Chairman's Statement (continued) 主席致辭(續)

In 2023, the classic games of "DDTank" (彈彈堂) and "Wartune" (神 曲) series published by us continued to perform well, with a steady growth in product revenue, which improved players' stickiness and willingness to pay through a well-designed upgrade model, and through data-driven refined operation activities and continuous R&D of new gameplay to maintain the long life cycle and player activity of the games. We have innovatively added a new gameplay of restarting future careers in certain games of the "DDTank" (彈彈 堂) series, bringing a new experience to players. In terms of player matching, we launched a pilot competition to further balance the attributes of players. In addition, in the gameplay designed by us, players can also allocate attributes and freely match different pets to achieve a comprehensive competition with more elements. In terms of the domestic market, the Group's newly launched DDTank products at the end of 2022 performed well. After ranking among the App Store Top 3 on the same day of launch at the end of 2022, the Group's total receipts exceeded RMB360 million in 2023. In terms of overseas markets, the Group actively promoted the international development of classic IP games. The "DDTank Classics" (彈彈堂 復古版) was launched in Thailand in the second quarter of 2023. Currently, the R&D of the European and American versions has entered the stage of commercial testing. The Portuguese version of "DDTank Adventure" (彈彈堂大冒險) was launched in Brazil in the third quarter, which was popular among players and topped the list of free-to-play Google Play games on the first day of its launch. Following the hot spots of DDTank series products, the new generation of "DDTank" (彈彈堂) products has been in the process of R&D, of which the new mobile game with the code of "DDTank x" (彈彈堂x) was jointly developed by the Group and a well-known group. With a new world concept as the core and a multi-character card as the design framework, the Group will make every effort to create an innovative DDTank product that is easy to use and meaningful with a long life cycle. It will be innovated on the basis of the existing product essence in terms of character painting, game plots and core gameplay, with an aim to bring new feeling and experience to users. The overseas version of "Wartune H5" (神 曲 H5), another classic IP of the Group, was basically completed at the end of 2023 and is expected to be officially launched in multiple overseas regions in 2024.

In 2023, with the new round of artificial intelligence wave led by ChatGPT and the rise of other Al large models, part of the content was generated by Al technologies, which brought new challenges and opportunities to the game industry. The Group has grasped the market trend and actively embraced technological changes. The Group has used AIGC technology (i.e. Artificial Intelligence Generated Content) in some aspects of game development and publishing. By learning from the use of Al to generate certain text, images, audio and other multimodal content, the Group has applied AI technology in multiple application scenarios to innovate and create content, so as to enrich product content, optimize product expression, and improve R&D efficiency.

2023年隨著ChatGPT引爆的新一輪人工智能浪潮及其他AI大模型的興起,借鑒利用AI技術生成部分內容,為遊戲行業帶來了新的挑戰與機遇。本集團把握市場潮流發行的部分環節中使用AIGC技術(即利用AI技術生成內容),借鑒利用AI生成部分內容,圖像、音頻等多模態內容,應則場景運用AI技術進行內容創新創作,以實產品內容,優化產品表達,並提升研發效率。

In terms of the cloud computing business, the Group will strive to respond to the changes in the cloud computing market after the large-scale rise of Al in 2023, and based on the strategy of focusing on serving major customers, strive to maintain the stability of the Company's cloud computing service business. Since November 2022, represented by the Al ChatGPT large model released by OPEN Al, it has quickly set off a global boom in the R&D of Al models and applications. The training tasks of Al large models require a large number of GPUs with high computing power, and the structural change in computing power demand in the cloud computing market is also very obvious, focusing on steering Al training, reasoning and applications. The Group started to invest in the cloud computing business in 2021, with an earlier layout. The GPU, the Group's main equipment, focus on cloud games, animation rendering, metaverse and other sub-sectors. Against the backdrop of rapid growth of the cloud computing market, the cloud computing field of non-Al training, reasoning and applications did not grow as rapidly as expected due to structural differences in the market.

在雲計算業務方面,本集團面對2023年在 AI大規模興起後雲計算市場的變化,努力 應對,立足聚焦服務大客戶的策略,力求 公司的雲計算服務業務保持穩定。2022 年11月起以OPEN AI公司發佈的人工智能 ChatGPT大模型為代表,迅速在全球範圍 內掀起了AI模型及應用研發熱潮,AI大模 型的訓練任務需要大量的高算力GPU,雲 計算市場算力需求的結構性轉變也非常明 顯,集中於轉向AI訓練、推理及應用。集 團於2021年開始投入的雲計算業務,佈局 較早,集團主要設備GPU其性能偏重於雲 遊戲、動漫渲染、元宇宙等細分領域。在 雲計算市場較快增長的背景下,由於市場 結構性差異,非AI訓練、推理及應用的雲 計算領域增長不如預期迅猛。

The huge progress of AI technology and the rapid development of GPU technology far exceed market expectations. The rapid iteration of GPU technology has caused a large gap between the Group's existing GPUs and new high-end GPUs such as H100 and H800. The performance of GPU equipment originally deployed by the Company cannot fully meet the demand for AI training computing power. There are quantitative differences, and it is also unable to convert into AI computing power in a superimposed manner due to the limitation of the technical architecture.

