwriting discount was \$4 million. Net proceeds, after underwriting discounts, were \$402 million (\$155.48 per share), which we used for general corporate purposes. This transaction was also exempt from registration under the Securities Act, pursuant to Section (3)(a)(2) thereof because the transaction involved securities issued by a bank.

### Purchases of Equity Securities By the Issuer and Affiliated Purchasers

We did not repurchase any of our common stock during the third quarter of 2022.

### Item 3. Defaults Upon Senior Securities.

Not applicable.

### Item 4. Mine Safety Disclosures.

Not applicable.

### Item 5. Other Information.

None.

### Item 6. Exhibits.

An Index to Exhibits listing the exhibits filed or furnished with this report is presented prior to the signature page to this Quarterly Report on Form 10-Q and is incorporated herein by reference.

### **INDEX TO EXHIBITS**

#### <u>Exhibit</u>

### No. Description

- 10.1 Offer Letter, dated as of August 1, 2022, between the Bank and Susie Cranston, incorporated by reference to Exhibit 10.1 of the Bank's Current Report on Form 8-K filed on August 4, 2022.<sup>(1)</sup>
- 10.2 Offer Letter, dated as of August 19, 2022, between the Bank and Neal Holland, incorporated by reference to Exhibit 10.1 of the Bank's Current Report on Form 8-K filed on August 23, 2022.<sup>(1)</sup>
- 31.1 Certification of Principal Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Principal Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Principal Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

### SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

### FIRST REPUBLIC BANK

November 8, 2022

/s/ Olga Tsokova

Olga Tsokova Executive Vice President, Deputy Chief Financial Officer and Chief Accounting Officer

#### Certification of Principal Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

I, Michael J. Roffler, certify that:

- 1. I have reviewed this Quarterly Report on Form 10-Q of First Republic Bank;
- Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant, and we have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of the annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
