

2024 ANNUAL REPORT

Bio-Rad Laboratories

We advance science and save lives, together.

BIO-RAD

FINANCIAL HIGHLIGHTS

Net Revenue (in millions)

2020	\$ 2,546
2021	\$ 2,923
2022	\$ 2,802
2023	\$ 2,671
2024	\$ 2,566

Gross Profit (in millions)

2020	\$ 1,438
2021	\$ 1,638
2022	\$ 1,567
2023	\$ 1,427
2024	\$ 1,379

Operating Income (in millions)

2020	\$ 421
2021	\$ 500
2022	\$ 483
2023	\$ 338
2024	\$ 269

Cash Flow From Operations (in millions)

2020	\$ 585
2021	\$ 669
2022	\$ 194
2023	\$ 375
2024	\$ 455

Looking back over the last several years and all the changes we have seen, both internally and externally, I am reminded how important resilience is to an organization.

In fact, looking back to the beginning of Bio-Rad and thinking how we have continuously adapted to changing markets, new technology, and new ways to operate over the last 70 plus years, resilience and adaptability have played a big part in our success. At the same time, our commitment to quality and innovation, and a collective mindset of staying one step ahead, have enabled us to bring new and useful products to our customers.

2024 was a year of change for Bio-Rad with the addition of several new senior leaders. The seasoned executives we have appointed to lead our operations, finance, supply chain, legal, Life Science, and Clinical Diagnostics segments, collectively bring decades of experience and fresh ideas to the organization. Together, we are dedicated to enhancing customer satisfaction, operational excellence, and driving efficiency while fostering a culture of innovation and continuous improvement.

We entered the year anticipating a gradual improvement, especially in biopharma, but the pace of market recovery was slower than expected. While this created headwinds for our Life Science segment, we returned to a more normalized growth rate in our Clinical Diagnostics business. Even with the slower market recovery, our broad-based, multi-year transformation helped us effectively navigate the changing conditions around us.

For the full-year 2024, we reported sales of \$2.6 billion compared to \$2.7 billion in 2023. On a currency-neutral basis, 2024 sales decreased 3.6% year-over-year, driven by lower Life Science sales, and offset by stronger demand for our Clinical Diagnostics products.

Compared to 2023, we saw a 30-basis point improvement in our gross margin. The gross margin expansion was possible because of initiatives including the consolidation of several European manufacturing sites into our Singapore manufacturing hub and the opening of a new distribution center in Singapore. Collectively, these projects simplify our logistics network and inventory management to better serve our customers in the Asia Pacific region. Both initiatives will also help us improve product margins going forward. And as we implement these and other operational improvements, we continue to carefully manage our operating expenses.

On the product front, in 2024 we introduced two new Life Science research platforms — the ChemiDoc™ Go Imaging System for analyzing gels and western blots, and the ddSEQ™ Single-Cell Kit, a cost-effective sample prep solution for researchers to easily conduct single-cell gene expression and regulation analyses.

In Life Science, we acquired Saber Bio, a development-stage platform using our core droplet technology for high-throughput discovery of novel antibodies and T-cell receptors, which play a critical role in helping researchers identify potential therapeutic drug candidates.

We also expanded our library of assays for use with Droplet Digital™ PCR to advance early diagnosis and monitoring of various cancers, cell and gene therapy manufacturing, and food safety monitoring.

In addition, we made investments and formed partnerships to drive the penetration of our Droplet Digital PCR platform into life science research and advanced clinical

diagnostics. We partnered with the Allegheny Health Network of hospitals to generate clinical evidence across various cancer types using Bio-Rad's Droplet Digital PCR technology for minimal residual disease monitoring of solid tumor cancer patients after treatment. We made an investment in Oncocyte to support the commercialization of transplant monitoring assays deploying Bio-Rad's QX600™ Droplet Digital PCR System, offering laboratory customers a highly sensitive alternative to centralized sequencing test providers. We also invested in Geneoscopy to support the launch of their FDA-approved, non-invasive colorectal cancer screening test utilizing our digital PCR platform.

Bio-Rad begins 2025 in a strong position. Our long-term strategy remains intact, and we believe in our ability to deliver value to our customers. In Clinical Diagnostics, we have leading positions globally for our core platforms. We are actively

investing in supporting their growth while building positions in new molecular diagnostic applications. In Life Science, we will continue to focus on the biopharma sector, especially with our digital PCR and process chromatography products, and new product development around cell biology.

The operational improvements made over the last several years put us in a position to continue to expand our margin profile. As the markets get back on a solid growth trajectory, this will further support our margin expansion.

We have an incredibly talented team, several new products in development, and we enter 2025 with renewed focus on our mission to collaborate with our customers in advancing science and improving healthcare outcomes to save lives.

Thank you for your support and interest in Bio-Rad.

PRODUCT HIGHLIGHTS

New Applications Using Bio-Rad's Droplet Digital PCR Technology

VeriCheck ddPCR™ Empty-Full Capsid Kit for Gene Therapy Production

Many gene therapies use AAV viral vectors to deliver therapeutic genes to patients' cells. The manufacturing process produces a mixture of full (containing the gene of interest) and empty capsids. The VeriCheck ddPCR Empty-Full Capsid Kit measures viral titer and the ratio of empty to full capsids, enabling accurate quality assessment. This is the first ddPCR kit to simultaneously detect protein and genetic material.

dd-Check STEC Solution for Food Safety Testing

This assay detects virulence genes from Shiga toxin-producing *Escherichia coli* (STEC) in food samples. It is the first ddPCR method approved by AOAC International, a leading association for food safety. Unlike standard qPCR testing methods for STEC, ddPCR technology can detect colocalization of virulence genes in a single bacterium, reducing false positives.

ddPLEX *ESR1* Mutation Detection Kit for Oncology Research

This kit is a powerful research tool that enables same-day multiplexed detection, discrimination, and quantification of seven mutations in the *ESR1* gene. Mutations in *ESR1* drive resistance to some types of breast cancer therapies. Using this kit, researchers can quickly and effectively assess breast cancer samples to support their research studies.

Solutions for Life Science Research and Drug Manufacturing

Foresight™ Pro 45 cm Diameter Chromatography Columns for Drug Manufacturing

Prepacked with Bio-Rad resins, these columns extend Bio-Rad's portfolio for process-scale chromatography across various stages of biological drug production. Foresight Pro Columns offer manufacturers an integrated solution for downstream purification of biotherapeutics, including vaccines, antibodies, and recombinant proteins.

ChemiDoc Go Imaging System for Life Science Research

The ChemiDoc Go Imaging System is the first benchtop imager on the market to leverage advanced complementary metal oxide semiconductor (CMOS) digital imaging to capture gel and western blot images with the same high sensitivity as larger instruments. Researchers can use the ChemiDoc Go System's user-friendly interface, LED illumination, and cloud connectivity for easy and accurate benchtop imaging.

ddSEQ Single-Cell 3' RNA-Seq Kit for Single-Cell Analysis

Designed to run on Bio-Rad's droplet-based ddSEQ Single-Cell Isolator, the ddSEQ Single-Cell 3' RNA-Seq Kit and accompanying Omnition v1.1 Analysis Software enable researchers to easily conduct single-cell gene expression and regulation analyses. This kit supports a broad range of research fields, including oncology, immunology, neurology, and stem cell biology.

2024 YEAR IN REVIEW

Bio-Rad is a leader in developing, manufacturing, and marketing a broad range of products for the life science research and clinical diagnostics markets. We operate a global network of research, development, manufacturing, and sales operations with approximately 7,700 employees and \$2.6 billion in revenues in 2024.

Our customers include universities, research institutions, hospitals, and biopharmaceutical companies, as well as clinical, food safety and environmental quality laboratories. Together, we develop innovative, high-quality products that advance science and save lives.

BIO-RAD LABORATORIES, INC.