AI技術的巨大進展和GPU技術的快速發展 遠超市場預期,GPU技術的快速迭代使 得集團現有GPU與H100、H800等新型高 端GPU產生了較大的代際差距,公司原先 佈局的GPU設備性能不能完全滿足AI訓練 算力需求,存在數量級差異,且受技術架 構限制也無法實現以疊加的方式轉為AI算 力。

Chairman's Statement (continued) 主席致辭(續)

Domestic internet giants, relying on their strong capital strength and profound technology accumulation, have advantages in terms of continuous R&D investment and diversification of cloud computing service products. Combined with the strong and rich ecological resources of their own main business, these internet giants have formed an integrated comprehensive business synergy with their cloud computing business, enabling them to have large-scale advantages. With their product price strategy, these internet giants have formed the Matthew effect and strong global integrated comprehensive product service capabilities in the market segment, so that small and medium-sized cloud computing companies face various challenges such as technology, capital and business ecology in competition. The Group's cloud computing business in the fields of graphic rendering, digital twin and metaverse did not develop as expected.

As the Group's cloud computing business faced challenges such as fierce industry competition, rapid changes in demand and rapid equipment iteration, the Company still lost some customers despite various measures such as improving and optimizing operations and launching marketing activities. At the end of 2023, the Group's cloud computing business related assets were significantly impaired, which was an important reason for the Group's loss in 2023.

由於集團雲計算業務面臨行業競爭激烈、需求快速變化、設備快速迭代等挑戰,儘管公司採取改進和優化運營,推出營銷活動等多種手段,仍流失了部分客戶。2023年底集團雲計算業務相關資產發生較大減值,是2023年度集團業績虧損的重要原因。

Management Discussion and Analysis

管理層討論與分析

OVERVIEW

The Group is a leading game developer and operator in China with a global reach. Since our incorporation in 2008, we have been engaging in the R&D, operation and publishing of a number of popular games.

Overview of the industries in which the Company operates in

In terms of the gaming business, according to the "2023 Global Games Market Report" (2023全 球 遊 戲 市 場 報 告) released by Newzoo in 2024, the global games market size was estimated to be US\$184.0 billion in 2023, and the number of game players around the world was over 3.3 billion, with a year-on-year increase of 4.3%. Among which, (i) mobile games still represented the most important sector of the gaming industry, and the global mobile games market size was estimated to be US\$90.5 billion in 2023, accounting for 49% of the total revenue of the industry, with a year-on-year decrease of 1.4%; and (ii) the PC games market size accounted for 21% of the total revenue of the industry, reaching US\$38.4 billion with a year-on-year increase of 5.3%. The report concluded that the gaming industry will continue to develop steadily, and the games market is expected to continue to grow in the next few years. It is estimated that the number of players around the world will increase from the current 3.3 billion to 3.6 billion by 2026, with the market size reaching US\$205.4 billion.

In terms of the cloud computing business, a global boom in the R&D of Al models and applications has generated a high demand for GPUs with high-computing power. Market demand is rapidly changing and equipment is rapidly iterating. Against the backdrop of rapid growth of the cloud computing market, due to the structural differences in the market, the growth of non-Al training, reasoning and application sectors in the cloud computing field was not as rapid as expected. Furthermore, domestic internet giants, relying on their strong capital strength and profound technology accumulation, have advantages in terms of continuous R&D investment and diversification of cloud computing service products. Combined with the strong and rich ecological resources of their own main business, these internet giants have formed an integrated comprehensive business synergy with their cloud computing business, so that small and medium-sized cloud computing companies face various challenges such as technology, capital and business ecology in competition.

FINANCIAL REVIEW

Operational Information

During the year ended 31 December 2023, we continued to focus on the R&D of games and the operations of high-quality games to cope with the intensifying competition in the gaming industry and endeavored to become a world-renowned game developer integrated with research, operation and development capabilities. For the year ended 31 December 2023, the Group's online game revenue was mainly derived from several well-known games, including "DDTank" (彈彈堂) series and "Wartune" (神曲) series.

We assess the operating performance with a set of key performance indicators, which include MAUs, MPUs and ARPPU. Fluctuations in our operating data are primarily a result of changes in the number of players who play, download (in the case of mobile games) and pay for virtual items and premium features in our games. Using these operating data as our key performance indicators allows us to monitor our ability to offer highly engaging online games and helps us to increase the continuous popularity of our games, gain the monetization of our player base and deal with the intense competition in the online gaming industry, so that we can implement better business strategies.

For the year ended 31 December 2023, our web games had (i) an average MAUs of approximately 0.7 million; (ii) an average MPUs of approximately 32,300; and (iii) an ARPPU of approximately RMB587; and our mobile games had (a) an average MAUs of approximately 0.7 million; (b) an average MPUs of approximately 65,000; and (c) an ARPPU of approximately RMB729.

COST OF REVENUE

The cost of revenue amounted to approximately RMB244.6 million for the year ended 31 December 2023, representing a decrease of approximately 12.5% as compared to approximately RMB279.4 million for the year ended 31 December 2022, mainly due to the decrease in cost of game licensing and amortized cost of IP games.

GROSS PROFIT AND GROSS PROFIT MARGIN

Our gross profit amounted to approximately RMB383.1 million for the year ended 31 December 2023, representing an increase of approximately 46.7% as compared to approximately RMB261.2 million for the year ended 31 December 2022, which is mainly due to the year-on-year increase in revenue and the year-on-year decrease in cost of revenue.

Our gross profit margin was approximately 61.0% for the year ended 31 December 2023, representing an increase of 12.7 percentage points as compared to approximately 48.3% for the year ended 31 December 2022, mainly due to the increase in revenue for the year ended 31 December 2023 as compared to the corresponding period for 2022, and the year-on-year decrease in cost of revenue.

EXPENSES

R&D Expenses

Our R&D expenses mainly comprise employee salary and benefit expenses incurred by our R&D department and outsourcing expenses. The R&D expenses amounted to approximately RMB168.5 million for the year ended 31 December 2023, representing an increase of approximately 30.1% as compared to approximately RMB129.5 million for the year ended 31 December 2022. Such increase was mainly because we increased the investment in R&D in 2023, leading to an increase in employee salary expenses and outsourcing expenses.

