Name: Yulong Eco-Materials Limited
Address: Xiwuzhuang Village, Jiaodian Town, Pingdingshan, Henan Province, PRC.
Current Standing: INACTIVE (Address changed.)

Yulong Eco-Materials Limited was originally incorporated under the laws of the Cayman Islands on March 10, 2011. On May 7, 2019, the Company formally and legally moved its jurisdiction to the State of Wyoming. The company is in active standing in the jurisdiction of incorporation.

As reported previously, on July 1, 2020, we initiated a name change from Yulong Eco-Materials Limited to Exosomes Biologics Corp. However, we were advised that the name Exosomes Biologics Corp., could have potential conflicts. The name was potentially misleading and implied that we were a full chemical-related drug development company. Management is focused on developing human mesenchymal and other stem cell and cell-derived products. Subsequently, on July 31, 2020, the Company name was changed formally and legally to EV Biologics Corp. in Wyoming, its state of jurisdiction. The Company then applied for a name change process with FINRA. As first announced on August 6, 2020. The Company moved its domicile from Cayman Islands to

Wyoming on April 12, 2019 and received its new CUSIP number on August 20, 2020. After almost two years of numerous FINRA submissions, what should have been a straightforward application process is no further along and this normally straightforward application process has come to a halt. FINRA has ruled that the Company must be fully reporting with the SEC to proceed with the name change. The Company is current in its filings under the OTC Alternative Reporting Standard, but this has been deemed inadequate by FINRA.

Currently, the Company is focusing all its resources on execution of its established plan for technological innovation in biomanufacturing of cell-derived nanomedicines and is preparing patent applications for the supporting intellectual property. Currently, the Company is focusing all its resources on execution of its established plan for technological innovation in biomanufacturing of cell-derived nanomedicines and plans to prepare patent applications for the supporting intellectual property. At this time, diversion of any further resources toward financial regulatory filings, related to the name change, will not provide any advantage to the Company's primary technical development objectives.

Describe any trading suspension or halt orders issued by the SEC or FINRA concerning the issuer or its predecessors since inception:

Response: None – There have been no trading suspension orders issued by the SEC.

4) Issuer's Business, Products and Services

The purpose of this section is to provide a clear description of the issuer's current operations. (Please ensure that these descriptions are updated on the Company's Profile on www.otcmarkets.com).

A. Summarize the issuer's business operations (If the issuer does not have current operations, state "no operations").

B. List any subsidiaries, parent company, or affiliated companies.

On July 1, 2019, the Company filed Form 15 with the Securities and Exchange Commission: Notice of Termination of Registration of a Class of Securities Under Section 12 to terminate or suspend the duty to file reports.

As noted, on September 15, 2020, the Company incorporated a wholly owned subsidiary, EVBI-ALI, LLC, in the State of Wyoming. The subsidiary is active and in good standing.

Manufacturing Services Agreement with Lonza Cell & Gene Therapy

On May 17, 2022, EV Biologics Corp, disclosed via news release that it has signed a Manufacturing Services Agreement (MSA) with Lonza for development of stem/progenitor cell-derived nanotherapeutics and scalable biomanufacturing process.

The MSA enables EV Biologics to accelerate its nanotherapeutic biomanufacturing process and producer-cell line development through Lonza's global infrastructure and deep expertise in cell and gene therapy. EV Biologics has been developing nanotherapeutic-producer cells and optimizing a process for isolation of primary cells from tissue and expansion of cell banks using defined cell culture conditions.

The Company is very pleased to announce that advancing its relationship with Lonza will accelerate development and implementation of rigorous upstream and downstream biomanufacturing processes that will facilitate production of more consistent nanotherapeutic candidates.

EV Biologics Corp. Subsidiary: Excyte, Inc.

On August 15, 2022, EV Biologics Corp, announced that it has launched Excyte, Inc., a wholly owned subsidiary incorporated in the State of Wyoming, with a \$100 Million valuation. Additionally, Excyte, Inc. reported that it had raised \$1,500,000 of its \$2.5 million goal. This funding is designed to provide scale-down biomanufacturing process development and bioanalytical data to advance EV Biologics' ongoing nanotherapeutic development. Funds allocated to comparative evaluation of small-scale automated bioreactor platforms will enable development of scalable biomanufacturing of stem cell-derived nanotherapeutics. The remainder of these funds will be allocated to analysis of the biomolecular composition and the biological activity of the composite secretome products and constituent vesicular and non-vesicular nanoparticle fractions produced by mesenchymal stem/stromal cell (MSC) banks already isolated and expanded by EV Biologics.