(Exact name of registrant as specified in its charter)

Delaware	94-1381833
(State or other jurisdiction of incorporation)	(I.R.S. Employer Identification No.)
1000 Alfred Nobel Drive, Hercules, California	94547
(Address of principal executive offices)	(Zip Code)
Registrant's telephone number, including area code (510) 724-7000	
Securities registered pursuant to Section 12(b) of the Act:	

Title of Each Class	Trading Symbols	Name of Each Exchange on Which Registered
Class A Common Stock Par Value \$0.0001 per share	BIO	New York Stock Exchange
Class B Common Stock Par Value \$0.0001 per share	BIO.B	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

☒ Yes ☐ No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

☐ Yes ☒ No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

☒ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated file	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). ☐ Yes ☒ No

As of June 28, 2024, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of the Registrant's Class A Common Stock held by non-affiliates was approximately \$5,342,352,777 and the aggregate market value of the registrant's Class B Common Stock held by non-affiliates was approximately \$28,604,722.

As of February 11, 2025, there were 22,940,805 shares of Class A Common Stock and 5,070,337 shares of Class B Common Stock outstanding.

INFORMATION RELATING TO FORWARD-LOOKING STATEMENTS

Other than statements of historical fact, statements made in this report include forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, without limitation, statements we make regarding our future financial performance, operating results, plans and objectives. Forward-looking statements generally can be identified by the use of forward-looking terminology, such as “believe,” “expect,” “anticipate,” “may,” “will,” “intend,” “estimate,” “continue,” “seek,” “future,” or similar expressions or the negative of those terms or expressions. Such statements involve risks and uncertainties, which could cause actual results to vary materially from those expressed in or indicated by the forward-looking statements. We have based these forward-looking statements on our current expectations and projections about future events. However, actual results may differ materially from those currently anticipated depending on a variety of risk factors including, but not limited to, the risks relating to our international operations, global economic and geopolitical conditions, tariffs or other trade barriers, our ability to develop and market new or improved products, our ability to compete effectively, foreign currency exchange fluctuations, reductions in government funding or capital spending of our customers, supply chain issues, risks associated with our position in Sartorius AG, risks to our information technology systems, intellectual property risks, our ability to attract and retain key personnel, international legal and regulatory risks, product quality and liability issues, our ability to integrate acquired companies, products or technologies into our company successfully, changes in the healthcare industry, natural disasters and other catastrophic events beyond our control, and other risks and uncertainties identified under “Part I, Item 1A, Risk Factors” and “Part II, Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this Annual Report. We caution you not to place undue reliance on forward-looking statements, which reflect an analysis only and speak only as of the date hereof. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by law.

PART I.

ITEM 1. BUSINESS

General

Bio-Rad Laboratories, Inc. (referred to in this report as “Bio-Rad,” “we,” “us,” “the Company” and “our”) is a multinational developer, manufacturer, and worldwide distributor of our own life science research and clinical diagnostics products. Bio-Rad develops, manufactures, and supplies life science research, healthcare, analytical chemistry and other markets with a broad range of products and systems used to separate complex chemical and biological materials and to identify, analyze and purify their components.

We have direct distribution channels in over 36 countries outside the United States through subsidiaries whose focus is sales, customer service and product distribution. In some locations outside and inside these 36 countries, sales efforts are supplemented by distributors and agents.

Description of Business

Business Segments

Bio-Rad operates in two industry segments designated as Life Science and Clinical Diagnostics. Both segments operate worldwide. Our Life Science segment and our Clinical Diagnostics segment generated 40% and 60%, respectively, of our consolidated net sales for the year ended December 31, 2024. We generated approximately 41% of our consolidated net sales for the year ended December 31, 2024 from the U.S. and approximately 59% from our international locations, with Europe being our largest international region.

Life Science Segment

Our Life Science segment is at the forefront of discovery, creating advanced tools to answer complex biological questions. These instruments, systems, reagents, and consumables are typically used to separate, purify, characterize, or quantify biological materials such as cells, proteins, and nucleic acids in the research laboratory or

biopharmaceutical laboratory. They are also used in biopharmaceutical manufacturing, quality control process, food safety, and science education applications. We are focused on the translational research market segment where our products help accelerate the timelines from discovery in the lab to use in the clinic and with patients. We are a leader in the life sciences market and develop, manufacture and market a broad portfolio of many thousands of products that serve a global customer base. We estimate that the worldwide sales for products in the markets we serve is approximately \$19 billion. Our principal life science customers include universities and medical schools, industrial research organizations, government agencies, pharmaceutical manufacturers, biotechnology researchers, food producers and food testing laboratories.

Clinical Diagnostics Segment

Our Clinical Diagnostics segment designs, manufactures, markets and supports test systems, informatics systems, test kits and specialized quality controls that serve clinical laboratories in the global diagnostics market. Our products currently address specific niches within the in vitro diagnostics ("IVD") test market, and we seek to focus on the higher margin, higher growth segments of this market.

We supply several thousand products that cover more than 300 clinical diagnostic tests to the IVD test market. We estimate that the worldwide sales for products in the markets we serve is approximately \$16 billion. IVD tests are conducted outside the human body and are used to identify and measure substances in a patient's tissue, blood or urine. Our products consist of reagents, instruments and software, typically provided to our customers as an integrated package to allow them to generate reproducible test results. Revenue in this business is highly recurring, as laboratories typically standardize test methodologies, which are dependent on a particular supplier's equipment, reagent and consumable products. An installed base of diagnostic test systems, therefore, typically creates a recurring source of revenue through the sale of test kits for each sample analyzed on an installed system. Our principal clinical diagnostic customers include hospital laboratories, diagnostic reference laboratories, transfusion laboratories and physician office laboratories.

Raw Materials and Components

We utilize a wide variety of chemicals, biological materials, electronic components, machined metal parts, optical parts, computing and peripheral devices. Most of these materials and components are available from numerous sources, and in 2024, we generally have not experienced difficulty in securing adequate supplies. In certain instances, we acquire components and materials from a sole supplier. For more discussion relating to the risks to our supply of raw materials, including the difficulty of securing adequate supplies, please see "Item 1A, Risk Factors" of this Annual Report.

Patents, Trademarks and Licenses

We own over 2,150 U.S. and international patents and numerous trademarks. We also hold licenses under U.S. and foreign patents owned by third parties and pay royalties on the sales of certain products under these licenses. In addition, we also receive royalties for licenses of our intellectual property. We view these patents, trademarks and license agreements as valuable assets; however, we believe that our ability to develop and manufacture our products depends primarily on our knowledge, technology and special skills rather than our patent, trademark and licensing positions.

Seasonal Operations

Our business is not inherently seasonal. However, the European custom of concentrating vacation during the summer months usually tempers third quarter sales volume and operating income.

Sales and Marketing

We conduct our worldwide operations through an extensive direct sales force, employing approximately 800 direct sales and sales management personnel around the world as of December 31, 2024. Our sales personnel typically consist of experienced industry professionals with scientific training, and we maintain a separate specialized sales

force for each of our segments. We believe that this direct sales approach allows us to sell a broader range of our products, create more brand awareness, and develop long-term relationships with our customers.

We also use a range of sales and marketing intermediaries ("SMIs") in our international markets. The types of SMIs we utilize are distributors, agents, brokers and resellers. We have programs and policies in place with our SMIs requiring their compliance with all applicable laws, including adhering to our anti-corruption standards to ensure a transparent sale to our customers.

Our customer base is broad and diversified. Our worldwide customer base includes (1) university and research institutions; (2) hospital, public health and commercial laboratories; (3) diagnostic manufacturers; and (4) companies in the biotechnology, pharmaceutical, chemical and food industries.

Our sales are affected by a number of external factors. For example, a number of our customers, particularly in the Life Science segment, are substantially dependent on government grants and research contracts for their funding. In our Clinical Diagnostic segment, we are constrained by government reimbursement for many of our products.

