FORM 10-K**

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended June 30, 2024

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 001-40550

Intapp, Inc.

(Exact name of Registrant as specified in its Charter)

Delaware
(State or other jurisdiction of
incorporation or organization)
3101 Park Blvd
Palo Alto, California
(Address of principal executive offices)

46-1467620
(I.R.S. Employer
Identification No.)

94306
(Zip Code)

Registrant's telephone number, including area code: (650) 852-0400

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, par value \$0.001 per share	INTA	The Nasdaq Global Select Market

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. YES NO

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the Registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

The aggregate market value of the registrant's common stock held by non-affiliates of the registrant, based on the closing price of a share of the registrant's common stock on December 31, 2023, which was the last day of the registrant's most recently completed second fiscal quarter, as reported by The NASDAQ Global Select Market on such date, was \$1.3 billion. Shares of the registrant's common stock held by each executive officer, director, and holders of 5% or more of the outstanding common stock who have been deemed to be affiliates have been excluded. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

The number of shares of Registrant's Common Stock outstanding as of August 12, 2024 was 74,699,528.

DOCUMENTS INCORPORATED BY REFERENCE

Part III, Items 10, 11, 12, 13 and 14 of this Annual Report on Form 10-K incorporates by reference where indicated certain sections of the definitive proxy statement for Intapp, Inc.'s 2024 Annual Meeting of Stockholders, to be filed with the United States Securities and Exchange Commission within 120 days after the end of the fiscal year to which this Annual Report on Form 10-K relates.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K, particularly in the sections captioned “Risk Factors” under Part I, Item 1A, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” under Part II, Item 7 and “Business” under Part I, Item 1, contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. All statements contained in this Annual Report on Form 10-K other than statements of historical fact, including statements regarding our future operating results and financial position, our business strategy and plans, potential acquisitions, market growth and trends, and our objectives for future operations, are forward-looking statements. You can identify these forward-looking statements by the use of forward-looking words such as “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “might,” “objective,” “ongoing,” “plan,” “predict,” “project,” “potential,” “should,” “will,” or “would,” or the negative version of those words or other comparable words. Any forward-looking statements contained in this Annual Report on Form 10-K are based upon our historical performance and on our current plans, estimates and expectations in light of information currently available to us. The inclusion of this forward-looking information should not be regarded as a representation by us or any other person that the future plans, estimates or expectations contemplated by us will be achieved. Such forward-looking statements are subject to various risks and uncertainties and assumptions relating to our operations, financial results, financial condition, business, prospects, growth strategy, and liquidity. Accordingly, there are, or will be, important factors that could cause our actual results to differ materially from those indicated in these statements. We believe that these factors include, but are not limited to:

- our ability to continue our growth at or near historical rates;
- our future financial performance and ability to be profitable;
- the effect of global events on the United States (“U.S.”) and global economies, our business, our employees, our results of operations, our financial condition, demand for our products, sales and implementation cycles, and the health of our clients’ and partners’ businesses;
- our ability to prevent and respond to data breaches, unauthorized access to client data or other disruptions of our solutions;
- our ability to effectively manage U.S. and global market and economic conditions, including inflationary pressures, economic and market downturns and volatility in the financial services industry, particularly adverse to our targeted industries;
- the length and variability of our sales cycle;
- our ability to attract and retain clients;
- our ability to attract and retain talent;
- our ability to compete in highly competitive markets, including artificial intelligence (“AI”) products;
- our ability to manage additional complexity, burdens, and volatility in connection with our international sales and operations;
- the successful assimilation or integration of the businesses, technologies, services, products, personnel or operations of acquired companies;
- our ability to incur indebtedness in the future and the effect of conditions in credit markets;
- the sufficiency of our cash and cash equivalents to meet our liquidity needs; and
- our ability to maintain, protect, and enhance our intellectual property rights.

These statements are based upon information available to us as of the date of this report, and while we believe such information forms a reasonable basis for such statements, such information may be limited or incomplete, and our statements should not be read to indicate that we have conducted an exhaustive inquiry into, or review of, all potentially available relevant information. These statements are inherently uncertain and investors are cautioned not to unduly rely upon these statements.

You should read the section titled “Risk Factors” set forth in Part I, Item 1A of this Annual Report on Form 10-K for a discussion of important factors that may cause our actual results to differ materially from those expressed or implied by our forward-looking statements. Moreover, we operate in an evolving environment. New risk factors and uncertainties may emerge from time to time, and it is not possible for management to predict all risk factors and uncertainties. As a result of these factors, we cannot assure you that the forward-looking statements in this Annual Report on Form 10-K will prove to be accurate. Except as required by applicable law, we do not plan to publicly update or revise any forward-looking statements contained herein, whether as a result of any new information, future events, changed circumstances or otherwise.

You should read this Annual Report on Form 10-K, completely and with the understanding that our actual future results may be materially different from what we expect. We qualify all of our forward-looking statements by these cautionary statements.

(This page has been left blank intentionally.)

PART I

Item 1. Business.

Overview

Intapp is a leading global provider of AI-powered solutions for professionals at advisory, capital markets, and legal firms. We empower the world’s premier accounting, consulting, investment banking, legal, private capital and real assets firms with the technology they need to operate more competitively, deliver timely insights to their professionals, and meet rapidly changing client, investor, and regulatory requirements. Using the power of Applied AI, our purpose-built vertical software as a service (“SaaS”) solutions accelerate the flow of information firmwide, activate expertise, empower teams, strengthen client relationships, manage risk, and help firms adapt more quickly in a highly complex ecosystem.

The professional and financial services industry, largely comprised of elite, partner-led firms, is one of the biggest sectors of the global economy. Firms in this industry operate in a highly connected ecosystem, providing valuable expertise, insight, and advice to a broad range of companies and institutions across varied transactions and engagements. The industry is competitive, and uniquely structured around highly experienced partners and professionals who leverage knowledge, intellectual capital, and relationships to succeed — differing greatly from companies that sell goods and products. Firms must manage an intricate web of complex, non-linear relationships spread across various functions, processes, and personnel, while also navigating an ever-changing market and regulatory environment.

Historically, firms in the professional and financial services industry have either relied on internally built technology solutions and legacy on-premises software, or they have attempted to use horizontal software providers to meet their industry-specific technology needs. Internally built or legacy solutions tend to be outdated, expensive, and cumbersome to maintain, while horizontal solutions do not align well with how these firms operate and require heavy customization. As a result, we believe these firms are increasingly embracing industry-specific software and AI technology to achieve improved levels of growth, investment, returns, productivity, risk management, and a differentiated experience for their clients, teams, and investors.

Our industry cloud strategy leverages deep understanding of the professionals across this industry to deliver products on the Intapp Intelligent Cloud platform that are tailored to address these firms’ specific business challenges. We combine our purpose-built technology with what we believe are best practices developed over more than 20 years and through thousands of successful deployments. This includes our robust set of applied AI capabilities that help clients solve unique challenges, allowing them to grow faster and run smarter. We have curated a robust, industry-specific partner ecosystem that allows our clients to generate added value from the adoption of our platform. All of these elements work together in our comprehensive industry cloud strategy.

We believe our cloud and Applied AI strategy and solutions provide us with a competitive advantage, driven by our deep domain expertise gained over 20 years of serving these professional firms. We have cultivated difficult-to-replicate, privileged access to these firms resulting in a deep understanding of how they work and what they need. Clients value our scalable platform’s differentiated domain expertise, purpose-built capabilities, comprehensive end-to-end offering, data-driven AI insights, and industry brand. We are trusted by many of the world’s elite firms, including 95 of the Am Law 100 law firms, 15 of the top 20 accounting firms, and over 1,700 private capital and investment banking firms.

We sell our software on a subscription basis through a direct sales model. As of June 30, 2024, we had over 2,550 clients. Our business has historically grown through a combination of expanding within our existing client base — including additional users and capabilities — and selling to new clients. We have had success in driving clients to further adoption, and currently have 73 clients, up from 53 clients at the end of fiscal year 2023, representing a 38% increase, with contracts greater than \$1 million of annual recurring revenues (“ARR”). With our scalable, modular cloud-based platform, we believe we are well positioned to continue our growth.

Our Products and Platform

The Intapp Intelligent Cloud is purpose-built to modernize these firms. The platform facilitates greater team collaboration, digitizes complex workflows to optimize deal and engagement execution, and leverages applied AI to help nurture relationships and originate new business. By better connecting their most important assets — people, processes, and data — our platform helps firms increase client fees and investment returns, operate more efficiently, and better manage risk and compliance.

Our deep understanding of the professional and financial services industry has enabled us to develop a suite of solutions on the Intapp Intelligent Cloud tailored to address these firms' specific business challenges. Intapp's Intelligent Cloud includes the DealCloud Platform which delivers configurable capabilities to deliver the Industry Solutions purpose built for professionals. Delivered in combination with our Compliance, Time, and Collaboration products, our DealCloud Platform provides a comprehensive solution for our clients and their firms. Our AI capabilities are similarly tailored, with security and compliance features that help ensure critical firm and client data is only shared when, where, and with whom it should be.

Our clients deliver value by leveraging their expertise, relationships, and experience. By its very nature, their work involves compiling inputs from vast sources of data and generating informed opinions that drive action. We believe these firms and their professionals are uniquely positioned to benefit from the promise of generative AI. The Intapp Intelligent Cloud helps firms move fast, modernize operations, and win more business with tailored cloud-based solutions that help them apply their intelligence to deliver value for their clients.

Industry Products and Solutions

Our solutions enable accounting, consulting, investment banking, legal, private capital and real assets firms and their professionals to realize the benefits of modern AI and cloud-based architectures for their most critical business functions — without compromising industry-specific functionality or their unique client, ethical or regulatory obligations. Our solutions serve firms' need for strong operational controls and compliance, and are complemented by solutions that support the work of the partners and professionals that grow the firms' fees and revenues:

- ***Intapp DealCloud*** serves partners and professionals in all of our markets. The solution manages firms' client relationships, prospective clients and investments, current engagements and deal processes, and operations and compliance activities — allowing investors and advisors to react faster, make better decisions, and execute the best deals. At investment banks and advisory firms, DealCloud helps partners and professionals enhance their coverage models, achieve greater win rates, and drive higher success fees. For investors, it helps increase origination volume, support investment selection, and drive greater returns. At professional services firms, DealCloud improves client strategy and targeting, business development and origination, and work delivery, increasing financial performance and helping to ensure regulatory compliance. The flexibility of DealCloud allows it to meet many needs including as a customer relationship management (“CRM”), deal management, experience management and relationship intelligence solution. DealCloud helps firms manage all aspects of their client relationships.
- ***Intapp Compliance solutions*** help firms thoroughly evaluate new business, onboard clients quickly, and monitor relationships for risk throughout their business lifecycle, while staying compliant with both regulatory and client obligations around independence and ethics.
- ***Intapp Time solutions*** provide AI-enabled software to drive efficiency and profitability. These solutions include time management software that accelerates billing, improves realization, and improves the experience for the firm's clients.
- ***Intapp Collaboration solutions*** provide intelligent client-centric collaboration, seamless content governance, and innovative client experiences leveraging Microsoft 365, Teams, and SharePoint. These capabilities have been extended through the recent acquisition of Transform Data International B.V. (“TDI”), which deepens the integration with Microsoft 365 applications and applies AI to everyday tasks and supports modern ways of working.
- ***Intapp Integration solutions*** connect all firm data into a single platform, tailored to the needs of professional and financial services firms. We also provide solutions that extend the value of our platform with third-party data that we are licensed to resell from a broad number of providers.

- **Intapp Assist** integrates Generative AI into everyday workflows to save professionals time by generating deal, company and meeting summaries and creating relevant, personalized signals that help professionals better harness the firm’s intelligence. Intapp Assist leverages the unique client data in the Intapp Intelligent Cloud and applies Generative AI to power business development, reduce manual work and help professionals make better-informed, faster decisions.

Technology Platform

Our solutions are built on a cloud platform, taking advantage of capabilities tailor-made for the unique requirements of the industries we serve. Our full range of solutions are delivered through an integrated cloud platform underpinned by key technology capabilities:

- A modern, cloud-based architecture purpose-built to meet industry needs;
- A low-code, tailored, configurable user experience (“UX”), based on industry-specific templates that meet users’ specific needs;
- An applied AI strategy that incorporates modern AI into our cloud offerings. Combined with our market expertise, our solutions help firms compete by better applying their intelligence while providing a Trusted AI approach to data security that meets the complex compliance needs of professional firms;
- Intapp Data unlocks valuable relationship intelligence with a rich data set of companies and contact data and delivering more valued integrations with our broad set of third-party data integrations; and,
- A specialized architecture based on an industry graph data model that is purpose-built to capture professional and financial services firms’ unique operating model — supporting the complex integrations needed to deliver data where and when it is needed.

Modern, cloud-based architecture

Our modern cloud-based architecture is purpose-built to meet the specialized needs of the industry. Key capabilities of our cloud architecture include:

- **Multi-tenant architecture.** Our multi-tenant architecture enables scalability, elasticity, high availability, and security, and provides operational cost efficiencies. Additionally, our internal operations and analytics instrumentation aggregates and leverages client instance and tenant experience captured within our solutions to track uptime and provide clients with real-time cloud status and trust information.
- **Single unified codebase.** We develop and release new versions of our solutions to cloud tenants on a common release schedule, with quarterly major releases and monthly maintenance releases. We deploy upgrades rapidly to all of our clients. With this approach, all cloud tenants are always on the latest versions of the software and have immediate access to critical new features, bug fixes, and innovations — without the lead time and delays common with traditional on-premises upgrade cycles.
- **Enterprise-grade security.** In response to the strict security requirements of professional and financial services firms, Intapp’s SaaS solutions provide tenants with enterprise-grade security, data protection, and control. In Intapp’s SaaS solutions, strict identity and access controls are employed and data is encrypted in transit and at rest. Intapp’s cloud services comply with numerous internationally recognized standards, such as ISO 27001, ISO 27017, ISO 27018, SOC 2, and CSA STAR.
- **Open ecosystem and APIs.** Intapp’s platform supports an open ecosystem by creating a centralized data lake and messaging service that integrates with disparate internal data sources and third-party applications and data services. By leveraging Intapp’s open (REST) APIs, client IT departments, other software providers, firm consultants, and partners in Intapp’s ecosystem can extend the benefits of Intapp’s platform to a broader range of business applications.

Low-code configurability and personalized UX

Our configurable UX capabilities allow both technical and non-technical users to rapidly tailor our applications to meet their specific needs. These capabilities enable our clients to make meaningful changes to their user experience, processes, and business rules with drag-and-drop configuration features and functionality — without having to perform custom coding. The flexibility of this framework enables firms to maximize their agility and easily adapt the software to match the frequent changes in their business.

We leverage our deep domain expertise in professional and financial services to create and provide our clients with access to pre-built industry-relevant configuration templates that are designed precisely for how these firms and their professionals operate. By mapping the user interface, data model, and workflows of our platform to firms’ unique industry and organizational requirements, we can deliver smart, personalized experiences by practice area, asset class, investment strategy, sector, industry, and geography.

Applied AI — our artificial intelligence strategy

Industry-specific AI is embedded throughout our cloud platform and solutions to help firms use their vast amounts of data to optimize critical processes and make better, faster decisions. Our AI team has been delivering capabilities into our solutions for more than 10 years, leveraging AI technology from automation to machine learning (“ML”) to deep learning to generative AI. The functions span a wide range across firm operations, including strategy, business development, risk and compliance, and work execution. Examples include:

- Enhanced conflicts review on matters with large number of parties — such as bankruptcies and restructuring — to accelerate conflicts clearance and help firms open matters faster with fewer errors.
- Billable activity capture to find missing time and automatically fill out timesheets to reduce revenue leakage, minimize write-offs, and accelerate cash and collections.
- Analysis of firms’ collected relationships to identify the strongest approach to winning new business and retaining important clients.
- Self-maintaining contacts in firm systems to keep contact records up to date — without requiring manual data entry.

Intapp’s Applied AI strategy also helps ensure proper safeguards are in place guided by more than a decade of expertise integrating AI capabilities into our tools, giving clients the Trusted AI they need. This includes a unique understanding of the complex obligations professionals face and the need to ensure that AI generated results include provenance and that users’ results are sourced only from data they are authorized to see – a unique challenge to these professionals and their firms.

Industry-specific data architecture

Our platform includes several key data management capabilities that help firms more effectively capture and leverage their critical data using a system of record that reflects the unique operating model of our client firms. These capabilities include:

- ***A specialized industry graph data model.*** Our specialized industry data model is purpose-built to capture the complex relationships, and the specialized knowledge and experience, that are unique to the firms we serve. The platform creates “many-to-many” data linkages that connect professionals with prospective clients, investors, and target portfolio companies and assets. Our solutions leverage these linkages to provide personalized analysis and insights for each professional that reflect their unique area of specialty, such as client industry, asset class, investment strategy, geography, or transaction type.
- ***A low-code integration platform.*** Intapp Integration Service is a core capability of our platform that provides cloud-native, easy-to-use, enterprise-class integration to connect applications and data — without requiring any code. The solution helps firms overcome data silos and easily move information between systems, including within our platform. Intapp Integration Service includes more than 100 industry-specific connectors, as well as extensive built-in workflow and automation capabilities tailored to the unique needs of professional firms.

- **Market intelligence in one place.** Our platform combines proprietary and third-party market data, transforming it into institutional knowledge that gives dealmakers and other professionals a competitive advantage through better market intelligence. Professionals can run complex reports, analyze industry trends, and evaluate potential synergies in the same place where they originate new business and manage relationships. With better, real-time, actionable market data, investors can source and close deals that best match their investment thesis and strategy, advisory professionals can quickly develop proprietary relationships and coverage strategies with companies that match previous transactions, and lawyers can more accurately identify white space opportunities with global clients to grow their relationships.

Key Benefits of Our Solutions

Our platform solutions help firms to:

- **Increase revenues and investment returns.** Our clients leverage our solutions to increase their revenues and investment returns by improving their origination and business development effectiveness, optimizing market coverage, and helping nurture key relationships by ensuring outreach to the right people at the right time to convert those relationships into business. Our solutions provide firms with a single source of truth and 360-degree views of key clients, related investments, potential new clients and investments, and prospective deals — giving partners, professionals, and dealmakers a competitive advantage in the market.
- **Operate more efficiently and profitably.** Our solutions help clients increase efficiency and profitability by streamlining and automating the many functions required to originate deals and deliver work. Using our workflow, analytics, and AI capabilities, firms can connect and operationalize their formerly disjointed engagement and deal lifecycle — eliminating manual processes, reducing duplicative data entry, and scaling to support growing businesses with less overhead. This focus includes critical processes such as investor relations, business development, conflicts clearance and business acceptance, engagement planning and resourcing, and billing and collections. Our cloud-based delivery model also reduces firms’ operating costs by eliminating their need to own, upgrade, and support the solutions or associated hardware infrastructure.
- **Manage risk and compliance more effectively.** Our solutions help firms reduce regulatory, financial, and reputational risk through workflow and automation, AI, predictive analytics, and rules-based risk scoring. Using Intapp, risk and compliance teams can work seamlessly together with front-office professionals, all within the Intapp Intelligent Cloud platform, to quickly assess new business opportunities, clear and manage conflicts and independence issues, easily establish ethical walls, prepare for regulatory or client audits, and dynamically respond to rapidly changing regulatory landscapes and the firm’s overall risk posture.
- **Leverage collective knowledge for competitive advantage.** Our solutions provide a competitive advantage to firms by helping leverage their immense, but often underutilized, collective knowledge. With integrated and connected information about investors, economic sectors, deals, clients, engagements, and relationships, combined with relevant third-party data, firm professionals are armed to make better, faster decisions, with better market insights and the knowledge with which to develop stronger relationships and increased business from clients, potential new clients, investors, and potential new investors.

Growth Strategies

The key components of our growth strategy are:

- **Capitalize on the generational change in work driven by AI.** We are seeing increased awareness of AI among our clients who are interested in how they can leverage AI in their business, driven by the excitement around generative AI, is increasing interest in next-generation solutions such as the Intapp Intelligent Cloud, and DealCloud in particular. Our Applied AI strategy expands the value of our cloud offerings by incorporating recent advancements in AI. This approach helps our clients to solve practical and unique business challenges.

- ***Continue to lead the market shift to the cloud.*** Mission-critical applications are increasingly being delivered more reliably, securely, and cost-effectively via the cloud, which can more readily enable real-time collaboration and provide access to valuable data from anywhere, anytime, on any device. As more professionals embrace cloud technologies, they will continue to drive the accelerated adoption of additional cloud capabilities across their firms. We believe we are a leader in the adoption cycle of cloud-based solutions by professional and financial services firms, driven in part by the needs of the next generation of professionals for purpose-built technology and software solutions.
- ***Expand within our existing client base.*** We have deep, longstanding, and trust-based relationships with our clients. Our land-and-expand model generates multi-year growth within our client base, with client lifetimes often spanning more than a decade. Clients typically adopt our modular solution to address a specific use case, then expand their use by adopting more modules, adding more users, and deploying to other parts of their organization over time.
- ***Grow our client base.*** We believe we are addressing a large, underserved market of firms with high demand for the capabilities we offer, and that we have a significant opportunity to continue to grow our client base. We will continue to invest in our sales and marketing force to target new client opportunities and grow our client base.
- ***Add new solutions to our platform.*** We plan to continue investing in our research and development team to enhance the functionality and breadth of our current solutions, as well as to develop and launch new solutions to address the evolving needs of our clients. In particular, we are continuing to invest resources in extending our AI and data science capabilities to better connect people, processes, and data.
- ***Broaden our geographical reach.*** We believe there is a significant need for our solutions on a global basis and, accordingly, opportunity for us to grow our business through further international expansion. We regularly analyze trends across the global market to identify areas for successful expansion and prioritize our investment to maximize our opportunity. We will continue to broaden our global footprint and intend to establish a presence in additional international markets.
- ***Selectively pursue strategic transactions.*** We have successfully completed 9 acquisitions over the past 10 years that have allowed us to enhance our platform, add new technology capabilities, and address new client segments. For example, in fiscal year 2024 we completed two new acquisitions: Berlin-based delphai GmbH ("delphai"), a cutting-edge organization that applies AI across public data, helping to ensure that firmographic data is collected, structured and presented to professionals with direct links or citations to source material, enabling validation and trust in the AI-generated material; and TDI, a long-time Intapp partner that builds and implements enterprise collaboration technology. We will continue to evaluate acquisition opportunities that will help us extend our market leadership and client reach.

Our Clients

Intapp is a leading global provider of AI-powered solutions for professionals at advisory, capital markets and legal firms. We serve the world's premier accounting, consulting, investment banking, legal, private capital, and real assets firms. Collectively, more than 2,550 clients, including 95 of the Am Law 100 law firms, 15 of the top 20 accounting firms, and over 1,700 private capital and investment banking firms rely on Intapp solutions to help activate their collective knowledge, navigate complex relationships, and drive growth. No single client represented more than 10% of total revenues in fiscal year 2024.

Our Functions

Sales and Marketing

We currently focus on marketing and selling our solutions to financial and professional services firms in North America, Europe, the Middle East, and Asia Pacific. We seek to drive market demand by developing and delivering specific, market-focused solutions to financial professional services firms.

We primarily generate sales through a direct sales model. All sales personnel focus on attracting new clients as well as expanding usage within our existing client base. Our sales team is supported by technical sales professionals and subject-matter experts who facilitate the sales process through developing and presenting demonstrations of our solutions after assessing requirements, addressing security and technical questions, and matching client needs with the appropriate solutions. We also have a team of experts who help advise on best practices and methodologies, strategize with respect to operations processes and management structure, and assess value creation and return on investment from our solutions.

We have a growing partner ecosystem that includes a range of technology and implementation partners. Together with these partners, we generate increased value for our clients and broaden our reach. Partners include specialized implementation and data partners as well as some of the largest technology players in the world, including Microsoft and KPMG. Across our entire ecosystem, we now have 130 data, technology, and implementation partners.

Our marketing efforts are focused on generating awareness of our solutions, creating sales leads, establishing and promoting our brand, showcasing our thought leadership, and cultivating a community of loyal clients and users. We utilize both online and offline marketing initiatives, including events and industry trade shows, online advertising, webinars, blogs, corporate communications, white papers, and case studies. We cultivate a community of our executive level buyers and influencers through our advisory board system.

Client Services and Client Success

After a client purchases our solutions, we, either directly or together with partners, provide implementation services to assist the client in the deployment of those solutions. We utilize best practices developed over our history in implementing our solutions for each client — including providing templates and industry-relevant templates to accelerate adoption, and delivering a purpose-built configuration that best suits a client’s specific needs. Implementation engagements typically range in duration from three to nine months, depending on scope.

We support our clients with access to engineers, other technical support personnel, release management, and managed services. To help our clients achieve success with the Intapp Intelligent Cloud platform, we offer in-depth change management workshops, classroom and virtual end-user and administrator training, consultative adoption services, and best practices. We view our clients’ success as a cornerstone of our business model and philosophy, and are organized to measure, monitor, and deliver high levels of client satisfaction.

We have also developed relationships with a number of implementation partners. These partners provide implementation services and other professional services related to our platform. We anticipate that we will continue to develop partnerships with a select number of third parties to help grow our business and deliver our solutions. In those markets where we have established such partnerships, we consider these important to our and our clients’ success.

Research and Development

Our ability to compete depends in large part on our continuous commitment to research and development and our ability to rapidly introduce new technologies, features, and functionality. Our research and development team is responsible for the design, architecture, testing, and quality of our solutions. We focus our efforts on enhancing our existing solutions and developing new solutions for our clients.

Our research and development teams are primarily located in Palo Alto, California; Charlotte, North Carolina; Belfast, Northern Ireland; Berlin, Germany and Manchester, England. We also utilize a substantial number of independent contractors and consultants working in research and development throughout the world.

Our Employees and Human Capital

We have built our culture around the success of our clients, our partners, our employees, and our investors. We have carefully recruited, selected, and developed employees who are highly focused on delivering success for our clients in the professional and financial services industry. This strategy is a crucial element of our hiring and evaluation processes throughout all departments. We believe this approach produces high levels of both client success and employee engagement.

We believe we provide employees with a unique opportunity to develop and sell world-class solutions within a specific industry. The Intapp Intelligent Cloud platform offers our developers an opportunity to build important solutions that can become the standard in the professional and financial services industry, while enabling sales personnel to sell a growing portfolio of solutions to a focused, deep set of firms. We believe that this unique opportunity will allow us to continue to attract top talent for our product development and sales efforts.

As of June 30, 2024, we had 1,235 full-time employees.

Our employees are primarily located in the U.S., the U.K., Europe, Australia, and Singapore. We also utilize independent contractors, brokers, and consultants, including a substantial number of developers working in research and development. None of our employees are represented by a labor union or are a party to a collective bargaining agreement, and we consider our relationship with our employees to be strong.

Competition

The professional and financial services industry is highly competitive and subject to change from the introduction of new products and technologies and other activities of industry participants. We believe our success in growing our business will depend on our ability to demonstrate to our clients that our solutions provide superior business outcomes to other competitive solutions — including, but not limited to, legacy applications, manual processes, horizontal platforms, and point solutions.

We believe that the principal competitive factors in our industry include the following:

- Deep domain experience and a long-term, trusted relationship;
- Product innovation, quality, functionality, and design;
- Solutions that are purpose-built for this industry;
- Platform solutions that are complete, end-to-end solutions across the relationship lifecycle;
- Solutions that enable connectedness of key data and processes through the use of AI;
- A track record of delivering value consistently over time;
- A strong commitment to security and privacy; and
- Brand reputation and name recognition in the industry.

Some of our competitors and potential competitors are large and have greater brand name recognition, longer operating histories, larger marketing budgets, established marketing relationships, access to larger client bases, and significantly greater resources for the development of their offerings. Moreover, because our market is highly competitive and subject to rapid change, it is possible that new entrants — especially those with substantial resources, more efficient operating models, more rapid technology and content development cycles, or lower marketing costs — could introduce new solutions that disrupt our market and better address the needs of our clients and potential clients.

Further, certain of our competitors may challenge our intellectual property, may develop additional competing or superior technologies and processes, and compete more aggressively and sustain that competition over a longer period of time than we could. For additional information regarding the competitive business conditions we face, see “Risk Factors” in Part I, Item 1A of this Annual Report on Form 10-K.

Intellectual Property

We rely on a combination of patent, copyright, trademark and trade secret laws, and confidentiality and invention assignment agreements to protect our intellectual property rights. Our patents cover various aspects of the Intapp Intelligent Cloud platform. The term of individual patents depends on the legal term for patents in the countries in which they are granted. We believe the duration of our patents is adequate relative to the expected lives of our product and service offerings. There is no active patent litigation involving any of our patents, and we have not received any notices claiming that our activities infringe a third-party's patent.

We cannot guarantee that patents will be issued from any of our pending applications or that, if patents are issued, they will be of sufficient scope or strength to provide meaningful protection for our technology. It may be necessary in the future to seek or renew licenses relating to various aspects of the Company's products, processes and services. While the Company has generally been able to obtain such licenses on commercially reasonable terms in the past, there is no guarantee that such licenses could be obtained in the future on reasonable terms or at all.

We also rely upon trademarks to build and maintain the integrity of our brand and, in part, upon trade secrets, know-how, continuing technological innovation, and licensing arrangements, to develop and maintain our competitive position. We own a number of registered trademarks (including Intapp and DealCloud, among others) and a portfolio of registered domain names for websites that we use in our business. We protect our proprietary rights through a variety of methods, including confidentiality and assignment agreements with suppliers, employees, consultants, and others who may have access to our proprietary information.