收益成本

我們的收益成本主要包括物業、廠房及設備的折舊成本和租賃開支、運營部門產生的員工薪酬福利開支、帶寬及服務器托管費、遊戲代理成本及遊戲IP攤銷成本。截至二零二三年十二月三十一日止年度,較益成本金額約為人民幣244.6百萬元,較的至二零二二年十二月三十一日止年度的約人民幣279.4百萬元減少約12.5%,主要由於遊戲代理成本及遊戲IP攤銷成本減少。

毛利及毛利率

我們於截至二零二三年十二月三十一日止年度的毛利金額約為人民幣383.1百萬元,較截至二零二二年十二月三十一日止年度約人民幣261.2百萬元增加約46.7%,主要由於我們的收益同比增長而收益成本同比下降。

我們於截至二零二三年十二月三十一日 止年度的毛利率約為61.0%,較截至二零 二二年十二月三十一日止年度的約48.3% 增加12.7個百分點。該增加主要由於截至 二零二三年十二月三十一日止年度收益較 二零二二年同期增長,而收益成本同比下 降所致。

開支

研發開支

我們的研發開支主要包括研發部門產生的員工薪酬福利開支及外包開支。截至二零二三年十二月三十一日止年度的研發開支金額約為人民幣168.5百萬元,較截至二零二二年十二月三十一日止年度約人民幣129.5百萬元增加約30.1%。該增加主要由於我們於二零二三年度加大研發投入導致員工薪酬開支及外包開支增加。

Administrative Expenses

Our administrative expenses mainly comprise employee salary and benefit expenses, rental expenses of office premises and professional consulting fees. The administrative expenses were approximately RMB72.4 million for the year ended 31 December 2023, representing an increase of 19.6% as compared to approximately RMB60.6 million for the year ended 31 December 2022. Such increase was mainly because of the increase in expenses such as property rents.

Selling and Marketing Expenses

Our selling and marketing expenses mainly comprise advertising expenses incurred by marketing. The selling and marketing expenses amounted to approximately RMB49.8 million for the year ended 31 December 2023, representing a decrease of approximately 56.9% as compared to approximately RMB115.6 million for the year ended 31 December 2022. Such decrease was mainly due to the increased promotion activities for launching new games in 2022, while the number of promotion activities during 2023 remained steady.

Income Tax

The income tax expenses increased for the year ended 31 December 2023 as compared to the corresponding period in 2022, which was mainly due to the change in tax rates applicable to the proceeds from taxable income of certain subsidiaries for the year. The estimated income tax rates applicable to the Group entities (excluding the entities that are currently tax exempted) for the year ended 31 December 2023 varied from 12.5% to 25% (2022: 12.5%–25%).

For the year ended 31 December 2023, our loss for the year attributable to owners of the Company amounted to approximately RMB146.5 million, representing a decrease of approximately 151.8% as compared with the year ended 31 December 2022. This was mainly attributable to (i) the absence of gain on disposal of an associate of other gain or loss, net, for the year ended 31 December 2023, which recorded approximately RMB306.2 million for the year ended 31 December 2022, (ii) the impairment of assets in relation to the Group's cloud computing business, and (iii) a recorded increase in fair value loss of the Group's financial assets, mainly attributable to the fair value loss of a trust. For further details on impairment of assets in relation to the cloud computing business and fair value loss of the financial assets, please refer to notes 8 and 22 to the consolidated financial statements.

行政開支

我們的行政開支主要包括僱員的薪酬福利開支、辦公室物業租賃開支和專業資詢費用。於截至二零二三年十二月三十一日止年度,行政開支約為人民幣72.4百萬元,較截至二零二二年十二月三十一日止年度的約人民幣60.6百萬元增加19.6%。該增加主要由於物業房租等開支有所增加。

銷售及市場推廣費用

我們的銷售及市場推廣費用主要包括市場推廣所產生的廣告費用。截至二零二三年十二月三十一日止年度,銷售及市場推廣用的金額約為人民幣49.8百萬元,較較至二零二二年十二月三十一日止年度的約減少主要由於二零二二年度為新遊戲上線投入較多推廣活動,而二零二三年度推廣量趨於穩定。

所得税

截至二零二三年十二月三十一日止年度的所得税費用與二零二二年同期相比有所增加,主要由於本年若干附屬公司所得税應納税所得額及適用税率變動。截至二零二三年十二月三十一日止年度適用於本集團實體(不包括目前税項豁免的實體)的估計所得税税率介乎12.5%至25%(二零二二年:12.5%至25%)。

年內(虧損)/溢利

Such decrease was mainly due to the repayment of principal and interest of borrowings and addition to investment in assets during the year.

INTEREST BEARING LOAN

We adopt a prudent treasury management policy to ensure that our Group maintains a healthy financial position. As at 31 December 2023, our bank and other borrowings amounted to approximately RMB231.0 million (2022: RMB206.9 million), mainly due to new borrowings during the year. GEARING RATIO

As at 31 December 2023, the Group's gearing ratio was approximately 22.9% (2022: 28.2%). The decrease was mainly due to the higher decrease in total liabilities relatively to total assets. The gearing ratio is calculated as total debt divided by total assets of the Group as at 31 December 2023.