Competition

The markets served by our product groups are highly competitive. Our competitors range in size from start-ups to large multinational corporations with significant resources and reach. We seek to compete primarily in market segments where the technology and efficacy of our products offer customers specific advantages over the competition.

Our Life Science segment does not face the same competitors for all of its products due to the breadth of its portfolio and specialization of its product lines. Major competitors in this market include Becton Dickinson, Danaher, Merck KGaA, Qiagen N.V. and Thermo Fisher Scientific. We compete primarily based on meeting performance specifications, technical support, and offering comprehensive solutions.

Major competitors for our products in the Clinical Diagnostics segment include Abbott Laboratories, Becton Dickinson, bioMérieux, Danaher, DiaSorin, Werfen, QuidelOrtho, Roche, Siemens Healthineers, Thermo Fisher Scientific and Tosoh. We compete across a variety of attributes including quality, service and product portfolio.

Research and Development

We conduct extensive research and development activities in all areas of our business. Research and development has played a major role in Bio-Rad's growth and is expected to continue to do so in the future. Our research teams are continuously developing new products and new applications for existing products. In our development of new products and applications, we interact with scientific and medical professionals at pharma and biopharma companies, universities, hospitals, medical schools, and elsewhere within our industry. In addition, we regularly invest in companies that are engaged in the development of new technologies that either complement or expand our existing portfolio of products. As of December 31, 2024, we had approximately 950 employees worldwide focused on research and development, including degreed scientists, engineers, software developers and other technical support staff.

Regulatory Matters

The development, testing, manufacturing, marketing, post-market surveillance, distribution, advertising and labeling of certain of our products (primarily diagnostic and donor screening products) are subject to regulation in the United States by the Center for Devices and Radiological Health ("CDRH") and/or the Center for Biologics Evaluation and Research ("CBER") of the U.S. Food and Drug Administration (FDA) and in other jurisdictions by state and foreign government authorities. FDA regulations require that certain new products have pre-marketing notification ("510(k)") or approval ("PMA" or Biologics License Application – "BLA") by the FDA and require certain products to be manufactured in accordance with FDA's "good manufacturing practice" regulations, to be extensively tested and to be properly labeled to disclose test results and performance claims and limitations. The

FDA's 510(k) clearance process requires regulatory competence to execute. The FDA's PMA and BLA processes also require extensive regulatory competence to execute.

A clinical trial is generally required to support a PMA or BLA application and is sometimes required for a 510(k) clearance or a de novo authorization. Conducting clinical trials is a complex and costly activity and frequently requires the use of outsourced resources that specialize in planning and conducting the clinical trial for the medical device manufacturer.

The European Union ("EU") has adopted the EU in-vitro Diagnostics Regulation (the "EU IVDR"), which imposes stricter requirements for the marketing and sale of in-vitro diagnostics products (as compared to the predecessor in-vitro Diagnostics Directive ("IVDD")), including in the areas of clinical evaluation requirements, quality systems, economic operators and post-market surveillance. Bio-Rad's IVD products currently meet the applicable requirements of the EU IVDR.

Our manufacturing facilities, as well as those of certain suppliers, are subject to periodic inspections by the FDA and other regulatory bodies to verify compliance with regulatory requirements. Similar inspections are performed by Notified Bodies to verify compliance to applicable International Organization for Standardization ("ISO") standards (e.g. ISO 13485:2016), requirements under the Medical Device Single Audit Program ("MDSAP") applicable to regulatory requirements of Australia, Brazil, Canada, Japan and the U.S. and/or medical device regulations and requirements from the countries in which we distribute product and other specified audits by regulatory authorities. If a regulatory body were to find that we or certain suppliers have failed to comply with applicable regulations (e.g. recordkeeping, reporting of adverse events), it could institute a wide variety of enforcement actions, ranging from issuance of a warning or untitled letter to more severe sanctions, such as mandatory product recalls or seizures, civil penalties, consent decrees, injunctions, criminal prosecution, operating restrictions, partial suspension or shutdown of production, refusal to permit importation or exportation, refusal to grant, or delays in granting, clearances or approvals or withdrawal or suspension of existing clearances or approvals. Any of these actions could have an adverse effect on our business.

We are also subject to additional regulation and enforcement by the federal government and by authorities in the states and foreign jurisdictions in which we conduct our business. Such laws include, without limitation, state and federal anti-kickback, fraud and abuse, false claims, privacy and security and physician sunshine laws and regulations. If our operations are found to be in violation of any such laws or any other governmental regulations that apply to us, we may be subject to penalties, including, without limitation, civil and criminal penalties, damages, fines, the curtailment or restructuring of our operations, and exclusion from participation in federal and state healthcare programs and imprisonment.

Sales of our products will depend, in part, on the extent to which our products or diagnostic tests using our products will be covered by third-party payors, such as government health care programs, commercial insurance and managed healthcare organizations. These third-party payors are increasingly adjusting reimbursements for certain medical products and services. In addition, the U.S. government, state legislatures and foreign governments have continued implementing cost containment programs, including price controls and restrictions on reimbursement. Adoption of price controls and cost-containment measures, and adoption of more restrictive policies in jurisdictions with existing controls and measures, could further limit our net revenue and results. Decreases in third-party reimbursement for our products or diagnostic tests using our products, or a decision by a third-party payor to not cover our products could reduce or eliminate utilization of our products and have a material adverse effect on our sales, results of operations and financial condition. In addition, healthcare reform measures have been and will be adopted in the future, any of which could limit the amounts that governments will pay for healthcare products and services, which could result in reduced demand for our products or additional pricing pressures.

As a multinational manufacturer and distributor of sophisticated instrumentation, we must meet a wide array of electromagnetic compatibility and safety compliance requirements to satisfy regulations in the United States, the European Union and other jurisdictions.

Our operations are subject to federal, state, local and foreign environmental laws and regulations that govern activities such as transportation of goods, emissions to air and discharges to water, as well as handling and disposal practices for solid, hazardous and medical wastes. In addition to environmental laws that regulate our operations, we are also subject to environmental laws and regulations that create liabilities and clean-up responsibility for spills, disposals or other releases of hazardous substances into the environment as a result of our operations or otherwise impacting real property that we own or operate. The environmental laws and regulations could also subject us to claims by third parties for damages resulting from any spills, disposals or releases resulting from our operations or at any of our properties.

These regulatory requirements vary widely among countries.

Human Capital Resources

At Bio-Rad, we consider our employees to be our most valuable asset, and critical to the effective development, manufacture, sale, distribution and servicing of our vast array of products and services. Our employees are essential to satisfying our customers' needs for products to advance science and healthcare. At December 31, 2024, we had approximately 7,700 employees, the overwhelming majority of which are full-time employees. Our employees are located throughout the world with roughly 48% in the Americas, 35% in Europe, the Middle-East and Africa, and 17% in Asia Pacific. Our employees work in 37 different countries around the world. We are a diverse organization. Our differences offer new and unique ideas and perspectives. We foster a work culture that embraces the diverse experience and knowledge of every employee.

Compensation and Benefits

We provide a competitive total rewards program consisting of broad-based salary and bonus plans as well as annual stock grants to senior level employees. These programs combine to recognize and reward employees based on individual, group, and overall company performance. We provide competitive health and welfare programs which include medical, dental, vision and life insurance, a 401(k) plan, an employee stock purchase program, local pension plans, profit sharing, employee assistance, child and elder care programs, employee recognition and a host of other localized programs tied to the unique needs of our employees. Pay equity is an integral part of our compensation strategy. We have established ongoing processes and protocols to help us pay each individual employee appropriately based on the employee's skills, performance, experience, location, market practices, etc., regardless of race, gender, and other non-performance related attributes. In 2023, we introduced an upgraded and streamlined mental health/Employee Assistance Program solution tailored to the need and preference of employees and families. In addition, we added a fertility benefit giving employees access to a suite of services including pregnancy resources, in vitro fertilization ("IVF"), adoption, donor and surrogate services resources.