Regulations

We are subject to a variety of laws and regulations in the United States and abroad that involve matters central to our business. Some of these laws and regulations are still evolving and being tested in courts and could be interpreted in ways that could harm our business. These may involve privacy, data protection, content, intellectual property, data collection and processing, data security, and data retention and deletion. In particular, we are subject to federal, state, and foreign laws regarding data protection and privacy. Foreign data protection and privacy laws and regulations can impose different obligations that may be more restrictive than those in the United States. Some United States federal and state and foreign laws and regulations in some cases may be enforced by private parties in addition to government entities. These laws and regulations are constantly evolving and may be subject to significant change. As a result, the application, interpretation, and enforcement of these laws and regulations are often uncertain, particularly in the evolving industry in which we operate. This may result in laws and regulations being interpreted and applied inconsistently from country to country, and also inconsistently with our current policies and practices. In recent years, there has been an increase in attention to and regulation of data protection and data privacy across the globe, including the Federal Trade Commission's ("FTC") increasingly active approach to enforcing data privacy in the United States. Additionally, the European Union's General Data Protection Regulation ("GDPR"), along with the United Kingdom which also still has laws equivalent to the GDPR/EU data protection laws, has resulted and will continue to result in significantly greater compliance burdens and costs for companies with users and operations in the European Union. Under GDPR, fines of up to 20 million Euros or up to 4% of the annual global revenues of the infringer, whichever is greater, can be imposed for violations. The California Consumer Privacy Act ("CCPA") and the California Privacy Rights Act ("CPRA") limit how we may collect and use certain data pertaining to California residents. Numerous other states have enacted or are considering enacting similar privacy laws further complicating our privacy compliance obligations through the introduction of increasingly disparate requirements across the various U.S. jurisdictions in which we operate. The impact of these laws on us and others in our industry is and will remain unclear until additional regulations are issued. The effects of the CCPA and CPRA are potentially far-reaching, however, and may require us to modify our data processing practices and policies and incur substantial compliance-related costs and expenses. Non-compliance with these laws could result in penalties or significant legal liability. We have invested, and continue to invest, human and technology resources into our GDPR and CPRA compliance efforts and our data privacy compliance efforts generally.

Seasonality

We generally experience seasonality in billings with our clients, and we typically record a higher percentage of billings in our fourth quarter than in the other quarters.

Available Information

The Securities and Exchange Commission (“SEC”) maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC at www.sec.gov. Our website address is www.intapp.com. We make available on or through our website certain reports and amendments to those reports that we file with or furnish to the SEC in accordance with the Securities Exchange Act of 1934, as amended (“Exchange Act”). These include our annual reports on Form 10-K, our quarterly reports on Form 10-Q, and our current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, and our Proxy Statement for our annual meeting of stockholders. We make available on our website at www.intapp.com, free of charge, copies of these reports and other information as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Further corporate governance information, including our corporate governance guidelines, code of business conduct and ethics, and committee charters, is also available on our investor relations website under the heading “Corporate Governance.” Information contained on, or that can be accessed through, our website does not constitute part of, and is not incorporated into, this Annual Report on Form 10-K or in any other report or document we file with the SEC.

Item 1A. Risk Factors.

Our business, operations and financial results are subject to various risks and uncertainties, including those described below, that could materially adversely affect our business, results of operations, financial condition, and the trading price of our common stock. The following material factors, among others, could cause our actual results to differ materially from historical results and those expressed in forward-looking statements made by us or on our behalf in filings with the SEC, press releases, communications with investors, and oral statements.

Risk Factors Summary

Below is a summary of material factors that make an investment in our common stock speculative or risky:

- Our rapid growth makes it difficult to evaluate our future prospects and may increase the risk that we will not continue to grow at or near historical rates.
- We have a history of losses and may not achieve or maintain profitability in the future.
- All of our revenues are generated by sales to clients in our targeted verticals, and factors, including the downturns in U.S. and global markets and economic conditions, that adversely affect the applicable industry could also adversely affect our business.
- If our solutions or third-party cloud providers or sub-processors experience data security breaches and there is loss, theft, misuse, unauthorized disclosure or unauthorized access to our clients' data, we may lose current or future clients, our reputation and business may be harmed, and we may be subject to governmental inquiries or investigations and a risk of loss or liability.
- Our business depends on clients renewing and expanding their subscriptions for our solutions. A decline in our client renewals and expansions could harm our future results of operations.
- Because we recognize revenues from our SaaS solutions over the term of the agreements for our subscriptions, a significant downturn in our business may not be reflected immediately in our operating results, which increases the difficulty of evaluating our future financial performance.
- Our sales cycles are lengthy and variable, depend upon factors outside our control, and could cause us to expend significant time and resources prior to generating revenues.
- We are expanding our SaaS solutions to incorporate recent innovations in AI and these initiatives may not be successful, which may adversely affect our business, results of operations and financial condition, and may also result in reputational harm and liability.
- If we are unable to develop, introduce and market new and enhanced versions of our solutions, we may be put at a competitive disadvantage and our operating results could be adversely affected.
- If we are unable to develop or sell our solutions into new markets or to further penetrate existing markets, our revenues will not grow as expected and our operating results could be adversely affected.
- We compete in highly competitive markets, and if we do not compete effectively, our business, results of operations, and financial condition could be negatively impacted and cause our market share to decline.
- If the market for SaaS solutions for professional and financial services develops slower than we expect or declines, it could have a material adverse effect on our business, financial condition and results of operations.
- We may continue to expand through acquisitions or partnerships with other companies, which may divert our management's attention and result in unexpected operating and technology integration difficulties, increased costs, and dilution to our stockholders.
- If we fail to effectively manage our growth, our business and results of operations could be harmed.
- Our solutions address functions within the heavily regulated professional and financial services industry, and our clients' failure to comply with applicable laws and regulations could subject us to litigation.

- Our solutions or pricing models may not accurately reflect the optimal pricing necessary to attract new clients and retain existing clients as the market matures.
- Our loan and security agreement provides our lender with a first-priority lien against substantially all of our assets and contains restrictive covenants which could limit our operational flexibility and otherwise adversely affect our financial condition.
- Failure of any of our established solutions to satisfy client demands or to maintain market acceptance would harm our business, results of operations, financial condition, and growth prospects.
- Our ability to sell and renew our solutions is dependent in part on the quality of our implementation services and technical support services and the implementation services provided by our partners, and our failure to offer high-quality implementation services or technical support services or our partners' failure to offering high-quality implementation services could damage our reputation and adversely affect our ability to sell our solutions to new clients and renew agreements with our existing clients.
- Real or perceived errors or failures in our solutions may affect our reputation, cause us to lose clients and reduce sales which may harm our business and results of operations.
- Changes in laws, regulations, or guidance issued by supervisory authorities relating to privacy or the protection or transfer of personal data, or any actual or perceived failure by us to comply with such laws, regulations, or guidance, could adversely affect our business and could subject us to liability, fines and reputational harm.
- Assertions against us, by third parties alleging infringement or other violation of their intellectual property rights, could result in significant costs and substantially harm our business and results of operations.
- Failure to protect our intellectual property could substantially harm our business and results of operations.
- We and our clients rely on technology and intellectual property of third parties, and any errors or defects in, or any unavailability of, such technology and intellectual property could limit the functionality of our solutions and disrupt our business.
- We agree to indemnify clients and other third parties, which exposes us to substantial potential liability.
- If we fail to maintain an effective system of internal controls, our ability to produce timely and accurate financial statements or comply with applicable regulations could be impaired.
- Our international sales and operations subject us to additional risks that can adversely affect our business, results of operations and financial condition.
- If the ownership of our common stock continues to be highly concentrated, it may prevent other minority stockholders from influencing significant corporate decisions and may result in conflicts of interest.
- The market price and trading volume of our common stock has been and may continue to be volatile, which could result in rapid and substantial losses for our stockholders.
- Future offerings of debt or equity securities by us may materially adversely affect the market price of our common stock.
- The market price of our common stock could be negatively affected by sales of substantial amounts of our common stock in the public markets.
- We may be adversely affected by natural disasters, outbreaks, epidemics, or pandemics involving public health, other catastrophic events and terrorism that could disrupt and harm our business, results of operations, and financial condition.

Risks Related to Our Business and Industry

Our rapid growth makes it difficult to evaluate our future prospects and may increase the risk that we will not continue to grow at or near historical rates.

We have been growing rapidly over the last several years, and as a result, our ability to forecast our future results of operations is subject to a number of uncertainties, including our ability to effectively plan for and model future growth. Our recent and historical growth should not be considered indicative of our future performance. In future periods, our revenues could grow more slowly than in recent periods or decline for a number of reasons, including any reduction in demand for our Intapp Intelligent Cloud platform, increase in competition, limited ability to, or our decision not to, increase pricing, or our failure to capitalize on growth opportunities or if any of the other risks described herein were to materialize. We have encountered in the past, and will encounter in the future, risks and uncertainties frequently experienced by growing companies in new and rapidly changing markets. If our assumptions regarding these risks and uncertainties, which we use to plan and operate our business, are incorrect or change, or if we do not address these risks successfully, our operating and financial results could differ materially from our expectations, our growth rates may slow and our business would suffer.

We have a history of losses and may not achieve or maintain profitability in the future.

In fiscal years 2024, 2023 and 2022, we incurred net losses. We must generate and sustain higher revenue levels in future periods to become profitable, and even if we do, we may not be able to maintain or increase our profitability. We expect to continue to incur losses for the foreseeable future as we intend to continue to invest in product development, sales and marketing programs and acquisitions to support further growth.

These expenditures may not result in additional revenues or growth of our business. We have also experienced increased costs associated with the growth and expansion of our client base and investments in research and development. Accordingly, we may not be able to generate sufficient revenues to offset our expected cost increases and achieve and sustain profitability. If we fail to achieve and sustain profitability, the market price of our common stock could decline.

All of our revenues are generated by sales to clients in our targeted verticals, and factors, including the downturns in U.S. and global markets and economic conditions, that adversely affect the applicable industry could also adversely affect our business.

A majority of our sales are to clients in the professional and financial services industry. Demand for our solutions could be affected by factors that are unique to and adversely affect our targeted verticals. In particular, our clients in the professional and financial services industry are highly regulated, subject to intense competition and impacted by changes in general economic and market conditions. For example, changes in applicable laws and regulations could significantly impact the software functionality demanded by our clients and require us to expend significant resources to ensure our solutions continue to meet their evolving needs. Changes in general economic and market conditions, including economic uncertainty, inflation, liquidity concerns and fluctuating interest rates, have resulted in and could continue to result in stress and volatility in the financial services industry. In certain sectors of the financial services industry, certain financial institutions have faced liquidity and solvency concerns, consolidation, a severe decline in market value, distress, failure and receivership. For example, in March 2023, Silicon Valley Bank (SVB) was closed by regulators. While the closure did not have a material direct impact on our business, continued instability in the global banking system may result in additional bank failures, as well as volatility of global financial markets, either of which may adversely impact our clients in the financial services industry and our business and financial condition. It is possible that these conditions may persist, deteriorate or reoccur, which may cause our clients to reduce their spending on our technology or to seek to terminate or renegotiate their contracts with us. In addition, industry consolidation or the introduction of competing technology, in any of our targeted verticals could lead to a significant reduction in the number of clients that use our solutions or the services demanded by these clients.

Significant economic and market downturns make it difficult for our clients and us to forecast and plan future business activities accurately. Adverse changes in domestic and global economic and political conditions, including those associated with outbreaks, epidemics, or pandemics involving public health, uncertainty as a result of geopolitical events such as the conflicts in and around Ukraine, the Middle East and other parts of the world, inflation, elevated interest rates and the adverse economic downturn, stress and volatility in the financial services industry and impacts from climate change, could result in significant decreases in demand or lengthened sales cycles for our solutions, including the delay or cancellation of current or anticipated projects, and reduction in IT spending by our clients and potential clients, or could present difficulties in collecting accounts receivables from our clients if their financial condition deteriorates. The effects of climate change may further disrupt our clients' businesses, by, among other things, increasing their costs and credit risk from their clients. Additionally, our market verticals are also interdependent. Our clients in the professional services industry rely significantly on revenues they receive from their own clients in the financial services industry, thus a decline in one vertical can lead to a decline in the other vertical. As a result, our ability to generate revenues from our clients could be adversely affected by specific factors that affect the professional and financial services industry.

If our solutions or third-party cloud providers or sub-processors experience data security breaches, and there is loss, theft, misuse, unauthorized disclosure or unauthorized access to our clients' data, we may lose current or future clients, our reputation and business may be harmed, and we may be subject to governmental inquiries or investigations and a risk of loss or liability.

Our business involves the processing, storing and transmission of increasingly large amounts of confidential and sensitive information that our clients and potential clients in the professional and financial services industry maintain and access. We and our third-party cloud providers and sub-processors face a variety of evolving threats that could cause data security breaches, including cyberattacks. Also, companies that provide software solutions to clients in the legal industry, like us, may face heightened cyber security risks. While we have developed and implemented measures designed to protect client information and prevent security breaches and our cloud services comply with numerous internationally recognized standards, such as ISO 27001, ISO 27017, ISO 27108, SOC 2 and CSA STAR, if our security measures are breached or unauthorized access to client data is otherwise obtained, our solutions may be perceived as not being secure; clients, especially those in the professional and financial services industry, may reduce the use of or stop using our solutions, and we may incur significant liabilities. Our solutions involve the storage and transmission of data, in some cases to third-party cloud providers, which may include personal data, and security breaches, including at third-party cloud providers, could result in the loss, theft, misuse, unauthorized disclosure of and unauthorized access to this information, which in turn could result in governmental inquiries or investigations, litigation, breach of contract claims, indemnity obligations, reputational damage and other liability for our company. Despite the measures that we have or may take, our infrastructure will be potentially vulnerable to physical or electronic break-ins, ransomware attacks, computer viruses or similar problems, and in the case of third-party cloud providers, may be outside of our control. As AI technologies, including generative AI models, develop rapidly bad actors may use these technologies to create new sophisticated attack methods that are increasingly automated, targeted and coordinated and more difficult to defend against. If a person circumvents our security measures, that person could misappropriate proprietary information or disrupt or damage our operations. As our business grows, the number of individuals using our products, as well as the amount of information we collect and store, is increasing, and our brands are becoming more widely recognized, which makes us a greater target for malicious activity. Risk of cyberattacks including ransomware, continues to grow as cybersecurity threats become more sophisticated and complex and geopolitical tensions or conflicts, may create a heightened risk of cyberattacks. Like most companies that provide cloud-based software solutions, we are, in the normal course of business, the target of malicious cyberattack attempts. Although, to date, such identified attempts have not resulted in security events that are material or significant to us, including to our reputation or business operations, or had a material financial impact, there can be no assurance that future cyberattacks will not be material or significant. Security breaches that result in access to confidential information could damage our reputation and subject us to a risk of loss or liability. We may be required to make significant expenditures to remediate security breaches or significant additional expenditures to protect against security breaches. Additionally, if we are unable to adequately address our clients' concerns about security, we may have difficulty selling our solutions.

We rely on third-party technology and systems for a variety of services, including, without limitation, third-party cloud providers or sub-processors to host our websites and web-based services, encryption and authentication technology, employee email, content delivery to clients, back-office support and other functions, and the ability to prevent breaches of any of these systems may be beyond our control. Because techniques used to obtain unauthorized access or sabotage systems change frequently and generally are not identified until they are launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. Although we have developed systems and processes that are designed to protect client information and prevent data loss and other security breaches, including systems and processes designed to reduce the impact of a security breach at a third-party vendor, such measures cannot provide absolute security. In addition, we may have to introduce such protective systems and processes to acquired companies, who may not correctly implement them at first or at all. Any or all of these issues could negatively impact our ability to attract new clients or to increase engagement by existing clients, could cause existing clients to elect not to renew their subscription arrangements or term licenses, or could subject us to third-party lawsuits, regulatory fines or other action or liability, thereby adversely affecting our results of operations. The laws, regulations and industry standards related to cybersecurity are evolving globally. We may be subject to increased compliance requirements by regulators and clients with respect to our products and services, as well as additional costs to oversee and monitor security risks. Many jurisdictions have enacted laws mandating the notification of individuals, stockholders, regulatory authorities and others of security breaches. For example, the SEC recently adopted cybersecurity risk management and disclosure rules, which require the disclosure of material cybersecurity incidents, risk management, strategy and governance. While we maintain cyber liability insurance policies covering certain damages relating to security breaches, we cannot be certain that our coverage will be adequate for liabilities actually incurred or that insurance will continue to be available to us on economically reasonable terms, or at all. Our risks are likely to increase as we continue to expand our platform, grow our client base, and process, store, and transmit increasingly large amounts of confidential and sensitive data, and as cyber security threats continue to grow increasingly sophisticated and complex.

Our business depends on clients renewing and expanding their subscriptions for our solutions. A decline in our client renewals and expansions could harm our future results of operations.

Our software solutions are provided on a subscription basis, with subscription terms typically varying from one to three years. Although most of our client subscriptions automatically renew at the end of their terms, our clients do have the opportunity to cancel their subscriptions prior to such renewals. Clients may elect not to renew their subscriptions on conclusion of the terms on relatively short notice. The loss of business from clients, including from cancellations, could seriously harm our business, results of operations and financial condition. Historical data with respect to rates of client renewals, upgrades and expansions of our solutions, may not accurately predict future trends in client renewals, upgrades and expansions of our solutions. Our clients' renewal, upgrade and expansion rates may fluctuate or decline because of several factors, including their satisfaction or dissatisfaction with our solutions and implementation services, the prices of our solutions, the prices of the solutions and the quality of the implementation services offered by our competitors or reductions in our clients' spending levels due to the macroeconomic environment or other factors. If our clients do not renew their subscriptions for our solutions or renew on less favorable terms, or otherwise do not upgrade or expand their use of our solutions, our revenues may decline or grow more slowly than expected and our profitability will be harmed.

Because we recognize revenues from our SaaS solutions over the term of the agreements for our subscriptions, a significant downturn in our business may not be reflected immediately in our operating results, which increases the difficulty of evaluating our future financial performance.

We generally recognize revenues from our SaaS solutions ratably over the duration of the contract, which typically range from one to three years. As a result, a substantial majority of our quarterly revenues from our SaaS solutions are generated from contracts entered into during prior periods. Consequently, a decline in new contracts in any quarter may not affect our results of operations in that quarter, but could reduce our revenues from our SaaS solutions in future quarters. Additionally, the timing of renewals or non-renewals of a contract during any quarter may only affect our financial performance in future quarters. For example, the non-renewal of a contract late in a quarter will have minimal impact on revenues from our SaaS solutions for that quarter but will reduce such revenues in future quarters. Accordingly, the effect of significant declines in sales of our solutions may not be reflected in our short-term results of operations, which would make these reported results less indicative of our future financial results. By contrast, a non-renewal occurring early in a quarter may have a significant negative impact on revenues from our SaaS solutions for that quarter and we may not be able to offset a decline in such revenues with revenues from new contracts

entered into in the same quarter. In addition, we may be unable to adjust our costs in response to reduced revenues from our SaaS solutions. These factors may cause significant fluctuations in our results of operations and cash flows, may make it challenging for an investor to predict our performance and may prevent us from meeting or exceeding the expectations of research analysts or investors, which in turn may cause our stock price to decline.

Our sales cycles are lengthy and variable, depend upon factors outside our control, and could cause us to expend significant time and resources prior to generating revenues.

The typical sales cycle for our solutions is lengthy and unpredictable and often requires pre-purchase evaluation by a significant number of employees in our clients' organizations. Our sales efforts involve educating our clients about the use and benefits of our solutions, including the technical capabilities of our solutions and the potential cost savings achievable by organizations using our solutions. Potential clients typically undertake a rigorous pre-purchase decision-making and evaluation process, and sales to new clients involve extensive client due diligence and reference checks. We invest a substantial amount of time and resources in our sales efforts without any assurance that our efforts will produce sales. Even if we succeed at completing a sale, we may be unable to predict the size of an initial subscription arrangement until very late in the sales cycle.

Furthermore, our sales cycles could be disrupted by factors outside of our control, including macroeconomic factors, volatility in the financial services industry and outbreaks, epidemics, or pandemics involving public health. Remote working and widespread restrictions on travel and in-person meetings could affect and interrupt sales activity and may negatively impact our business, results of operations, or financial position. See "Risk Factors—General Risk Factors — We may be adversely affected by natural disasters, outbreaks, epidemics, or pandemics involving public health other catastrophic events and terrorism that could disrupt and harm our business, results of operations, and financial condition."

We are expanding our SaaS solutions to incorporate recent innovations in AI and these initiatives may not be successful, which may adversely affect our business, results of operations and financial condition, and may also result in reputational harm and liability.

We have an AI strategy to further expand and embed industry-specific AI throughout the Intapp Intelligent Cloud platform and our solutions to help our clients more effectively use their data to manage risk, enhance efficiency and improve operations. While we have made, and expect to continue to make, investments in the continued development of AI capabilities, adoption of fast changing AI technology presents risks, challenges and potential unintended consequences. Also, the markets for our solutions and services are rapidly evolving and are highly competitive, and many of our competitors are also seeking to incorporate AI into their products. Competing firms may be able to develop and embed AI in their products more quickly than we can. If our competitors are better able to incorporate AI in their products and we are unable to compete effectively with them, our business, results of operations and financial condition could be adversely affected. Also, while we believe that the market for AI in SaaS solutions for the professional and financial services industries is growing, if the market for AI in these solutions develops more slowly than we expect or declines, our business, results of operations and financial condition could be adversely affected.

Our AI capabilities include, among other things, automation, machine learning, deep learning and generative AI. Many of our products are powered by AI and machine learning, some of which include the use of large language models and generative AI. Known risks of generative AI currently include accuracy, bias, toxicity, privacy, and security and data provenance. Developing, testing and deploying AI systems may also increase the cost of our offerings. The AI capabilities of our platform and solutions could potentially have actual or perceived impacts on privacy, employment and civil rights. Our failure to adequately address legal risks relating to AI in our platform and solutions could result in litigation regarding, among other things, intellectual property, privacy, employment, civil rights and other claims that could result in liability for our company. Countries are applying their data protection laws to AI, particularly generative AI, and are considering legal frameworks on AI. The introduction of AI technologies, including generative AI, into new or existing products could result in a failure or perceived failure by the Company to comply with such legal requirements and may also result in new or increased governmental or regulatory scrutiny, which could result in regulatory action and liability. Additionally, actions taken by our clients and employees, including through the use or misuse of our products or new technologies for illegal activities or improper information sharing, may result in reputational harm or possible liability. The use of our AI capabilities could raise ethical or social

concerns and our failure to adequately address these concerns or the failure of our competitors, clients or other end users to do so could negatively impact our brand and reputation.

If we are unable to develop, introduce and market new and enhanced versions of our solutions, we may be put at a competitive disadvantage and our operating results could be adversely affected.

Our ability to attract new clients and increase revenues from our existing clients depends, in part, on our continued ability to enhance the functionality of the existing solutions on the Intapp Intelligent Cloud platform by developing, introducing, and marketing new and enhanced versions of our solutions that address the evolving needs of our clients and changing industry standards. Because some of our solutions are complex and require rigorous testing, development cycles can be lengthy and can require months or even years of development, depending upon the solution and other factors. As we expand internationally, our products and services must be modified and adapted to comply with regulations and other requirements of the countries in which our clients do business.

Additionally, market conditions, including heightened pressure on clients from end-users relating to mobile computing devices and speed of delivery, may dictate that we change the technology platform underlying our existing solutions or that new solutions be developed on different technology platforms, potentially adding significant time and expense to our development cycles. The nature of these development cycles may cause us to experience delays between the time we incur expenses associated with research and development and the time we generate revenues, if any, from such expenses.

If we fail to develop new solutions or enhancements to our existing solutions, our business could be adversely affected, especially if our competitors are able to introduce solutions with enhanced functionality. It is critical to our success for us to anticipate changes in technology, industry standards, regulations and client requirements and to successfully introduce new, enhanced, and competitive solutions to meet our clients' and prospective clients' needs on a timely basis. We have invested and intend to continue to make significant investments in research and development to meet these challenges. However, we may not recognize significant revenues from these investments for several months or years, if at all. Our estimates of research and development expenses may be too low, revenues may not be sufficient to support the future product development that is required for us to remain competitive and development cycles may be longer than anticipated. Further, there is no assurance that research and development expenditures will lead to successful solutions or enhancements to our existing solutions, or that our clients will value or be willing to bear the cost of our new solutions. If we incur significant expenses developing solutions that are not competitive in technology and price or that fail to meet client demands, our market share will decline and our business and results of operations would be harmed.

If we are unable to develop or sell our solutions into new markets or to further penetrate existing markets, our revenues will not grow as expected and our operating results could be adversely affected.

Our ability to increase revenues will depend, in large part, on our ability to further penetrate our existing markets and to attract new clients, as well as our ability to generate subscription renewals from existing clients and to increase sales from existing clients who do not utilize the full Intapp Intelligent Cloud platform. The success of any enhancement or new solution or service depends on several factors, including the timely completion, introduction and market acceptance of enhanced or new solutions, adaptation to new industry standards that our solutions address and technological changes, the ability to maintain and to develop relationships with third parties and the ability to attract, retain and effectively train sales, services, support and marketing personnel. Any new solutions we develop or acquire may not be introduced in a timely or cost-effective manner and may not achieve the market acceptance necessary to generate significant revenues. Any new industry standards or practices that emerge, or any introduction by competitors of new solutions embodying new services or technologies, may cause our solutions to become obsolete. Any new markets in which we attempt to sell our solutions, including new countries or regions, may not be receptive or sales cycles may be delayed due to outbreaks, epidemics, or pandemics involving public health, political instabilities and the global economic downturn. Additionally, any expansion into new markets will require commensurate ongoing expansion of our monitoring of local laws and regulations, which increases our costs. Our ability to further penetrate our existing markets depends on the quality of our solutions and our ability to design our solutions to meet changing consumer demands and industry standards, as well as our ability to assure that our clients will be satisfied with our existing and new solutions. If we are unable to sell our solutions into new markets or to further penetrate existing markets, or to increase sales from existing clients by selling them additional software and services, our revenues will not grow as expected, which would have a material adverse effect on our business, financial condition, and results of operations.

We compete in highly competitive markets, and if we do not compete effectively, our business, results of operations, and financial condition could be negatively impacted and cause our market share to decline.

The markets for our solutions and services are rapidly evolving and highly competitive. As these markets continue to mature and new technologies and competitors enter such markets, we expect competition to intensify. Our current competitors include large solution providers that focus on one or more point solutions, legacy systems, and manual processes developed by or for our clients, new or emerging entrants seeking to develop competing technologies, including those with AI and generative AI capabilities, and well-established horizontal solution providers that provide broad solutions across multiple verticals. Specifically, we compete from time to time with large software companies such as SAP and Salesforce. The competitors we face in any sale may change depending on, among other things, the line of business, functional or regional group or department purchasing the solution, the solution being sold, the geography in which we are operating and the size of the client to which we are selling.

We compete based on various factors, including unique product features or functions, configurability, price and the time and cost required for software implementation. Outside of the United States, we are more likely to compete against vendors that may further differentiate themselves based on local advantages in language or market knowledge. Some of our current and potential competitors may have longer operating histories and greater financial, technical, sales, marketing, and other resources than we do, as well as larger installed client bases. Our current and potential competitors may also establish cooperative relationships or engage in other strategic transactions among themselves or with third parties, including our clients, to further enhance their resources and offerings. As a result, such competitors may be able to devote greater resources to the development, promotion, and sale of their solutions than we can devote to ours, which could allow them to respond more quickly than we can to new or emerging technologies and changes in client needs, thus leading to their wider market acceptance. Existing relationships with our competitors may make those clients less willing to purchase our solutions. For instance, if a potential client uses one product from a competitor that powers a critical element of the client's day-to-day operations, they may be more likely to turn to such competitor in the future to the extent they require further product solutions, rather than purchasing one or more solutions from the Intapp Intelligent Cloud platform. If we are unable to compete effectively with these evolving competitors for market share, our business, results of operations, and financial condition would be materially and adversely affected.

Our industry is evolving rapidly and we anticipate the market for solutions will become increasingly competitive as our current and potential clients move a greater proportion of their data and computational needs to the cloud or to future generation technologies. New competitors may emerge that offer services either comparable or better suited than ours to address the demand for such solutions, which could reduce demand for our offerings. Continuing intense competition could result in increased pricing pressure, increased sales and marketing expenses, increased expenses associated with personnel and third-party services and greater investments in research and development, each of which could negatively impact our profitability. In addition, the failure to increase, or the loss of, market share, would harm our business, results of operations, financial condition, and/or future prospects.

If the market for SaaS solutions for professional and financial services develops slower than we expect or declines, it could have a material adverse effect on our business, financial condition and results of operations.

While the market for SaaS solutions for the professional and financial services industry is growing, it is uncertain whether our SaaS solutions will achieve and sustain high levels of client demand and market acceptance, particularly in the professional and financial services industry. Many professional and financial services firms use on-premises software applications, including some who have invested substantial resources to integrate a variety of point solutions into their organizations to address one or more specific business needs and, therefore, may be reluctant to switch to SaaS solutions. Our success substantially depends on the adoption of cloud computing and SaaS solutions in the professional and financial services industry, which may be affected by, among other things, the widespread acceptance of cloud computing and SaaS solutions in other industries and in general. Market acceptance of our SaaS solutions may be affected by a variety of factors, including but not limited to: price, security, reliability, performance, client preference, public concerns regarding privacy and the enactment of restrictive laws or regulations. It is difficult to predict client adoption rates and demand for our SaaS solutions, the future growth rate and size of the cloud computing market or the entry of other competitive applications. If we or other providers of cloud-based computing in general, and in the professional and financial services industry in particular, experience security incidents, loss of client data, disruptions in delivery, or other problems, the market for cloud computing applications as a whole, including our SaaS solutions, may be negatively affected. If there is a reduction in demand for cloud computing caused by a lack of client acceptance, technological challenges, weakening economic conditions, security or privacy concerns, competing technologies and solutions, reductions in corporate spending or otherwise, it could have a material adverse effect on our business, financial condition, and results of operations.

We may continue to expand through acquisitions or partnerships with other companies, which may divert our management's attention and result in unexpected operating and technology integration difficulties, increased costs, and dilution to our stockholders.

We expect to continue to grow, in part, by making targeted acquisitions. Our business strategy includes the potential acquisition of shares or assets of, or alliances with companies with software, technologies or businesses complementary to ours, both domestically and globally. For example, in fiscal year 2024, we acquired delphai, an AI software company specializing in applied AI for firmographic data automation, structuring and intelligence, and TDI, a software and professional services provider and a reseller of Intapp's products. Acquisitions and alliances may result in unforeseen operating difficulties and expenditures and may not result in the benefits anticipated by such corporate activity.

