Climate Change

Climate change can significantly affect our business operations if the relevant risks are not assessed properly. The increase in temperature will lead to higher electricity consumption, and extreme weather events, such as typhoons and flooding that can possibly result in physical damage to facilities, resulting in higher maintenance costs and insurance premiums. The change in customer preferences for green products could also affect the demand for the current products of the Group. To cope with the climate change challenges, the Group is committed to prioritising actions that address climate change, including saving energy, reducing greenhouse gas ("GHG") emissions and supporting the transition to a cleaner and more sustainable business structure. We actively carried out climate change risks and opportunities identification.

General Waste and Hazard Waste

According to the amended Prevention and Control of Environmental Pollution by Solid Waste Law of the PRC, the manufacturers, vendors, importers and users must seek to prevent and control the discharge of solid wastes.

Our operations produce limited non-hazardous wastes, which are generally office wastes. The wastes generated are collected and managed by local hygiene and environmental department. We uphold the 4Rs principle, namely reduce, reuse, recycle, and replace, for waste management and strive for resource utilisation. Hazardous waste such as battery, fluorescent tube and electronic equipment are managed by approved waste collectors to handle the waste to comply with the relevant environmental laws and regulations.

Use of Packaging Materials

We normally use the original packaging provided by our own suppliers for delivery through third party logistics companies. Our major suppliers are international well-known companies, which also place high attention to the environmental protection issues. Most of their products are packed by materials that can be reused, recycled and naturally degraded to minimise the impact on the natural environment. For products produced by us, we used limited packaging whenever possible to minimise waste generation.

COMMUNITY INVESTMENT

The Group understands the importance of community investment and giving back to the community. We always encourage our employees to participate in social welfare affairs and join volunteer activities to serve the society.

During the Reporting Period, the Group participated in "Green Low Carbon Day" on 27 and 28 November 2022, which was organised by the Community Chest of Hong Kong.

In future, our Group will continue its community engagement and promote community investment campaign to our employees and stakeholders.