Health, Wellness and Safety

The health and welfare of our employees is of the highest importance to Bio-Rad. We prioritize, manage, and carefully track safety performance at all locations globally and integrate sound safety practices in every aspect of our operations. We provide work site hazard evaluations, workplace safety surveys, safety equipment selection, safety program reviews, chemical exposure monitoring, safety training, and disposal of hazardous chemical and infectious waste.

Training and Talent Development

We provide training programs for managers and employees to support their growth and development. Our management series of courses cover essential management and leadership learning to provide our managers with the necessary skills and experience needed to more effectively lead and develop their teams. In addition, available courses for employees help them to be more effective at work, enhance interpersonal effectiveness, and help them achieve their full potential. We also support employees' professional development by providing a reimbursement program for qualified educational expenses.

Investment in Sartorius AG

Sartorius AG ("Sartorius") is an international laboratory and process technology provider for the biotech, pharmaceutical, and food industries. It operates in two divisions – Bioprocess Solutions Division and Lab Products & Services Division. Sartorius is headquartered in Gottingen, Niedersachsen, Germany and has voting ordinary shares as well as non-voting preference shares listed on XETRA and the Frankfurt Stock Exchanges.

As of December 31, 2024, we own 12,987,900 ordinary voting shares and 9,588,908 preference shares of Sartorius, representing approximately 38% of the outstanding ordinary shares (excluding treasury shares) and 28% of the preference shares of Sartorius. As of December 31, 2024, the fair value of the investment in Sartorius was \$4,469.2 million. We account for our investment in Sartorius at fair market value and do not include any of the financial information summarized below in our consolidated financial statements.

The following summarizes certain financial data of Sartorius as of and for the year ended December 31, 2023 (in millions).

	December 31, 2023 (1)	
Current assets	€	1,956.9
Non-current assets		7,798.5
Current liabilities		1,330.0
Non-current liabilities		5,667.9
Equity		2,757.4

	Year Ended December 31, 2023 (1)	
Sales revenue	€	3,395.7
Gross profit on sales		1,561.7
Earnings before interest and taxes (EBIT)		503.9
Net profit		290.0

Cash flow from operating activities		853.6
Cash flow from investing activities		(2,823.3)
Cash flow from financing activities		2,165.7

(1) As disclosed in Sartorius AG's consolidated financial statements for the year ended December 31, 2023, prepared in accordance with the International Financial Reporting Standards (IFRS), the International Financial Reporting Interpretations Committee (IFRIC) Standards, and the International Accounting Standards Board (IASB) as required to be applied by the European Union, and based upon information publicly disclosed by Sartorius. Bio-Rad does not assume, and by way of referencing the financial data of Sartorius above shall not be deemed to assume, any responsibility or liability for any errors or omissions in the information publicly disclosed by Sartorius.

Refer to Sartorius' 2023 Annual Report for further details, which can be found at <https://www.sartorius.com/en/company/investor-relations/sartorius-ag-investor-relations>. The Sartorius website and any information disclosed thereon are not incorporated by reference into this report.

The following graph reflects the changes in the Sartorius share price over the most recent five annual periods:

Available Information

Bio-Rad files annual, quarterly, and current reports, proxy statements, and other documents with the Securities and Exchange Commission ("SEC") under the Securities Exchange Act of 1934, as amended. The SEC maintains an Internet website that contains reports, proxy and information statements, and other information regarding issuers, including Bio-Rad, that file electronically with the SEC. The public can obtain any documents that we file with the SEC at <http://www.sec.gov>.

Bio-Rad's website address is www.bio-rad.com. We make available, free of charge through our website, our Form 10-Ks, 10-Qs and 8-Ks, and any amendments to these reports, as soon as reasonably practicable after filing with the SEC. The information on our website is not part of this Annual Report on Form 10-K.

ITEM 1A. RISK FACTORS

In evaluating our business and whether to invest in any of our securities, you should carefully read the following risk factors in addition to the other information contained in this report. We believe that any of the following risks (some of which have occurred and any of which may occur in the future) could have a material adverse effect on our business, results of operations or financial condition, our industry, the value of our equity holdings, or the trading price of our common stock. We operate in a continually changing business environment, and new risks and uncertainties emerge from time to time. We cannot predict these new risks and uncertainties, nor can we assess the extent to which any such new risks and uncertainties or the extent to which the risks and uncertainties set forth below may adversely affect our business, results of operations, financial condition, our industry, the value of our equity holdings, or the trading price of our common stock. Please carefully consider the following discussion of significant factors, events and uncertainties that make an investment in our securities risky and provide important information for the understanding of the “forward-looking” statements discussed in this report. Additional or unforeseen effects from the global economic and geopolitical climate may give rise to or amplify many of these risks discussed below.

Business, Economic, Legal and Industry Risks

Our international operations expose us to additional costs and legal and regulatory risks, which could have a material adverse effect on our business, results of operations and financial condition.

We have significant international operations. We have direct distribution channels in over 36 countries outside the United States, and during the twelve months ended December 31, 2024 our foreign entities generated 59% of our net sales. Compliance with complex foreign and U.S. laws and regulations that apply to our international operations increases our cost of doing business. These numerous and sometimes conflicting laws and regulations include, among others, data privacy requirements, labor relations laws, tax laws, unfair competition regulations, import and trade restrictions, tariffs, duties, quotas and other trade barriers, export requirements, U.S. laws such as the Foreign Corrupt Practices Act ("FCPA") and other U.S. federal laws and regulations established by the office of Foreign Asset Control, foreign laws such as the UK Bribery Act 2010 or other foreign laws which prohibit corrupt payments to governmental officials or certain payments or remunerations to customers. In addition, changes in laws or regulations potentially could be disruptive to our operations and business relationships in the affected regions.

Given the high level of complexity of the foreign and U.S. laws and regulations that apply to our international operations, we cannot guarantee that we have not or will not inadvertently breach some provisions, for example, through fraudulent or negligent behavior of individual employees, our failure to comply with certain formal documentation requirements, or otherwise. In addition, we operate in some countries in which the business environment is subject to a higher risk of corruption. Our success depends, in part, on our ability to anticipate these risks and manage these challenges through policies, procedures and internal controls. However, we have a dispersed international sales organization, and we use distributors and agents in many of our international operations. This structure makes it more difficult for us to ensure that our international selling operations comply with laws and regulations, and our global policies and procedures.

Violations of these laws and regulations could result in fines, criminal sanctions against us, our officers or our employees, requirements to obtain export licenses, cessation of business activities in sanctioned countries, implementation of compliance programs, and prohibitions on the conduct of our business. Violations of laws and regulations also could result in prohibitions on our ability to offer our products in one or more countries and could materially damage our reputation, our brand, our international expansion efforts, our ability to attract and retain employees, or our business, results of operations and financial condition. See also our risk factors regarding government regulations and global economic conditions below.

The industries and market segments in which we operate are highly competitive, and we may not be able to compete effectively.

The life science and clinical diagnostics markets are each highly competitive. Some of our competitors have greater financial resources than we do, making them better equipped to license technologies and intellectual property from third parties or to fund research and development, manufacturing and marketing efforts, or to source high-demand

materials and components. Moreover, competitive and regulatory conditions in many markets in which we operate restrict our ability to fully recover, through price increases, higher costs of acquired goods and services resulting from inflation and other drivers of cost increases. Many public tenders have become more competitive due to governments lengthening the commitments of their public tenders to multiple years, which reduce the number of tenders in which we can participate annually. Because the value of these multiple-year tenders is so high, our competitors have been more aggressive with their pricing. Our failure to compete effectively and/or pricing pressures resulting from competition could adversely affect our business, results of operations and financial condition.

We may not be able to grow our business because of our failure to develop new or improved products.