In particular, we may fail to assimilate or integrate the businesses, technologies, services, products, personnel or operations of the acquired companies, retain key personnel necessary to favorably execute the combined companies' business plan, or retain existing clients or sell acquired products to new clients. Additionally, the assumptions we use to evaluate acquisition opportunities may not prove to be accurate, and intended benefits may not be realized. Our due diligence investigations may fail to identify all of the problems, liabilities or other challenges associated with an acquired business which could result in increased risk of unanticipated or unknown issues or liabilities, including with respect to privacy, environmental, competition and other regulatory matters, and our mitigation strategies for such risks that are identified may not be effective. As a result, we may not achieve some or any of the benefits, including anticipated synergies or accretion to earnings, that we expect to achieve in connection with our acquisitions, or we may not accurately anticipate the fixed and other costs associated with such acquisitions, or the business may not achieve the performance we anticipated, which may materially adversely affect our business, prospects, financial condition, results of operations, and cash flows, as well as our stock price. Further, if we fail to achieve the expected synergies from our acquisitions and alliances, particularly if business performance declines or expected growth is not realized, we may experience impairment charges with respect to goodwill, intangible or other long-lived assets. Any future impairment of our goodwill or intangible or other long-lived assets could have an adverse effect on our financial condition and results of operations.

Acquisitions and alliances may also disrupt our ongoing business, divert our resources and require significant management attention that would otherwise be available for ongoing development of our current business. In addition, we may be required to make additional capital investments or undertake remediation efforts to ensure the success of our acquisitions, which may reduce the benefits of such acquisitions. We also may be required to use a substantial amount of our cash or issue debt or equity securities to complete an acquisition or realize the potential of an alliance, which could deplete our cash reserves and/or dilute our existing stockholders. In addition, our ability to maintain favorable pricing of new solutions may be challenging if we bundle such solutions with sales of existing solutions. Reduced pricing due to bundled sales may cause fluctuations in our quarterly financial results, may adversely affect our operating margins and may reduce the benefits of such acquisitions or alliances.

Additionally, competition within the software industry for acquisitions of businesses, technologies and assets has been, and is expected to continue to be, intense. As such, even if we are able to identify an acquisition that we would like to pursue, the target may be acquired by another strategic buyer or financial buyer such as a private equity firm, or we may otherwise not be able to complete the acquisition on commercially reasonable terms, if at all. Moreover, in addition to our failure to realize the anticipated benefits of any acquisition, including our revenues or return on investment assumptions, we may be exposed to unknown liabilities or impairment charges as a result of acquisitions we do complete.

If we fail to effectively manage our growth, our business and results of operations could be harmed.

We have experienced, and may continue to experience, rapid growth, which has placed, and may continue to place, significant demands on our management and our operational and financial resources. We operate globally, sell our services to more than 2,550 clients in more than 55 countries, and have employees and contractors in the Americas, Europe and Asia Pacific. We plan to continue to expand our international presence in the future, which will place additional demands on our resources and operations. Additionally, we continue to increase the breadth and scope of our Intapp Intelligent Cloud platform and our operations and continue to develop our partner network. In order to successfully manage our future growth, we will need to continue to add and retain qualified personnel across our operations, improve our IT and financial infrastructures, our operating and administrative systems, and our ability to manage headcount, capital, and internal processes in an efficient manner and deepen our industry experience in key industry verticals. Our organizational structure is also becoming more complex as we grow our operational, financial, and management infrastructure and we must continue to improve our internal control over financial reporting as well as our disclosure systems and procedures. We intend to continue to invest to expand our business, including investing in technology, sales and marketing operations, developing new solutions and features for our existing solutions, hiring additional personnel, and upgrading our infrastructure. These investments will require significant capital expenditures and may divert management and financial resources from other projects, such as the development of new solutions, and any investments we make will occur in advance of experiencing the benefits from such investments, making it difficult to determine in a timely manner if we are efficiently allocating our resources. We continue to assess our facilities requirements and may deem it advisable in the near-term or later to add new offices or downsize certain of our offices in order to reduce costs, which may cause us to incur related charges. For example, during fiscal year 2024, we entered into a lease agreement to lease office space in New York, New York for a term ending in February 2030. Also, during fiscal year 2023, we exited a portion of our space in Palo Alto, California and recorded a net charge of \$1.6 million in connection with the impairment of the related operating lease right-of-use asset and the reassessment of the lease liability. As we continue to evaluate our real estate needs, we may incur additional charges in the future in connection with exit activities. If we do not achieve the benefits anticipated from these investments, or if the achievement of these benefits is delayed, our results of operations may be adversely affected.

Our solutions address functions within the heavily regulated professional and financial services industry, and our clients' failure to comply with applicable laws and regulations could subject us to litigation.

We sell our solutions to clients within the professional and financial services industry. Our clients use our solutions for business activities that are subject to a number of laws and regulations, including state and local legal, accounting, and other types of professional ethics rules. Any failure by our clients to comply with laws and regulations applicable to their businesses, and in particular to the functions for which our solutions are used, could result in fines, penalties or claims for substantial damages against our clients. To the extent our clients believe that such failures were caused by our solutions or our client service organization, our clients may make a claim for damages against us, regardless of whether we are responsible for the failure. We may be subject to lawsuits that, even if unsuccessful,

could divert our resources and our management's attention and adversely affect our business, and our insurance coverage may exclude coverage for some claims or may not be sufficient to cover such claims against us.

Our solutions or pricing models may not accurately reflect the optimal pricing necessary to attract new clients and retain existing clients as the market matures.

As the market for our solutions matures, or as competitors introduce new solutions that compete with ours, we may be unable to attract new clients at the same price or based on the same pricing models as we have used historically. We price our solutions based on an enterprise size basis with enterprise-wide access to our solutions or based on the number of individual users, and therefore, pricing decisions may also impact the mix of adoption among our subscription plans and negatively impact our overall revenues. Further, pricing pressures and increased competition generally could result in reduced sales, reduced margins, losses, or the failure of our products to achieve or maintain more widespread market acceptance, any of which could harm our business, results of operations, and financial condition. In the future, we may be required to reduce our prices or develop new pricing models, which could adversely affect our revenues, gross margin, profitability, financial position, and cash flow.

Our loan and security agreement provides our lender with a first-priority lien against substantially all of our assets and contains restrictive covenants which could limit our operational flexibility and otherwise adversely affect our financial condition.

Our loan and security agreement under our revolving credit facility contains a number of covenants that limit our ability to incur debt, grant liens, make acquisitions, undergo a change in control, make investments, make certain dividends or distributions, repurchase or redeem stock, dispose of or transfer assets, and enter into transactions with affiliates. Our loan and security agreement is secured by substantially all of our assets. The terms of our loan and security agreement may restrict our current and future operations and could adversely affect our ability to finance our future operations or capital needs or to execute preferred business strategies. In addition, complying with these covenants may make it more difficult for us to successfully execute our business strategy and compete against companies who are not subject to such restrictions. Additionally, our obligations to repay principal and interest on our indebtedness make us vulnerable to economic or market downturns. As of August 26, 2024, we had no outstanding loan balance under this facility.

Our failure to comply with the covenants or payment requirements, or other events specified in our loan and security agreement, could result in an event of default and our lender may accelerate our obligations under our loan and security agreement and foreclose upon the collateral, or we may be forced to sell assets, restructure our indebtedness, or seek additional equity capital, which would dilute our stockholders' interests. Our failure to comply with any covenant could result in an event of default under the agreement and the lender could make the entire debt immediately due and payable. If this occurs, we might not be able to repay our debt or borrow sufficient funds to refinance it. Even if new financing is available, it may not be on terms that are acceptable to us. Any of the foregoing could adversely affect our business, financial condition, or results of operations.

Failure of any of our established solutions to satisfy client demands or to maintain market acceptance would harm our business, results of operations, financial condition, and growth prospects.

We derive our revenues and cash flows from our established solutions. We expect to continue to derive a substantial portion of our revenues from these sources. As such, continued market acceptance of these solutions is critical to our growth and success. Demand for our solutions is affected by a number of factors, some of which are beyond our control, including the successful implementation of our solutions, the timing of development and release of new solutions by us and our competitors, technological advances which reduce the appeal of our solutions, changes in regulations that our clients must comply with in the jurisdictions in which they operate and the growth or contraction in the worldwide market for technological solutions for the professional and financial services industry. If we are unable to continue to meet client demands, to achieve and maintain a technological advantage over competitors, or to maintain market acceptance of our solutions, our business, results of operations, financial condition, and growth prospects would be adversely affected.

Our ability to sell and renew our solutions is dependent in part on the quality of our implementation services and technical support services and the implementation services provided by our partners, and our failure to offer high-quality implementation services or technical support services or our partners' failure to offering high-quality implementation services could damage our reputation and adversely affect our ability to sell our solutions to new clients and renew agreements with our existing clients.

Our solutions are complex and are used in a wide variety of environments. Our revenues and profitability depend in part on the reliability and performance of our implementation services, training services and technical support services, some of which are provided through partners that can provide services for our solutions to clients. If our implementation services are unavailable, or clients are dissatisfied with our or our partners' performance, we could lose clients, our revenues and profitability would decrease and our business operations or financial position could be harmed. Additionally, if our solutions are not used correctly or as intended, inadequate performance may result. Because our clients rely on our solutions to manage a wide range of operations, our failure to properly train clients on how to efficiently and effectively use our solutions, may result in negative publicity or legal claims against us. As we grow internationally, we may face additional challenges and costs in delivering implementation services and training in languages other than English.

Unexpected delays and difficulties can occur as clients implement and test our solutions. Implementing our solutions typically involves integration with our clients' and third-party's systems, as well as adding client and third-party data to our platform. This can be complex, time consuming, and expensive for our clients and can result in delays in the implementation of our solutions. We also provide our clients with upfront estimates regarding the duration, resources and costs associated with the implementation of our solutions. Failure to meet these upfront estimates and the expectations of our clients for the implementation of our solutions could result in a loss of clients and negative publicity about us and our solutions and implementation services. Such failure could result from deficiencies in our solution capabilities or inadequate professional service engagements performed by us, our partners or our clients' employees, the latter two of which are beyond our direct control. Time-consuming implementations may also increase the amount of services personnel we must allocate to each client, thereby increasing our costs and consequently the cost to our clients and adversely affecting our business, results of operations, and financial condition.

Once our solutions are implemented and integrated with our clients' existing IT investments and data, our clients may depend on our technical support services to resolve any issues relating to our solutions. High-quality support is critical for the continued successful marketing and sale of our solutions and renewal of contracts. In addition, as we continue to expand our operations internationally, our support organization will face additional challenges, including those associated with delivering support in languages other than English. Many enterprise clients require higher levels of support than smaller clients. If we fail to meet the requirements of our larger clients, it may be more difficult to sell additional solutions and implementation services to these clients, a key group for the growth of our revenues and profitability. The implementation, provision and support of our solutions also creates the risk of significant liability claims against us. Our subscription arrangements with our clients contain provisions designed to limit our exposure to potential liability claims. It is possible, however, that the limitation of liability provisions contained in such agreements may not be enforced as a result of international, federal, state and local laws or ordinances or unfavorable judicial decisions. Breach of warranty or damage liability, or injunctive relief resulting from such claims, could harm our results of operations and financial condition.

In addition, as we further expand our solutions, our implementation services and support organization will face new challenges, including hiring, training and integrating a large number of new implementation services personnel with experience in delivering high-quality support for our solutions. Alleviating any of these problems could require significant expenditures which could adversely affect our results of operations and growth prospects. Further, as we continue to rely on our partners to provide implementation and on-going services, our ability to ensure a high level of quality in addressing client issues will be diminished. If our partners fail to meet such commitments or do not commit sufficient or qualified resources to these activities, our clients will be less satisfied, be less supportive with references, or may require the investment of our resources at discounted rates.

Our sales are dependent on our business reputation and on positive recommendations from our existing clients. Accordingly, if we or our partners do not effectively assist our clients in implementing our solutions, train our clients in the use of our solutions, succeed in helping our clients quickly resolve post-implementation issues, our ability to sell additional solutions and implementation services to existing clients would be adversely affected and our reputation with potential clients could be damaged, which could have a material adverse effect on our business, results of operations, financial condition, and growth prospects.

Real or perceived errors or failures in our solutions may affect our reputation, cause us to lose clients and reduce sales which may harm our business and results of operations.

As with all software solutions, undetected errors or failures may exist or occur, especially when solutions are first introduced or when new versions are released, implemented or integrated into other systems. Our software solutions are often installed and used in large-scale computing environments with different third party applications operating systems, system management software and equipment and networking configurations, which may cause errors or failures in our solutions or may expose undetected errors, failures, or bugs in our solutions. Despite testing by us, we may not identify all errors, failures, or bugs in new solutions or releases until after commencement of commercial sales or installation. In the past, we have discovered errors, failures, and bugs in some of our solutions after their introduction. We may not be able to fix errors, failures, and bugs without incurring significant costs or an adverse impact to our business. We believe that our reputation and name recognition are critical factors in our ability to compete and generate additional sales. Promotion and enhancement of our name will depend largely on our success in continuing to provide effective solutions and services. The occurrence of errors in our solutions or the detection of bugs by our clients may damage our reputation in the market and our relationships with our existing clients, and as a result, we may be unable to attract or retain clients. Any of these events may result in the loss of, or delay in, market acceptance of our solutions, which could seriously harm our sales, results of operations, and financial condition.

Changes in laws, regulations, or guidance issued by supervisory authorities relating to privacy or the protection or transfer of personal data, or any actual or perceived failure by us to comply with such laws, regulations, or guidance, could adversely affect our business and could subject us to liability, fines and reputational harm.

Data protection and privacy legislation, enforcement and policy activity are rapidly expanding in the United States and around the world and creating a complex compliance environment and the potential for high profile negative publicity in the event of any noncompliance or data breach. We are subject to many privacy and data protection laws and regulations in the United States and around the world, some of which place restrictions on our ability to process and store personal data across our business. For example, in Europe Regulation (EU) 2016/679 (GDPR) imposes requirements relating to, among other things, consent to process personal data of individuals, the information provided to individuals regarding the processing of their personal data, rights which may be exercised by individuals, the security and confidentiality of personal data, and notifications in the event of data breaches and use of third-party processors. The GDPR imposes substantial fines for breaches of data protection requirements, which can be up to four percent of the worldwide revenues or 20 million Euros, whichever is greater. Despite the UK's exit from the EU, the UK still also has laws equivalent to the GDPR/EU data protection laws. We may experience hesitancy, reluctance, or refusal by European or multi-national clients to continue to use some of our services due to the potential risk exposure of personal data transfers and the current data protection obligations imposed on them by certain data protection authorities. Such clients may also view any alternative approaches to the transfer of any personal data as being too costly, too burdensome, or otherwise objectionable, and therefore may decide not to do business with us if the transfer of personal data is a necessity or may require that our employees who are providing services to them be based in the European Union/UK which could increase our costs in providing such services. Uncertainty about compliance with the GDPR and EU data protection laws remains, with the possibilities that data protection authorities located in different EU Member States may interpret GDPR differently, or requirements of national laws may vary between the EU Member States, or guidance on GDPR and compliance practices may be often updated or otherwise revised. Any of these events will increase the complexity and costs of processing personal data in the UK or European Economic Area or concerning individuals located in the UK or European Economic Area ("EEA").

Under GDPR, transfers of personal data to countries outside of the European Economic Area that have not been determined by the European Commission to provide adequate protections for personal data, including the United States, are prohibited unless certain transfer mechanisms are used. Switzerland and the UK have similar restrictions. However, such mechanisms are subject to consistent scrutiny and challenge. A decision of the Court of Justice of the European Union in July 2020 invalidated the EU-US Privacy Shield Framework, a means that previously permitted transfers of personal data from the EEA to companies in the United States that certified adherence to the Privacy Shield Framework. While the United States and EU have put in place a new framework to replace the Privacy Shield Framework, the EU-US Data Privacy Framework, this framework is already subject to challenge in the Court of Justice of the European Union, so there can be no assurance that it will not be invalidated, repealed or otherwise modified in the future. There are also Swiss and UK extensions to the EU-US Data Privacy Framework. In addition, that same Court of Justice of the European Union decision also cast doubt on the use of a prior form of standard contractual clauses that are the other commonly used mechanism to transfer personal data outside of the EEA/UK. In the UK and

the EEA, there are now updated form versions of standard contractual clauses and a need to conduct a transfer risk assessment in accordance with applicable guidance. With respect to personal data transfers from the EU to the UK and UK to the EU, there are adequacy decisions in place meaning personal data can transfer freely for the time being. Given the consistent scrutiny and challenge to data transfers, further changes to how data transfers to and from the European Union and other jurisdictions are regulated could impact how we provide services to our clients in relevant jurisdictions.

The CCPA imposes requirements relating to how companies may collect, use and process personal information relating to California residents. The CCPA establishes a privacy framework for covered businesses such as ours by, among other things, creating an expanded definition of personal information, establishing new data privacy rights for California residents and creating a new and potentially severe statutory damages framework for violations of the CCPA, as well as potentially severe statutory damages and private a right of action against businesses that suffer a data security breach due to their violation of a duty to implement reasonable security procedures and practices. This private right of action may increase the likelihood of, and risks associated with, data breach litigation. In addition, in November 2020, California voters adopted the CPRA, which enhances and strengthens regulatory requirements and individual protections that currently exist under the CCPA. Numerous other states have enacted or are considering enacting similar privacy laws, further complicating our privacy compliance obligations through the introduction of increasingly disparate requirements across the various U.S. jurisdictions in which we operate. Congress is also considering legislation that may preempt some or all of such U.S. state privacy laws, but which may also provide a more expansive private right of action for privacy claims than exists under current state laws. Further, privacy class actions in the United States are on the rise, with cases being filed based on pre-digital age state and federal laws. The evolving complexity of privacy and data security legislation in the United States may complicate our compliance efforts and further increase our risk of regulatory enforcement, penalties and litigation. The uncertainty and changes in the requirements of California and other jurisdictions, including potential federal legislation regarding data privacy that may impose requirements and potentially preempt state data privacy rules, may increase the cost of compliance, restrict our ability to offer services in certain locations or subject us to sanctions by national, regional, state, local and international data protection regulators, all of which could harm our business, results of operations or financial condition.

Although we take reasonable efforts to comply with all applicable laws and regulations and have invested and continue to invest human and technology resources into data privacy compliance efforts, there can be no assurance that we will not be subject to regulatory action, including fines, in the event of an incident or other claim. Data protection laws and requirements may also be enacted, interpreted or applied in a manner that creates inconsistent or contradictory requirements on companies that operate across jurisdictions. We or our third-party service providers could be adversely affected if legislation or regulations are expanded to require changes in our or our third-party service providers' business practices or if governing jurisdictions interpret or implement their legislation or regulations in ways that negatively affect our or our third-party service providers' business, results of operations or financial condition. For example, we may find it necessary to establish alternative systems to maintain personal data originating from the European Union in the European Economic Area, which may involve substantial expense and may cause us to divert resources from other aspects of our business, all of which may adversely affect our results from operations. Data protection legislation, regulatory and contractual requirements could hamper our ability to use data to train our artificial intelligence algorithms. Further, any inability to adequately address privacy concerns in connection with our solutions, or comply with applicable privacy or data protection laws, regulations and policies, could result in additional cost and liability to us, and adversely affect our ability to offer our solutions. Further, countries are applying their data protection laws to AI, and particularly generative AI, and are considering legal frameworks on AI. Any failure or perceived failure by the Company to comply with such requirements could have an adverse impact on our business.

Anticipated further evolution of regulations on this topic may substantially increase the penalties to which we could be subject in the event of any non-compliance. Compliance with these laws is challenging, constantly evolving, and time consuming and federal regulators, state attorneys general and plaintiff's attorneys have been and will likely continue to be active in this space. We may incur substantial expense in complying with legal obligations to be imposed by new regulations and we may be required to make significant changes to our solutions and expanding business operations, all of which may adversely affect our results of operations.

Assertions against us, by third parties alleging infringement or other violation of their intellectual property rights, could result in significant costs and substantially harm our business and results of operations.

The software industry is characterized by the existence of a large number of patents and frequent claims and related litigation regarding patents and other intellectual property rights. In particular, leading companies in the software industry own large numbers of patents, copyrights, trademarks, and trade secrets, which they may use to assert claims against us. From time to time, third parties holding such intellectual property rights, including leading companies, competitors, patent holding companies, and/or non-practicing entities, may assert patent, copyright, trademark or other intellectual property claims against us, our clients, and partners, and those from whom we license technology and intellectual property.

Although we believe that our solutions do not infringe upon the intellectual property rights of third parties, we cannot assure that third parties will not assert infringement or misappropriation claims against us with respect to current or future solutions, or that any such assertions will not require us to enter into royalty arrangements or result in costly litigation, or result in us being unable to use certain intellectual property. Infringement assertions from third parties may involve patent holding companies or other patent owners who have no relevant product revenues, and therefore our own issued and pending patents may provide little or no deterrence to these patent owners in bringing intellectual property rights claims against us. The intellectual property ownership and license rights, including without limitation copyright, surrounding AI technologies generally, and generative AI technologies specifically, has not been fully addressed by courts or applicable laws or regulations. Further, the use or adoption of third-party AI technologies, including generative AI technologies, into our products and services may result in exposure to claims of copyright infringement or other intellectual property-related causes of action.

If we are forced to defend against any infringement or misappropriation claims, whether they are with or without merit, are settled out of court, or are determined in our favor, we may be required to expend significant time and financial resources on the defense of such claims. Regardless of the merits or eventual outcome, such a claim could harm our brand and business. Furthermore, an adverse outcome of a dispute may require us to pay damages, potentially including treble damages and attorneys' fees, if we are found to have willfully infringed a party's intellectual property; cease making, licensing or using our solutions that are alleged to infringe or misappropriate the intellectual property of others; expend additional development resources to redesign our solutions; enter into potentially unfavorable royalty or license agreements in order to obtain the right to use necessary technologies or works; and indemnify our partners, clients and other third parties. Any of these events could seriously harm our business, results of operations, and financial condition.

Failure to protect our intellectual property could substantially harm our business and results of operations.

Our success depends in part on our ability to enforce and defend our intellectual property rights. We rely upon a combination of trademark, trade secret, copyright, patent, and unfair competition laws, as well as license agreements and other contractual provisions, to do so.

In the future we may file patent applications related to certain of our innovations. We do not know whether those patent applications will result in the issuance of a patent or whether the examination process will require us to narrow our claims. In addition, we may not receive competitive advantages from the rights granted under our patents and other intellectual property. Our existing patents and any patents granted to us or that we otherwise acquire in the future, may be contested, circumvented or invalidated, and we may not be able to prevent third parties from infringing these patents. Therefore, the extent of the protection afforded by these patents cannot be predicted with certainty. In addition, given the costs, effort, risks, and downside of obtaining patent protection, including the requirement to ultimately disclose the invention to the public, we may choose not to seek patent protection for certain innovations; however, such patent protection could later prove to be important to our business.

We also rely on several registered and unregistered trademarks to protect our brand. Nevertheless, competitors may adopt service names similar to ours, or purchase our trademarks and confusingly similar terms as keywords in Internet search engine advertising programs, thereby impeding our ability to build brand identity and possibly leading to confusion in the marketplace. In addition, there could be potential trade name or trademark infringement claims brought by owners of other registered trademarks or trademarks that incorporate variations of our trademarks. Any claims or client confusion related to our trademarks could damage our reputation and brand and substantially harm our business and results of operations.

We attempt to protect our intellectual property, technology and confidential information by generally requiring our employees and consultants to enter into confidentiality and assignment of inventions agreements and third parties to enter into nondisclosure agreements, all of which offer only limited protection. These agreements may not effectively prevent unauthorized use or disclosure of our confidential information, intellectual property, or technology and may not provide an adequate remedy in the event of unauthorized use or disclosure of our confidential information, intellectual property or technology. Despite our efforts to protect our confidential information, intellectual property, and technology, unauthorized third parties may gain access to our confidential proprietary information, develop and market solutions similar to ours, or use trademarks similar to ours, any of which could materially harm our business and results of operations. In addition, others may independently discover our trade secrets and confidential information, and in such cases, we could not assert any trade secret rights against such parties. Existing United States federal, state and international intellectual property laws offer only limited protection. The laws of some foreign countries do not protect our intellectual property rights to as great an extent as the laws of the United States, and many foreign countries do not enforce these laws as diligently as governmental agencies and private parties in the United States. Moreover, policing our intellectual property rights is difficult, costly and may not always be effective. In addition, the availability of copyright protection and other legal protections for intellectual property generated by certain new technologies, such as generative AI, is uncertain. The use of generative AI and other forms of AI may expose us to risks because the intellectual property ownership and license rights, including copyright, of generative and other AI output has not been fully settled in the United States or abroad.

From time to time, legal action by us may be necessary to enforce our patents and other intellectual property rights, to protect our trade secrets, to determine the validity and scope of the intellectual property rights of others or to defend against claims of infringement or invalidity. Even if we are successful in defending our claims, litigation could result in substantial costs and diversion of resources and could negatively affect our business, reputation, results of operations, and financial condition. To the extent that we seek to enforce our rights, we could be subject to claims that an intellectual property right is invalid, otherwise not enforceable, or is licensed to the party against whom we are pursuing a claim. In addition, our assertion of intellectual property rights may result in the other party seeking to assert alleged intellectual property rights or assert other claims against us, which could harm our business. If we are not successful in defending such claims in litigation, we may not be able to sell or license a particular solution due to an injunction, or we may have to pay damages that could, in turn, harm our results of operations. In addition, governments may adopt regulations, or courts may render decisions, requiring compulsory licensing of intellectual property to others, or governments may require that products meet specified standards that serve to favor local companies. Our inability to enforce our intellectual property rights under these circumstances may harm our competitive position and our business. If we are unable to protect our technology and to adequately maintain and protect our intellectual property rights, we may find ourselves at a competitive disadvantage to others who need not incur the additional expense, time and effort required to create the innovative solutions that have enabled us to be successful to date.

We and our clients rely on technology and intellectual property of third parties, and any errors or defects in, or any unavailability of, such technology and intellectual property could limit the functionality of our solutions and disrupt our business.

We use technology and intellectual property licensed from unaffiliated third parties internally and in certain of our solutions, and we may license additional third-party technology and intellectual property in the future. We have experienced, and may continue to experience, errors or defects in this third-party technology and intellectual property that result in errors that could harm our brand and business. In addition, licensed technology and intellectual property may not continue to be available on commercially reasonable terms, or at all. The loss of the right to license and distribute this third-party technology could limit the functionality of our solutions and might require us to redesign our solutions. In some cases, we receive subscription fees from the provision of such third-party technology to our clients, and the loss of the right to distribute such technology could negatively impact revenues.

We agree to indemnify clients and other third parties, which exposes us to substantial potential liability.

Our agreements with clients, suppliers, partners and other third parties may include indemnification or other provisions under which we agree to indemnify or otherwise be liable to them for losses suffered or incurred as a result of claims of intellectual property infringement, damages caused by us to property or persons, and other liabilities relating to or arising from our software, services, acts or omissions. The term of these contractual provisions often survives termination or expiration of the applicable agreement. Large indemnity payments or damage claims from contractual breach could harm our business, results of operations, and financial condition. Although in some cases we contractually limit our liability with respect to such obligations, we do not always do so, and in the future we may still incur substantial liability related to them. Any dispute with a client with respect to such obligations could have adverse effects on our relationship with that client and other current and prospective clients, reduce demand for our solutions, and harm our business, results of operations, and financial condition.

If we fail to maintain an effective system of internal controls, our ability to produce timely and accurate financial statements or comply with applicable regulations could be impaired.

As a public company we are subject to various requirements pursuant to the Sarbanes-Oxley Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act, the rules of the SEC, the listing requirements of the Nasdaq Global Select Market, and other applicable securities rules and regulations, including requirements relating to disclosure controls and procedures, internal control over financial reporting and corporate governance practices. The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. Our disclosure controls and other procedures are designed to ensure that information required to be disclosed by us in the reports that we file with the SEC is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms and that information required to be disclosed in reports under the Exchange Act is accumulated and communicated to our principal executive and financial officers. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, we have expended, and anticipate that we will continue to expend, significant resources, including accounting-related costs and significant management oversight.

Our current controls and any new controls that we develop may become inadequate because of changes in conditions in our business. Further, weaknesses in our disclosure controls and internal control over financial reporting may be discovered in the future. Any failure to develop or maintain effective controls or any difficulties encountered in their implementation or improvement could harm our results of operations or cause us to fail to meet our reporting obligations and may result in a restatement of our financial statements for prior periods. Ineffective disclosure controls and procedures and internal control over financial reporting could also cause investors to lose confidence in our reported financial and other information, which could have a negative effect on the trading price of our common stock. In addition, if we are unable to continue to meet these requirements, we may not be able to remain listed on Nasdaq.

We are required to comply with the SEC rules that implement Section 404 of the Sarbanes-Oxley Act and are required to provide an annual management report on, among other things, the effectiveness of our internal control over financial reporting, as well as a statement that our independent registered public accounting firm has issued an opinion on our internal control over financial reporting. We expect to continue to incur significant expenses and to continue to devote substantial management effort toward ensuring compliance with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act. We may in the future, identify deficiencies and be unable to remediate them before we must provide the required reports. Furthermore, if we have a material weakness in our internal control over financial reporting, we may not detect errors on a timely basis and our financial statements may be materially misstated. If we are unable to assert that our internal control over financial reporting is effective, or if our independent registered public accounting firm is unable to express an unqualified opinion on the effectiveness of our internal control, including as a result of any identified material weakness, we could lose investor confidence in the accuracy and completeness of our financial reports which could cause a decline in the price of our common stock. In addition, changing laws, regulations, and standards relating to corporate governance and public disclosure, including those related to executive compensation, human capital, climate change, and other ESG-focused disclosures, may result in increased general and administrative expenses and a diversion of management's time and attention from revenue-generating activities to compliance activities.

Our international sales and operations subject us to additional risks that can adversely affect our business, results of operations and financial condition.