流動資金及財務資源

本集團一般以內部產生的現金流量及通過權益或債務融資活動為其營運提供資金,以滿足本集圍的資本需求。於等二三年十二月三十一日,現金及現金等價物約為人民幣48.1百萬元(二零二二年:人民幣104.7百萬元),按人民幣列值。較到104.7百萬元),按人民幣列值度減少至二零二二年十二月三十一日止年度內數54.1%。有關減少主要由於本年度內致還借款本金及利息及新增資產投資所致。

Contractual Arrangements

Background

On 11 December 2001, the State Council promulgated d the Regulations for the Administration of Foreign-Invested Telecommunications Enterprises (the "FITE Regulations"), which were amended on 10 September 2008 and 6 February 2016. According to the FITE Regulations, foreign investors are not allowed to hold more than 50% of the equity interests of a company providing value-added telecommunications services. In addition, a foreign investor who invests in a value-added telecommunications business in the PRC must possess prior experience in operating value-added telecommunications businesses and a proven track record of business operations overseas (the "Qualification Requirements"). Currently, none of the applicable PRC laws, regulations or rules provided clear guidance or interpretation on the Qualification Requirements. Therefore, in order for the Company to be able to carry on its business in the PRC, the Group has entered into the Contractual Arrangements to enable the Company to exercise and maintain control over operations of the Consolidated Affiliated Entities and to consolidate these companies' financial results into the Company's results under IFRSs as if they are wholly-owned subsidiaries of the Company.

Despite the lack of clear guidance or interpretation on the Qualification Requirements, we have taken and plan to continue to take specific steps to comply with the Qualification Requirements.

The table below set forth the connected persons of our Company involved in the Contractual Arrangements and the nature of their relationship with our Group.

Impairment assessment of goodwill 商譽減值評估 (Refer to Note 18 to the consolidated financial statements) (請參閱綜合財務報表附註18)

As at 31 December 2023, the Group had a balance of goodwill of approximately RMB624,183,000 in respect of the cash-generating units (the "CGUs") principally engaged in the development and distribution of web games and mobile games in the People's Republic of China, which are subject to impairment assessment at the end of each reporting period. Impairment of goodwill is assessed based on the value in use calculation by applying discounted cash flow model, which is highly judgmental and is dependent on certain significant inputs, including the discount rates, growth rates and expected changes to sales and direct costs.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body, in accordance with our agreed term of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

- 評價董事所採用會計政策的恰當性 及作出會計估計和相關披露的合理 性。

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

從與審核委員會溝通的事項中,我們確定哪些事項對本期綜合財務報表的審計最為重要,因而構成關鍵審計事項。我們在核數師報告中描述這些事項,除非法律法規不允許公開披露這些事項,或在極端早見的情況下,如果合理預期在我們報告中,清通某事項造成的負面後果超過產生的公眾利益,我們決定不應在報告中溝通該事項。

2.4 Going concern assessment

As of 31 December 2023, the Group had net current liabilities of approximately RMB3,221,000, out of which approximately RMB35,354,000 was non-refundable contract liabilities.

Taking into account the above factors, the directors of the Company are satisfied that the Group will have sufficient financial resources to meet its financial obligations as they fall due in the next twelve months from the end of the reporting period. Accordingly, the consolidated financial statements have been prepared on a going concern basis.

2.5 Subsidiaries

(a) Consolidation

A subsidiary is an entity (including a structured entity) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies.

截至二零二三年十二月三十一日,本集團的流動負債淨額約為人民幣3,221,000元,其中約人民幣35,354,000元為無需退還合約負債。

經考慮上述因素,本公司董事信納本集團將擁有足夠的財務資源以滿足其自報告期末起計未來十二個月的到期財務承擔。因此,綜合財務報表乃按持續經營基準編製。

Qianhai Huanjing may exercise such options at any time until it has acquired all equity interests of Shenzhen 7Road. The respective shareholders have also undertaken, subject to the relevant PRC laws and regulations, they will return to Qianhai Huanjing any consideration received in the event that Qianhai Huanjing exercises the option to acquire the equity interests of Shenzhen 7Road: and
 - obtain a pledge over the entire equity interests of Shenzhen 7Road from its respective shareholders as collateral security for all of Shenzhen 7Road's payments due to Qianhai Huanjing and to secure performance of Shenzhen 7Road's obligation under the Contractual Arrangements.

Nevertheless, the Contractual Arrangements may not be as effective as direct legal ownership in providing the Group with direct control over Shenzhen 7Road and its subsidiaries and such uncertainties presented by the PRC legal system could impede the Group's beneficiary rights of the results, assets and liabilities of the Shenzhen 7Road and its subsidiaries. The directors of the Company, based on the advice of its external legal counsel, consider that the Contractual Arrangements among Qianhai Huanjing, Shenzhen 7Road and its shareholders are in compliance with the relevant PRC laws and regulations and are legally binding and enforceable.

(ii) Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. The choice of measurement basis is made on a transaction-by-transaction basis.

(b) Investments in subsidiaries

Investments in subsidiaries disclosed in Note 39 are accounted for at cost less impairment. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

Impairment testing of the investments in subsidiaries is required upon receiving a dividend from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the consolidated financial statements of the investee's net assets including goodwill.

2 MATERIAL ACCOUNTING POLICY INFORMATION (continued)

2.6 Associates and joint ventures

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The results and assets and liabilities of associates and joint ventures are incorporated in these consolidated financial statements using the equity method of accounting. The financial statements of associates and joint ventures used for equity accounting purposes are prepared using uniform accounting policies as those of the Group for like transactions and events in similar circumstances. Under the equity method, an investment in an associate or a joint venture is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate or joint venture. When the Group's share of losses of an associate or joint venture exceeds the Group's interest in that associate or joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate or joint venture), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.