Our future growth depends in part on our ability to continue to improve our product offerings and develop and introduce new products that integrate technological advances. If we are unable to integrate technological advances into our product offerings or to design, develop, manufacture and market new products successfully and in a timely manner, our business, results of operations and financial condition will be adversely affected. Supply chain disruptions have caused some delays to our ability to develop and introduce new products. We have experienced product launch delays in the past and may do so in the future. We cannot assure you that our product and process development efforts will be successful or that new products we introduce will achieve market acceptance. Failure to launch successful new products or improvements to existing products may cause our products to become obsolete, which could harm our business, results of operations and financial condition.

Global economic and geopolitical conditions could adversely affect our operations.

In recent years, we have been faced with challenging global economic conditions. U.S. and international markets have experienced inflationary pressures, and inflation rates in the U.S. and in other countries in which we operate have been at elevated levels. Our raw material costs have increased, and we are not always able to recover these increased costs from our customers. Russia's invasion of Ukraine and sanctions against Russia have caused disruptions to global economic conditions and are negatively impacting our business in Russia. Conflicts in the Middle East have also caused some disruptions to the global business environment (including impacting international logistics), the stability of the Middle East region and our business in that region. It is unknown how long any of these disruptions will continue and whether such disruptions will become more severe. In addition, we expect moderating economic growth and changing government policies in China will continue to affect our commercial opportunities in the country. The bank failures in March 2023 and the resulting volatility in the banking sector caused and could continue to cause disruptions to global economic conditions and may impact access to cash and other financial resources by us, our customers and our suppliers. A deterioration in the global economic environment may result in a decrease in demand for our products, increased competition, downward pressure on prices for our products and longer sales cycles. A weakening of macroeconomic conditions is also adversely affecting our suppliers, which could continue to result in interruptions in the supply of components and raw materials necessary for our products and raw material cost increases. Additionally, the United States and other countries have imposed tariffs on certain goods. Further escalation of tariffs or other trade barriers could adversely impact our profitability and/or our competitiveness. See also our risk factors regarding our international operations above and regarding government regulations below.

Reductions in government funding and the capital spending programs of our customers could have a material adverse effect on our business, results of operations or financial condition.

Our customers include universities, clinical diagnostics laboratories, government agencies, hospitals and pharmaceutical, biotechnology and chemical companies. The capital spending programs of these institutions and companies have a significant effect on the demand for our products. Such programs are based on a wide variety of factors, including the resources available to make such purchases, the availability of funding from grants by governments or government agencies, the spending priorities for various types of equipment and the policies regarding capital expenditures during industry downturns or recessionary periods. If funding to our customers were to decrease, or if our customers were to decrease or reallocate their budgets in a manner adverse to us, our business, results of operations or financial condition could be materially and adversely affected.

A reduction or interruption in the supply of components and raw materials has adversely affected and could continue to adversely affect our manufacturing operations and related product sales.

The manufacture of our products requires the timely delivery of sufficient amounts of quality components and materials. We manufacture our products around the world. We acquire our components and materials from many suppliers in various countries. We work closely with our suppliers to ensure the continuity of supply, but we cannot guarantee these efforts will always be successful. Further, while we seek to diversify our sources of components and materials, in certain instances we acquire components and materials from a sole supplier. The COVID-19 pandemic created delays and shortages in the supply of components and raw materials. These shortages, along with challenges in ramping up new production facilities, caused a backlog of sales orders, some of which we consider to be significant, and delays in certain new product development activities. Some of the backlog of sales orders continued into 2023 but moderated in 2024 to a more typical level. We have experienced raw material cost increases, some of which will likely continue. In addition, due to the regulatory environment in which we operate, we may need to cease use of certain essential components and materials and be unable to establish acceptable replacement sources for such components or materials. When our supply is reduced or interrupted or of poor quality, and we are unable to develop alternative sources for such supply, our ability to manufacture our products in a timely or cost-effective manner is adversely affected, which affects our ability to sell our products.

Breaches of our information systems could have a material adverse effect on our business and results of operations.

We have experienced and expect to continue to experience attempts by individuals and organizations to attack and penetrate our layered security controls. Through our sales and eCommerce channels, we collect and store confidential information that customers provide to, among other things, purchase products or services, enroll in promotional programs and register on our web site. We also acquire and retain information about suppliers and employees in the normal course of business. Such information on our systems includes personally identifiable information and, in limited instances, protected health information. We also create and maintain proprietary information that is critical to our business, such as our product designs and manufacturing processes. Despite recent initiatives to improve our technology systems, such as our enterprise resource planning implementation and the centralization of our global information technology organization, we could experience a significant data security breach. The Company is also subject to phishing and other fraud schemes including fraudulent vendor communications with requests for payments and fraudulent attempts to redirect payments to improper bank accounts, some of which have been successful. While the Company has adopted training and process changes to limit the success of such fraudulent activity, the Company will be unable to stop all such fraudulent activity which may lead to unrecoverable payments to criminal accounts. Because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and often are not recognized until launched against a target, we may not be able to anticipate all of these techniques or to implement adequate preventive measures. Computer hackers have attempted to penetrate and will likely continue to attempt to penetrate our and our vendors' information systems and, if successful, could misappropriate confidential customer, supplier, employee or other proprietary business information, such as our intellectual property. Third parties could also gain control of our systems and use them for criminal purposes while appearing to be us. As a result, we could lose existing customers, have difficulty attracting new customers, be exposed to claims from customers and suppliers, financial institutions, payment card associations, employees and other persons, have regulatory sanctions or penalties imposed, incur additional expenses or lose revenues as a result of a data privacy breach, or suffer other adverse consequences. Our operations and ability to process sales orders, particularly through our eCommerce channels, could also be disrupted, as they have been in the past. Any significant breakdown, intrusion, interruption, corruption, or destruction of our systems, as well as any data breaches, could have a material adverse effect on our business and results of operations. See also our risk factors regarding our information technology systems below.

If our information technology systems are disrupted, or if we fail to successfully implement, manage and integrate our information technology and reporting systems, our business, results of operations and financial condition could be harmed.

Our information technology (IT) systems are an integral part of our business, and a significant disruption of our IT systems (which increasingly include cloud-based systems provided by third party vendors) could have a material adverse effect on our business, results of operations and financial condition. We depend on our IT systems to

process orders, manage inventory, pay our vendors and collect accounts receivable. Our IT systems also allow us to efficiently purchase products from our suppliers and ship products to our customers on a timely basis, maintain cost-effective operations and provide customer service. We cannot assure you that our contingency plans will allow us to operate at our current level of efficiency.

Our ability to implement our business plan in a rapidly evolving market requires effective planning, reporting and analytical processes. We expect that we will need to continue to improve and further integrate our IT systems, reporting systems and operating procedures by training and educating our employees with respect to these improvements and integrations on an ongoing basis in order to effectively run our business. We may suffer interruptions in service, loss of data or reduced functionality when we upgrade or change systems or migrate to cloud-based systems. If we fail to successfully manage and integrate our IT systems, reporting systems and operating procedures, it could adversely affect our business, results of operations and financial condition. See also our risk factors regarding our data security above and events beyond our control below.

We are subject to foreign currency exchange fluctuations, which could have a material adverse effect on our results of operations and financial condition.

A significant portion of our operations and sales are outside of the United States. When we make purchases and sales in currencies other than the U.S. dollars, we are exposed to fluctuations in foreign currencies relative to the U.S. dollar that may adversely affect our results of operations and financial condition. Our international sales are largely denominated in local currencies. As a result, the strengthening of the U.S. dollar negatively impacts our consolidated net sales expressed in U.S. dollars. Conversely, when the U.S. dollar weakens, our expenses at our international sites increase. In addition, the volatility of other currencies may negatively impact our operations outside of the United States and increase our costs to hedge against currency fluctuations. In addition, we hold investments and a loan receivable that are subject to foreign exchange fluctuations. We cannot assure you that future shifts in currency exchange rates will not have a material adverse effect on our results of operations and financial condition.

Changes in the market value of our position in Sartorius AG materially impact our financial results.