We sell our solutions to clients located outside the United States, and we are continuing to expand our international operations as part of our growth strategy. Our current international operations and our plans to expand our international operations subject us to a variety of risks, including:

- increased management, travel, infrastructure, and legal compliance costs associated with having multiple international operations;
- unique terms and conditions in contract negotiations desired by clients in foreign countries;
- longer payment cycles and difficulties in enforcing contracts and collecting accounts receivable;
- the need to localize our solutions and store data locally for international clients;
- lack of familiarity with and unexpected changes in foreign regulatory requirements;
- increased exposure to fluctuations in currency exchange rates;
- levels of inflation in international economies;
- the burdens and costs of complying with a wide variety of foreign laws and legal standards, including employment, tax, privacy, anticorruption, import/export, antitrust, data transfer, storage and protection, health and safety, and industry-specific laws and regulations;
- compliance with the U.S. Foreign Corrupt Practices Act of 1977, as amended, the U.K. Bribery Act and other anti-corruption regulations, particularly in emerging market countries;
- compliance by international staff with accounting practices generally accepted in the United States, including adherence to our accounting policies and internal controls;
- import and export license requirements, tariffs, trade agreements, taxes, and other trade barriers;
- increased financial accounting and reporting burdens and complexities;
- weaker protection of intellectual property rights in some countries;
- multiple and possibly overlapping tax regimes;
- the application of the respective local laws and regulations to our business in each of the jurisdictions in which we operate and associated legal expenses;
- government sanctions that may interfere with our ability to sell into particular countries;
- disruption to our operations caused by epidemics, pandemics or outbreaks; and
- political, social, and economic instability abroad, including geopolitical and regional conflicts, terrorist attacks, and security concerns in general.

Additionally, we engage through third parties a significant number of independent contractors abroad in our research and development efforts. Changes to foreign laws governing the definition or classification of such independent contractors, or judicial decisions regarding independent contractor classification could result in reclassification of such contractors as employees. Such reclassification could have an adverse effect on our business and results of operations, could require us to pay significant retroactive wages, taxes and penalties, and could force us to change our contractor business model in the foreign jurisdictions affected.

As we continue to expand our business globally, our success will depend, in large part, on our ability to anticipate and effectively manage these and other risks associated with our international operations. Any of these risks could harm our international operations and reduce our international sales, adversely affecting our business, results of operations, financial condition, and growth prospects.

Some of our development resources are subject to additional risks inherent in foreign operations, which could lead to interruptions in our development efforts or hamper our ability to maintain its solutions.

Prior to Russian military action against Ukraine, a majority of our research and development had been conducted through our facilities based in Ukraine and our contractors' facilities located in Belarus, Ukraine, and Russia. In addition to product development, our resources in the region also played a role in providing implementation services as well as support services for our solutions. After Russia's invasion of Ukraine, we implemented contingency plans to ensure the continuity of our contract research and development activity which included ending activities in Belarus and Russia and transitioning work to the European Union, U.K. and Americas. Political tensions or economic instability in the regions where we conduct operations could disrupt or delay our research and development operations or adversely affect the timeliness of new product delivery or maintenance and upgrades to existing products and solutions, which could harm our operations, financial conditions, sales and growth prospects. Disruptions in communications with these resources could also lead to periods of unavailability of our SaaS solutions, which could require us to provide credits or refunds to clients or lead to client cancellations.

Additionally, we engage through third parties a significant number of independent contractors in our research and development efforts. Changes to foreign laws governing the definition or classification of such independent contractors, or judicial decisions regarding independent contractor classification could result in re-classification of such contractors as employees. Such reclassification could have an adverse effect on our business and results of operations, could require us to pay significant retroactive wages, taxes and penalties, and could force us to change our contractor business model in the foreign jurisdictions affected.

If we are unable to retain key members of our management team or attract, integrate and retain additional executives and other skilled personnel we need to support our operations and growth, we may be unable to achieve our goals and our business will suffer.

Our future success depends upon our ability to continue to attract, train, integrate and retain highly skilled employees, particularly those on our management team, including John Hall, our Chief Executive Officer and David Morton, our Chief Financial Officer, whose services are essential to the execution of our corporate strategy and ensuring the continued operations and integrity of financial reporting within our company. Our management team is generally employed on an at-will basis, which means that these personnel could terminate their relationship with us at any time. The loss of any member of our senior management team could significantly delay or prevent us from achieving our business and/or development objectives, and could materially harm our business.

We compete with a number of software and other technology companies to attract and retain software developers with specialized experience in designing, developing, and managing our solutions, including our cloud-based software, as well as for skilled developers, engineers and information technology and operations professionals who can successfully implement and deliver our solutions. Additionally, we believe that our future growth will depend on the development of our go-to-market strategy and the continued recruiting, retention, and training of our sales teams, including their ability to obtain new clients and to manage our existing client base. Our ability to expand geographically depends, in large part, on our ability to attract, retain and integrate managers to lead the local business and employees with the appropriate skills. Similarly, our profitability depends on our ability to effectively utilize personnel with the right mix of skills and experience to perform services for our clients, including our ability to transition employees to new assignments on a timely basis. Many of the companies with which we compete for experienced personnel have greater resources than we have. We may incur significant costs to attract, train and retain such personnel, and we may lose new employees to our competitors or other technology companies before we realize the benefit of our investment after recruiting and training them. Also, to the extent that we hire personnel from competitors, we may be subject to allegations that such personnel have been improperly solicited or have divulged proprietary or other confidential information. If we are unable to attract, integrate and retain qualified personnel, or if there are delays in hiring required personnel, including delays due to geopolitical instability or outbreaks, epidemics, or pandemics involving public health or adjustments to U.S. immigration policy related to skilled foreign workers, our business, results of operations, and financial condition may be materially adversely affected.

Increases in labor costs, including wages, and an overall tightening of the labor market, could adversely affect our business, results of operations or financial condition.

The labor costs associated with our business are subject to several external factors, including unemployment levels and the quality and the size of the labor market, prevailing wage rates, minimum wage laws, wages and other forms of remuneration and benefits offered to prospective employees by competitor employers, health insurance costs and other insurance costs and changes in employment and labor legislation or other workplace regulation. Although we are not currently exposed to minimum wage work, we are exposed to related requirements as per the Fair Labor Standards Act regarding exempt versus non-exempt employment. From time to time, the labor market becomes increasingly competitive. For example, the United States is currently experiencing low unemployment, which in turn, has created a competitive wage environment that may increase our operating costs. If we are unable to mitigate wage rate increases driven by increases to the competitive labor market through automation and other labor savings initiatives, our labor costs may increase. Furthermore, high inflation rates could also push up our labor costs. There is no assurance that our revenues will increase at the same rate as these labor cost increases to maintain the same level of profitability.

In the event we must offer increased wages or other competitive benefits and incentives to attract and retain qualified personnel and fail to do so, the quality of our workforce could decline, causing certain aspects of our business to suffer. Increases in labor costs could force us to increase our prices, which could adversely impact sales. Although we have not experienced any material labor shortage to date, we have observed an overall tightening and increasingly competitive labor market and have recently experienced and expect to continue to experience some labor cost pressures. If we are unable to hire and retain capable employees, manage labor cost pressures, or if mitigating measures we take in response to increased labor costs, have unintended negative effects, including on client service or retention, our business would be adversely affected. If competitive pressures or other factors prevent us from offsetting increased labor costs, our profitability may decline and could have an adverse effect on our business, results of operations or financial condition.

Any disruption of our Internet connections, including to any third-party cloud providers that host any of our websites or web-based services, could affect the success of our SaaS solutions.

Any system failure, including network, software or hardware failure, that causes an interruption in our network or a decrease in the responsiveness of our website and our SaaS solutions could result in reduced user traffic, reduced revenues and potential breaches of our subscription arrangements. Continued growth in Internet usage, as well as Internet outages, delays and other difficulties due to system failures unrelated to our solutions could cause a decrease in the quality of Internet connection service. Websites have experienced service interruptions as a result of outages and other delays occurring throughout the worldwide Internet network infrastructure. If these outages, delays or service disruptions frequently occur in the future, usage of our web-based services could grow more slowly than anticipated or decline and we may lose revenues and clients.

If the third-party cloud providers or sub-processors that host any of our websites or web-based services were to experience a system failure, the performance of our websites and web-based services, including our SaaS solutions, would be harmed and our ability to deliver our solutions to our clients could be impaired, resulting in client dissatisfaction, damage to our reputation, loss of clients, and harm to our operations and our business. In general, third-party cloud providers are vulnerable to damage from fire, floods, earthquakes, acts of terrorism, power loss, telecommunications failures, break-ins, and similar events. The controls implemented by our current or future third-party cloud providers may not prevent or timely detect such system failures and we do not control the operation of third-party cloud providers that we use. Our current or future third-party cloud providers could decide to close their facilities without adequate notice. In addition, any financial difficulties, such as bankruptcy, faced by our current or future third-party cloud providers, or any of the service providers with whom we or they contract, may have negative effects on our business. If our current or future third-party cloud providers are unable to keep up with our growing needs for capacity or any spikes in client demand, it could have an adverse effect on our business. Any changes in service levels by our current or future third-party cloud providers could result in loss or damage to our clients' stored information and any service interruptions at these third-party cloud providers could hurt our reputation, cause us to lose clients, harm our ability to attract new clients or subject us to potential liability. In the event of any damage or interruption, our property and business interruption insurance coverage may not be adequate to fully compensate us for losses that may occur. Additionally, our systems are not fully redundant, and we have not yet implemented a complete disaster recovery plan or business continuity plan. Although the redundancies we do have in place will permit us to respond, at least to some degree, to service outages, our current or future third-party cloud providers that host our SaaS solutions are vulnerable in the event of failure. We do not yet have adequate structure or systems in place to recover from a third-party cloud provider's severe impairment or total destruction, and recovery from the total destruction or severe impairment of any of our third-party cloud providers could be difficult and may not be possible at all. Any of these events could seriously harm our business, results of operations, and financial condition.

Some of our services and technologies may use “open source” software, which may restrict how we use or distribute our services or require that we release the source code of certain solutions subject to those licenses.

Some of our services and technologies may incorporate software licensed under so-called “open source” licenses. In addition to risks related to license requirements, usage of open source software can lead to greater risks than use of third-party commercial software, as open source licensors generally do not provide warranties or controls on origin of the software. Additionally, some open source licenses require that source code subject to the license be made available to the public and that any modifications to or derivative works of open source software continue to be licensed under open source licenses. These open source licenses typically mandate that proprietary software, when combined in specific ways with open source software, become subject to the open source license. If we combine our proprietary solutions in such ways with certain open source software, we could be required to release the source code of our proprietary solutions.

We take steps to ensure that our proprietary solutions are not combined with, and do not incorporate, open source software in ways that would require our proprietary solutions to be subject to many of the restrictions in an open source license. However, few courts have interpreted open source licenses, and the manner in which these licenses may be interpreted and enforced is therefore subject to some uncertainty. Additionally, we rely on software programmers to design our proprietary technologies, and although we take steps to prevent our programmers from including objectionable open source software in the technologies and software code that they design, write and modify, we do not exercise complete control over the development efforts of our programmers and we cannot be certain that our programmers have not incorporated such open source software into our proprietary solutions and technologies or that they will not do so in the future. In the event that portions of our proprietary technology are determined to be subject to an open source license, we could be required to publicly release the affected portions of our source code, re-engineer all or a portion of our technologies, or otherwise be limited in the licensing of our technologies, each of which could reduce or eliminate the value of our services and technologies and materially and adversely affect our business, results of operations and prospects.

We may experience fluctuations in foreign currency exchange rates that could adversely impact our results of operations and financial condition.

Our international sales are generally denominated in foreign currencies, and these revenues could be materially affected by currency fluctuations. The volatility of exchange rates depends on many factors that we cannot forecast with reliable accuracy. Although we believe our operating activities act as a natural hedge for a substantial portion of our foreign currency exposure at the cash flow or operating income level because we typically collect revenues and incur costs in the currency of the location in which we provide our solutions, it is difficult to predict if our operating activities will provide a natural hedge in the future. Our results of operations may also be impacted by transaction gains or losses related to revaluing certain monetary asset and liability balances that are denominated in currencies other than the functional currency of the entities in which they are recorded. Moreover, significant and unforeseen changes in foreign currency exchange rates may cause us to fail to achieve our stated projections for revenues and operating income, which could have an adverse effect on our stock price. We will continue to experience fluctuations in foreign currency exchange rates, which, if material, may harm our results of operations or financial condition.

Our U.S. NOL carryforwards may expire or could be substantially limited if we experience an ownership change as defined in the Internal Revenue Code of 1986, as amended (“IRC”) or if changes are made to the IRC.

We have significant U.S. federal and state net operating loss (“NOL”) carryforwards. Under U.S. federal tax laws, we can carry forward and use our pre-2018 NOLs to reduce our future U.S. taxable income and tax liabilities until such NOL carryforwards expire in accordance with the IRC. Under changes made by the Tax Cuts and Jobs Act (“TCJA”), as modified by the Coronavirus Aid, Relief, and Economic Security Act (“CARES Act”), NOL carryforwards generated on or after January 1, 2018 may be carried forward indefinitely, but their utilization is limited to 80% of annual taxable income for tax years beginning after December 31, 2020. Our NOL carryforwards provide a benefit to us, if fully utilized, of significant future tax savings. However, our ability to use these tax benefits in future years will depend upon the amount of our federal and state taxable income. If we do not have sufficient federal and state income in future years to use the benefits before they expire, we will permanently lose the benefit of the pre-2018 NOL carryforwards. Additionally, as a result of the common stock sold by certain of our existing stockholders, we experienced a change of ownership as defined under the IRC. As a result of this change in ownership, pursuant to Section 382 and Section 383 of the IRC, our ability to utilize our tax attributes, including NOL carryforwards and credits, as well as certain built-in losses, against our U.S. taxable income, are limited to certain annual limitations. We currently do not anticipate any of our NOL loss carryforwards expiring, and as such, have not recorded a reduction of deferred tax assets. However, there can be no assurance that a portion of our NOL loss carryforwards may expire in any future periods. Any further changes made to the IRC or to the regulations promulgated thereunder could impact our ability to utilize our NOLs. Accordingly, any such occurrences could adversely affect our financial condition, operating results, and cash flows.

Our results of operations may be harmed if we are required to collect sales or other related taxes for our subscription solutions in jurisdictions where we have not historically done so.

We collect sales and similar value-added taxes as part of our client agreements in a number of jurisdictions. Sales and use, value-added, and similar tax laws and rates vary greatly by jurisdiction. If we believe that we should have been or should be collecting additional sales, use, or other taxes on our solutions, we voluntarily engage with appropriate tax authorities, and such engagement has led and may lead to our participation in voluntary disclosure agreements. Additionally, we have been in the past and may in the future be, under audit by one or more state or local tax authorities with regard to sales tax and other indirect tax matters. Our voluntary participation in agreements with states, countries, or other jurisdictions, or successful assertions by states, countries, or other jurisdictions that we should have been or should be collecting additional sales, use, or other taxes on our solutions could, among other things, result in substantial tax liabilities for past sales, create significant administrative burdens for us, discourage clients from purchasing our solutions, or otherwise harm our business, results of operations, and financial condition.

Risks Related to Our Organizational Structure

If the ownership of our common stock continues to be highly concentrated, it may prevent other minority stockholders from influencing significant corporate decisions and may result in conflicts of interest.

As of August 12, 2024, Anderson Investments Pte Ltd. and its affiliates (collectively, “Anderson”) beneficially own approximately 23% of our common stock. As a result, Anderson exercise significant influence over all matters requiring a stockholder vote, including: the election of directors; mergers, and acquisitions; the sale of all or substantially all of our assets and other decisions affecting our capital structure; the amendment of our amended and restated certificate of incorporation and our amended and restated bylaws; and our winding up and dissolution. This concentration of ownership may delay, deter or prevent acts that would be favored by our other stockholders. The interests of Anderson may not always coincide with our interests or the interests of our other stockholders. This concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of us. Also, Anderson may seek to cause us to take courses of action that, in its judgment, could enhance its investment in us, but which might involve risks to our other stockholders or adversely affect us or our other stockholders. As a result, the market price of our common stock could decline or stockholders might not receive a premium over the then-current market price of our common stock upon a change in control. In addition, this concentration of share ownership may adversely affect the trading price of our common stock because investors may perceive disadvantages in owning shares in a company with a significant stockholder.

Certain provisions of Delaware law, the Stockholders’ Agreement, our amended and restated certificate of incorporation and our amended and restated bylaws could hinder, delay or prevent a change in control of us, which could adversely affect the price of our common stock.

Certain provisions of Delaware law, that certain stockholders’ agreement, dated July 2, 2021, by and between us and Anderson (the “Stockholders’ Agreement”), our amended and restated certificate of incorporation and our amended and restated bylaws contain provisions that could make it more difficult for a third-party to acquire us without the consent of our board of directors or certain existing stockholders.

The Company has not been governed by Section 203 of the Delaware General Corporation Law, as amended (the “DGCL”), and we will only become subject to Section 203 of the DGCL, immediately following the time at which both of the following conditions exist: (i) Section 203 of the DGCL by its terms would, but for the provisions of our amended and restated certificate of incorporation, apply to the Company; and (ii) Anderson does not own (as defined in Section 203 of the DGCL) shares of capital stock of the Company representing at least fifteen percent (15%) of the voting power of all the then outstanding shares of capital stock of the Company. Section 203 of the DGCL prevents some stockholders holding more than 15% of our outstanding common stock from engaging in certain business combinations without approval of the holders of two-thirds of all of our outstanding common stock not held by such interested stockholder.

Furthermore, Anderson controls 23% of the voting power of the shares of our common stock eligible to vote in the election of our directors and on other matters submitted to a vote of our stockholders, and Anderson may be able to influence outcome of matters submitted to a stockholder vote. Pursuant to the Stockholders’ Agreement, so long as Anderson beneficially owns at least 10% of our outstanding common stock, it shall have the right to nominate one director to our board of directors.

These provisions may make it difficult and expensive for a third-party to pursue a tender offer, change in control or takeover attempt that is opposed by Anderson, our management or our board of directors. Public stockholders who might desire to participate in these types of transactions may not have an opportunity to do so, even if the transaction is favorable to stockholders. These anti-takeover provisions could substantially impede the ability of public stockholders to benefit from a change in control or change our management and board of directors and, as a result, may adversely affect the market price of our common stock and your ability to realize any potential change of control premium.

Risks Related to Ownership of Our Common Stock

The market price and trading volume of our common stock has been and may continue to be volatile, which could result in rapid and substantial losses for our stockholders.

The market price of our common stock has been and may continue to be highly volatile and could be subject to wide fluctuations. In addition, the trading volume in our common stock may fluctuate and cause significant price variations to occur. Some of the factors that have or could in the future negatively affect our share price or result in fluctuations in the price or trading volume of our common stock, many of which are beyond our control, include:

- variations in our quarterly or annual operating results;
- our ability to attract new clients in both domestic and international markets, and our ability expand the solutions provided to existing clients;
- the timing of our clients' buying decisions and reductions in our clients' budgets for IT purchases and delays in their purchasing cycles, particularly in light of recent adverse global economic conditions;
- changes in our earnings estimates (if provided) or differences between our actual financial and operating results and those expected by investors and analysts;
- the contents of published research reports about us or our industry or the failure of securities analysts to cover our common stock;
- additions to, or departures of, key management personnel and our ability to attract, train, integrate and retain highly skilled employees;
- any increased indebtedness we may incur in the future;
- announcements and public filings by us or others and developments affecting us;
- actions by institutional stockholders;
- litigation and governmental investigations;
- operating and stock performance of other companies that investors deem comparable to us (and changes in their market valuations) and overall performance of the equity markets;
- speculation or reports by the press or investment community with respect to us or our industry in general;
- increases in market interest rates, including due to impacts from inflation, that may lead purchasers of our shares to demand a higher yield;
- announcements by us or our competitors of significant contracts, acquisitions, dispositions, strategic relationships, joint ventures or capital commitments;
- announcements or actions taken by our principal stockholders;
- sales of substantial amounts of our common stock by Anderson or other significant stockholders or our insiders, or the expectation that such sales might occur;
- volatility, inflation, or economic downturns in the markets in which we, our clients and our partners are located caused by outbreaks, epidemics, or pandemics involving public health and related policies and restrictions undertaken to contain the spread of such pandemics or potential pandemics;
- geopolitical tensions or conflicts in locations in which we, our clients and our partners are located, including Russian military action against Ukraine and any further escalation of such conflict as well as ongoing conflict in the Middle East;
- general volatility in the prices of stock traded on the Nasdaq Global Select Market and other equity markets; and
- general market, political and economic conditions, including inflation, rising interest rates and disruptions in the professional and financial services industry, including any such conditions and local conditions in the markets in which any of our clients are located.

The stock markets have experienced price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many technology companies. Stock prices of many technology companies have fluctuated in a manner unrelated or disproportionate to the operating performance of those companies. In the past, following periods of volatility in the overall market and the market price of a company's securities, securities class action litigation has often been instituted against these companies. This litigation, if instituted against us, could result in substantial costs and a diversion of our management's attention and resources.

Future offerings of debt or equity securities by us may materially adversely affect the market price of our common stock.

In the future, we may attempt to obtain financing or to further increase our capital resources by issuing additional shares of our common stock or offering debt or other equity securities, including senior or subordinated notes, debt securities convertible into equity or shares of preferred stock. In addition, we may seek to expand operations in the future to other markets which we would expect to finance through a combination of additional issuances of equity, corporate indebtedness and/or cash from operations.

Issuing additional shares of our common stock or other equity securities or securities convertible into equity may dilute the economic and voting rights of our existing stockholders or reduce the market price of our common stock or both. For example, in May of 2023, we completed an underwritten public offering of 7,187,500 shares of our common stock, consisting of 2,000,000 shares sold by us and 5,187,500 shares of common stock sold by certain selling stockholders, which had a dilutive effect on the pre-existing stockholders. Debt securities convertible into equity could be subject to adjustments in the conversion ratio pursuant to which certain events may increase the number of equity securities issuable upon conversion. Preferred shares, if issued, could have a preference with respect to liquidating distributions or a preference with respect to dividend payments that could limit our ability to pay dividends to the holders of our common stock. Our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, which may adversely affect the amount, timing or nature of our future offerings. Thus, holders of our common stock bear the risk that our future offerings may reduce the market price of our common stock and dilute their stockholdings in us.

The market price of our common stock could be negatively affected by sales of substantial amounts of our common stock in the public markets.

As of August 12, 2024, there were 74,699,528 shares of common stock outstanding. Approximately 23% of our outstanding common stock is held by Anderson and can be resold into the public markets in the future in accordance with the requirements of Rule 144. In addition, we filed an automatically effective registration statement on Form S-3 with the SEC on May 16, 2023, as supplemented on April 15, 2024, and as may be amended or supplemented from time to time, which registered shares held by certain of our existing stockholders (including Anderson) and its respective affiliates. Pursuant to this effective registration statement, such shares are freely tradeable in the public market to the extent sold pursuant to the registration statement. The sale by Anderson of a substantial number of shares, or a perception that such sales could occur, could significantly reduce the market price of our common stock. In addition, certain of our employees, executive officers and directors have entered or may enter into Rule 10b5-1 trading plans providing for sales of shares of our common stock from time to time. The market price of our common stock may decline significantly if our existing stockholders were to sell substantial amounts of our common stock. A decline in the price of our common stock might impede our ability to raise capital through the issuance of additional common stock or other equity securities.

As of August 12, 2024, we had an aggregate of 599,415,412 shares of common stock authorized but unissued and not reserved for issuance under our incentive plans. We may issue all of these shares of common stock without any action or approval by our stockholders, subject to certain exceptions. Additionally, as of August 12, 2024, we had 25,885,060 shares of common stock reserved for issuance under our incentive plans. Any common stock issued in connection with our incentive plans, the exercise of outstanding stock options or otherwise would dilute the percentage ownership held by all of our stockholders.

We have not paid dividends in the past and do not anticipate paying any dividends on our common stock in the foreseeable future.

We have never paid cash dividends on our common stock and have no plans to pay regular dividends on our common stock in the foreseeable future. Any declaration and payment of future dividends to holders of our common stock will be at the sole discretion of our board of directors and will depend on many factors, including our financial condition, earnings, capital requirements, level of indebtedness, statutory, and contractual restrictions applying to the payment of dividends and other considerations that our board of directors deems relevant. Additionally, our revolving credit facility agreements limit the ability of certain of our subsidiaries to pay dividends. Until such time that we pay a dividend, which may never occur, our investors must rely on sales of their common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investment.

Our amended and restated certificate of incorporation designates a state or federal court located within the State of Delaware as the exclusive forum for certain types of actions and proceedings and the federal courts for certain other types of actions that may be initiated by our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers, employees, or other stockholders.

Our amended and restated certificate of incorporation provides that, unless we consent in writing to the selection of an alternative forum, to the fullest extent permitted by law, the sole and exclusive forum for (1) any derivative action or proceeding brought on our behalf, (2) any action asserting a claim of breach of a fiduciary duty owed by any of our directors, officers or other employees or our stockholders to us or our stockholders, (3) any action asserting a claim arising pursuant to any provision of the DGCL, our amended and restated certificate of incorporation or our amended and restated bylaws or as to which the DGCL confers jurisdiction on the Court of Chancery of the State of Delaware, or (4) any action asserting a claim that is governed by the internal affairs doctrine shall be, to the fullest extent permitted by law, the Court of Chancery of the State of Delaware or, if such court does not have subject matter jurisdiction thereof, the federal district court of the State of Delaware. Our amended and restated certificate of incorporation also provides that, unless we consent in writing to the selection of an alternative forum, the federal district courts of the United States of America will be the sole and exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act. Any person or entity purchasing or otherwise acquiring any interest in shares of our capital stock shall be deemed to have notice of and consented to these provisions. This provision would not apply to suits brought to enforce a duty or liability created by the Exchange Act or any other claim for which the federal courts have exclusive jurisdiction.

Furthermore, Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all such Securities Act actions. Accordingly, both state and federal courts have jurisdiction to entertain such claims. To prevent having to litigate claims in multiple jurisdictions and the threat of inconsistent or contrary rulings by different courts, among other considerations, our amended and restated certificate of incorporation contains a federal forum provision which provides that unless the Company consents in writing to the selection of an alternative forum, the federal district courts of the United States of America will be the exclusive forum for the resolution of any complaint asserting a cause of action arising under the Securities Act.

While the Delaware courts have determined that such choice of forum provisions are facially valid, a stockholder may nevertheless seek to bring a claim in a venue other than those designated in the exclusive forum provisions. In such instance, we would expect to vigorously assert the validity and enforceability of the exclusive forum provisions of our amended and restated certificate of incorporation. This may require significant additional costs associated with resolving such action in other jurisdictions and there can be no assurance that the provisions will be enforced by a court in those other jurisdictions.

These choice of forum provisions may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers, or other employees, which may discourage such lawsuits. Alternatively, if a court were to find the choice of forum provision in our amended and restated certificate of incorporation to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which could harm our business, results of operations and financial condition.

General Risk Factors

We may be adversely affected by natural disasters, outbreaks, epidemics, or pandemics involving public health, other catastrophic events and terrorism that could disrupt and harm our business, results of operations, and financial condition.

Our business operations are subject to interruption by various events beyond our control. Natural disasters or other catastrophic events may cause damage or disruption to our operations, international commerce, and the global economy, which could have an adverse effect on our business, operating results, and financial condition. Further, acts of terrorism and other geopolitical unrest could cause disruptions in our business or the businesses of our partners or the economy as a whole. In addition, our global operations expose us to risks associated with public health crises, such as pandemics and epidemics, which could materially and adversely impact our operations and the markets and industries in which we, our partners and clients operate. For example, the COVID-19 pandemic and/or the precautionary measures that we, our clients, and governmental authorities adopted resulted in global business disruptions, economic downturn and increased market volatility.

Public health crises may adversely affect, among other things, demand, spending by new clients, renewal and retention rates of existing clients, the length of our sales cycles, the value and duration of subscriptions, collections of accounts receivable, our IT and other expenses, our ability to recruit, and the ability of our employees to travel, all of which could adversely affect our business, results of operations and financial condition.

Because we recognize revenues over the term of the agreements for our SaaS solutions, any downturn in our business resulting from the such outbreaks, epidemics, or pandemics involving public health may not be reflected immediately in our operating results, which increases the difficulty of evaluating our future financial performance. Further, our sales cycles could increase, resulting in a slower growth of new sales. Certain of our competitors may also be better equipped to weather the impact of such outbreaks, epidemics, or pandemics involving public health both domestically and abroad and better able to address changes in client demand.

We may not be able to obtain capital when desired on favorable terms, if at all, and we may not be able to obtain capital or complete acquisitions through the use of equity without dilution to our stockholders.

We may need additional financing to execute our current or future business strategies, including to develop new or enhance existing solutions, acquire businesses and technologies or otherwise respond to competitive pressures. If we fail to raise capital when needed, we could be prevented from executing our business strategy or react to the economic environment.

If we raise additional funds through the issuance of equity or securities convertible into shares of our common stock, the percentage ownership of our stockholders could be significantly diluted, and newly-issued securities may have rights, preferences, or privileges senior to those of existing stockholders. The trading prices for our and other technology companies' common stock have been highly volatile in recent years, including as a result of circumstances unrelated to the operating performance of companies, which may reduce our ability to access capital on favorable terms or at all. Additionally, if we accumulate additional funds through debt financing, a substantial portion of our operating cash flow may be dedicated to the payment of principal and interest on such indebtedness, thus limiting funds available for our business activities. We cannot assure you that additional financing will be available on terms favorable to us, or at all. If adequate funds are not available or are not available on acceptable terms, when we desire them, our ability to fund our operations, develop or enhance our solutions, invest in future growth opportunities or otherwise respond to competitive pressures would be significantly limited. Any of these factors could harm our results of operations.

If tax laws change or we experience adverse outcomes resulting from examination of our income tax returns, it could adversely affect our results of operations.

We are subject to federal, state and local income taxes in the United States and in foreign jurisdictions. Our future effective tax rates and the value of our deferred tax assets could be adversely affected by changes in tax laws, which changes may have retroactive application. In recent years, many such changes have been made and changes are likely to continue to occur in the future. For example, the TCJA and the CARES Act made a number of significant changes to the current U.S. federal income tax rules, including with respect to the corporate tax rate, NOLs, and the international tax rules. Many of the provisions of these laws still require finalization by the U.S. Treasury Department, increasing the uncertainty as to the ultimate effects on us and our stockholders. Global tax developments applicable

to multinational businesses may have a material impact to our business, cash flows, or financial results. Such developments, for example, may include certain new provisions introduced by the Inflation Reduction Act, certain Organization for Economic Co-operation and Development's proposals including the implementation of the global minimum tax under the Pillar Two model rules, and the European Commission's and certain major jurisdictions' heightened interest in and taxation of companies participating in the digital economy. Furthermore, governments' responses to macroeconomic factors such as shrinking gross domestic product or increased inflation rates and tax revenue needs may lead to tax rule changes that could materially and adversely affect our cash flows and financial results. In addition, we are subject to the examination of our income tax returns by the Internal Revenue Service ("IRS"), foreign and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from such examinations to determine the adequacy of our provision for income taxes. Significant judgment is required in determining our worldwide provision for income taxes. Although we believe we have made appropriate provisions for taxes in the jurisdictions in which we operate, changes in the tax laws or challenges from tax authorities under existing tax laws could adversely affect our business, financial condition, and results of operations.