Excyte, Inc. is founded on the premise that potent biotherapeutics and a deeper understanding of health, disease and aging can be obtained from living cells. Our mission is to further the understanding of the complex interactions between the multiplex of functional biomolecules that comprise cell-derived nanotherapeutics and the interconnected cellular pathways of biological systems in disease and aging. The Company will be focused on innovation in biomanufacturing, bioengineering, bioanalytics and machine learning toward a versatile platform for on-demand precision nanotherapeutic development for any clinical indication. Excyte, Inc. joins a narrow field of notable biotechnology ventures focused on longevity and extending the human health span, such as Altos Labs, Excyte, Inc. will take a pragmatic approach to innovation in the longevity space with development of products and technologies that can be further commercialized in parallel with its primary development pathway. The Company will use virtual infrastructure and collaboration with best-in-class commercial partners to execute its biotechnology innovations and minimize capital requirements and operating costs. Intellectual property, patents, proprietary processes and product development will be held by Excyte, Inc. in support of EV Biologics Corp.

Patents and Trademarks

We currently do not own or license any significant intellectual property, including patent, or copyright, in connection with our operations. On September 11, 2020, EV Biologics Corp. applied for a Trademark with the United States Patent and Trademark Office, which was approved on February 2, 2021, Serial Number: 90173520

5) Issuer's Facilities

The goal of this section is to provide a potential investor with a clear understanding of all assets, properties or facilities owned, used or leased by the issuer and the extent in which the facilities are utilized.

In responding to this item, please clearly describe the assets, properties or facilities of the issuer, give the location of the principal plants and other property of the issuer and describe the condition of the properties. If the issuer does not have complete ownership or control of the property (for example, if others also own the property or if there is a mortgage on the property), describe the limitations on the ownership.

If the issuer leases any assets, properties or facilities, clearly describe them as above and the terms of their leases.

The Company has no facilities other than rented office space. Currently, our office is located at 1621 Central Avenue, Cheyenne WY 82001. We do not physically occupy or use this office other than to receive mail. Our fiscal year end is December 31; our telephone number is 518-638-8192.

6) All Officers, Directors, and Control Persons of the Company

Using the table below, please provide information, as of the period end date of this report, regarding any officers, or directors of the company, individuals or entities controlling more than 5% of any class of the issuers securities, or any person that performs a similar function, regardless of the number of shares they own. If any insiders listed are corporate shareholders or entities, provide the name and address of the person(s) beneficially owning or controlling such corporate shareholders, or the name and contact information (City, State) of an individual representing the corporation or entity. Include Company Insiders who own any outstanding units or shares of any class of any equity security of the issuer.

The goal of this section is to provide an investor with a clear understanding of the identity of all the persons or entities that are involved in managing, controlling or advising the operations, business development and disclosure of the issuer, as well as the identity of any significant or beneficial shareholders.

Legal Proceedings

On July 3, 2019, Yulong Eco-Materials Limited Filed Case No. CGC-19-576129 against Ridgeway Smith in the State of California Superior Court, County of San Francisco to recover a stock loan to Smith of \$500,000. The Company and Defendant Smith had entered a written contract whereby the Company agreed to buy, and Smith agreed to sell, an alleged Michelangelo painting for 7.5 million shares of The Company stock for an agreed upon value of \$75 million. As additional consideration for the sale, The Company orally agreed to provide Smith with a stock loan for \$500,000, which was collateralized by the Company stock issued to Smith. Subsequent to the loan, the agreement for the acquisition of the painting was cancelled and on August 7, 2020, a total of 7,500,000 shares were cancelled and returned to treasury. The lawsuit is ongoing at this time.

SELECTED NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1 - Basis of Presentation

The accompanying unaudited interim financial statements of EV Biologics Corp. have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission and should be read in conjunction with the financial statements and notes thereto contained in EV Biologics Corp. Quarterly Report. In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of financial position and the results of operations for the interim periods presented have been reflected herein. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year.

Principles of Consolidation

The consolidated financial statements include only the accounts of EV Biologics Corp.

Note 2 - Going Concern

The Company is working to bring human mesenchymal and other stem cell and cell-derived products to market.

On October 10, 2023, EV Biologics Corp. signed a Revenue Share agreement with related party RegenRX for 60% sales of product revenue by RegenRX. A company milestone was reached December 2023 when EV Biologics recorded positive income for the first time.

On March 31, 2024, EV Biologics Corp. had a net loss of \$197,693, working capital deficit of \$1,920,669 and negative stockholders' equity of \$1,881,048.