Changes in the market value of our position in Sartorius AG will continue to materially impact our consolidated statements of income (loss) and other financial statements. A decline in the market value of our position in Sartorius AG will result in decreases in net income due to write-downs in the value of the equity securities. An increase in the market value of our position in Sartorius AG will result in a favorable impact to net income independent of the actual operating performance of our business. Depending on the extent of the decline or of the increase in the market value of our position in Sartorius AG, these negative or positive impacts on us could continue to be material.

Our share price may change significantly based upon changes in the market value of our position in Sartorius AG, independent of the actual performance of our business. Additionally, non-operating income for a period may be significantly impacted by any distribution of dividends by Sartorius AG, particularly when the dividends amount varies in comparison to prior year periods.

The value of our position in Sartorius AG might cause us to be deemed an investment company under the Investment Company Act of 1940.

As a result of the market value of our position in Sartorius AG, we might be deemed to be an “investment company” under Section 3(a)(1)(C) of the Investment Company Act of 1940, as amended (the “Investment Company Act”). The Company does not believe it is an investment company primarily in reliance on Section 3(b)(1) of the Investment Company Act because we are “primarily engaged” in a business other than that of investing, reinvesting, owning, holding or trading in securities. Rather, we are primarily engaged in the development, manufacturing and marketing of products for the life science research and clinical diagnostic markets, and we believe that our historical development, our public representations of policy, the activity of our officers and directors, the nature of our present assets, the sources of our present income, and the public perception of the nature of our business all support the conclusion that we are an operating company and not an investment company. Although we have discussed this issue with the staff of the SEC and we are comfortable with our position, if it is determined later that the Company may not rely on Section 3(b)(1) or any other exemption under the Investment Company Act and the Company were deemed to be an unregistered investment company, such determination would have a material adverse effect on our business as we would need to register as an investment company and be subject to the regulations of the Investment

Company Act which are designed to restrict and regulate mutual funds rather than operating companies. It could also call into question the validity of all contracts to which the Company is a party. If it appeared likely that we would be deemed to be an investment company, we may modify our position in Sartorius AG in order to avoid such determination.

We have incurred and may continue to incur losses in future periods due to write-downs in the value of our financial instruments.

We have positions in a variety of financial instruments including asset backed securities and other similar investments. Financial markets are volatile and the markets for these securities can be illiquid. The value of these securities will continue to be impacted by external market factors including default rates, changes in the value of the underlying property, such as residential or commercial real estate, rating agency actions, the prices at which observable market transactions occur and the financial strength of various entities, such as financial guarantors who provide insurance for the securities. Should we need to convert these positions to cash, we may not be able to sell these instruments without significant losses due to current debtor financial conditions, low trading volume of the securities, or other market considerations.

As discussed further in the Notes to Consolidated Financial Statements, in Note 2. Fair Value Measurements and Investments, under the heading “*Level 3 Fair Value Investments*”, we made a loan of 400 million Euros to Sartorius-Herbst Beteiligungen II GmbH in November 2021 that is secured by the pledge of certain trust interests which upon termination of the trust represent the right to receive Sartorius ordinary shares (the “Loan”). Prior to a termination of the trust, the trust interests, which are provided as collateral for the Loan, are not tradable on the capital markets and may, in case of an enforcement, have to be sold with a significant discount to the value of the underlying shares.

We also have positions in equity securities, including our position in Sartorius AG. Financial markets are volatile and the markets for these equity securities can be illiquid as well. A decline in the market value of our investments in equity securities has resulted and could continue to result in significant losses due to write-downs in the value of the equity securities. Also, if we need to convert these positions to cash, we may not be able to sell these equity securities without significant losses. In addition, significant declines in the value of the Sartorius ordinary shares have reduced the value of the collateral for the Loan discussed in the previous paragraph. The value of the collateral may be insufficient to cover the repayment of the Loan if the decline in value continues, and Sartorius-Herbst Beteiligungen II GmbH will likely have no other assets from which to repay the Loan. Furthermore, the change in the market value of Sartorius ordinary shares will have an impact on the value appreciation rights acquired in connection with the Loan discussed in the previous paragraph.

Recent and planned changes to our organizational structure could negatively impact our business.

We made significant changes to our organizational structure over the past few years, including the reorganization of aspects of our European operations that was announced in February 2021 and additional restructurings approved in 2023, 2024, and 2025. These changes may have unintended consequences, such as distraction of our management and employees, labor unrest, business disruption, disruption of supply, attrition of our workforce, inability to attract or retain key employees, and reduced employee morale or productivity.

Risks relating to intellectual property rights may negatively impact our business.

We rely on a combination of copyright, trade secret, patent and trademark laws and third-party nondisclosure agreements to protect our intellectual property rights and products. However, we cannot assure you that our intellectual property rights will not be challenged, invalidated, circumvented or rendered unenforceable, or that meaningful protection or adequate remedies will be available to us. Unauthorized third parties have attempted to copy our intellectual property, reverse engineer or obtain and use information that we regard as proprietary, or have developed equivalent technologies independently, and may do so in the future. Additionally, third parties have asserted patent, copyright and other intellectual property rights to technologies that are important to us and may do so in the future. If we are unable to license or otherwise access protected technology used in our products, or if we lose our rights under any existing licenses, we could be prohibited from manufacturing and marketing such products. From time to time, we also must enforce our patents or other intellectual property rights or defend ourselves against claimed infringement of the rights of others through litigation. As a result, we could incur substantial costs, be forced to redesign our products, or be required to pay damages or royalties to an infringed

party. Any of the foregoing matters could adversely impact our business, results of operations and financial condition.

Changes in the healthcare industry could have an adverse effect on our business, results of operations and financial condition.

There have been, and will continue to be, significant changes in the healthcare industry in an effort to reduce costs. These changes include:

- The trend towards managed care, together with healthcare reform of the delivery system in the United States and efforts to reform in Europe, has resulted in increased pressure on healthcare providers and other participants in the healthcare industry to reduce selling prices. Consolidation among healthcare providers and consolidation among other participants in the healthcare industry has resulted in fewer, more powerful groups, whose purchasing power gives them cost containment leverage. In particular, there has been a consolidation of laboratories and a consolidation of blood transfusion centers. These industry trends and competitive forces place constraints on the levels of overall pricing and thus could have a material adverse effect on our gross margins for products we sell in clinical diagnostic markets.
- Third party payors, such as Medicare and Medicaid in the United States, have reduced their reimbursements for certain medical products and services. Our Clinical Diagnostics business is impacted by the level of reimbursement available for clinical tests from third party payors. In the United States payment for many diagnostic tests furnished to Medicare fee-for-service beneficiaries is made based on the Medicare Clinical Laboratory Fee Schedule (CLFS), a fee schedule established and adjusted from time to time by the Centers for Medicare and Medicaid Services (CMS). Some commercial payors are guided by the CLFS in establishing their reimbursement rates. Laboratories and clinicians may decide not to order or perform certain clinical diagnostic tests if third party payments are inadequate, and we cannot predict whether third party payors will offer adequate reimbursement for tests utilizing our products to make them commercially attractive. Legislation, such as the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (PPACA) and the Middle Class Tax Relief and Job Creation Act of 2012, has reduced the payments for clinical laboratory services paid under the CLFS. In addition, the Protecting Access to Medicare Act of 2014 (PAMA) has made significant changes to the way Medicare will pay for clinical laboratory services, which has further reduced reimbursement rates.

To the extent that the healthcare industry seeks to address the need to contain costs stemming from reform measures such as those contained in the PPACA and the PAMA, or in future legislation, by limiting the number of clinical tests being performed or the amount of reimbursement available for such tests, our business, results of operations and financial condition could be adversely affected. If these changes in the healthcare markets in the United States and Europe continue, we could be forced to alter our approach in selling, marketing, distributing and servicing our products.

We are subject to substantial government regulation, and any changes in regulation or violations of regulations by us could adversely affect our business, prospects, results of operations or financial condition.