Item 1B. Unresolved Staff Comments.

None

Item 1C. Cybersecurity.

Cybersecurity Risk Management and Strategy

The Company recognizes the critical importance of developing, implementing, and maintaining robust cybersecurity measures to safeguard our information systems and to protect the confidentiality, integrity, and availability of our and our client's data and information assets. As such, we have developed and implemented a cybersecurity risk management program intended to protect the confidentiality, integrity, and availability of our critical systems and information. Our cybersecurity risk management program includes a cybersecurity incident response plan.

We design our program based on industry standard cybersecurity frameworks, such as the National Institute of Standards and Technology Cybersecurity Framework (NIST CSF). This does not imply that we meet any particular technical standards, specifications, or requirements, only that we use the NIST CSF as a guide to help us identify, assess, and manage cybersecurity risks relevant to our business. Also, our cloud services comply with numerous internationally recognized standards, such as ISO 27001, ISO 27017, ISO 27108, SOC 2 and CSA STAR.

Our cybersecurity risk management program is integrated into our overall enterprise risk management program, and shares common methodologies, reporting channels and governance processes that apply across the enterprise risk management program to other legal, compliance, strategic, operational, and financial risk areas.

Our cybersecurity risk management program includes:

- risk assessments designed to help identify material cybersecurity risks to our critical systems, information, products, services, and our broader enterprise IT environment;
- a security team principally responsible for managing (1) our cybersecurity risk assessment processes, (2) our security controls, and (3) our response to cybersecurity incidents;
- the use of external service providers, where appropriate, to assess, test or otherwise assist with aspects of our security controls;
- cybersecurity awareness training of our employees, incident response personnel, and senior management, including through the use of third-party providers for regular mandatory trainings;
- a cybersecurity incident response plan that includes procedures for responding to cybersecurity incidents; and
- a third-party risk management process for service providers, suppliers, and vendors.

When we experience cybersecurity incidents, we promptly activate incident response protocols and commence investigation of the incident. We may notify law enforcement and engage third-party professionals, as appropriate, as part of our incident response and/or investigation. Based on our assessments, we have not identified any cybersecurity threats that have had a material impact during the last fiscal year, and we do not believe these incidents have materially affected or will materially affect us, including our operations, business strategy, results of operations, or financial condition. However, we face ongoing cybersecurity risks, including threats that might become more sophisticated and effective over time. If realized, these risks are reasonably likely to materially affect the Company. Additional information on the cybersecurity risks we face is discussed in Part I, Item 1A, “Risk Factors.”

Cybersecurity Governance

Our Board of Directors considers cybersecurity risk as part of its risk oversight function and has delegated to the Audit Committee (“Committee”) oversight of the Company’s enterprise risks, including cybersecurity and other information security risks. The Committee oversees management’s implementation of our cybersecurity risk management program. Also, the Company created a Risk Management Working Group which meets no less than quarterly and which receives updates on the Company’s cybersecurity risk management program and cybersecurity risks from the Chief Information Security Officer (“CISO”). The Risk Management Working Group includes two Audit Committee members, certain members of senior management and the CISO.

The Committee receives quarterly reports on our cybersecurity risks from the Risk Management Working Group. In addition, management updates the Committee, as necessary, regarding any material cybersecurity incidents, as well as any incidents with lesser impact potential.

The Committee reports quarterly to the full Board of Directors regarding its activities, including those related to cybersecurity. The full Board of Directors also receives briefings on our cyber risk management program, including from our CISO.

Our team of experienced cybersecurity professionals has primary responsibility for our overall cybersecurity risk management program, including assessing and managing material risks from cybersecurity threats. Our CISO, Mark Schertler, supervises both our internal cybersecurity personnel and our retained external cybersecurity consultants. Mr. Schertler has over 40 years of experience in the field of cybersecurity. Mr. Schertler leads a team of experienced cybersecurity professionals who have extensive experience in the field of cybersecurity, including experience in cybersecurity consulting, cloud security, principal security architect, application security and as a chief technology officer.

Our management team supervises efforts to prevent, detect, mitigate, and remediate cybersecurity risks and incidents through various means, which may include briefings from internal security personnel; threat intelligence and other information obtained from governmental, public or private sources, including external consultants engaged by us; and alerts and reports produced by security tools deployed in the IT environment.

Item 2. Properties.

We have eleven offices globally, all in leased or managed premises. Our corporate headquarters is located in Palo Alto, California, and consists of approximately 13,000 square feet of space pursuant to an agreement that expires in August 2025. In addition to our head office, we also maintain ten offices in multiple locations in the U.S. and internationally in the U.K., Netherlands, Ukraine, Germany and Singapore.

We continually assess our facilities requirements in light of the needs of a hybrid workforce and may make changes to our facilities as necessary, which might include adding new facilities as we add employees and enter new geographic markets or reducing our space in certain locations. We believe that suitable additional or alternative space will be available as needed to accommodate any such changes.

Item 3. Legal Proceedings.

The information contained in Note 9. “Commitments and Contingencies—Litigation” in our audited consolidated financial statements included elsewhere in this Annual Report on Form 10-K is incorporated herein by reference. From time to time we may become involved in legal proceedings or investigations, which could have an adverse impact on our reputation, business and financial condition and divert the attention of our management from the operation of our business. Additionally, we may from time to time receive letters from third parties alleging patent infringement, violation of employment practices, or trademark infringement, and we may in the future participate in litigation to defend ourselves. We cannot predict the results of any such disputes, and regardless of the potential outcomes, the existence thereof may have an adverse material impact on us due to diversion of management time and attention as well as the financial costs related to resolving such disputes.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Market Information

Our common stock is listed on the Nasdaq Global Select Market under the symbol “INTA.”

Holders of Common Stock

As of August 12, 2024, there were 31 holders of record of our common stock. The actual number of stockholders is greater than this number of record holders and includes stockholders who are beneficial owners but whose shares are held in street name by brokers and other nominees.

Dividend Policy

We have never declared or paid any cash dividends on our capital stock. We currently intend to retain any future earnings and do not expect to pay any dividends in the foreseeable future. Any future determination to declare cash dividends will be made at the discretion of our board of directors, subject to applicable laws, and will depend on a number of factors, including our financial condition, results of operations, capital requirements, contractual restrictions, general business conditions and other factors that our board of directors may deem relevant. Our ability to pay cash dividends on our capital stock is limited by our Credit Agreement.

Recent Sales of Unregistered Securities

All unregistered sales of equity securities during the period covered by this Annual Report were previously disclosed on prior Quarterly Reports on Form 10-Q that we filed with the SEC.

Issuer Purchases of Equity Securities

None.

Securities Authorized for Issuance Under Equity Compensation Plans

The information required by this Item regarding equity compensation plans is incorporated by reference to the information set forth in Part III, Item 12 of this Annual Report on Form 10-K.

Performance Graph

The following graph shows a comparison of the cumulative total stockholder return for our common stock to the Nasdaq Composite — Total Return Index and S&P Software & Services Select Industry Index, assuming an initial investment of \$100 at the market close on June 30, 2021, the date our stock commenced trading on the Nasdaq Global Select Market through June 30, 2024. Such comparisons are based on historical results and are not intended to suggest future performance. Data for the Nasdaq Composite Total Return Index and S&P Software & Services Select Industry Index assume reinvestment of dividends.

The performance graph above shall not be deemed “soliciting material” or to be “filed” with the SEC for purposes of Section 18 of the Exchange Act or incorporated by reference into any of our filings under the Exchange Act or the Securities Act.

Item 6. [Reserved]

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our financial condition and results of operations should be read together with our audited consolidated financial statements and related notes and other financial information included in this Annual Report on Form 10-K. The following discussion contains forward-looking statements that reflect our plans, estimates, and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this Annual Report on Form 10-K, particularly in the section titled “Cautionary Note regarding Forward-Looking Statements” and “Risk Factors.” Our historical results are not necessarily indicative of the results that may be expected for any period in the future. Unless otherwise noted, any reference to a year preceded by the word “fiscal” refers to the fiscal year ended June 30 of that year.

A discussion regarding our financial condition and results of operations for the fiscal year ended June 30, 2024 compared to the fiscal year ended June 30, 2023 is presented below. A discussion regarding our financial condition and results of operations for the fiscal year ended June 30, 2023 compared to the fiscal year ended June 30, 2022 can be found in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Part II, Item 7 of our Annual Report on Form 10-K for the fiscal year ended June 30, 2023 filed with the SEC on September 7, 2023.

Overview

Intapp is a leading global provider of AI-powered solutions for professionals at advisory, capital markets and legal firms. Intapp software helps professionals unlock their teams’ knowledge, relationships, and operational insights to increase value for their firms. Using the power of Applied AI, we make firm and market intelligence easy to find, understand, and use. With Intapp’s portfolio of vertical SaaS solutions, professionals can apply their collective expertise to make smarter decisions, manage risk, and increase competitive advantage. The world’s top firms — across accounting, consulting, investment banking, legal, private capital, and real assets — trust Intapp’s industry-specific platform and solutions to modernize and drive new growth.

Highlights from Fiscal Year 2024

During fiscal year 2024, we generated total revenues of \$430.5 million with a gross margin of 71%. Our operating cash flow was \$67.2 million and we completed acquisitions of delphai and TDI. Total cash and cash equivalents as of June 30, 2024 was \$208.4 million. Our remaining performance obligations, which represent all future revenue under contract yet to be recognized, were \$566.5 million as of June 30, 2024.

How We Generate Revenue

We generate revenues primarily from software subscriptions, typically with one-year or multi-year contract terms. We sell our software through a direct sales model, which targets clients based on end market, geography, firm size, and business need. We recognize revenues from SaaS subscriptions ratably over the term of the contract, while we recognize revenues from the license component of on-premise subscriptions upfront and the support component of such subscriptions ratably over the support term. We generally price our subscriptions based on the number of users adopting our solution and the modules deployed.

We expect the vast majority of our new ARR (as defined below) growth in the future to be from the sale of SaaS subscriptions.

We generate a majority of our non-recurring revenues from professional services. Our clients utilize these services to configure and implement one or more modules of the Intapp Intelligent Cloud platform, integrate those modules with the existing platform and with other core systems in their IT environment, upgrade their existing deployment, and provide training for their employees. Other professional services include strategic consulting and advisory work, which are generally provided on a standalone basis.

Key Factors Affecting Our Performance

Market Adoption of our Cloud Platform. Our future growth depends on our ability to win new professional and financial services clients and expand within our existing client base, primarily through the continued acceptance of our cloud business. Our cloud business has historically grown faster than our overall business, and represents an increasing proportion of our ARR. We must demonstrate to new and existing clients the benefits of selecting our cloud platform, and support those deployments once live with reliable and secure service. From a sales perspective, our ability to add new clients and expand within existing accounts depends upon a number of factors, including the quality and effectiveness of our sales personnel and marketing efforts, and our ability to convince key decision makers within professional and financial services firms to embrace the Intapp Intelligent Cloud platform over point solutions, internally developed solutions, and horizontal solutions. If our clients do not continue to see the ability of our platform to generate return on investment relative to other software alternatives, net revenue retention could suffer and our operating results may be adversely affected.

Continued Investment in Innovation and Growth. We have made substantial investments in research and development and sales and marketing to achieve a leadership position in our market and grow our revenues and client base. We intend to continue to invest in research and development to build new capabilities and maintain the core technology underpinning our differentiated platform. In addition, we expect to invest in sales and marketing to broaden our reach with new clients in the U.S. and abroad and deepen our penetration with existing clients. With our revenue growth objectives, we expect to continue to make such investments for the foreseeable future. We intend to continue to gradually increase our general and administrative spending to support our growing operational needs.

We have a track record of successfully identifying and integrating complementary businesses within the professional and financial services industry. To complement our organic investment in innovation and accelerate our growth, we will continue to evaluate acquisition opportunities that help us extend our platform, broaden and deepen our market leadership, and add new clients.

Key Business Metrics

We review a number of operating and financial metrics, including the following key metrics to help us evaluate our business, measure our performance and the effectiveness of our sales and marketing efforts, identify trends affecting our business, formulate business plans and budgets, and make strategic decisions.

Annual Recurring Revenues (“ARR”)

ARR represents the annualized recurring value of all active SaaS and on-premise subscription license contracts at the end of a reporting period. Contracts with a term other than one year are annualized by taking the committed contract value for the current period divided by number of days in that period then multiplying by 365. As a metric, ARR mitigates fluctuations in revenue recognition due to certain factors, including contract term and the sales mix of SaaS contracts and subscription licenses. ARR does not have any standardized meaning and may not be comparable to similarly titled measures presented by other companies. ARR should be viewed independently of revenues and deferred revenues and is not intended to be combined with or to replace either of those elements of our financial statements. ARR is not a forecast and the active contracts at the end of a reporting period used in calculating ARR may or may not be extended or renewed by our clients.

ARR was \$404.2 million and \$330.2 million as of June 30, 2024 and 2023, respectively, an increase of 22%.

Cloud ARR

Cloud ARR is the portion of our ARR which represents the annualized recurring value of our active SaaS contracts. We believe Cloud ARR provides important information about our ability to sell new SaaS subscriptions to existing clients and to acquire new SaaS clients.

Cloud ARR was \$296.7 million and \$222.3 million as of June 30, 2024 and 2023, respectively, an increase of 33%, and represented 73% and 67% of ARR for fiscal years 2024 and 2023, respectively.

Net Revenue Retention (“NRR”)

We measure our ability to grow and retain ARR from existing clients using a metric we refer to as NRR. We calculate this by starting with the ARR from the cohort of all clients as of the twelve months prior to the applicable fiscal period, or prior period ARR. We then calculate the ARR from these same clients as of the current fiscal period, or current period ARR. We then divide the current period ARR by the prior period ARR to calculate the NRR.

This metric accounts for changes in our recurring revenue base from cross-sell (additional solution capabilities sold), upsell (additional seats sold), price changes, and client attrition (including contraction of solution capabilities, contraction of seats and client churn). We upsold additional seats and cross-sold new solutions to our existing clients such that our trailing twelve months’ NRR rate as of June 30, 2024 was 116%, which is within our expected range of 113% to 117%.

Cloud NRR

Cloud NRR is the portion of our NRR which represents the net revenue retention of our SaaS contracts. We calculate Cloud NRR by starting with the Cloud ARR from the cohort of all clients as of the twelve months prior to the applicable fiscal period, or prior period Cloud ARR. We then calculate the Cloud ARR from these same clients as of the current fiscal period, or current period Cloud ARR. We then divide the current period Cloud ARR by the prior period Cloud ARR to calculate the Cloud NRR. Our trailing twelve months’ Cloud NRR as of June 30, 2024 was 121%.

Number of Clients

We believe our ability to increase the number of clients on our platform is a key indicator of the growth of our business and our future business opportunities. We define a client at the end of any reporting period as an entity with at least one active subscription as of the measurement date. As of June 30, 2024, we had over 2,550 clients. No single client represented more than 10% of total revenues for fiscal years 2024, 2023 and 2022, respectively.

Our client base includes some of the largest and most reputable professional and financial services firms globally. These clients have the financial and operating resources needed to purchase, deploy, and successfully use the full capabilities of our software platform, and as such, we believe the number of our clients with contracts greater than \$100,000 of ARR is an important metric for highlighting our progress on the path to full adoption of our platform by our professional and financial services clients. As of June 30, 2024 and 2023, we had 698 and 603 clients, respectively, with contracts greater than \$100,000 of ARR, of which 73 and 53 clients, respectively, had contracts greater than \$1.0 million of ARR.

Components of Our Results of Operations

Revenues

We generate recurring revenues from the sale of our SaaS solutions, subscriptions to our term software applications, and from providing support for those applications. We generate non-recurring revenues primarily by delivering professional services for the configuration, implementation and upgrade of our solutions. Our recurring revenues accounted for 87%, 86% and 87% of our total revenues during fiscal years 2024, 2023 and 2022, respectively.

SaaS and Support

We recognize revenues from our SaaS solutions ratably over the term of the contract beginning once the SaaS environment is provisioned and made available to clients. The initial term of our SaaS contracts is generally one to three years in duration.

Support revenues consist of non-cancelable support which is included with our subscription licenses and entitles clients to receive technical support and software updates, on a when and if available basis. We recognize revenues for support ratably over the term of the support contract which corresponds to the underlying subscription license agreement. We expect to continue to generate a relatively consistent stream of revenues from support services we provide to our existing subscription license clients. However, over time as we focus on new sales of our SaaS solutions and encourage existing subscription license clients to migrate to SaaS solutions, we expect revenues from support to decrease as a percentage of total revenues.

Subscription License

Our subscription licenses provide the client with the right to functional intellectual property and are distinct performance obligations as the client can benefit from the subscription licenses on their own. The transaction price allocated to subscription license arrangements is recognized as revenues at a point in time when control is transferred to the client, which generally occurs at the time of delivery for a new contract or commencement of the renewal term for renewals. Subscription license fees are generally payable in advance on an annual basis over the term of the license arrangement, which is typically non-cancelable.

Professional Services

Our professional services primarily consist of implementation, configuration and upgrade services provided to clients. These engagements are billed to clients either on a time and materials or milestone basis; revenues are recognized as invoiced or in proportion to the work performed, respectively. We expect the demand for our professional services to increase due to client growth and the need for implementation, upgrade, and migration services for new and existing clients. This demand will be affected by the mix of professional services that are provided by us versus provided by our third-party implementation partners. Our professional services are currently loss making (after allocated overhead costs for facilities and IT) and accounted for 13%, 14% and 13% of our total revenues during fiscal years 2024, 2023 and 2022, respectively.

Cost of Revenues

Our cost of revenues consists primarily of expenses related to providing SaaS subscription, support and professional services to our clients, including personnel costs (salaries, bonuses, benefits and stock-based compensation) and related expenses for client support and services personnel, as well as cloud infrastructure costs, third-party expenses, amortization of capitalized internal-use software costs and acquired intangible assets, and allocated overhead costs. We do not have any cost of revenues related to our subscription licenses. We expect our cost of revenues to increase in absolute dollars as we expand our SaaS client base over time as this will result in increased cloud infrastructure costs and increased costs for additional personnel to provide technical support services to our growing client base.

Cost of SaaS and Support

Our cost of SaaS and support revenues comprises the direct costs to deliver and support our products, including personnel costs, allocated overhead costs for facilities and IT, third-party hosting fees related to cloud services, amortization of capitalized internal-use software costs and amortization of acquired intangible assets.

Cost of Professional Services

Our cost of professional services revenues comprises the personnel-related costs for our professional services employees and contractors responsible for delivering implementation, upgrade and migration services to our clients. This includes personnel costs and allocated overhead costs for facilities and IT. We expect the cost of professional services revenues to increase in absolute dollars as we continue to hire personnel and engage contractors to provide implementation, upgrade and migration services to our growing client base.

Operating Expenses

Research and Development

Our research and development expenses consist primarily of personnel-related costs for engineering and product development employees, costs of third-party services, and allocations of various overhead, cloud hosting costs and facilities costs. We expect our research and development expenses to continue to increase in absolute dollars for the foreseeable future as we continue to dedicate substantial internal resources to develop, improve and expand the functionality of our solutions.

Sales and Marketing

Our sales and marketing expenses consist primarily of costs incurred for personnel-related costs for our sales and marketing employees as well as commission payments to our sales employees, costs of marketing events and online advertising, allocations of various overhead and facilities costs and travel and entertainment expenses. We capitalize client acquisition costs (principally commissions paid to sales personnel) and subsequently amortize these costs over the expected period of benefit. In the medium-term, we expect to see an increase in sales and marketing expense as we continue to expand our direct sales force to take advantage of opportunities for growth and increase in in-person meetings, conferences, and attendance at trade shows.

General and Administrative

Our general and administrative expenses consist primarily of personnel-related costs as well as professional services and facilities costs related to our executive, finance, human resources, information technology and legal functions. As a public company, we expect to continue to incur significant accounting and legal costs related to compliance with rules and regulations enacted by the SEC, including increase in compliance costs with the Sarbanes-Oxley Act as a result of our transition from emerging growth company to large accelerated filer status, as well as insurance, investor relations and other costs associated with being a public company.

Lease Modification and Impairment

Lease modification and impairment consists of charges related to the early exit of certain leased office space and amendments to the underlying lease agreement.

Loss on Debt Extinguishment

Loss on debt extinguishment consists of the write-off of unamortized deferred financing costs upon the repayment of our debt obligations.

Interest and Other Income (Expense), net

Interest and other income (expense), net consists primarily of interest income from our cash and cash equivalents, non-cash interest expense related to the amortization of deferred financing costs, realized and unrealized foreign exchange gains and losses resulting from fluctuations in foreign currency exchange rates on monetary assets and liabilities denominated in currencies other than the U.S. dollar.

Income Tax (Expense) Benefit

Our income tax (expense) benefit consists of an estimate of federal, state and foreign income taxes based on enacted federal, state and foreign tax rates, as adjusted for allowable credits, deductions, uncertain tax positions, changes in the valuation of our deferred tax assets and liabilities and changes in tax laws. We maintain a full valuation allowance on our federal and state deferred tax assets as we have concluded that it is more likely than not that the deferred tax assets will not be realized.

Results of Operations

The following tables set forth our results of operations for the periods presented, expressed in total U.S. dollar terms and as a percentage of our total revenues:

	Year Ended June 30,					
	2024		2023		2022	
	<i>(in thousands, except for percentages)</i>					
Revenues:						
SaaS and support	\$ 315,960	73 %	\$ 252,310	72 %	\$ 192,980	71 %
Subscription license	60,682	14	48,970	14	44,202	16
Professional services	53,881	13	49,593	14	34,889	13
Total revenues	430,523	100	350,873	100	272,071	100
Cost of revenues ⁽¹⁾ :

(2) Includes transaction costs related to acquisitions and certain non-capitalized offering-related expenses of \$2.7 million, \$1.4 million and \$1.9 million for fiscal years 2024, 2023 and 2022, respectively.

Comparison of the Fiscal Years Ended June 30, 2024 and 2023

Revenues

	Year Ended June 30,		Change	
	2024	2023	Amount	%
<i>(in thousands, except for percentages)</i>				
Revenues:				
SaaS and support	\$ 315,960	\$ 252,310	\$ 63,650	25%
Subscription license	60,682	48,970	11,712	24%
Total recurring revenues	376,642	301,280	75,362	25%
Professional services	53,881	49,593	4,288	9%
Total revenues	<u>\$ 430,523</u>	<u>\$ 350,873</u>	<u>\$ 79,650</u>	23%

Recurring Revenues

Recurring revenues from the sale of our SaaS solutions, from subscriptions to our term software solutions, and from providing support for these solutions increased by \$75.4 million, or 25%, compared to the prior year.

Our SaaS and support revenues increased by \$63.7 million, or 25%, in fiscal year 2024 compared to fiscal year 2023, due to sales to new clients and expansion of existing clients from both cross-selling and upselling sales motions. The continuation of clients migrating from using our on-premise solutions to our cloud solutions also contributed to the growth.

Subscription license revenues increased by \$11.7 million, or 24%, in fiscal year 2024 compared to fiscal year 2023, due to sustained annual renewals on multi-year contracts upon expiration of their initial term, CPI-based price increases on annual renewals and new multi-year contracts.

Professional Services

Professional services revenues increased by \$4.3 million, or 9%, for fiscal year 2024 compared to fiscal year 2023. This reflects a continuation in demand for implementation, upgrade and migration services consistent with our revenue growth.

Cost of Revenues and Gross Profit

	Year Ended June 30,		Change	
	2024	2023	Amount	%
<i>(in thousands, except for percentages)</i>				
Cost of revenues:				
SaaS and support	\$ 59,831	\$ 53,022	\$ 6,809	13%
Total cost of recurring revenues	59,831	53,022	6,809	13%
Professional services	63,830	58,440	5,390	9%
Total cost of revenues	<u>123,661</u>	<u>111,462</u>	<u>12,199</u>	11%
Gross profit:				
SaaS and support	256,129	199,288	56,841	29%
Subscription license	60,682	48,970	11,712	24%
Total gross profit - recurring revenues	316,811	248,258	68,553	28%
Professional services	(9,949)	(8,847)	(1,102)	12%
Gross profit	<u>\$ 306,862</u>	<u>\$ 239,411</u>	<u>\$ 67,451</u>	28%

Cost of SaaS and Support

Cost of SaaS and support revenues increased by \$6.8 million, or 13%, for fiscal year 2024 compared to fiscal year 2023. The increase can be attributed primarily to increases in cloud hosting costs of \$4.2 million, royalty expense of \$1.4 million relating to third-party products, amortization expense of \$1.1 million relating to internal-use software costs and amortization of acquired intangible assets and personnel related costs of \$0.8 million which reflect a benefit of \$5.5 million in fiscal year 2024 resulting from an operational and organizational realignment that reclassified expenses from cost of SaaS and support to research and development. This was partially offset by a \$0.7 million decrease in contractor costs.

Cost of Professional Services

Cost of professional services revenues increased by \$5.4 million, or 9%, for fiscal year 2024 compared to fiscal year 2023, primarily due to an increase in personnel-related costs of \$4.8 million due to increased headcount and salary raises and sub-contractor costs of \$1.1 million.

Gross Profit

Gross profit increased by \$67.5 million, or 28%, for fiscal year 2024 compared to fiscal year 2023. Of this increase, \$56.8 million was attributable to growth in SaaS and support revenues and a lower increase in SaaS and support costs as a percentage of related revenues resulting from an operational and organizational realignment of part of the development operations team to research and development. The improvement in gross profit was also attributable to the increase in subscription license revenue which contributed \$11.7 million.

Operating Expenses

	Year Ended June 30,		Change	
	2024	2023	Amount	%
	<i>(in thousands, except for percentages)</i>			
Operating expenses:				
Research and development	\$ 113,634	\$ 93,851	\$ 19,783	21%
Sales and marketing	138,176	132,189	5,987	5%
General and administrative	87,243	81,031	6,212	8%
Lease modification and impairment	—	1,601	(1,601)	*
Total operating expenses	<u>\$ 339,053</u>	<u>\$ 308,672</u>	<u>\$ 30,381</u>	10%

* Not meaningful

Research and Development

Research and development expenses increased by \$19.8 million, or 21%, for fiscal year 2024 compared to fiscal year 2023. Personnel-related costs increased by \$12.5 million due to annual salary increases and increased headcount. The increase in headcount was driven by the operational and organizational realignment of part of the development operations team to research and development. Contractor costs increased by \$4.0 million as we increased contract resources to support on-going development of our cloud offerings. Allocated overhead costs increased by \$1.7 million due to increased headcount. Cloud hosting costs increased by \$1.6 million due to increased usage in support of development activities.

Sales and Marketing

Sales and marketing expenses increased by \$6.0 million, or 5%, for fiscal year 2024 compared to fiscal year 2023. Personnel-related costs increased by \$6.1 million due to annual salary increase and increased headcount. Marketing expenses increased by \$2.1 million largely due to increase in marketing events and travel related costs. These increases were partially offset by a decrease of \$3.1 million in stock-based compensation primarily due to forfeitures of unvested performance stock awards and the graded vesting of certain prior year grants which resulted in higher expense in the same period in prior year.

General and Administrative

General and administrative expense increased by \$6.2 million, or 8%, for fiscal year 2024 compared to fiscal year 2023. This was primarily driven by an increase of \$7.8 million in personnel-related costs primarily due to annual salary increases and increased headcount, an increase of \$4.0 million in third-party professional fees, and an increase of \$2.8 million in bad debt expense. These increases were partially offset by a decrease of \$6.1 million in stock-based compensation expense primarily due to forfeitures of unvested performance stock awards, and a decrease of \$1.5 million from change in fair value of contingent consideration related to prior acquisitions.

Lease modification and impairment

Lease modification and impairment net charge of \$1.6 million during fiscal year 2023 was related to accelerated amortization expense associated with a right-of-use leased asset on the early exit of a leased office space, offset by a benefit arising from an amendment to an underlying lease agreement which resulted in a reduction in the related lease payment obligation.

Interest and Other Income (Expense), net

	Year Ended June 30,		Change	
	2024	2023	Amount	%
	<i>(in thousands, except for percentages)</i>			
Interest and other income (expense), net	\$ 2,285	\$ (659)	\$ 2,944	(447)%

The change in interest and other income (expense), net, was primarily due to interest income on our cash held in money market funds, offset by the impact of fluctuations in foreign currency rates on our monetary asset and liability balances denominated in currencies other than the U.S. dollar, primarily British pounds.

Income Tax (Expense) Benefit

	Year Ended June 30,		Change	
	2024	2023	Amount	%
	<i>(in thousands, except for percentages)</i>			
Income tax (expense) benefit	\$ (2,115)	\$ 495	\$ (2,610)	(527)%

Income tax expense was \$2.1 million for fiscal year 2024 compared to an income tax benefit of \$0.5 million recorded during fiscal year 2023. The change in our income tax (expense) benefit was primarily due to a partial release of the valuation allowance against our deferred tax assets in the U.S. in fiscal year 2023. The income tax expense for fiscal year 2024 is primarily attributable to current taxes for U.S. state and foreign jurisdictions. The income tax benefit for fiscal year 2023 was primarily attributable to a partial release of the valuation allowance against our deferred tax assets in the U.S. due to an acquisition that was completed during the year. The valuation allowance release was the result of net deferred tax liabilities originating from the acquisitions that were an available source of income to realize a portion of our deferred tax assets.

Liquidity and Capital Resources

Sources and Uses of Liquidity

As of June 30, 2024, we had cash and cash equivalents of \$208.4 million. We finance our liquidity needs primarily through collections from clients and the issuance of equity securities. We generally bill and collect from our clients annually in advance. Our billings are subject to seasonality with billings in the fourth quarter higher than in the other quarters.