2.6 聯營公司及合營企業

聯營公司指本集團對其有重大影響力的實體。重大影響力指有權力參與被投資方的財務及營運決策,但對有關政策並無控制權或共同控制權。

合營企業指一項共同安排,對安排 擁有共同控制權的訂約方據此 營安排的資產淨值擁有權利。共同 控制權是指按照合約約定對某 排所共有的控制權,共同控制權 在相關活動要求共同享有控制權的 各方作出一致同意的決定時存在。

For the year ended 31 December 2023 截至二零二三年十二月三十一日止年度

2 MATERIAL ACCOUNTING POLICY INFORMATION (continued)

2.6 Associates and joint ventures (continued)

An investment in an associate or a joint venture is accounted for using the equity method from the date on which the investee becomes an associate or a joint venture. On acquisition of the investment in an associate or a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The Group assesses whether there is an objective evidence that the interest in an associate or a joint venture may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised is not allocated to any asset, including goodwill, that forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

2.6 聯營公司及合營企業(續)

For the year ended 31 December 2023 截至二零二三年十二月三十一日止年度

2 MATERIAL ACCOUNTING POLICY INFORMATION (continued)

2.6 Associates and joint ventures (continued)

When the Group ceases to have significant influence over an associate or joint control over a joint venture, it is accounted for as a disposal of the entire interest in the investee with a resulting gain or loss being recognised in profit or loss. When the Group retains an interest in the former associate or joint venture and the retained interest is a financial asset within the scope of IFRS 9, the Group measures the retained interest at fair value at that date and the fair value is regarded as its fair value on initial recognition. The difference between the carrying amount of the associate or joint venture and the fair value of any retained interest and any proceeds from disposing of the relevant interest in the associate or joint venture is included in the determination of the gain or loss on disposal of the associate or joint venture. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that associate or joint venture on the same basis as would be required if that associate or joint venture had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognised in other comprehensive income by that associate or joint venture would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) upon disposal/partial disposal of the relevant associate or joint venture.

2.6 聯營公司及合營企業(續)

當本集團不再對聯營公司擁有重大 影響力或不再對合營企業擁有共同 控制權時,其入賬列作出售被投資 方的全部權益,所產生的收益或虧 損於損益確認。倘本集團保留於前 聯營公司或合營企業的權益,且所 保留的權益屬於國際財務報告準則 第9號範圍內的金融資產,則本集 團會於該日按公允價值計量保留權 益,而該公允價值被視為於初始確 認時的公允價值。釐定出售聯營公 司或合營企業的收益或虧損時,計 入聯營公司或合營企業的賬面值與 任何保留權益的公允價值及出售於 聯營公司或合營企業的相關權益的 所得款項的差額。此外,本集團就 先前於其他全面收益確認的與該聯 營公司或合營企業相關的所有金額 的入賬基準與倘聯營公司或合營企 業直接出售相關資產或負債而須依 據的入賬基準相同。因此,倘該聯 營公司或合營企業先前於其他全面 收益確認的收益或虧損將於出售相 關資產或負債時重新分類至損益, 則本集團會於出售/部分出售相關 聯營公司或合營企業時將相關收益 或虧損由權益重新分類至損益(作 為重新分類調整)。

2 MATERIAL ACCOUNTING POLICY INFORMATION (continued)

2.7 Revenue recognition

The Group evaluated and recognised revenue based on a five step approach:

- Identify the contract(s) with a customer
- Identify the performance obligations in the contract
- Determine the transaction price
- Allocate the transaction price to each performance obligation
- Recognise revenue when each performance obligation is satisfied

Revenue is measured at the fair value of the consideration received or receivable, and represents amounts receivable for services provided, stated net of discounts, returns and value added taxes. Revenue is recognised when or as the control of the goods or services is transferred to the customer. Depending on the terms of the contract and the laws that apply to the contract, control of the goods and services may be transferred over time or at a point in time.

(a) Online game revenue (continued)

(i) Revenue from online games (both self-developed games and licensed games) published by the Group

The Group sells in-game tokens to its game players via payment channels, such as various mobile carriers and third-party internet payment systems. The in-game tokens are non-refundable and non-cancellable, and can be exchanged for in-game virtual items. The payment channels are entitled to a handling fee which is withheld and deducted from the gross proceeds collected from the game players, with the net amounts remitted to the Group. The handling fee charged by payment channels are recognised as cost of revenue in the consolidated statement of profit or loss.

The Group is obligated to provide on-going services to the game players and such obligation is not deemed to be inconsequential after game players purchase in-game virtual items. Revenue is recognised when the Group satisfies its performance obligations, i.e. at a point in time for the consumable in-game virtual items upon consumed and over the estimated playing period of paying players (the "Player Relationship Period") for the durable in-game virtual items, given there is an implicit obligation of the Group to maintain and allow access of the players to the games operated by the Group.

Estimation of the Player Relationship Period

The Group estimates the Player Relationship Period and re-assesses such periods at the end of each reporting period. If there is insufficient data to determine the Player Relationship Period, such as in the case of a newly launched game, the Group estimates the Player Relationship Period based on other similar types of games developed by the Group until the new game establishes its own pattern and history. The Group also considers game profile, target audience, and its appeal to players of different demographics groups in estimating the Player Relationship Period. Adjustments arising from changes in the estimated useful lives of durable in-game virtual items are applied prospectively.

2.13 Share-based payments

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date.

The fair value of the equity-settled share-based payments determined at the grant date without taking into consideration all non-market vesting conditions is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity (share-based compensation reserve). At the end of each reporting period, the Group revises its estimate of the number of equity instruments expected to vest based on assessment of all relevant non-market vesting conditions. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the share-based compensation reserve.

When share options are exercised, the amount previously recognised in share-based compensation reserve will be transferred to retained earnings. When the share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in share-based compensation reserve will be transferred to retained earnings.