Some of our products (primarily our Clinical Diagnostic products), production processes and marketing are subject to U.S. federal, state and local, and foreign regulation, including by the Food and Drug Administration ("FDA") in the United States and its foreign counterparts. The FDA regulates our Clinical Diagnostic products as medical devices, and we are subject to significant regulatory clearances or approvals to market our Clinical Diagnostic products and other requirements including, for example, recordkeeping and reporting requirements, such as the FDA's medical device reporting regulations and reporting of corrections and removals. The FDA has broad regulatory and enforcement powers. If the FDA determines that we have failed to comply with applicable regulatory requirements, it can impose a variety of enforcement actions ranging from public warning letters, fines, injunctions, consent decrees and civil penalties to suspension or delayed issuance of approvals, seizure or recall of our products, total or partial shutdown of production, withdrawal of approvals or clearances already granted, and criminal prosecution.

The FDA can also require us to repair, replace or refund the cost of devices that we manufactured or distributed. In addition, the FDA may change its clearance and approval policies, adopt additional regulations or revise existing regulations, or take other actions, which may prevent or delay approval or clearance of our products or impact our ability to modify our currently approved or cleared products on a timely basis. Any delay in, or failure to receive or maintain, clearance or approval for our products or changes in regulation could prevent us from generating revenue from these products and adversely affect our business operations and financial results. Additionally, the FDA and other regulatory authorities have broad enforcement powers. Regulatory enforcement or inquiries, or other increased scrutiny on us, could affect the perceived safety and efficacy of our products and dissuade our customers from using our products.

The FDA has issued a final rule applicable to certain clinical diagnostic products referred to as laboratory developed tests. This change in the FDA approach could negatively impact our customers who use our Life Science products for laboratory developed tests.

Many foreign governments have similar rules and regulations regarding the importation, registration, labeling, sale and use of our products. Such agencies may also impose new requirements that may require us to modify or re-register products already on the market or otherwise impact our ability to market our products in those countries. The EU in-vitro Diagnostics Regulation (the “EU IVDR”) includes broad changes regarding in vitro diagnostic devices and medical devices. The EU IVDR required us to modify or re-register some products, and we expect will continue to result in additional costs for ongoing compliance. In addition, Russia has enacted more stringent medical product registration and labeling regulations, China has enacted stricter labeling requirements, and we expect other countries, such as Brazil and India, to impose more regulations that impact our product registrations. The United Kingdom's withdrawal from the EU is resulting in additional regulatory requirements associated with goods manufactured and sold in the United Kingdom and additional complexities and delays with respect to goods, raw materials and personnel moving between the United Kingdom and the EU. In addition, new government administrations may interpret existing regulations or practices differently. Due to these evolving and diverse requirements, we face uncertain product approval timelines, additional time and effort to comply, as well as the potential for reduced sales and/or fines for noncompliance. Increasing protectionism in such countries also impedes our ability to compete with local companies. We may not be able to participate in certain public tenders in China, India and Russia because of increasing measures to restrict access to such tenders for companies without local manufacturing capabilities. Such regulations could adversely affect our business, results of operations and financial condition. See also our risk factors regarding our international operations and regarding global economic and geopolitical conditions above.

We are also subject to government regulation of the use and handling of a number of materials and controlled substances. The U.S. Drug Enforcement Administration establishes registration, security, recordkeeping, reporting, storage, distribution and other requirements for controlled substances pursuant to the Controlled Substances Act of 1970. Failure to comply with present or future laws and regulations could result in substantial liability to us, suspension or cessation of our operations, restrictions on our ability to expand at our present locations or require us to make significant capital expenditures or incur other significant expenses.

We cannot assure you that we will be able to integrate acquired companies, products or technologies into our company successfully, or that we will be able to realize the anticipated benefits from the acquisitions.

As part of our overall business strategy, we pursue acquisitions of and investments in complementary companies, products and technologies. The benefits of any acquisition or investment may prove to be less than anticipated, which we have experienced in some of our acquisitions and investments, and may not outweigh the costs reported in our financial statements. Completing any potential future acquisitions could cause significant diversion of our management's time and resources. If we acquire or invest in new companies, products or technologies, we may be required to assume contingent liabilities or record impairment charges for goodwill and other intangible assets over time. Goodwill and non-amortizable intangible assets are subject to impairment testing, and potential periodic goodwill impairment charges, amortization expenses related to certain intangible assets, and other write-offs could harm our operating results. Impairment tests are highly sensitive to changes in assumptions and minor changes to assumptions could result in impairment losses. If the results forecast in our impairment tests are not achieved, or business trends vary from the assumptions used in forecasts, or external factors change detrimentally, future impairment losses may occur, as they have occurred in the past, which may result in some volatility to our consolidated statements of income (loss). Increased antitrust enforcement and greater government scrutiny of

mergers in the healthcare sector may impact our ability to consummate acquisitions. We cannot assure you that we will successfully overcome these risks or any other problems we encounter in connection with any acquisitions or investments, and any such acquisitions or investments could adversely affect our business, results of operations and financial condition.

Product quality and liability issues could harm our reputation and negatively impact our business, results of operations and financial condition.

We must adequately address quality issues associated with our products, including defects in our engineering, design and manufacturing processes, as well as defects in third-party components included in our products. Our instruments, reagents and consumables are complex, and identifying the root cause of quality issues, especially those affecting reagents or third-party components, is difficult. We may incur significant costs and expend substantial time in researching and remediating such issues. Quality issues could also delay our launching or manufacturing of new products. In addition, quality issues, unapproved uses of our products, or inadequate disclosure of risks related to our products, could result in product recalls or product liability or other claims being brought against us. In responding to shortages, we may source components from alternative suppliers and distributors. Quality issues associated with components from these alternative sources may lead to product failures and associated costs notwithstanding our efforts to detect and remediate such quality issues. These issues could harm our reputation, impair our relationship with existing customers and harm our ability to attract new customers, which could negatively impact our business, results of operations and financial condition.

Lack of key personnel could hurt our business.

Our products are very technical in nature, and we operate in a complex and competitive business environment. In general, only highly qualified and well-trained scientists, technicians and other specialized individuals have the necessary skills to develop, market and sell our products, and many of our manufacturing positions require very specialized knowledge and skills. In addition, the global nature of our business also requires that we have sophisticated and experienced staff to comply with increasingly complex international laws and regulations. We face intense competition for these professionals from our competitors, customers, marketing partners and other companies throughout our industry. If we do not offer competitive compensation and benefits, we may fail to retain or attract a sufficient number of qualified personnel, which could impair our ability to properly run our business. Further, our ability to successfully execute organizational changes, including management transitions within our senior leadership team, are critical to our business success. If we are not able to fully integrate new executives, these changes could impact our ability to successfully execute our business strategy, which could adversely affect our business, results of operations and financial condition.

We may have higher than anticipated tax liabilities.

We are subject to income taxes in the United States and many foreign jurisdictions. We report our results of operations based on our determination of the amount of taxes owed in various tax jurisdictions in which we operate. The determination of our worldwide provision for income taxes and other tax liabilities requires estimation, judgment and calculations where the ultimate tax determination may not be certain. Determination of our tax liabilities is subject to review or examination by tax authorities in various tax jurisdictions. Tax authorities have disagreed with our judgment in the past and may disagree with positions we take in the future resulting in assessments of additional taxes. Any adverse outcome of such review or examination could have a negative impact on our operating results and financial condition.

Economic and political pressures to increase tax revenues in various jurisdictions may make resolving tax disputes more difficult. In recent years, the tax authorities in Europe have disagreed with our tax positions related to hybrid debt, research and development credits, transfer pricing and indirect taxes, among others. We regularly assess the likelihood of the outcome resulting from these examinations to determine the adequacy of our provision for income taxes. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related litigation could be materially different from our historical income tax provisions and accruals.