Operating losses could continue in the future as we continue to invest in the growth of our business. We believe our existing cash and cash equivalents as of June 30, 2024, along with our JPMorgan Credit Facility described below, will be sufficient to meet our working capital and capital expenditure needs for the next twelve months and beyond.

On October 5, 2021, we entered into a Credit Agreement, as amended on June 6, 2022 and further amended on November 17, 2022, with a group of lenders led by JPMorgan. The Credit Agreement provides for a five-year, senior secured revolving credit facility of \$100.0 million with a sub-facility for letters of credit in the aggregate amount of up to \$10.0 million. As of June 30, 2024, no amounts have been borrowed under the JPMorgan Credit Facility. See Note 10 to our consolidated financial statements for additional information.

Our primary uses of cash include personnel-related expenses, third-party cloud infrastructure expenses, research and development, sales and marketing expenses, overhead costs and acquisitions we may make from time to time. Our future capital requirements will depend on many factors, including, but not limited to, our ability to grow our revenues and the timing and extent of investment across our organization necessary to support growth in our business. In addition, we may in the future enter into arrangements to acquire or invest in complementary businesses or technologies. We may need to seek additional equity or debt financing in order to meet these future capital requirements. If we are unable to raise additional capital when desired, or on terms that are acceptable to us, our business, financial condition and results of operations could be adversely affected.

Cash Flows

The following table summarizes our cash flows from operating, investing, and financing activities for the periods presented (in thousands):

	Year Ended June 30,		
	2024	2023	2022
Net cash provided by operating activities ⁽¹⁾	\$ 67,231	\$ 27,487	\$ 14,236
Net cash used in investing activities	(19,828)	(14,340)	(7,287)
Net cash provided by financing activities	30,325	64,100	6,647
Effect of foreign currency exchange rate changes on cash and cash equivalents	(343)	(373)	(748)
Net increase in cash, cash equivalents and restricted cash	<u>\$ 77,385</u>	<u>\$ 76,874</u>	<u>\$ 12,848</u>

(1) Includes debt-related cash interest payments of \$6.0 million during fiscal year 2022.

Operating Activities

During fiscal year 2024, net cash provided by operating activities was \$67.2 million, as our operating loss of \$32.0 million was reduced by \$99.3 million of adjustments. These adjustments consisted of \$82.0 million of non-cash charges (principally comprising of stock-based compensation, depreciation and amortization and amortization of operating lease right-of-use assets) and net cash inflow of \$17.3 million from net changes in operating assets and liabilities. The net cash inflow from changes in operating assets and liabilities was primarily driven by an increase in deferred revenues of \$28.3 million due to our revenue growth, an increase in accounts payable and accrued liabilities of \$9.4 million due to timing of payments, and an increase in other liabilities of \$1.4 million due to the timing of payments. These changes were partially offset by a \$5.8 million increase in prepaid expenses and other assets, an increase in accounts receivable of \$5.1 million due to growth in our revenues and the timing of billing and collections on our outstanding receivables, a decrease of \$4.3 million in operating lease liabilities due to lease payments, an increase in deferred commissions of \$4.1 million due to increased sales and an increase of \$2.6 million in unbilled receivables due to the timing of invoicing to our clients.

During fiscal year 2023, net cash provided by operating activities was \$27.5 million, as our operating loss of \$69.4 million was reduced by \$96.9 million of adjustments. These adjustments consisted of \$87.7 million of non-cash charges (principally comprising of stock-based compensation, depreciation and amortization and amortization of operating lease right-of-use assets) and net cash inflow of \$9.2 million from net changes in operating assets and liabilities. The net cash inflow from changes in operating assets and liabilities was primarily driven by an increase in deferred revenues of \$46.6 million due to our revenue growth, an increase in accounts payable and accrued liabilities of \$2.3 million due to an increase in accrued bonuses and timing of payments, and a decrease of \$1.3 million in prepaid expenses and other assets. These changes were partially offset by an increase in accounts receivable of \$26.4 million due to growth in our revenues and the timing of billing and collections on our outstanding receivables, a decrease of \$5.9 million in operating lease liabilities due to lease payments, an increase of \$3.9 million in unbilled receivables due to the timing of invoicing to our clients, an increase in deferred commissions of \$3.4 million due to increased sales and a decrease in other liabilities of \$1.3 million due to timing of payments.

Investing Activities

Net cash used in investing activities consists of business acquisitions, purchases of property and equipment, leasehold improvements, and capitalized internal-use software costs.

During fiscal year 2024, net cash used in investing activities was \$19.8 million, consisting of \$11.0 million cash consideration paid, net of cash acquired for the acquisitions of delphai and TDI, capitalized internal-use software costs of \$6.4 million and capital expenditures of \$2.4 million on property and equipment largely of computer equipment and website development costs.

During fiscal year 2023, net cash used in investing activities was \$14.3 million, consisting of \$6.6 million cash consideration paid for the acquisition of Paragon, capitalized internal-use software costs of \$5.5 million and capital expenditures of \$2.2 million on property and equipment largely of computer equipment and leasehold improvements to our facilities in London, United Kingdom.

Financing Activities

During fiscal year 2024, net cash provided by financing activities was \$30.3 million, primarily comprised of \$30.7 million of proceeds from stock option exercises and \$3.4 million of proceeds from employee stock purchase plan, partially offset by \$3.0 million of payments for the final contingent consideration and cash holdback related to prior acquisitions and \$0.8 million of payments related to deferred offering costs in connection with our follow-on public offering.

During fiscal year 2023, net cash provided by financing activities was \$64.1 million, primarily comprised of \$70.1 million in net proceeds from our public offering completed in May 2023, \$23.5 million of proceeds from stock option exercises and \$2.7 million of proceeds from employee stock purchase plan, partially offset by \$22.3 million of payments for the final contingent consideration and cash holdback related to the acquisition of Repstor and deferred purchase consideration related to the acquisition of Billstream, \$9.1 million of payments related to employee payroll tax withholding on vested equity awards and \$0.8 million of payments related to offering costs in connection with our follow-on public offering.

Material Cash Commitments

Our material cash commitments as of June 30, 2024 were as follows (in thousands):

	Total	Short-Term	Long-Term
Operating lease obligations	\$ 30,564	\$ 7,558	\$ 23,006
Purchase obligations	111,346	5,459	105,887
Deferred considerations and acquisition holdbacks	5,394	4,481	913
Total cash requirements	<u>\$ 147,304</u>	<u>\$ 17,498</u>	<u>\$ 129,806</u>

Operating lease obligations consist of obligations under non-cancelable operating leases for office space with expiration through November 2030. See Note 8 to our consolidated financial statements for additional information.

Purchase obligations primarily consist of non-cancelable obligations under third-party cloud hosting and support service agreements and software subscriptions. See Note 9 to our consolidated financial statements for additional information.

In addition to the obligations described above, in connection with the acquisition of TDI, we are also obligated to pay deferred consideration up to \$1.9 million over the next three fiscal years, subject to service condition, and a maximum of \$1.1 million for contingent consideration in fiscal year 2027, if certain performance measures are achieved. In connection with the acquisition of Paragon, we are also obligated to pay contingent consideration in the third quarter of fiscal year 2025, a maximum of \$3.9 million, if certain performance measures are achieved. See Note 6 to our consolidated financial statements for additional information.

Non-GAAP Financial Measures

We report our financial results in accordance with generally accepted accounting principles in the United States of America (“GAAP”), however, management believes evaluating our ongoing operating results may be enhanced if investors have additional non-GAAP financial measures. Specifically, management reviews non-GAAP gross profit, non-GAAP recurring gross profit, and non-GAAP operating income (loss), each of which is a non-GAAP financial measure, to manage our business, make planning decisions, evaluate our performance and allocate resources and, for the reasons described below, considers them to be useful indicators, for both management and investors, of our financial performance over time. These non-GAAP financial measures, which may be different than similarly-titled measures used by other companies, should not be considered a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP.

Non-GAAP Gross Profit

We define non-GAAP gross profit as GAAP gross profit less the portion related to cost of revenues of stock-based compensation expense, amortization of intangible assets and restructuring and other costs. We believe non-GAAP gross profit provides investors and other users of our financial information consistency and comparability with our past financial performance and facilitates period-to-period comparisons of gross profit.

The following table provides a reconciliation of gross profit to non-GAAP gross profit (in thousands):

	Year Ended June 30,		
	2024	2023	2022
GAAP gross profit	\$ 306,862	\$ 239,411	\$ 172,988
Adjusted to exclude the following:			
Stock-based compensation	7,322	5,621	4,287
Amortization of intangible assets	4,778	4,340	7,877
Restructuring and other costs	342	—	—
Non-GAAP gross profit	<u>\$ 319,304</u>	<u>\$ 249,372</u>	<u>\$ 185,152</u>

Non-GAAP Recurring Gross Profit

We define non-GAAP recurring gross profit as revenues from our GAAP SaaS and support and subscription license less GAAP SaaS and support cost of revenues adjusted for the portion of cost related to stock-based compensation expense and amortization of intangible assets. We believe non-GAAP recurring gross profit provides investors and other users of our financial information consistency and comparability with our past financial performance and facilitates period-to-period comparisons of recurring gross profit as management is focused on increasing sales associated with our recurring revenue stream.

The following table provides a reconciliation of recurring gross profit to non-GAAP recurring gross profit (in thousands):

	Year Ended June 30,		
	2024	2023	2022
SaaS and support	\$ 315,960	\$ 252,310	\$ 192,980
Subscription license	60,682	48,970	44,202
Total recurring revenues	376,642	301,280	237,182
Cost of revenues - SaaS and support	59,831	53,022	51,177
Total cost of recurring revenues	59,831	53,022	51,177
GAAP recurring gross profit	316,811	248,258	186,005
Adjusted to exclude the following:			
Stock-based compensation	2,292	1,705	1,258
Amortization of intangible assets	4,778	4,340	7,877
Non-GAAP recurring gross profit	<u>\$ 323,881</u>	<u>\$ 254,303</u>	<u>\$ 195,140</u>

Non-GAAP Operating Income (Loss)

We define non-GAAP operating income (loss) as GAAP operating loss excluding stock-based compensation expense, amortization of intangible assets, lease modification and impairment, change in fair value of contingent consideration, transaction costs related to acquisitions and certain non-capitalized offering-related expenses and restructuring and other costs. We believe non-GAAP operating income (loss) provides investors and other users of our financial information consistency and comparability with our past financial performance and facilitates period-to-period comparisons of GAAP operating loss.

The following table provides a reconciliation of GAAP operating loss to non-GAAP operating income (loss) (in thousands):

	Year Ended June 30,		
	2024	2023	2022
GAAP operating loss	\$ (32,191)	\$ (69,261)	\$ (99,456)
Adjusted to exclude the following:			
Stock-based compensation	59,895	67,769	77,514
Amortization of intangible assets	11,029	10,773	13,519
Lease modification and impairment	—	1,601	—
Change in fair value of contingent consideration	(3,290)	(1,762)	(639)
Transaction costs ⁽¹⁾	2,685	1,366	1,939
Restructuring and other costs	598	—	—
Non-GAAP operating income (loss)	<u>\$ 38,726</u>	<u>\$ 10,486</u>	<u>\$ (7,123)</u>

(1) Consists of acquisition-related transaction costs and costs related to certain non-capitalized offering-related expenses.

Indebtedness

On October 5, 2021, we entered into a Credit Agreement, as amended on June 6, 2022 and further amended on November 17, 2022, with a group of lenders led by JPMorgan. The Credit Agreement provides for a five-year, senior secured revolving credit facility of \$100.0 million with a sub-facility for letters of credit in the aggregate amount of up to \$10.0 million. Future borrowings under the JPMorgan Credit Facility will bear interest, at our election, at an annual rate based on either (a) an adjusted secured overnight financing rate (SOFR, as described in the Credit Agreement) plus a percentage spread (ranging from 1.75% to 2.50%) or (b) an alternate base rate (as described in the Credit Agreement) plus a percentage spread (ranging from 0.75% to 1.50%), in each case based on our total net leverage ratio. In addition, a commitment fee accrues with respect to the unused amount of the JPMorgan Credit Facility at an annual rate ranging from 0.25% to 0.40%, based on our total net leverage ratio. Subject to certain exceptions, our total net leverage ratio as of the end of each fiscal quarter may not exceed 3.50 to 1.00. We were in compliance with all of the covenants as of June 30, 2024.

As of June 30, 2024, no amounts have been borrowed under the JPMorgan Credit Facility.

Critical Accounting Policies and Estimates

The process of preparing our consolidated financial statements in conformity with GAAP requires the use of estimates and judgments that affect the reported amounts of assets, liabilities, revenues, and expenses. These estimates and judgments are based on historical experience, future expectations and other factors and assumptions we believe to be reasonable under the circumstances. The most significant estimates and judgments are reviewed on an ongoing basis and are revised when necessary. Actual amounts may differ from these estimates and judgments.

A summary of our significant accounting policies is contained in Note 2 of our audited consolidated financial statements included elsewhere in this Annual Report on Form 10-K.

Revenue Recognition

Revenue recognition requires judgment and the use of estimates, especially in identifying and evaluating the various non-standard terms and conditions in our contracts with clients and their effect on reported revenues.

We derive our revenues primarily from the Sales of our SaaS solutions, subscriptions to license our on-premises software, provision of support activities and professional services.

The estimates and assumptions requiring significant judgment under our revenue recognition policy are as follows:

Identification of the performance obligations

The majority of our contracts contain multiple performance obligations (such as when subscription licenses are sold with support and implementation services) and are typically capable of being distinct and accounted for as separate performance obligations.

Determination of the transaction price

We determine the transaction price based on the consideration to which we expect to be entitled in exchange for transferring our services and products to the client. We estimate variable consideration included in the transaction price if, in our judgment, it is probable that no significant future reversal of cumulative revenues under the contract will occur.

In instances where the timing of revenue recognition differs from the timing of invoicing, we have determined that contracts generally do not include a significant financing component.

Allocation of the transaction price to the performance obligations in the contract

If the contract contains a single performance obligation, we allocate the entire transaction price to the single performance obligation. Contracts that contain multiple performance obligations require an allocation of the transaction price to each performance obligation based on its relative standalone selling price (“SSP”). The determination of SSP involves judgment and is generally based on the contractually stated, observable prices of the promised goods and services charged when sold separately to client. In a contract with multiple performance obligations, we allocate revenues to each performance obligation at the inception of the contract. Some of our performance obligations have observable inputs that are used to determine the SSP of those distinct performance obligations. Where SSP is not directly observable, we determine the SSP using information that may include market conditions and other observable inputs.

Stock-Based Compensation

We calculate stock-based compensation expense related to stock option awards made to employees, consultants and directors based on the fair value of stock-based awards on the date of grant. We determine the grant date fair value of our stock option awards and stock purchase rights under the 2021 Employee Stock Purchase Plan (“ESPP”) using the Black-Scholes option pricing model, and recognize the related stock-based compensation in the consolidated statements of operations on a straight-line basis, over the period in which a participant is required to provide service in exchange for the stock-based award. We recognize forfeitures of stock-based awards as they occur.

We estimate the fair value of the ESPP for calculating stock-based compensation expense at the grant date using the Black-Scholes option-pricing model, which requires us to make subjective assumptions and judgments about the inputs used in the calculation, including the risk-free interest rates, expected term of the awards and the expected volatility of our common stock.

The fair value of restricted stock units (“RSUs”) and performance-based stock units (“PSUs”) is based on the closing price of our common stock on the date of the grant. We recognize stock-based compensation expense for RSUs over the requisite service period, which is generally four years. We recognize stock-based compensation expense for PSUs in the period in which it becomes probable that the performance target will be achieved, using the graded vesting method.

Goodwill

Goodwill represents the excess purchase price over fair value of net tangible and identifiable intangible assets acquired in our business combinations. We test goodwill for impairment on an annual basis during the fourth quarter or whenever events or changes in circumstances indicate the carrying amount may not be recoverable. We have determined that we have one reporting unit for purposes of our annual impairment evaluation. As part of the annual goodwill impairment test, we first assess the qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, as a result of its qualitative assessment, the carrying amount of the reporting unit is more than its fair value, an impairment charge in the amount of such excess is recorded to goodwill.

Business Combinations

The allocation of the purchase price in a business combination requires management to make significant estimates and assumptions to assign fair value to tangible and intangible assets acquired and liabilities assumed at the acquisition date. Critical estimates in valuing certain intangible assets include, but are not limited to, future expected cash flows, discount rates, revenue growth rates, expected lifecycle for acquired technologies, the time and expense to recreate the assets and profit margin a market participant would receive. Such estimates are inherently uncertain and subject to refinement. The excess of the purchase price in a business combination over the fair value of these tangible and intangible assets acquired and liabilities assumed is recorded as goodwill. We evaluate these estimates and assumptions and may record any adjustments to the preliminary estimates to goodwill within the measurement period, which is no later than one year from the acquisition date.

Contingent consideration liabilities arising from business combinations are initially measured at fair value on the acquisition date. Each reporting period thereafter, these obligations are revalued and increases or decreases to the fair value are recorded as adjustments to general and administrative expense in the consolidated statements of operations.

Recent Accounting Pronouncements

See Note 2 to our audited consolidated financial statements included elsewhere in this Annual Report on Form 10-K for more information regarding recent accounting pronouncements and our assessment of their impact.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

We are exposed to market risks in the ordinary course of our business, including foreign currency exchange rate, credit, inflation, and interest rate risks.

Foreign Currency Exchange Rate Risk

Our reporting currency is the U.S. dollar and the functional currency for all of our foreign subsidiaries is the U.S. dollar, except Rekoop Ltd., which uses the British pound.

The majority of our revenue and expenses are denominated in U.S. dollars. However, we have foreign currency risks as we have contracts with clients and payroll obligations and a limited number of supply contracts with vendors which have payments denominated in foreign currencies.

The volatility of exchange rates depends on many factors that we cannot forecast with reliable accuracy. We have experienced and will continue to experience fluctuations in foreign exchange gains and losses related to changes in foreign currency exchange rates. We have not engaged in the hedging of foreign currency transactions to date, although we may choose to do so in the future. Our exposure to foreign currency exchange risk relates primarily to our accounts receivable, cash balances, other employee compensation related obligations and lease liabilities denominated in currencies other than the U.S. dollar. If a hypothetical 10% change in foreign currency exchange rates were to occur in the future, the resulting gain or loss would be immaterial on our operating results over the next twelve months.

Credit Risk

We routinely assess the creditworthiness of our clients. We have not experienced any material losses related to non-payment of receivables from individual or groups of clients due to loss of creditworthiness during fiscal years 2024, 2023 and 2022. We had one client that represented in excess of 10% of our accounts receivable balance at each of June 30, 2024 and 2023. Due to these factors, management believes that we do not have additional credit risk beyond the amounts already provided for collection losses in our accounts receivable.

Inflation Risk

We do not believe that inflation has had a material effect on our business, results of operations, or financial condition. Nonetheless, if our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs, particularly if inflationary pressures occur during an economic downturn. Further, our clients may not buy new products or may refrain from expanding current product usage as a result of the impact of increasing costs on their spend. These matters could harm our business, results of operations, or financial condition.

Interest Rate Risk

Our exposure to market risk for changes in interest rates relates primarily to our cash held in cash deposits and cash equivalents invested in money market funds and our senior secured revolving credit facility of up to \$100.0 million.

As of June 30, 2024, we had cash and cash equivalents of \$208.4 million held with multiple high credit quality financial institutions, including investments in money market funds. Our investments are subject to market risk due to changes in interest rates, which may affect our interest income. A hypothetical 100 basis points increase or decrease in interest rates would not have a material impact on our operating results or the fair value of our cash and cash equivalents over the next twelve months.

As of June 30, 2024, we had no outstanding loan balance under our senior secured revolving credit facility. Future borrowings under this facility will accrue interest at a variable rate based on, at our election, either (a) an adjusted secured overnight financing rate (SOFR, as described in the Credit Agreement) plus a percentage spread (ranging from 1.75% to 2.50%) or (b) an alternate base rate (as described in the Credit Agreement) plus a percentage spread (ranging from 0.75% to 1.50%), in each case based on the Company's total net leverage ratio. As a result, we will be exposed to increased interest rate risk if we draw down on the facility.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and the Board of Directors of Intapp, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Intapp, Inc. and subsidiaries (the "Company") as of June 30, 2024 and 2023, the related consolidated statements of operations, comprehensive loss, convertible preferred stock and stockholders' equity (deficit), and cash flows, for each of the three years in the period ended June 30, 2024, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of June 30, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended June 30, 2024, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of June 30, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated August 26, 2024, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Revenues - Revenue Recognition– Refer to Notes 2 and 3 to the financial statements

Critical Audit Matter Description

The Company derives its revenues from the sale of its SaaS solutions and subscriptions to its term software applications, including support services, as well as the provision of professional services for implementation of its solutions. The majority of the Company's contracts contain multiple performance obligations. Revenue recognition for contracts with multiple performance obligations requires management judgment, especially in identifying and evaluating the various non-standard terms and conditions in the Company's contracts with its clients and their effect on reported revenues. Additionally, contracts that contain multiple performance obligations require the Company to identify the performance obligations and allocate the transaction price to each performance obligation using judgment and is generally based on the contractually stated, observable prices of the promised goods and services charged when sold separately.

We identified revenue recognition for material revenue contracts with multiple performance obligations as a critical audit matter because of the significant judgments made by management in evaluating the impact of any non-standard terms or conditions in the contracts that may impact the total transaction price, identification of performance obligations, and the allocation of revenues. Accordingly, performing audit procedures related to these material revenue contracts required a high degree of auditor judgment and an increased extent of effort.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the recognition of revenues from material revenue contracts with multiple performance obligations included the following, among others:

- We tested the effectiveness of controls over revenue recognition, including those over the accounting for non-standard terms, identification of performance obligations, determining the allocation of revenues in arrangements.
- We evaluated the Company's accounting policies in the context of the applicable accounting standards.
- We selected a sample of material revenue arrangements and performed the following procedures:
 - o We obtained and read the contracts and related contract documentation.
 - o We evaluated whether management properly identified the contract terms (including those that are non-standard) and tested management's application of the Company's policies, including the identification of the performance obligations, determination of the allocation of revenues in the arrangement.
 - o We tested the mathematical accuracy of management's calculations of revenues and the associated timing of revenues recognized in the financial statements.

We have served as the Company's auditor since 2018.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and the Board of Directors of Intapp, Inc.

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Intapp, Inc. and subsidiaries (the “Company”) as of June 30, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of June 30, 2024, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended June 30, 2024, of the Company and our report dated August 26, 2024, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Intapp, Inc.
Notes to Consolidated Financial Statements

Note 1. Description of Business

Intapp, Inc. (“Intapp” or the “Company”), formerly known as LegalApp Holdings, Inc., was incorporated in Delaware in November 2012. The Company is a holding company and conducts its operations through its wholly-owned subsidiary, Integration Appliance, Inc.

Intapp is a leading global provider of AI-powered solutions for professionals at advisory, capital markets and legal firms. The Company empowers the world’s premier accounting, consulting, investment banking, legal, private capital and real assets firms with the technology they need to operate more competitively, deliver timely insights to their professionals, and meet rapidly changing client, investor, and regulatory requirements. Using the power of Applied AI, its purpose-built vertical software as a service (“SaaS”) solutions accelerate the flow of information firmwide, activate expertise, empower teams, strengthen client relationships, manage risk, and help firms adapt more quickly in a highly complex ecosystem. The Company serves clients primarily in the United States (“U.S.”) and the United Kingdom (“U.K.”). References to “the Company,” “us,” “we,” or “our” in these consolidated financial statements refer to the consolidated operations of Intapp and its consolidated subsidiaries.

Note 2. Summary of Significant Accounting Policies

Basis of Presentation and Principles of Consolidation

The consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”) and reflect the consolidated results of operations, financial position, and cash flows of the Company and its consolidated subsidiaries, after eliminating all inter-company transactions and balances.

Use of Estimates

The preparation of the accompanying consolidated financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the amounts reported and disclosed in the consolidated financial statements and accompanying notes. Those estimates and assumptions include, but are not limited to, revenue recognition including determination of the standalone selling price (“SSP”) of the deliverables included in multiple deliverable revenue arrangements; allowance for credit losses; the depreciable lives of long-lived assets including intangible assets; the expected useful life of deferred commissions; the fair value of stock-based awards; the fair value of assets acquired and liabilities assumed in business combinations; goodwill and long-lived assets impairment assessment; the fair value of contingent consideration liabilities; the incremental borrowing rate used to determine the operating lease liabilities; valuation allowances on deferred tax assets; uncertain tax positions; and loss contingencies. The Company evaluates estimates and assumptions on an ongoing basis using historical experience and other factors and adjusts those estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ from these estimates, and those differences could be material to the consolidated financial statements.

Segment Information

Operating segments are defined as components of an entity for which separate financial information is available and that is regularly reviewed by the Chief Operating Decision Maker (“CODM”) in deciding how to allocate resources and assessing performance. The Company’s Chief Executive Officer is the Company’s CODM. The CODM reviews financial information presented on a consolidated basis for purposes of making operating decisions, allocating resources, and evaluating financial performance. As such, the Company has determined that it operates in one operating and reportable segment.

The Company’s property and equipment are primarily located in the U.S. Information about geographic revenues is included in Note 3.

Revenue Recognition

The Company's revenues are derived from the sale of its SaaS solutions and subscriptions to its term software applications, including support services, as well as the provision of professional services for the implementation of our solutions.

Revenue is recognized upon the transfer of control of services or to clients in an amount that reflects the consideration the Company expects to be entitled to in exchange for those services or products. The Company applies the following framework to recognize revenues:

- Identification of the contract, or contracts, with a customer;
- Identification of the performance obligations in the contract;
- Determination of the transaction price;
- Allocation of the transaction price to the performance obligations in the contract; and
- Recognition of revenues when, or as, the Company satisfies a performance obligation.

The Company records revenues net of applicable sales taxes collected. Sales taxes collected from clients are recorded in other current liabilities in the accompanying consolidated balance sheets and are remitted to state and local taxing jurisdictions based on the filing requirements of each jurisdiction.

SaaS and Support Revenue

SaaS and Support revenues include subscription fees from clients accessing our SaaS solutions, premium support services related to SaaS and subscription licenses, and updates, if any, to the subscribed service during the subscription term. The Company recognizes SaaS and Support revenues ratably over the contract term beginning on the commencement date of each contract, which is the date when the Company's service is available to our clients. The Company's contracts with clients typically include a fixed amount of consideration and are generally non-cancellable and without any refund-type provisions. The Company's SaaS subscriptions are generally sold as annual or multi-year terms with automatic annual renewal provisions on the expiration of the initial term. The initial term of our SaaS contract is generally one to three years in duration. Contracts with termination for convenience provision in certain multi-year contracts are accounted as an annual contract. Invoice is generally billed in advance on an annual basis for the SaaS and support services upon execution of the initial contract or subsequent renewal.

Subscription License Revenue

Subscription license revenue include subscription fees from providing clients with the right to functional intellectual property where clients can benefit from the subscription licenses on their own. Subscription license revenue is recognized at a point in time when control of our term software application is transferred to the client, which generally occurs at the time of delivery or upon commencement of the renewal term. Subscription license fees are generally billed in advance on an annual basis over the term of the license arrangement, which is typically non-cancelable.

Professional Services Revenue

Professional services arrangements sold on a time and materials basis are generally invoiced monthly in arrears and revenues are recognized as services are delivered. In instances where professional services arrangements are sold on a fixed price basis, invoicing occurs upon the achievement of project milestones and revenues are recognized over time using an input measure of time incurred to date relative to total estimated time to be incurred at project completion.

Contracts with Multiple Performance Obligations

The Company reviewed and concluded that each of the SaaS subscription, support services, subscription license and professional services noted above are performance obligations that are capable of being distinct. The Company evaluates the terms and conditions included within our client contracts to ensure appropriate revenue recognition, including whether products and services are considered distinct in the context of the contract and therefore should be accounted for separately or combined. For contracts with multiple performance obligations, the transaction price is allocated to the separate performance obligations on a relative SSP basis.

The Company uses historical sales transaction data, market conditions and other observable inputs, to determine the SSP for each distinct performance obligation. The Company's SSP ranges are reassessed periodically or when facts and circumstances change.

Contract Modifications

Contracts may be modified to account for changes in contract scope or price. The Company considers contract modifications to exist when the modification either creates new rights or obligations or changes the existing enforceable rights and obligations of either party. Contract modifications are accounted for prospectively when it results in the promise to deliver additional products and services that are distinct and contract price does not increase by an amount that reflects standalone selling price for the new goods or services.

Contract Balances

Contract Assets

The Company records contract assets when revenue recognized on a contract exceeds the billings. This generally occurs in multi-year subscription license arrangements where control of the software license is transferred at the inception of the contract, but the client is invoiced annually in advance over the term of the license.

Contract Liabilities

Contract liabilities consist of deferred revenues amounts from invoices related to unsatisfied performance obligation where the Company has the right to invoice in advance of revenue being recognized. Deferred revenue expected to be recognized within twelve months of the balance date is classified as current, while amounts exceeding this period are recorded as noncurrent.

Contract Costs

Contract costs consist of two components, client acquisition costs and costs to fulfill a contract. The Company's client acquisition costs consist primarily of commissions paid to its sales team. Commissions related to client acquisition and SaaS and support revenues are capitalized and amortized on a straight-line basis over the expected benefit period of up to four years. Commissions related to subscription licenses are expensed when control of the license is transferred to clients. The Company determines the expected useful life based on an estimated benefit period by evaluating our technology development life cycle, expected client relationship period and other factors. Amortization of deferred commissions is included in sales and marketing expense in the consolidated statements of operations.

Costs to fulfill a contract, or fulfillment costs, are only capitalized if they relate directly to a contract with a client, the costs generate or enhance resources that will be used to satisfy performance obligations in the future, and the costs are expected to be recoverable. The Company has not capitalized any fulfillment costs as of June 30, 2024 and 2023.

Cost of Revenues

Cost of revenues consists primarily of costs related to providing SaaS and professional services to the Company's clients, including personnel costs (salaries, bonuses and benefits, and stock-based compensation) and related expenses for client support and services personnel, as well as cloud infrastructure costs, third-party expenses, depreciation of fixed assets, amortization of capitalized software development costs and amortization associated with acquired intangible assets, and allocated overhead. The Company does not have any cost of revenues related to subscription licenses.