2.14 Current and deferred income tax

The tax expense for the year comprises current and deferred tax. Tax is recognised in the statement of profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(a) Current income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of each reporting period in the countries where the Company's subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

(b) Deferred income tax

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred income tax liabilities are not recognised if they arise from the initial recognition of goodwill, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss and at the time of the transaction does not give rise to equal taxable and deductible temporary differences.

For the purpose of measuring deferred tax for leasing transactions in which the Group recognises the right-of-use assets and the related lease liabilities, the Group first determines whether the tax deductions are attributable to the right-of-use assets or the lease liabilities.

2.14 Current and deferred income tax (continued)

(b) Deferred income tax (continued)

For leasing transactions in which the tax deductions are attributable to the lease liabilities, the Group applies IAS 12 requirements to the lease liabilities, the provisions for decommissioning and restoration and the related assets separately. The Group recognises a deferred tax asset related to lease liabilities to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised and a deferred tax liability for all taxable temporary differences.

Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted at the end of each reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

(c) Offsetting

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied to the same taxable entity by the same taxation authority.

2.15 Property, plant and equipment

Property, plant and equipment are stated in the consolidated statement of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

When the Group makes payments for ownership interests of properties which includes both leasehold land and building elements, the entire consideration is allocated between the leasehold land and the building elements in proportion to the relative fair values at initial recognition. To the extent the allocation of the relevant payments can be made reliably, interest in leasehold land is presented as "right-of-use assets" in the consolidated statement of financial position. When the consideration cannot be allocated reliably between non-lease building element and undivided interest in the underlying leasehold land, the entire properties are classified as property, plant and equipment.

Depreciation is recognised so as to write off the cost of assets, less their residual values over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Any gain or loss arising from the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

2.16 Intangible assets

(a) Goodwill

Goodwill arising from an acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units ("CGUs") (or group of CGUs) that is expected to benefit from the synergies of the combination, which represent the lowest level at which the goodwill is monitored for internal management purposes and not larger than an operating segment.

A CGU (or group of CGUs) to which goodwill has been allocated is tested for impairment annually or more frequently when there is indication that the unit may be impaired. For goodwill arising from an acquisition in a reporting period, the CGU (or group of CGUs) to which goodwill has been allocated is tested for impairment before the end of that reporting period. If the recoverable amount is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill and then to the other assets on a pro-rata basis based on the carrying amount of each asset in the CGU (or group of CGUs).

(b) Intangible assets other than goodwill

Intangible assets with finite useful lives that are acquired separately are carried at costs less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less any subsequent accumulated impairment losses.

2.17 Impairment on property, plant and equipment, right-ofuse assets and intangible assets other than goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its property, plant and equipment, right-of-use assets and intangible assets with finite useful lives to determine whether there is any indication that these assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of property, plant and equipment, right-of-use assets, and intangible assets are estimated individually. When it is not possible to estimate the recoverable amount individually, the Group estimates the recoverable amount of the CGU to which the asset belongs.

In testing a CGU for impairment, corporate assets are allocated to the relevant CGU when a reasonable and consistent basis of allocation can be established, or otherwise they are allocated to the smallest group of CGUs for which a reasonable and consistent allocation basis can be established. The recoverable amount is determined for the CGU or group of CGUs to which the corporate asset belongs, and is compared with the carrying amount of the relevant CGU or group of CGUs.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a CGU) for which the estimates of future cash flows have not been adjusted.

2.17 Impairment on property, plant and equipment, right-ofuse assets and intangible assets other than goodwill (continued)

If the recoverable amount of an asset (or a CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or a CGU) is reduced to its recoverable amount.

2.18 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on a first-in, first-out method. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale. Costs necessary to make the sale include incremental costs directly attributable to the sale and non-incremental costs which the Group must incur to make the sale.

2.19 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

2.20 Financial instruments

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument.

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling in the near term; or
- on initial recognition it is a part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

Amortised cost and interest income

Interest income is recognised using the effective interest method. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired. For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit-impaired.

Equity instruments designated as at fair value through other comprehensive income

Investments in equity instruments at fair value through other comprehensive income are subsequently measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the financial assets at fair value through other comprehensive income reserve; and are not subject to impairment assessment. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, and will continue to be held in the fair value through other comprehensive income reserve.

Dividends from these investments in equity instruments are recognised in profit or loss when the Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment.

Financial assets at fair value through profit or loss

Financial assets that do not meet the criteria for being measured at amortised cost or fair value through other comprehensive income or designated as fair value through other comprehensive income are measured at fair value through profit or loss.

Financial assets at fair value through profit or loss are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss. The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset.

(ii) Impairment of financial assets subject to impairment assessment under IFRS 9

The Group performs impairment assessment under expected credit loss ("ECL") model on financial assets (including trade receivables, other receivables, restricted cash and cash and cash equivalents) which are subject to impairment assessment under IFRS 9. The amount of ECL is updated at the end of each reporting period to reflect changes in credit risk since initial recognition.

Assessments are done based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the end of the reporting period as well as the forecast of future conditions.

The Group always recognises lifetime ECL for trade receivables.

For all other instruments, the Group measures the loss allowance equal to 12m ECL, unless there has been a significant increase in credit risk since initial recognition, in which case the Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data and forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights. The Group uses a practical expedient in estimating ECL on trade receivables using a provision matrix taking into consideration historical credit loss experience, adjusted for forward looking information that is available without undue cost or effort.

Generally, the ECL is the difference between all contractual cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the effective interest rate determined at initial recognition.