Note 3 - Related Party Transactions

As of March 31, 2024, EV Biologics Corp. has the following related party transactions:

- a) CEO's travel advances for cash payments for operating expenses totaling \$2,354.
- b) An outstanding debt of \$999,975 owed to Excyte Inc, a subsidiary company.
- c) An amount of \$10,884 owed to Daniel Mckinney, Chief Executive Officer, who covered company operating expenses using his personal funds.
- d) An outstanding balance of \$532,892 owed to Dr. Jason Sanders, Chief Innovations Officer, in compensation for services rendered.

Note 5 - Intangible Assets

a. Intangible assets - rEVerie

rEVerie is a non-fungible token (NFT) with a cost of \$21,675,900. It depicts the essence of extracellular vesicle (EV) science & technology, illustrating stem cells as they appear with fluorescent microscopy. Beyond capturing the stunning visual quality intrinsic to this biological system, the synchronized release of EVs signifies the harmony of intercellular communication they mediate in nature. rEVerie alludes to the fundamental aspects of EV biotechnology that will deliver the next generation of biotherapeutics to conquer aging, disease, and injury.

This NFT was created to commemorate an early stage of our technological progress, and for issue as a dividend to shareholders as a token of our appreciation for their continuing support of our development of EV-based therapeutics.

On March 31, 2023, the management of MS Token LLC and EV Biologics Corp. have agreed to reverse this transaction due to Force Majeure as the regulators don't understand blockchain and crypto assets and the NFTs can't be distributed. The company canceled the purchase of the full series of 72,253 NFTs linked to a digital image from MS Token for \$21,675,900 in the form a Convertible Note for common stock or future issued security tokens, with no penalty.

Note 6 - Notes Payable

Excyte, Inc., a Wyoming corporation, promises to pay to the order of an investor the sum of \$999,975 for value received. On November 17, 2022, the management of EV Biologics Corp. and the sole Excyte Organizer and Incorporator have converted the promissory notes held and owned by the investor into shares of Excyte, Inc. at a price of \$10.00 per share.

\$500,000

The agreement is established, effective as of September 4, 2023, between John L. Aldred and EV Biologics Corp. In accordance with this agreement, EV Biologics Corp is obligated to lend a sum of \$500,000 to John Aldred. The loan term is set to expire on September 4, 2024. However, it is acknowledged that John Aldred reserves the unilateral right to extend the due date by providing written notice to the borrower before the scheduled repayment date.

Furthermore, it is mutually agreed upon by the parties that the loan in question is entirely interest-free.

Note 7 - Subsidiary: Excyte, Inc.

Excyte, a wholly owned subsidiary of EV Biologics, Inc., is founded on the idea that potent biotherapeutics and a deeper understanding of health, disease and aging can be obtained from living cells. Its mission is to further the understanding of the complex interactions between the multiplex of functional biomolecules that comprise cell-derived nanotherapeutics and the interconnected cellular pathways of biological systems in disease and aging.

The Company is focused on innovation in biomanufacturing, bioengineering, bio analytics and machine learning in support of a versatile platform for on-demand precision nanotherapeutic development for any clinical indication. The innovative approach to longevity will use a multi-functional nanotherapeutic platform to deliver the right bioactive molecules to diseased, damaged, or aging cells to restore health, combat aging and provide a longer health span.

On January 3, 2023, EV Biologics Corp announced that Excyte has already raised \$1,000,000 of its \$2.5 million initial capitalization goal.

One hundred thousand shares (100,000) have been issued at \$10 per share, out of a total issuance of ten million shares to EV Biologics. Excyte, a wholly owned subsidiary, was launched in August 2022, with \$100 Million valuation.

This funding will provide for further optimization of our primary stem cell bank isolation and expansion along with scale-down biomanufacturing process development. Some of these funds will also be allocated to analysis of the biomolecular composition and the biological activity of composite stem cell secretome products and their constituent vesicular and non-vesicular nanoparticle fractions to advance EV Biologics' ongoing secretome product development.

CEO, Daniel Mckinney, said "By illuminating the complex mechanisms and principal bioactive components of the stem cell secretome, we can accelerate our product and process development toward standardized biomanufacturing of our regenerative therapeutics for better health and longevity. Our audacious goal is to revolutionize modern medicine by unraveling the complex mechanisms of stem cell therapy and apply this understanding to recreate defined regenerative therapeutics."

To execute its biotechnology innovations and minimize capital requirements, Excyte is developing essential product and process technologies in parallel with its primary therapeutic development pathway through collaboration with best-in-class commercial partners. Intellectual property, patents, proprietary process, and product development will be held by Excyte in support of EV Biologics.