Research and Development Costs

Research and development costs comprise costs associated with the development of software products for sale. Research and development costs related to the development of software products for sale are charged to expense until technological feasibility has been established. Costs incurred thereafter are capitalized until the product is generally made available. The Company considers technological feasibility to be reached at approximately the same time a product is generally available to clients. The major components of research and development costs include salaries, bonuses and benefits, stock-based compensation, costs of third-party services, and allocations of various overhead and occupancy costs.

Advertising Costs

Advertising costs are expensed as incurred. Advertising expense was \$1.5 million, \$1.3 million and \$1.3 million for fiscal years ended June 30, 2024, 2023 and 2022, respectively.

Stock-Based Compensation

Compensation expense related to stock-based awards made to employees, consultants and directors are calculated based on the fair value of stock-based awards on the date of grant. The Company determines the grant date fair value of stock option awards and stock purchase rights under the 2021 Employee Stock Purchase Plan (“ESPP”) using the Black-Scholes option pricing model, and restricted stock units based on the fair value of the Company’s common stock on the date of grant. The related stock-based compensation for stock option awards and restricted stock units is recognized in the consolidated statements of operations on a straight-line basis, over the period in which a participant is required to provide service in exchange for the stock-based awards, which is generally four years. The Company recognizes compensation expense related to ESPP over the respective offering period, which is 6 months. The Company recognizes forfeitures of stock-based awards as they occur.

This valuation model for stock-based compensation expense requires the Company to make assumptions and judgments about the variables used in the calculation, including the expected term (weighted-average period of time that the options granted are expected to be outstanding), the volatility of the Company’s common stock and an assumed risk-free interest rate. No compensation cost is recorded for stock-based awards that do not vest.

The Company uses historical experience and future expectations to determine the expected term, and volatility is based on the historical volatilities of the Company’s common stock. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding with the expected life of the option.

The Company has issued performance-based stock options and performance-based stock units that vest based upon continued service through the vesting term and achievement of certain operating performance targets, including annual recurring revenues and annual contract value targets established by the Board of Directors for a predetermined period. The Company measures stock-based compensation expense for performance-based stock options based on the estimated grant date fair value determined using the Black-Scholes valuation model. The Company measures the fair value of the performance-based stock units based on the fair value of the Company’s common stock on the date of grant. The Company recognizes compensation expense for such awards in the period in which it becomes probable that the performance target will be achieved. Compensation expense for awards that contain performance conditions is calculated using the graded vesting method and the portion of expense recognized in any period may fluctuate depending on changing estimates of the achievement of the performance conditions.

Restricted Cash

Restricted cash represents amounts held as collateral under certain facility lease agreements.

Cash and Cash Equivalents

All highly-liquid investments with a remaining maturity of three months or less at the time of purchase are considered to be cash equivalents. Cash equivalents consist primarily of investments in institutional money market funds. The fair value of money market funds held was \$78.7 million as of June 30, 2024. There were no cash equivalents as of June 30, 2023.

Accounts Receivable and Allowance for Expected Credit Losses

Accounts receivable are recorded at invoiced amounts, net of allowance for expected credit losses. The Company evaluates the collectability of its accounts receivable based on known collection risks, historical experience and forecasts of future collectability, and maintains an allowance for expected credit losses for estimated losses resulting from its clients failing to make required payments for subscriptions or services rendered. Sufficiency of the allowance is assessed based upon knowledge of credit-worthiness of our clients, review of historical receivable and reserves trends and other pertinent information. Actual future losses from uncollectible accounts may differ from these estimates.

Changes in the allowance for expected credit losses are recorded as general and administrative expense in the consolidated statements of operations and were not significant for any of the periods presented.

Property and Equipment

Property and equipment are stated at cost, less accumulated depreciation and amortization. Construction-in-progress primarily consists of the construction or development of property and equipment that have not yet been placed into service for their intended use. Depreciation and amortization are calculated using the straight-line method over the estimated useful lives of the related assets. Depreciation on property and equipment, excluding leasehold improvements, ranges from two to seven years. Leasehold improvements are amortized using the straight-line method over the shorter of the estimated useful lives of the respective assets or the lease term. When assets are sold, or otherwise disposed of, the cost and related accumulated depreciation and amortization are removed from the balance sheet and any gain or loss is reflected in operating expenses. Maintenance and repair costs that do not extend the useful life of the assets are expensed as incurred.

Capitalized Internal-Use Software

Costs related to software acquired, developed, or modified solely to meet the Company's internal requirements, with no substantive plans to market such software at the time of development, or costs related to development of our hosted SaaS products are capitalized during the application development stage. Once the products are available for general release, capitalized costs are amortized to cost of revenue on a straight-line basis over its estimated useful life, which is generally four years. Capitalized internal-use software costs are recorded in property and equipment on the Company's consolidated balance sheets.

Goodwill and Acquired Intangible Assets

Goodwill represents the excess purchase price over fair value of net tangible and identifiable intangible assets acquired in a business combination. Goodwill is tested for impairment at least annually during the fourth quarter or whenever events or changes in circumstances indicate that the carrying amount of the goodwill may not be recoverable. The Company has determined that it is comprised of one reporting unit for purposes of its annual impairment evaluation. As part of the annual goodwill impairment test, the Company first assesses the qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, as a result of its qualitative assessment, the carrying amount of the reporting unit is more than its fair value, an impairment charge in the amount of such excess is recorded to goodwill.

Intangible assets resulting from the acquisition of entities are estimated by the Company based on the fair value of assets received. The fair value of intangible assets was derived based on the income approach. This fair value measurement is based on significant inputs that are not observable in the market. Key assumptions utilized in management's analysis included revenues and expense forecasts based on trends of historical performance and management's estimate of future performance, and estimated future cash flows discounted using a weighted-average cost of capital.

Acquired intangible assets consist of client relationships, non-compete agreements, trademarks and trade names, core technology and backlog. Certain assets are being amortized on a straight-line basis over the period of expected benefit with no calculated residual value, as follows:

Description	Period
Client relationships	9 to 15 years
Non-compete agreements	3 to 5 years
Trademarks and trade names	5 years to indefinite
Core technology	2 to 7 years
Backlog	2 years

Impairment Assessment of Long-lived Assets

The Company reviews long-lived assets with finite lives, which include property and equipment, capitalized internal-use software, lease right-of-use (“ROU”) assets and acquired intangible assets, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset group may not be recoverable or that the useful life is shorter than what was originally estimated. Recoverability of assets to be held and used is measured by comparing the carrying amount of each asset group to the estimated undiscounted future net cash flows expected to be generated by the asset group over its remaining life. If the carrying amount of the asset group exceeds its estimated future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset group exceeds the fair value of the asset group. If the useful life is shorter than originally estimated, the remaining carrying value is amortized over the new shorter useful life.

Business Combinations

Business combinations are accounted for using the acquisition method of accounting. The Company uses best estimates and assumptions to assign fair value to tangible and intangible assets acquired and liabilities assumed at the acquisition date. Such estimates are inherently uncertain and subject to refinement. The Company continues to collect information and reevaluate these estimates and assumptions and record any adjustments to the preliminary estimates to goodwill provided that the Company is within the measurement period. Upon the conclusion of the measurement period or final determination of the fair value of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded to the consolidated statements of operations. Expenses incurred in connection with a business combination are expensed as incurred.

Contingent consideration liabilities arising from business combinations are initially measured at fair value on the acquisition date. Each reporting period thereafter, these obligations are revalued and increases or decreases to the fair value are recorded as adjustments to general and administrative expense in the consolidated statements of operations.

Fair Value of Financial Instruments

The Company applies authoritative guidance for fair value measurements and disclosures for financial assets and liabilities measured on a recurring basis and nonfinancial assets and liabilities. Assets and liabilities recorded at fair value are categorized based upon the level of judgment associated with the inputs used to measure their fair value.

Leases

The Company leases its office space under non-cancelable operating lease agreements. The Company determines whether an arrangement constitutes a lease and records lease liabilities and ROU assets on its consolidated balance sheets at the lease commencement date. Lease liabilities are measured based on the present value of the total lease payments not yet paid, discounted based on either the rate implicit in the lease or the Company's incremental borrowing rate, whichever is more readily determinable. Lease liabilities due within 12 months are included within other current liabilities on the Company's consolidated balance sheets. The incremental borrowing rate is based on an estimate of the Company's expected senior unsecured borrowing rate based on synthetic credit rating, adjusted for collateralization. ROU assets are measured based on the corresponding lease liability adjusted for (i) payments made to the lessor at or before the lease commencement date, (ii) initial direct costs incurred, and (iii) tenant incentives received, incurred or payable under the lease. Recognition of rent expense begins when the lessor makes the underlying asset available to the Company.

The Company does not assume renewals or early terminations of its leases unless it is reasonably certain to exercise these options at commencement and does not allocate consideration between lease and non-lease components. For short-term leases, the Company records rent expense in its consolidated statements of operations on a straight-line basis over the lease term and records variable lease payments as incurred.

ROU assets are evaluated for impairment whenever events or changes in the circumstances indicate that the carrying amount may not be recoverable.

Foreign Currency

The functional currency for all of our foreign subsidiaries is the U.S. dollar, except Rekoop Ltd., which uses the British pound. The Company translates the foreign functional currency financial statements to U.S. dollars for those entities that do not have U.S. dollars as their functional currency using the exchange rates at the balance sheet date for assets and liabilities, the period average exchange rates for revenues and expenses, and the historical exchange rates for equity transactions. The effects of foreign currency translation adjustments are reflected in stockholders' equity (deficit) as a component of accumulated other comprehensive loss.

Transaction gains and losses that arise from exchange rate fluctuations on transactions denominated in a currency other than the functional currency are recorded as foreign currency transaction adjustments within interest and other income (expense) in the consolidated statements of operations.

Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss, which is reported in the accompanying consolidated statements of stockholders' equity (deficit), consists of net loss and foreign currency translation adjustments. The Company's other comprehensive loss consists of changes in the cumulative effect of translation of financial statements of certain wholly owned foreign subsidiaries.

Concentrations of Credit Risk and Significant Clients

Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash and accounts receivable. The Company maintains its cash and cash equivalents with multiple high credit quality financial institutions. The Company is exposed to credit risk for cash held in financial institutions to the extent that such amounts recorded on the balance sheet are in excess of amounts that are insured by the Federal Deposit Insurance Corporation. The Company has not experienced any such losses.

No client individually accounted for 10% or more of the Company's revenues for any of the fiscal years ended June 30, 2024, 2023 and 2022. As of June 30, 2024 and 2023, one client individually accounted for 16% and 15% of the Company's total accounts receivable, respectively.

Income Taxes

The Company accounts for income taxes using the asset and liability method. Under this method, deferred income tax assets and liabilities are recorded based on the estimated future tax effects of differences between the financial statement and income tax basis of existing assets and liabilities. These differences are measured using the enacted statutory tax rates that are expected to apply to taxable income for the years in which differences are expected to reverse. The Company recognizes the effect on deferred income taxes of a change in tax rates in the period that includes the enactment date. The Company records a valuation allowance to reduce its deferred tax assets to the net amount that it believes is more-likely-than-not to be realized. Management considers all available evidence, both positive and negative, including historical levels of income, expectations and risks associated with estimates of future taxable income and ongoing tax planning strategies in assessing the need for a valuation allowance.

The Company operates in various tax jurisdictions and is subject to audit by various tax authorities. The Company provides for tax contingencies whenever it is deemed probable that a tax asset has been impaired or a tax liability has been incurred for events such as tax claims or changes in tax laws. Tax contingencies are based upon their technical merits, relative tax law, and the specific facts and circumstances as of each reporting period. The Company establishes liabilities or reduce assets for uncertain tax positions when the Company believes certain tax positions are more likely than not of not being sustained if challenged. Changes in facts and circumstances could result in material changes to the amounts recorded for such tax contingencies.

Net Loss Per Share

The Company's basic net loss per share is calculated by dividing net loss by the weighted-average number of shares of common stock outstanding for the period, without consideration of potentially dilutive securities. The diluted net loss per share is calculated by giving effect to all potentially dilutive securities outstanding for the period using the treasury stock method or the if-converted method based on the nature of such securities. For periods in which the Company reports net losses, diluted net loss per share is the same as basic net loss per share because potentially dilutive common shares are not assumed to have been issued if their effect is anti-dilutive.

Recently Adopted Accounting Pronouncements

In June 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-13, *Financial Instruments – Credit Losses*, which requires the establishment of an allowance for estimated credit losses on financial assets, including trade and other receivables, at each reporting date. The Company adopted this guidance on July 1, 2023 on a modified retrospective basis. The adoption did not have a material impact on its consolidated financial statements.

Accounting Pronouncements Not Yet Adopted

In November 2023, the FASB issued ASU No. 2023-07, *Segment Reporting (ASC 280): Improvements to Reportable Segment Disclosures*, which expands annual and interim disclosure requirements for reportable segments, primarily through enhanced disclosures about significant segment expenses. This guidance will be effective for the Company's annual report for fiscal year beginning July 1, 2024, and should be applied on a retrospective basis to all periods presented. The Company is currently evaluating the impact of the adoption on its disclosures.

In December 2023, the FASB issued ASU No. 2023-09, *Income Taxes (ASC 740): Improvements to Income Tax Disclosures*, which requires additional income tax disclosures to better assess how an entity's operations, related tax risks, tax planning and operational opportunities affect its tax rate and prospects of future cash flows. This guidance will be effective for the Company's fiscal year beginning July 1, 2025, and should be applied on a prospective or retrospective basis. The Company expects the adoption to result in additional disclosures only.

Note 3. Revenues

Disaggregation of Revenues

Revenues by geography were as follows (in thousands):

	Year Ended June 30,		
	2024	2023	2022
U.S.	\$ 292,009	\$ 243,237	\$ 188,971
U.K.	64,199	54,326	45,025
Rest of the world	74,315	53,310	38,075
Total	<u>\$ 430,523</u>	<u>\$ 350,873</u>	<u>\$ 272,071</u>

No country other than those listed above accounted for 10% or more of the Company's revenues during the fiscal years ended June 30, 2024, 2023 and 2022.

Client Contract — Related Balance Sheet Amounts

Deferred Commissions

The following table summarizes the activity of deferred commissions (in thousands):

	Year Ended June 30,	
	2024	2023
Beginning balance	\$ 28,336	\$ 24,942
Additions	18,856	16,242
Recognition of deferred commissions	(14,790)	(12,848)
Ending balance	<u>\$ 32,402</u>	<u>\$ 28,336</u>

Contract Balances

The Company's contract assets and liabilities were as follows (in thousands):

	June 30, 2024	June 30, 2023
Unbilled accounts receivable ⁽¹⁾	\$ 13,363	\$ 10,765
Deferred revenue, net	222,486	192,397

(1) The long-term portion of \$63 and \$104 as of June 30, 2024 and 2023, respectively, is included in other assets on the consolidated balance sheets.

There was no allowance for credit losses associated with unbilled receivables as of June 30, 2024 and 2023. During the fiscal year ended June 30, 2024, the Company recognized \$190.4 million in revenue pertaining to deferred revenue as of June 30, 2023.

Remaining Performance Obligations

Remaining performance obligations represent non-cancellable contracted revenues that have not yet been recognized, which includes deferred revenue and amounts that will be invoiced and recognized as revenues in future periods. SaaS subscription is typically satisfied over one to three years, subscription license is typically satisfied at a point in time, support services are generally satisfied within one year, and professional services are typically satisfied within one year. Professional services contracts are not included in the performance obligations amount.

As of June 30, 2024, approximately \$566.5 million of revenues is expected to be recognized from remaining performance obligations with approximately 55% over the next 12 months and the remainder thereafter.

Note 4. Business Combinations

delphai

On April 3, 2024, the Company, through its wholly-owned subsidiary, acquired a 100% equity interest in delphai GmbH (“delphai”), a company which specializes in applied AI for firmographic data automation, structuring and intelligence. The transaction has been accounted for as a business combination.

The goodwill balance is primarily attributable to the expected revenue opportunities with the Company’s applications and services offerings, other unidentified assets and acquired workforce. The goodwill recorded is not expected to be deductible for income tax purposes.

Acquisition-related transaction costs of \$0.9 million, consisting primarily of third-party professional fees, were expensed as incurred and are included in general and administrative expenses in the Company’s consolidated statement of operations for the fiscal year ended June 30, 2024.

The following table summarizes the allocation of the consideration to the fair values of the assets acquired and liabilities assumed at the acquisition date (in thousands):

	Amount
Cash paid	\$ 11,818
Holdback	1,691
Total purchase consideration	13,509
Goodwill	5,433
Core technology	6,800
Net assets acquired (inclusive of deferred tax assets of \$253)	1,276
Total	\$ 13,509

Pro forma financial information related to this acquisition has not been presented as the effects of the acquisition described above were not material to the Company’s consolidated financial results. Revenue and net loss attributable to delphai included in the Company's consolidated statement of operations for the fiscal year ended June 30, 2024 were immaterial.

TDI

On May 1, 2024, the Company, through its wholly-owned subsidiary, acquired a 100% equity interest in Transform Data International B.V. and its subsidiaries (“TDI”), a software and professional services provider and reseller of Intapp’s products. The transaction has been accounted for as a business combination.

The goodwill balance is primarily attributable to the expected revenue opportunities with the Company’s applications and services offerings, other unidentified assets and acquired workforce. The goodwill recorded is not expected to be deductible for income tax purposes.

Acquisition-related transaction costs of \$0.7 million, consisting primarily of third-party professional fees, were expensed as incurred and are included in general and administrative expenses in the Company’s consolidated statements of operations for the fiscal year ended June 30, 2024.

The following table summarizes the allocation of the consideration to the fair values of the assets acquired and liabilities assumed at the acquisition date (in thousands):

	Amount
Cash paid	\$ 2,149
Deferred consideration	1,262
Fair value of contingent consideration	99
Total purchase consideration	3,510
Goodwill	1,639
Core technology	1,265
Net assets acquired (inclusive of deferred tax liabilities of \$240)	606
Total	\$ 3,510

Pro forma financial information related to this acquisition has not been presented as the effects of the acquisition described above were not material to the Company's consolidated financial results. Revenue and net loss attributable to TDI included in the Company's consolidated statement of operations for the fiscal year ended June 30, 2024 were immaterial.

Paragon

On May 2, 2023, the Company, through its wholly-owned subsidiary, acquired a 100% equity interest in Paragon Data Labs, Inc. ("Paragon"), a cloud-based employee compliance software solution provider, in accordance with the terms of the Agreement and Plan of Merger, dated as of the same date. The employee compliance solution addresses regulatory compliance by leveraging advanced technology to monitor, identify, and manage employee adherence to firm policies, enhancing the Intapp Risk and Compliance management solutions to help firms ensure personal independence.

The total consideration for the acquisition consisted of \$7.6 million (in cash and shares of its common stock) paid at closing, \$1.8 million of deferred consideration and holdbacks (payable in cash and shares of the Company's common stock) and \$4.3 million in the fair value of contingent consideration payable in cash on achievement of certain performance measures.

The goodwill balance is primarily attributable to the expected revenue opportunities with the Company's applications and services offerings, other unidentified assets and acquired workforce. The goodwill recorded is not expected to be deductible for income tax purposes.

Acquisition-related transaction costs of \$1.2 million, consisting primarily of third-party professional fees, were expensed as incurred and are included in general and administrative expenses in the Company's consolidated statements of operations for the fiscal year ended June 30, 2023.

The following table summarizes the allocation of the consideration to the fair values of the assets acquired and liabilities assumed at the acquisition date (in thousands):

	Amount
Cash and stock paid	\$ 7,587
Deferred consideration	565
Cash and stock holdbacks	1,223
Fair value of contingent consideration	4,317
Total purchase consideration	13,692
Goodwill	8,669
Non-compete agreement	500
Core technology	3,300
Client relationships	1,300
Backlog	500
Net liabilities acquired (inclusive of deferred tax liabilities of \$186)	(577)
Total	<u>\$ 13,692</u>

Pro forma financial information related to this acquisition has not been presented as the effects of the acquisition described above were not material to the Company's consolidated financial results. Revenue and net loss attributable to Paragon included in the Company's consolidated statement of operations for the fiscal year ended June 30, 2023 were immaterial.

Billstream

On June 13, 2022, the Company acquired the assets of Billstream LLC ("Billstream"), a pre-billing automation and workflow solution, from legal operations specialist Wilson Allen. The solution leverages advanced technology to simplify the preparation and validation of prebills and proforma invoices, enhancing the Intapp Operations & Finance suite to create a comprehensive billing and time tracking software solution. The transaction has been accounted for as a business combination.

The total consideration for the acquisition was \$18.5 million, which consisted of initial cash consideration of \$2.5 million paid at closing, deferred purchase consideration of \$10.4 million paid in full in fiscal year 2023, contingent consideration estimated at \$4.1 million and amounts held back in the amount of \$1.5 million. The contingent consideration will be payable based upon the achievement of certain performance measures, calculated as of September 30, 2023.

The goodwill balance is primarily attributable to the expected revenue opportunities with the Company's applications and services offerings, other unidentified assets and acquired workforce. The goodwill recorded is expected to be deductible for income tax purposes.

Acquisition-related transaction costs of \$0.2 million, consisting primarily of third-party professional fees, were expensed as incurred and are included in general and administrative expenses in the Company's consolidated statements of operations for the fiscal year ended June 30, 2022.

The following table summarizes the allocation of the consideration to the fair values of the assets acquired and liabilities assumed at the acquisition date (in thousands):

	Amount
Cash paid	\$ 2,500
Deferred consideration	10,390
Holdback	1,500
Fair value of contingent consideration	4,126
Total purchase consideration	18,516
Goodwill	7,974
Non-compete agreement	300
Core technology	2,200
Client relationships	6,600
Backlog	500
Net assets acquired	942
Total	<u>\$ 18,516</u>

Pro forma financial information related to this acquisition has not been presented as the effects of the acquisition described above were not material to the Company's consolidated financial results.

Note 5. Goodwill and Intangible Assets

Goodwill

Changes in the carrying amounts of goodwill were as follows (in thousands):

	Year Ended June 30,	
	2024	2023
Balance, beginning of period	\$ 278,890	\$ 269,103
Goodwill acquired during the period	7,072	8,669
Purchase price adjustment	—	784
Foreign currency translation adjustment	7	334
Balance, end of period	<u>\$ 285,969</u>	<u>\$ 278,890</u>

During the fiscal year ended June 30, 2023, the Company recognized a purchase price adjustment of \$0.8 million related to the Billstream business acquisition that occurred in June 2022, which increased goodwill and deferred consideration.

No impairment of goodwill has been recorded for the fiscal years ended June 30, 2024, 2023 and 2022.

Intangible Assets

Intangible assets acquired through business combinations consisted of the following (in thousands):

	June 30, 2024			
	Useful Life (In years)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Client relationships	9 to 15	\$ 48,900	\$ (28,949)	\$ 19,951
Non-compete agreements	3 to 5	4,907	(4,035)	872
Trademarks and trade names	Indefinite	4,683	—	4,683
Trademarks and trade names	5 to 10	7,822	(5,773)	2,049
Core technology	2 to 7	60,584	(48,054)	12,530
Backlog	2	1,000	(792)	208
Intangible assets, net		<u>\$ 127,896</u>	<u>\$ (87,603)</u>	<u>\$ 40,293</u>

	June 30, 2023			
	Useful Life (In years)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Client relationships	9 to 15	\$ 48,900	\$ (24,341)	\$ 24,559
Non-compete agreements	3 to 5	4,907	(3,383)	1,524
Trademarks and trade names	Indefinite	4,683	—	4,683
Trademarks and trade names	5 to 10	7,822	(5,270)	2,552
Core technology	4 to 6	52,519	(43,275)	9,244
Backlog	2	1,000	(305)	695
Intangible assets, net		<u>\$ 119,831</u>	<u>\$ (76,574)</u>	<u>\$ 43,257</u>

Amortization expense related to acquired intangible assets was recognized as follows (in thousands):

	Year Ended June 30,		
	2024	2023	2022
Cost of SaaS and support	\$ 4,778	\$ 4,340	\$ 7,877
Sales and marketing	5,599	5,921	5,214
General and administrative	652	512	428
Total amortization expense	<u>\$ 11,029</u>	<u>\$ 10,773</u>	<u>\$ 13,519</u>

There was no impairment of intangible assets recorded during the fiscal years ended June 30, 2024, 2023 and 2022.

As of June 30, 2024, the estimated future amortization expense for acquired intangible assets is as follows (in thousands):

Fiscal Year Ending June 30,	Amount
2025	\$ 11,163
2026	7,835
2027	5,121
2028	4,623
2029	3,252
2030 and thereafter	3,616
Total remaining amortization	<u>\$ 35,610</u>

Note 6. Fair Value Measurements

The authoritative guidance on fair value measurements establishes a three-tier fair value hierarchy for disclosure of fair value measurements as follows:

Level 1—Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date;

Level 2—Inputs are quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability;

Level 3—Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

Money market funds are classified as Level 1 as the assets are valued using quoted prices in active markets. Liabilities for contingent consideration related to business combinations are classified as Level 3 liabilities as the Company uses unobservable inputs in the valuation, specifically related to the projected total contract value generated by the acquired businesses for a distinct period of time.

The following table sets forth the Company's financial assets that were measured at fair value on a recurring basis as of the date indicated by level within the fair value hierarchy (in thousands):

	June 30, 2024			
	Level 1	Level 2	Level 3	Total
Financial assets:				
Cash equivalents:				
Money market funds	\$ 78,677	\$ —	\$ —	\$ 78,677
Total financial assets	<u>\$ 78,677</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 78,677</u>

The following tables set forth the Company's financial liabilities that were measured at fair value on a recurring basis as of the dates indicated by level within the fair value hierarchy (in thousands):

	June 30, 2024			
	Level 1	Level 2	Level 3	Total
Financial Liabilities:				
Liability for contingent consideration, current portion	\$ —	\$ —	\$ 2,405	\$ 2,405
Liability for contingent consideration, non-current portion	—	—	153	153
Total financial liabilities	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 2,558</u>	<u>\$ 2,558</u>

	June 30, 2023			
	Level 1	Level 2	Level 3	Total
Financial Liabilities:				
Liability for contingent consideration, current portion	\$ —	\$ —	\$ 2,364	\$ 2,364
Liability for contingent consideration, non-current portion	—	—	4,317	4,317
Total financial liabilities	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 6,681</u>	<u>\$ 6,681</u>

In connection with the acquisition of TDI, the Company recorded a contingent consideration liability of \$0.2 million on the acquisition date for the estimated fair value of the contingent consideration. The fair value was measured based on the probability of achieving certain performance measures pursuant to the acquisition agreement. In addition, the Company is obligated to pay up to \$0.9 million in cash on achievement of certain performance measures and continued employment or service with the Company or its subsidiaries. The fair value of \$0.9 million in future compensation costs are accounted for as post-combination compensation costs to be recognized over the required service period.

In connection with the acquisition of Paragon, the Company recorded a contingent consideration liability of \$4.3 million on the acquisition date for the estimated fair value of the contingent consideration. The fair value was measured based on the probability of achieving certain performance measures pursuant to the acquisition agreement. The liability of \$4.3 million was included in other liabilities on the consolidated balance sheet as of June 30, 2023. The fair value of the contingent consideration was re-measured at \$2.4 million and was included in other current liabilities on the consolidated balance sheet as of June 30, 2024.

In connection with the acquisition of Billstream, the Company recorded a contingent consideration liability of \$4.1 million on the acquisition date for the estimated fair value of the contingent consideration. The fair value was measured based on the probability of achieving certain performance measures pursuant to the acquisition agreement. The fair value of the contingent consideration was re-measured at \$2.4 million and was included in other current liabilities on the balance sheet as of June 30, 2023. During the fiscal year ended June 30, 2024, the Company paid \$1.0 million in full consideration for the remaining contingent consideration.

In connection with the acquisition of Repstor Limited (“Repstor”) in June 2021, the Company recorded contingent consideration liabilities representing the amounts payable to former Repstor shareholders based upon the achievement of certain performance measures. During the fiscal year ended June 30, 2023, the Company paid \$9.3 million in full consideration for the remaining contingent consideration.

The fair value of the contingent consideration was initially estimated on the acquisition date using the Monte Carlo simulation and included key assumptions used by management related to the estimated probability of occurrence and discount rates. Subsequent changes in the fair value of the contingent consideration liabilities, resulting from management’s revision of key assumptions and estimates, have been recorded in general and administrative expenses in the consolidated statements of operations. Gains and losses arising from exchange rate fluctuation on these liabilities not denominated in U.S. dollars have been included in interest and other income (expense), net on the consolidated statements of operations.

Changes in the fair value of contingent consideration liabilities during fiscal years ended June 30, 2024 and 2023 were as follows (in thousands):

	Year Ended June 30,	
	2024	2023
Balance, beginning of period	\$ 6,681	\$ 13,835
Contingent consideration accrued at acquisition	152	4,317
Payment of contingent consideration	(985)	(9,299)
Change in fair value of contingent consideration	(3,290)	(1,762)
Effect of foreign currency exchange rate changes	—	(410)
Balance, end of period	<u>\$ 2,558</u>	<u>\$ 6,681</u>

Other financial instruments consist of accounts receivable, accounts payable, accrued expenses, accrued liabilities and other current liabilities, which are stated at their carrying value as it approximates fair value due to the short time to expected receipt or payment.

Note 7. Property and Equipment

Property and equipment, net, consisted of the following (in thousands):

	June 30, 2024	June 30, 2023
Computer equipment and software	\$ 3,691	\$ 2,290
Capitalized internal-use software	23,701	16,978
Furniture and office equipment	2,403	2,433
Leasehold improvements	5,601	5,897
Construction in progress	163	386
Total property and equipment	35,559	27,984
Less: accumulated depreciation and amortization	(16,615)	(11,618)
Property and equipment, net	<u>\$ 18,944</u>	<u>\$ 16,366</u>

Depreciation expense, excluding the amortization of capitalized internal-use software costs, was \$2.1 million, \$1.6 million and \$1.3 million for fiscal years ended June 30, 2024, 2023 and 2022, respectively.

The Company capitalized \$6.8 million, \$5.9 million and \$4.2 million of costs related to software developed for internal use during the fiscal years ended June 30, 2024, 2023 and 2022, respectively. Amortization expense related to capitalized internal-use software was \$3.6 million, \$2.9 million and \$1.9 million for fiscal years ended June 30, 2024, 2023 and 2022, respectively. The net book value of capitalized internal-use software was \$13.5 million and \$10.3 million as of June 30, 2024 and 2023, respectively.