Lifetime ECL for trade receivables are considered on a collective basis taking into consideration past due information and relevant credit information such as forward looking macroeconomic information.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Interest income is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit-impaired, in which case interest income is calculated based on amortised cost of the financial asset.

The Group recognises an impairment gain or loss in profit or loss for all financial instruments by adjusting their carrying amount, with the exception of trade receivables and other receivables, where the corresponding adjustment is recognised through a loss allowance account.

3 FINANCIAL RISK MANAGEMENT

3.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, price risk and cash flow and fair value interest rate risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. Risk management is carried out by the senior management of the Group.

(a) Market risk

(i) Foreign exchange risk

The Group operates internationally through overseas publishers and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US\$. Foreign exchange risk primarily arose from recognised assets and liabilities when receiving or to receive foreign currencies from overseas counterparties. The Group did not hedge against any fluctuation in foreign currency during the years ended 31 December 2023 and 2022.

For the Company's PRC subsidiaries whose functional currency is RMB, if US\$ had strengthened/ weakened by 5% against RMB with all other variables held constant, the post-tax profit would have been approximately RMB1,655,000 (2022: RMB2,979,000) higher/lower for the year ended 31 December 2023, as a result of net foreign exchange gains/losses on translation of net monetary assets denominated in US\$.

 - (ii) Price risk

The Group is exposed to price risk in respect of investments held by the Group that are classified on the consolidated statement of financial position either as at fair value through other comprehensive income or at fair value through profit or loss. The Group is not exposed to commodity price risk. To manage its price risk arising from the investments, the Group diversifies its portfolio. Each investment is managed by senior management on a case by case basis.

The Group's financial assets at fair value through other comprehensive income are held for capital appreciation and business strategic purposes. The sensitivity analysis is determined based on the exposure to equity price risks of financial assets at fair value through other comprehensive income at the end of the reporting period. If equity prices of the respective instruments held by the Group had been 5% higher/lower, the other comprehensive income for the year ended 31 December 2023 would have been approximately nil (2022: RMB81,000) higher/lower.

In respect of the Group's financial assets at fair value through profit or loss, the sensitivity analysis is determined based on the exposure to price risk of financial assets at fair value through profit or loss at the end of the reporting period. If the fair value of the respective instruments held by the Group had been 5% higher/lower, the post-tax profit for the year ended 31 December 2023 would have been approximately RMB33,240,000 (2022: RMB26,221,000) higher/lower.

3 FINANCIAL RISK MANAGEMENT (continued)

3.1 Financial risk factors (continued)

(a) Market risk (continued)

(iii) Cash flow and fair value interest rate risk

The Group does not have significant exposure to interest rate risk, as the Group has no variable interest rate's external borrowing and the interest rate risk in relation to variable bank balances is insignificant. A reasonable change in interest rate in next twelve months is assessed to result in no material change in the Group's results and retained profit. Thus, no sensitivity analysis on the interest rate risk has been presented.

(b) Credit risk

The Group is exposed to credit risk in respect of its trade receivables, other receivables, restricted cash and cash and cash equivalents placed with banks. The carrying amount of each class of the above financial assets represents the Group's maximum exposure to credit risk in relation to the corresponding class of financial assets.

(i) Risk management

Credit risk is managed on group basis. Finance team is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The Group assesses the credit quality of its customers and other debtors by taking into account various factors including their financial position, past experience and other factors.

The Group has concentration of credit risk as 2% (2022: 14%) and 15% (2022: 39%) of the total trade receivables was due from the Group's largest customer and the five largest customers respectively. In order to minimise the credit risk, the Group maintains continuous communications with the customers from trade receivables to ensure the effective credit control.

In view of the history of cooperation with the customers from trade receivables and the collection history of receivables due from them, the directors of the Company believe that the credit risk inherent in the Group's outstanding trade receivables balances is low. The Group applies the simplified approach to provide for expected credit losses prescribed by IFRS 9, which permits the use of the lifetime expected loss provision for all trade receivables.

Restricted cash and cash and cash equivalents are mainly placed with state-owned financial institutions in the PRC and reputable international financial institutions in the overseas. There was no recent history of default in relation to these financial institutions. In the opinion of the directors or the Company, the expected credit loss is close to zero.

(ii) Impairment of financial assets

The Group has mainly two classes of financial assets that are subject to the expected credit loss model: trade receivables and other receivables.

The Group applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due.

Other receivables are measured as either 12-month expected credit losses or lifetime expected credit losses, depending on whether there has been a significant increase in credit risk since initial recognition. The company considers the probability of default upon initial recognition of an asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the company compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forwarding-looking information. Especially the following indicators are incorporated:

internal credit rating;

 - significant changes in the expected performance and behavior of the counterparty;

Regardless of the analysis above, a significant increase in credit risk is presumed if a debtor is more than 90 days past due in making a contractual payment/repayable demanded.

The expected loss rates are based on the payment profiles of sales over a period of 36 months before 31 December 2023, and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables.

3.3 Fair value estimation (continued)

The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the reporting period. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price. These financial instruments are categorised within level 1. The Group's level 1 financial instruments comprise of investments in equity securities listed in Hong Kong.

The fair value of financial instruments that is not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the financial instrument is categorised within level 2. The Group did not have any level 2 financial instruments as at 31 December 2023 and 2022.

If one or more of the significant inputs is not based on observable market data, the financial instrument is categorised within level 3.

Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments; and
- Other techniques, such as discounted cash flow model, are used to determine fair value for financial instruments.

There was no transfer between levels 1, 2 and 3 during the year.

4 CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes assumptions and estimates concerning the current and future periods. The resulting accounting estimates will, by definition, seldom equal the related actual results. The assumptions and estimates that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

(a) Estimates of Player Relationship Period in respect of online game revenue

As described in Note 2.7, the Group recognises certain revenue from sale of durable in-game virtual items in online games ratably over the Player Relationship Period. The determination of the Player Relationship Period for durable in-game virtual items requires significant judgments and estimates by the management. These judgments and estimates included (i) the determination of key assumptions applied in the estimation of Player Relationship Period, including but not limited to the observation of historical paying players' behaviour, log-in records, churn rates and games life-cycle; and (ii) the identification of events that may trigger changes in the Player Relationship Period. Such estimates are subject to re-evaluation at the end of each reporting period. Any adjustments arising from changes in the Player Relationship Period as a result of new information will be accounted for as changes in accounting estimates.

(b) Impairment assessment of goodwill

Determining whether goodwill is impaired requires an estimation of the recoverable amount of the CGUs to which goodwill has been allocated, which is higher of the value in use or fair value less costs of disposal. The value in use calculation requires the Group to estimate the future cash flows expected to arise from the CGUs with certain significant inputs, including growth rates and expected changes to sales and direct costs, and a suitable discount rate in order to calculate the present value of future cash flows. Where the actual cash flows are less than expected, a material impairment loss may arise. As at 31 December 2023, the carrying amount of goodwill is RMB624,183,000 (2022: RMB624,183,000). Details of the impairment assessment of goodwill are disclosed in Note 18.

4 關鍵會計判斷及估計 不確定性的主要來源

判斷及估計會持續予以評估,並以 過往經驗及其他因素(包括在某些 情況下對未來事件的合理預期)為 依據。

本集團就現在和未來期間作出假設 及估計。根據定義,由此產生的會 計估計極少與相關的實際結果相符。 很可能引致須於下一個財政年度內 對資產及負債的賬面值進行重大調 整的假設及估計討論如下。

(a) 對網絡遊戲收益過程中用戶關係 期間的估計

(b) 商譽減值評估

釐定商譽是否減值需要對商譽分配 所至的現金產生單位之可收回金額 (以使用價值或公允值減出售成本 兩者的較高者為準)進行估計。為 計算使用價值,本集團需要對現金 產生單位(具有若干重大輸入數據, 包括增長率及銷售及直接成本的預 期變動)的未來預計現金流量進行 估計,並選擇適當的貼現率,以計 算未來預計現金流量的現值。如實 際現金流量低於預期,可能會產生 重大減值虧損。於二零二三年十二 月三十一日, 商譽的賬面值為人民 幣624,183,000元(二零二二年:人民 幣624,183,000元)。商譽減值評估的 詳情於附註18披露。

For the year ended 31 December 2023 截至二零二三年十二月三十一日止年度

4 CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

(c) Impairment of trade receivables and other receivables

Impairment of trade receivables and other receivables are assessed based on assumptions and estimates in respect of the expected credit loss rates. In determining the expected credit loss rates, the Group takes into consideration the Group's historical data, existing market conditions as well as forward looking information at the end of each reporting period. Changes in these assumptions and estimates could materially affect the result of the impairment assessment. Details of the impairment of other receivables and trade receivables are disclosed in Notes 3.1(b), 23 and 25.

(d) Fair value measurement of level 3 financial instruments

The fair values of financial instruments that are not quoted in active markets are determined by using valuation techniques. These valuation techniques include the use of market approach, discounted cash flow model and other valuation techniques commonly used by market participants, which require selection of significant unobservable inputs in the valuation process, including but not limited to earnings multiple of comparable companies, discount for lack of marketability and discount rate etc. Changes in these assumptions and estimates could materially affect the fair values of financial instruments.

(e) Control over Shenzhen 7Road and its subsidiaries under the Contractual Arrangements

As described in Note 2.5(a)(i), Shenzhen 7Road and its subsidiaries are treated as controlled structured entities of Qianhai Huanjing and are ultimately controlled and consolidated by the Company by way of the Contractual Arrangements. The management of the Group, with the support of legal opinion, are of the opinion that the Contractual Arrangements are in compliance with the PRC laws and regulations and are legally enforceable, and that the Group has power over Shenzhen 7Road's relevant activities and is exposed to significant variable return of Shenzhen 7Road. Changes in these assumptions could have material impact on the consolidated financial statements of the Group.

4 關鍵會計判斷及估計 不確定性的主要來源 (續)

(c) 貿易應收款項及其他應收款項減 值

貿易應收款項及其他應收款項的減值乃根據有關預期信貸虧損率的損率的實施。於於實期信貸虧期信貸虧期。於實期信實的,本集團會考慮本集團的發力。以及於明末的前時性資料。該等假設的對減值的影響。其他應收款項減值的詳情於附註3.1(b)、23及25披露。

(a) The Group entered into various finance lease agreements with two companies established in the PRC with limited liability who are both independent third parties of the Group ("Lessors"), to transfer the ownership and lease back of certain servers and other equipment of the Group at a cash consideration totalling RMB256,000,000 (the "Finance Lease Agreements"). Pursuant to the Finance Lease Agreements, the ownership of certain servers and other equipment of the Group was transferred to the Lessors and the Group leased back those servers and other equipment from the Lessors for a term of 48 months. At the end of lease term, the Lessors, subject to the settlement of all outstanding amounts due under the Finance Lease Agreements, agreed to transfer the ownership of those servers and other equipment to the Group at a purchase price ranging from RMB100 to RMB10,000.

The Finance Lease Agreements were not accounted for as a sale in accordance with IFRS 15 since the Group is able to repurchase those servers and other equipment at a price which is significantly lower than its original selling price; and the Finance Lease Agreements were not accounted for as a sale and leaseback transaction in accordance with IFRS 16.