Note 8. Leases

The Company leases the majority of its office space in the U.S., U.K., Netherlands, Ukraine, Germany and Singapore under non-cancelable operating lease agreements, which have various expiration dates through November 2030, some of which include options to extend the leases for up to 5 years.

As part of the Company's continuing assessment of its facilities requirements, during the fiscal year ended June 30, 2023, the Company exited a portion of the leased office space in its headquarters in Palo Alto, California and amended the underlying lease agreement to relieve the Company of certain lease payments. As a result, the Company assessed the operating ROU asset associated with the leased office space and deemed it to be impaired. The Company also assessed the lease liability in view of the amended lease agreement. The Company recorded a net charge of \$1.6 million in connection with the impairment of the related operating ROU asset and the reassessment of the operating lease liability, which was included in its consolidated statements of operations for the fiscal year ended June 30, 2023.

In February 2024, the Company further amended the lease in Palo Alto to extend the existing leased office space for an additional 12 months through August 2025. The Company accounted for these lease extensions as lease modifications and recorded an adjustment of \$2.2 million and \$2.5 million to the operating ROU asset and operating lease liability on the consolidated balance sheets as of June 30, 2024 and 2023, respectively.

The components of lease costs were as follows (in thousands):

	Year Ended June 30,	
	2024	2023
Operating Leases:		
Operating lease cost ⁽¹⁾	\$ 6,353	\$ 6,113
Short-term lease cost	1,290	843
Variable lease cost	455	—

(1) Amount excluded a net charge of \$1.6 million related to lease modification and impairment for the fiscal year ended June 30, 2023 as described above.

Rent expense for operating leases recognized prior to the adoption of ASC 842 for the fiscal year ended June 30, 2022 was \$9.0 million.

The weighted-average remaining lease term of the Company's operating leases and the weighted-average discount rate used to measure the present value of the operating lease liabilities are as follows:

Lease Term and Discount Rate:	June 30, 2024	June 30, 2023
Weighted-average remaining lease term (in years)	5.3	6.0
Weighted-average discount rate	7.0%	7.1%

The following table presents supplemental cash flow information related to the Company's operating leases (in thousands):

	Year Ended June 30,	
	2024	2023
Cash payments included in the measurement of operating lease liabilities	\$ 5,847	\$ 7,582
ROU assets obtained in exchange for new operating lease liabilities	8,983	3,253

Current operating lease liabilities of \$6.0 million and \$4.7 million were included in other current liabilities on the Company's consolidated balance sheets as of June 30, 2024 and 2023, respectively.

As of June 30, 2024, remaining maturities of operating lease liabilities are as follows (in thousands):

Fiscal Year Ending June 30,	Amount
2025	\$ 7,558
2026	5,273
2027	4,324
2028	4,617
2029	5,032
2030 and thereafter	3,760
Total lease payments	30,564
Less: imputed interest	(4,956)
Present value of operating lease liabilities	<u>\$ 25,608</u>

Note 9. Commitments and Contingencies

Other Purchase Commitments

The Company's other purchase commitments primarily consist of third-party cloud services, support fees and software subscriptions to support operations in the ordinary course of business. Future minimum payments under the Company's non-cancelable purchase commitments as of June 30, 2024 are as follows (in thousands):

Year ending June 30,	Amount
2025	\$ 5,459
2026	3,106
2027	2,816
2028	2,879
2029	800
2030 and thereafter	1,600
Total purchase commitments	<u>\$ 16,660</u>

In December 2021, the Company entered into an agreement with Microsoft, pursuant to which the Company is committed to spend a minimum of \$110.0 million on cloud services. The committed spend period concludes at the end of December 2028, with the Company having the option to extend any remaining commitment into a further 12 month period to the end of December 2029. As of June 30, 2024, the Company had \$94.7 million remaining on this commitment.

Litigation

From time to time, the Company is a party to claims, lawsuits, and proceedings which arise in the ordinary course of business. The Company warrants to its clients that it has all necessary rights and licenses to the intellectual property comprised in its products and services and indemnifies those clients against intellectual property claims with respect to such products and services, so such claims, lawsuits and proceedings might in the future include claims of alleged infringement of intellectual property rights. The Company records a liability when it believes that it is probable that a loss will be incurred, and the amount of loss or range of loss can be reasonably estimated. Given the unpredictable nature of legal proceedings, the Company bases its estimate on the information available at the time of the assessment. As additional information becomes available, the Company reassesses the potential liability and may revise the estimate. The Company is not presently a party to any litigation the outcome of which, it believes, if determined adversely to the Company, would individually or in the aggregate have a material adverse effect on the business, operating results, or financial condition.

Note 10. Debt

On October 5, 2021, the Company entered into a Credit Agreement, as amended on June 6, 2022 and further amended on November 17, 2022 (the “Credit Agreement”) among the Company, the guarantors party thereto, the lenders party thereto and JPMorgan Chase Bank, N.A., as Administrative Agent (“JPMorgan”). The Credit Agreement provides for a five-year, senior secured revolving credit facility of \$100.0 million with a sub-facility for letters of credit in the aggregate amount of up to \$10.0 million (the “JPMorgan Credit Facility”). The Credit Agreement also provides that the Company may seek additional revolving credit commitments in an aggregate amount not to exceed \$50.0 million, subject to certain administrative procedures, including approval by the Administrative Agent. Future borrowings under the JPMorgan Credit Facility will bear interest, at the Company’s election, at an annual rate based on either (a) an adjusted secured overnight financing rate (SOFR, as described in the Credit Agreement) plus a percentage spread (ranging from 1.75% to 2.50%) or (b) an alternate base rate (as described in the Credit Agreement) plus a percentage spread (ranging from 0.75% to 1.50%), in each case based on the Company’s total net leverage ratio. In addition, a commitment fee accrues with respect to the unused amount of the JPMorgan Credit Facility at an annual rate ranging from 0.25% to 0.40%, based on the Company’s total net leverage ratio.

In connection with the execution of the Credit Agreement, the Company also entered into a pledge and security agreement (the “Security Agreement”) dated as of October 5, 2021 among the Company, the subsidiary grantors thereto and JPMorgan, as administrative agent for the secured parties. Under the Security Agreement, borrowings under the JPMorgan Credit Facility are secured by a first priority pledge of all of the capital stock and substantially all of the assets (excluding real estate interests) of each subsidiary of the Company and the subsidiary guarantors.

The Credit Agreement provides that the Company must maintain compliance with a maximum consolidated total net leverage ratio covenant, as determined in accordance with the Credit Agreement. It also contains affirmative, negative and financial covenants, including limitations on certain other indebtedness, loans and investments, liens, mergers, asset sales, and transactions with affiliates, as well as customary events of default. The Company was in compliance with all covenants as of June 30, 2024.

As of June 30, 2024, there were no outstanding borrowings under the JPMorgan Credit Facility.

Note 11. Stockholders’ Equity and Stock-Based Compensation

On July 2, 2021, upon the closing of the IPO, all outstanding shares of Series A and Series A-1 convertible preferred stock were automatically converted into 19,034,437 shares of the Company’s common stock on a one-for-one basis.

Equity Incentive Plans

In June 2021, the Company’s Board of Directors adopted, and its stockholders approved, the 2021 Omnibus Incentive Plan (the “2021 Plan”) and the 2021 Employee Stock Purchase Plan (“ESPP”). The 2021 Plan provides for the grant of restricted shares, restricted share units (“RSUs”), performance shares, performance share units (“PSUs”), deferred share units, share options and share appreciation rights. All employees, non-employee directors and selected third-party service providers of the Company and its subsidiaries and affiliates are eligible to receive grants under the 2021 Plan. Eligible employees may purchase the Company’s common stock under the ESPP.

Both the 2021 Plan and ESPP include a provision to increase the share reserves on July 1 of each year through 2031. On July 1, 2024, 4,328,205 and 865,641 shares were added to the 2021 Plan and ESPP, respectively.

As of June 30, 2024, shares of common stock reserved for future issuance were as follows (in thousands):

	June 30, 2024
Stock plans:	
Outstanding stock options	6,866
Unvested PSUs and RSUs	5,074
Reserved for ESPP	2,764
Reserved for future stock award grants	5,516
Total shares of common stock reserved for issuance	<u>20,220</u>

Stock Awards

The Company has granted time-based and performance-based stock options, RSUs and PSUs, collectively referred to as “Stock Awards.” The Company accounts for stock-based compensation using the fair value method which requires the Company to measure stock-based compensation based on the grant-date fair value of the awards and recognize compensation expense over the requisite service or performance period. Awards that contain only service conditions, are generally earned over four years and expensed on a straight-line basis over that term. Compensation expense for awards that contain performance conditions is calculated using the graded vesting method and the portion of expense recognized in any period may fluctuate depending on changing estimates of the achievement of the performance conditions.

Stock Options

Stock options granted generally become exercisable ratably over a four-year period following the date of grant and expire ten years from the date of grant. The exercise price of stock options granted under the Plan after the IPO was determined based on the fair market value of Company’s common stock on the date of grant.

Stock option activity under the Company’s equity incentive plans during the fiscal years ended June 30, 2024 and 2023 was as follows (in thousands, except per share data):

	Number of Options	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value ⁽¹⁾
Balance as of June 30, 2022	12,773	\$ 10.56	6.5	\$ 65,284
Exercised	(2,313)	10.14		
Forfeited	(323)	18.08		
Balance as of June 30, 2023	10,137	\$ 10.42	5.5	\$ 319,250
Exercised	(3,105)	9.90		
Forfeited	(166)	20.70		
Balance as of June 30, 2024	6,866	\$ 10.40	4.4	\$ 180,360
Vested and exercisable as of June 30, 2024	6,632	\$ 10.04	4.3	\$ 176,657
Vested and expected to vest as of June 30, 2024	6,866	\$ 10.40	4.4	\$ 180,360

(1) Aggregate intrinsic value for stock options represents the difference between the exercise price and the per share fair value of the Company’s common stock as of the end of the period, multiplied by the number of stock options outstanding.

There were no stock options granted during the fiscal years ended June 30, 2024 and June 30, 2023. The weighted-average grant date fair value of options granted during the fiscal year ended June 30, 2022 was \$12.61. The total intrinsic value of stock options exercised during the fiscal years ended June 30, 2024, 2023 and 2022 was \$86.7 million, \$61.3 million and \$28.5 million, respectively.

During the fiscal years ended June 30, 2024, 2023 and 2022, the proceeds from option exercises totaled \$30.7 million, \$23.5 million and \$10.2 million, respectively.

PSUs and RSUs

During the fiscal year ended June 30, 2024, the Company granted PSUs to certain of its employees with vesting terms based on meeting certain operating performance targets, including annual recurring revenue and profitability targets, and continued service conditions. The Company also granted RSUs to certain employees that vest based on continued service.

PSU activity during the fiscal years ended June 30, 2024 and 2023 was as follows (in thousands, except per share data):

	Number of Shares	Weighted- Average Grant Date Fair Value
Balance as of June 30, 2022	3,470	\$ 26.40
Granted	1,657	17.45
Vested	(1,196)	23.67
Forfeited	(286)	23.80
Balance as of June 30, 2023	3,645	\$ 23.43
Granted	1,229	38.82
Vested	(1,911)	24.64
Forfeited	(413)	26.23
Balance as of June 30, 2024	<u>2,550</u>	\$ 29.48

RSU activity during the fiscal years ended June 30, 2024 and 2023 was as follows (in thousands, except per share data):

	Number of Shares	Weighted- Average Grant Date Fair Value
Balance as of June 30, 2022	1,001	\$ 29.18
Granted	1,843	22.01
Vested	(517)	25.15
Forfeited	(173)	23.50
Balance as of June 30, 2023	2,154	\$ 24.46
Granted	1,647	36.39
Vested	(893)	26.14
Forfeited	(384)	29.72
Balance as of June 30, 2024	<u>2,524</u>	\$ 30.84

Stock-Based Compensation Expense

The Company recorded stock-based compensation expense in the consolidated statements of operations as follows (in thousands):

	Year Ended June 30,		
	2024	2023	2022
Cost of revenues			
Cost of SaaS and support	\$ 2,292	\$ 1,705	\$ 1,258
Cost of professional services	5,030	3,916	3,029
Research and development	14,854	15,186	17,166
Sales and marketing	17,312	20,426	25,428
General and administrative	20,407	26,536	30,633
Total stock-based compensation	<u>\$ 59,895</u>	<u>\$ 67,769</u>	<u>\$ 77,514</u>

The Company recognized related income tax benefit of \$1.1 million and \$0.7 million for the fiscal years ended June 30, 2024 and 2023, respectively. The related income tax benefit recognized for the fiscal year ended June 30, 2022 was not significant.

As of June 30, 2024, there was approximately \$106.9 million of unrecognized compensation cost related to unvested stock-based awards granted, which is expected to be recognized over the weighted-average period of approximately 2.4 years.

2021 Employee Stock Purchase Plan

Under the ESPP, eligible employees may purchase the Company's common stock at a price equal to 85% of the lower of the fair market value of the Company's common stock on the offering date or the applicable purchase date. The ESPP provides an offering period that begins on June 1 and December 1 of each year and each offering period consists of one six-month purchase period. During the fiscal years ended June 30, 2024 and 2023, 137,374 shares and 141,547 shares were purchased under the ESPP, respectively.

The fair value of ESPP shares was estimated using the Black-Scholes option valuation model with the following weighted-average assumptions:

	Year Ended June 30,		
	2024	2023	2022
Expected dividend yield	0%	0%	0%
Risk-free interest rate	5.4%	4.9%	0.7%
Expected volatility	46%	48%	40%
Expected term (in years)	0.5	0.7	1.2

As of June 30, 2024, total unrecognized compensation cost related to the ESPP was \$0.6 million, which will be amortized over a weighted-average vesting term of 0.4 years.

Note 12. Income Taxes

The components of loss before income taxes are as follows (in thousands):

	Year Ended June 30,		
	2024	2023	2022
U.S.	\$ (34,220)	\$ (72,871)	\$ (104,391)
Foreign	4,314	2,951	1,278
Total	\$ (29,906)	\$ (69,920)	\$ (103,113)

The income tax expense (benefit) consists of the following (in thousands):

	Year Ended June 30,		
	2024	2023	2022
Current:			
Federal	\$ —	\$ (246)	\$ (48)
State	1,307	226	278
Foreign	830	437	572
	2,137	417	802
Deferred:			
Federal	—	(154)	137
State	34	(327)	131
Foreign	(56)	(431)	(4,505)
	(22)	(912)	(4,237)
Income tax expense (benefit)	\$ 2,115	\$ (495)	\$ (3,435)

The income tax expense (benefit) differs from the amount computed by applying the statutory federal income tax rate as follows (in thousands):

	Year Ended June 30,		
	2024	2023	2022
Federal tax expense (benefit):			
At statutory rate	\$ (6,280)	\$ (14,683)	\$ (21,654)
State tax (net of federal benefit)	935	192	140
Research and development credits	(2,943)	(1,888)	1,019
Stock-based compensation	(9,364)	(3,311)	6,828
Acquisition-related transaction costs	162	254	53
Change in valuation allowance	19,448	20,764	10,802
Other	157	(1,823)	(623)
Income tax expense (benefit)	<u>\$ 2,115</u>	<u>\$ (495)</u>	<u>\$ (3,435)</u>

Deferred tax assets and liabilities are as follows (in thousands):

	June 30,	
	2024	2023
Deferred tax assets:		
Nondeductible accrued expenses	\$ 3,243	\$ 2,658
Net operating loss carryforwards	31,153	29,054
Research and development credits	9,551	6,634
Section 174 capitalization	47,930	22,934
Stock-based compensation	7,437	11,079
Interest carryforwards	13,765	14,342
Deferred revenue	588	709
Other	67	234
Valuation allowance	(100,543)	(71,911)
Total deferred tax assets	<u>13,191</u>	<u>15,733</u>
Deferred tax liabilities:		
Deferred commissions	(6,614)	(5,906)
Fixed assets	(3,089)	(2,479)
Intangible assets	(4,196)	(8,090)
Total deferred tax liabilities	<u>(13,899)</u>	<u>(16,475)</u>
Net deferred tax liabilities	<u>\$ (708)</u>	<u>\$ (742)</u>

As of June 30, 2024, the Company has federal, California and other state net operating loss carryforwards of approximately \$107.8 million, \$49.0 million and \$60.6 million, respectively, which expire beginning in the year 2034 for federal and 2029 for California.

As of June 30, 2024, the Company has federal and state research credits carryforwards of approximately \$11.7 million and \$5.2 million, respectively, expiring beginning in 2027 for federal. The state credits can be carried forward indefinitely.

Federal and state tax laws impose substantial restrictions on the utilization, for tax purposes, of net operating loss and credit carryforwards in the event of an ownership change as defined in Section 382 of the Internal Revenue Code. Accordingly, the Company's ability to utilize these carryforwards may be limited as a result of such ownership change. Such a limitation could result in the expiration of carryforwards before they are utilized.

In assessing the need for a valuation allowance, the Company considered all available evidence both positive and negative, including historical levels of income, legislative developments, expectations and risks associated with estimates of future taxable income, and prudent and feasible tax planning strategies.

As a result of this analysis as of June 30, 2024 and 2023, the Company has determined that it is more likely than not that it will not realize the benefits of its deferred tax assets due to continuing losses and therefore has recorded a valuation allowance of \$100.5 million and \$71.9 million, respectively, to reduce the carrying value of its deferred tax assets.

At June 30, 2024, the Company asserts that it will not permanently reinvest its foreign earnings outside the U.S. The Company anticipates that the cash from its foreign earnings may be used to fund operations domestically, settle a portion of the outstanding debt obligations, or used for other business needs. The accumulated undistributed earnings generated by its foreign subsidiaries was approximately \$26.2 million. Substantially all of these earnings will not be taxable upon repatriation to the U.S. since under the Tax Cuts and Jobs Act, they will be treated as previously taxed income or benefit from the dividends received deduction. The withholding taxes related to the distributable earnings of the Company's foreign subsidiaries are not expected to be material.

It is the Company's policy to recognize interest and penalties related to income tax matters in income tax expense. As of June 30, 2024 and 2023, the Company had no accrued interest and penalties related to uncertain tax positions.

The Company does not anticipate any significant increases or decreases to its unrecognized tax benefits in the next 12 months. There is no applicable lapse of the statute of limitations in the next 12 months.

The Company files income tax returns in the U.S. federal jurisdiction, various state jurisdictions and various foreign jurisdictions. In the normal course of business, the Company is subject to examination by taxing authorities. The Company is not currently under audit by the Internal Revenue Service or other similar tax authorities. The Company's tax returns remain open to examination as follows: U.S. federal and states, all tax years; and significant foreign jurisdictions, generally 2018 through 2023.

The following table summarizes the activity related to the Company's unrecognized tax benefits (in thousands):

	June 30,		
	2024	2023	2022
Beginning of the year, unrecognized tax benefits	\$ 5,311	\$ 3,811	\$ 2,970
Increases, prior year tax positions	173	532	396
Increases, current year tax positions	1,392	968	445
End of the year, unrecognized tax benefits	<u>\$ 6,876</u>	<u>\$ 5,311</u>	<u>\$ 3,811</u>

As of June 30, 2024 and 2023, unrecognized tax benefits approximated \$6.9 million and \$5.3 million, respectively, of which none of the tax benefits would affect the effective tax rate if recognized. There are no interest and penalties accrued as of June 30, 2024.

Note 13. Net Loss Per Share

Basic net loss per share is computed by dividing the net loss by the weighted-average number of common shares outstanding for the period. Diluted net loss per share is calculated by giving effect to all potentially dilutive securities outstanding for the period using the treasury stock method.

Basic net loss per share is the same as diluted net loss per share because the Company reported net losses for all periods presented. The following table sets forth the computation of basic and diluted net loss per share for the periods presented (in thousands, except per share data):

	Year Ended June 30,		
	2024	2023	2022
Numerator:			
Net loss	\$ (32,021)	\$ (69,425)	\$ (99,678)
Denominator:			
Weighted-average shares used to compute net loss per share, basic and diluted	71,488	64,295	61,267
Net loss per share, basic and diluted			
Basic and diluted	\$ (0.45)	\$ (1.08)	\$ (1.63)

The Company excluded the following potential shares of common stock from the calculation of diluted net loss per share because their effect would be anti-dilutive (in thousands):

	As of June 30,		
	2024	2023	2022
Outstanding stock options to purchase common stock	6,866	10,137	12,773
Unvested PSUs and RSUs	5,074	5,799	4,471
Shares issuable under ESPP	12	15	18
Shares issuable related to acquisition	63	4	—
Total	12,015	15,955	17,262

Note 14. Employee Benefit Plans

On December 22, 2012, the Company adopted a 401(k) plan (the “401(k) Plan”) for all U.S. employees who have met certain eligibility requirements. Under the 401(k) Plan, employees may elect to contribute up to 100% of their eligible compensation, subject to certain limitations. The Company may make discretionary and matching contributions to the 401(k) Plan. Employees are immediately vested 100% in the Company’s matching contributions. The Company incurred matching expenses of \$4.3 million, \$3.8 million and \$3.0 million for the fiscal years ended June 30, 2024, 2023 and 2022, respectively. The Company also offers pension benefits through company funded employee contributions in the U.K., Australia, Singapore, Germany, Netherlands, Ireland and Canada for employees who have met certain eligibility requirements. The Company incurred employee pension contribution expenses of \$2.4 million, \$1.7 million and \$1.3 million for the fiscal years ended June 30, 2024, 2023 and 2022, respectively.

Note 15. Related Party Transactions

Secondary Offerings

In November 2023, the Company completed a secondary offering in which certain existing stockholders sold 5,000,000 shares of common stock at a price of \$39.01 per share. In March 2024, the Company completed a separate secondary offering in which certain existing stockholders sold 7,000,000 shares of common stock at a price of \$36.27 per share. The Company did not receive any of the proceeds from the sale of the shares by the existing stockholders. In connection with these offerings, the Company incurred costs of \$1.1 million for the fiscal year ended June 30, 2024, which was recorded in general and administrative expenses in the consolidated statements of operations.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, under the supervision and with the participation of our Chief Executive Officer (principal executive officer) and Chief Financial Officer (principal financial officer), has evaluated the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, as of the end of the period covered by this Annual Report on Form 10-K. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this Annual Report on Form 10-K, our disclosure controls and procedures were effective at the reasonable assurance level.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act). Internal control over financial reporting is a process designed by, or under the supervision of, our Chief Executive Officer and Chief Financial Officer includes policies and procedures that provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on criteria established in "Internal Control—Integrated Framework (2013)" issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on this evaluation, our management concluded that our internal control over financial reporting was effective as of June 30, 2024.

Our independent registered public accounting firm, Deloitte & Touche LLP, has issued an audit report with respect to our internal control over financial reporting, which is included in Part II, Item 8 of this Form 10-K.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by Rules 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the quarter ended June 30, 2024 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, believes that our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance of achieving their objectives and are effective at the reasonable assurance level. However, management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent or detect all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Item 9B. Other Information

Rule 10b5-1 Trading Plans

Michele Murgel, the Company's Chief People and Places Officer, entered into a stock trading plan intended to satisfy the affirmative defense conditions of Rule 10b5-1(c) (a "Rule 10b5-1 Plan") on June 13, 2024, which has an end date of February 15, 2025. Ms. Murgel's Rule 10b5-1 Plan provides for the potential exercise of stock options and the associated sale of up to 38,533 shares of Intapp common stock and the potential sale of up to 23,172 additional shares of Intapp common stock.

Our Board of Directors has approved the Intapp, Inc. Insider Trading Policy (the "Insider Trading Policy"). The Insider Trading Policy governs transactions, including the purchase, sale and/or other dispositions of, in our securities by our directors, officers and employees. The Insider Trading Policy is designed to promote compliance with insider trading laws, rules and regulations, and the listing requirements of the Nasdaq Global Select Market.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Code of Business Conduct and Ethics

We have adopted a Code of Business Conduct and Ethics that applies to our officers, directors and employees, which is available on our website (investors.intapp.com) under “Corporate Governance.” The Code of Ethics is intended to qualify as a “code of ethics” within the meaning of Section 406 of the Sarbanes-Oxley Act of 2002, as amended, and Item 406 of Regulation S-K. In addition, we intend to promptly disclose on our website (1) the nature of any amendment to our Code of Business Conduct and Ethics that applies to our directors or our principal executive officer, principal financial officer, principal accounting officer or controller or persons performing similar functions and (2) the nature of any waiver, including an implicit waiver, from a provision of our Code of Business Conduct and Ethics that is granted to a director or one of these specified officers, the name of such person who is granted the waiver and the date of the waiver. The information contained on, or accessible from, our website is not part of this Annual Report on Form 10-K by reference or otherwise.

Executive Officers of the Company

Set forth below is certain information, including names, ages, positions, and biographical information, regarding the executive officers of the Company, as of the date hereof.

John Hall (51), Chairman and Chief Executive Officer

John Hall has served as a director and Chief Executive Officer of the Company since 2007. Prior to joining the Company, Mr. Hall was an early executive at VA Linux Systems and helped lead the company from its startup phase to its initial public offering.

David H. Morton, Jr. (52), Chief Financial Officer

David Morton has served as Chief Financial Officer of the Company since August 2023. Prior to joining the Company, Mr. Morton served as chief financial officer of DigiCert, Inc., a cybersecurity company, from November 2021 to August 2023. Prior to DigiCert, Mr. Morton served as chief financial officer at Anaplan, Inc., a SaaS company, from September 2018 to July 2021 and remained as an employee of Anaplan until September 2021. Mr. Morton served as chief accounting officer at Tesla, Inc. from August 2018 to September 2018. Earlier, Mr. Morton served as executive vice president, chief financial officer and principal accounting officer of Seagate Technology, plc, an electronic data storage company from October 2015 to August 2018. Mr. Morton received a B.S. from California State Polytechnic University, Pomona in Business Administration with a major in Finance, Real Estate and Law.

Thad Jampol (48), Co-founder and Chief Product Officer

Thad Jampol is the Co-Founder of the Company and has served as Chief Product Officer of the Company since 2000. Mr. Jampol is the architect of the Intapp Intelligent Cloud platform. Mr. Jampol received a B.S. from the University of California, Los Angeles in Computer Science.

Don Coleman (49), Chief Operating Officer

Don Coleman has served as the Chief Operating Officer of the Company since 2003. Prior to joining the Company, Mr. Coleman oversaw mergers and acquisitions at Excite@Home, a pioneering provider of internet media services, which was acquired by InterActiveCorporation. Prior to joining Excite@Home, Mr. Coleman served as the co-founder and chief executive officer of Stanford Student Enterprises. Mr. Coleman received a B.A. and B.S. from Stanford University in Economics and Biology.

Michele Murgel (63), Chief People and Places Officer

Michele Murgel has served as Chief People and Places Officer of the Company since 2020 and previously served as Senior Vice President of the Company since July 2019. Prior to joining the Company in 2015, Ms. Murgel served as the vice president of human resources at Coupons.com (now Quotient Technology), overseeing all human resources functions through the company's initial public offering in 2014. Prior to Coupons.com, Ms. Murgel held executive leadership roles with Zappos, Macromedia (which was acquired by Adobe in 2005) and Alias Research (which was acquired by Autodesk in 2006). Ms. Murgel studied at the University of Toronto, Mississauga and graduated from Humber College Institute of Technology and Advanced Learning.

Scott Fitzgerald (50), Chief Marketing Officer

Scott Fitzgerald has served as Chief Marketing Officer of the Company since May 2021. Prior to joining the Company, Mr. Fitzgerald was chief marketing officer of Duck Creek Technologies Inc. from 2017 to May 2021. Prior to joining Duck Creek Technologies Inc., Mr. Fitzgerald was senior vice president of marketing for BlueSnap, Inc. from July 2015 until March 2017. Mr. Fitzgerald has also previously served as vice president, marketing and VP, product line manager of ACI Worldwide, Inc. from September 2010 to July 2015. Mr. Fitzgerald held various leadership positions at CA Technologies from December 2003 to September 2010. Prior to joining CA, Mr. Fitzgerald was with Cisco Systems, Inc. and American Power Conversion, Inc. from 2000 to 2002 and 1996 to 2000, respectively. Mr. Fitzgerald received a B.A. from Union College and an M.B.A. from the Babson F.W. Olin Graduate School of Business.

Ben Harrison (39), President, Industries

Ben Harrison is the Founder of DealCloud and has served as the President, Industries of the Company since February 2024. Mr. Harrison was the President, Financial Services of the Company from 2018 to February 2024. At DealCloud, Mr. Harrison served as the President and Chief Executive Officer and Chief Revenue Officer. Prior to founding DealCloud, Mr. Harrison worked for Falfurrias Capital Partners, a Charlotte-based private equity firm, and also in M&A advisory with Harris Williams & Co. and Edgeview Partners. Mr. Harrison received a B.S.B.A. from the University of North Carolina at Chapel Hill and was awarded the William M. Rawls scholarship.

Additional information required by this Item is incorporated herein by reference to the definitive proxy statement for the Company's 2024 Annual Meeting of Stockholders, to be filed no later than 120 days after June 30, 2024.

Item 11. Executive Compensation

The information required by this Item is incorporated herein by reference to the definitive proxy statement for the Company's 2024 Annual Meeting of Stockholders, to be filed no later than 120 days after June 30, 2024.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item is incorporated herein by reference to the definitive proxy statement for the Company's 2024 Annual Meeting of Stockholders, to be filed no later than 120 days after June 30, 2024.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item is incorporated herein by reference to the definitive proxy statement for the Company's 2024 Annual Meeting of Stockholders, to be filed no later than 120 days after June 30, 2024.

Item 14. Principal Accountant Fees and Services

The information required by this Item is incorporated herein by reference to the definitive proxy statement for the Company's 2024 Annual Meeting of Stockholders, to be filed no later than 120 days after June 30, 2024.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) The following documents are filed as part of this report:

1. Consolidated Financial Statements

See Index to Consolidated Financial Statements at Item 8 herein.

2. Financial Statement Schedules

Schedules not listed above have been omitted because the information required to be set forth therein is not applicable or is shown in the financial statements or notes herein.

3. Exhibits

See the Exhibit Index of this Annual Report on Form 10-K set forth below.

Item 16. Form 10-K Summary

None.