Changes in tax laws or rates, changes in the interpretation of tax laws or changes in the jurisdictional mix of our earnings could adversely affect our financial position and results of operations.

On December 22, 2017, the U.S. enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act") which made a number of substantial changes to how the United States imposes income tax on multinational corporations. The U.S. Treasury, Internal Revenue Service and other standard setting bodies continue to issue guidance and interpretation relating to the Tax Act. As future guidance is issued, we may make adjustments to amounts previously reported that could materially impact our financial statements.

On August 16, 2022, President Biden signed into law the Inflation Reduction Act of 2022, which included an Alternative Minimum Tax based on the Adjusted Financial Statement Income of Applicable Corporations. We do not believe the Inflation Reduction Act will have a material impact on our income tax provision and cash taxes, but we continue to monitor U.S. Department of the Treasury guidance and regulations.

The tax effect of our position in Sartorius AG and the jurisdictional mix of our earnings could continue to materially affect our financial results and cash flow. In addition, the adoption of some or all of the recommendations set forth in the Organization for Economic Co-operation and Development ("OECD")'s project on "Base Erosion and Profit Shifting" ("BEPS") by tax authorities in the countries in which we operate, could negatively impact our effective tax rate. These recommendations focus on payments from affiliates in high tax jurisdictions to affiliates in lower tax jurisdictions and the activities that give rise to a taxable presence in a particular country.

On October 8, 2021, the OECD announced that 136 countries have agreed on a two-pillar framework that would dramatically alter the taxation of multinational enterprises and require that all profit be subject to a global minimum tax rate of 15%. On December 15, 2022, the European Union formally adopted the Pillar Two Directive and EU member states enacted the Pillar Two Directive as of January 1, 2024. Other countries have taken similar actions. We currently believe Pillar 2 legislation will not have a material impact on our income tax provision and cash taxes.

Environmental, health and safety regulations and enforcement proceedings may negatively impact our business, results of operations and financial condition.

Our operations are subject to federal, state, local and foreign environmental laws and regulations that govern such activities as transportation of goods, materials that we use in our products, emissions to air and discharges to water, as well as handling and disposal practices for solid, hazardous and medical wastes. In addition to environmental laws that regulate our operations, we are also subject to environmental laws and regulations that create liability and responsibility for spills, disposals or other releases of hazardous substances into the environment as a result of our operations or otherwise impacting real property that we own or operate. The environmental laws and regulations also subject us to claims by third parties for damages resulting from any spills, disposals or releases resulting from our operations or at any of our properties. We must also comply with various health and safety regulations in the United States and abroad in connection with our operations.

We may in the future incur capital and operating costs to comply with currently existing laws and regulations, and possible new statutory enactments, and these expenditures may be significant. We have incurred, and may in the future incur, fines related to environmental matters and/or liability for costs or damages related to spills or other releases of hazardous substances into the environment at sites where we have operated, or at off-site locations where we have sent hazardous substances for disposal. We cannot assure you, however, that such matters or any future obligations to comply with environmental or health and safety laws and regulations will not adversely affect our business, results of operations or financial condition.

In addition, there is an increasing focus by U.S. and international regulators, investors, customers, and other stakeholders on environmental, social and governance (ESG) matters. Complying with new laws or regulations concerning sustainability matters, climate related matters or other ESG matters will result in increased compliance costs and create additional non-compliance risks. Failure to adequately meet our stakeholder's expectations or comply with any such laws or regulations may result in loss of business, reputational damage, an inability to attract customers, an inability to attract and retain top talent, and a negative impact on our business, results of operations and financial condition.

We also have announced certain sustainability goals, which require ongoing investment and operational changes. Our efforts may not achieve their intended outcomes, and we may not achieve such goals, which could negatively impact our reputation and business.

Use of generative AI and other AI technologies presents risks and challenges due to the evolving nature of AI.

We utilize artificial intelligence and machine learning technologies (“AI”), such as chatbots, assistants and automation agents, in our business operations, and we are exploring the other opportunities that AI could bring us. The use of AI, particularly generative AI, and the developing regulatory landscape, pose risks that could expose us to liability or adversely affect our business. Integration of AI into our and our vendors’ systems (potentially without the vendor disclosing such use to us) subjects us to the risk that the providers of AI may not meet existing or rapidly evolving regulatory or industry standards with respect to privacy and data protection. This may lead to loss of intellectual property or exposure of confidential or proprietary information, breaches of security or privacy, and reduced levels of service or experience. Sophisticated cyberattacks, including those using AI, could increase these risks. Generative AI can produce false or misleading outputs, or generate content that may not be subject to intellectual property protection or that infringes proprietary rights of others, and thereby present additional risks to our business. Regulatory changes or reinterpretations could introduce new compliance risks, including potential government enforcement actions or civil lawsuits. In addition, a failure to timely and effectively use or deploy AI and integrate it into new product offerings and services could negatively impact our competitiveness, particularly ahead of developing consumer demands and evolving industry trends. Our competitors’ faster or more effective adoption of AI also could disadvantage us.

Our current and future debt and related covenants may restrict our future operations.

We have substantial debt and have the ability to incur additional debt. As of December 31, 2024, we had approximately \$1.2 billion of outstanding long-term indebtedness, primarily consisting of the 3.3% Senior Notes due in March 2027 and the 3.7% Senior Notes due in March 2032 as further discussed in Note 6 of the consolidated financial statements. In addition, we have a revolving credit facility that provides for up to \$200.0 million in borrowing capacity, \$5.7 million of which was utilized for domestic standby letters of credit as of December 31, 2024. Our incurrence of substantial amounts of debt may have important consequences. For instance, it could:

- make it more difficult for us to satisfy our financial obligations, including those relating to our outstanding debt;
- require us to dedicate a substantial portion of our cash flow from operations to the payment of interest and principal due under our debt, which will reduce funds available for other business purposes;
- increase our vulnerability to general adverse economic and industry conditions;
- limit our flexibility in planning for, or reacting to, changes in our business and the industries in which we operate;
- place us at a competitive disadvantage compared with some of our competitors that have less debt; and
- limit our ability to obtain additional financing required to fund working capital and capital expenditures and for other general corporate purposes.

Our existing credit facility, our Senior Notes and agreements we may enter in the future, contain or may contain covenants imposing restrictions on our business. These restrictions may affect our ability to operate our business and may limit our ability to take advantage of potential business opportunities as they arise. Existing covenants place restrictions on our ability to, among other things: incur additional debt; acquire other businesses or assets through merger or purchase; create liens; enter into transactions with affiliates; sell assets; and in the case of some of our subsidiaries, guarantee debt. Our existing credit facility also requires that we comply with a maximum consolidated leverage ratio test. Our ability to comply with these covenants may be affected by events beyond our control, including prevailing economic, financial and industry conditions. The breach of any of these restrictions could result in a default. An event of default under our debt agreements would permit certain of our lenders to declare all amounts borrowed from them to be due and payable, together with accrued and unpaid interest.

We are subject to healthcare laws and regulations and could face substantial penalties if we are unable to fully comply with such laws.

We are subject to healthcare regulation and enforcement by both the U.S. federal government and the U.S. states and foreign governments in which we conduct our business. These healthcare laws and regulations include, for example:

- the U.S. federal Anti-Kickback Statute, which prohibits, among other things, persons or entities from soliciting, receiving, offering or providing remuneration, directly or indirectly, in return for or to induce either the referral of an individual for, or the purchase order or recommendation of, any item or services for which payment may be made under a federal healthcare program such as the Medicare and Medicaid programs;
- U.S. federal false claims laws, which prohibit, among other things, individuals or entities from knowingly presenting, or causing to be presented, claims for payment from Medicare, Medicaid, or other third-party payors that are false or fraudulent. In addition, the U.S. federal government may assert that a claim including items or services resulting from a violation of the federal Anti-Kickback Statute constitutes a false or fraudulent claim for purposes of the false claims statutes;
- the U.S. Physician Payment Sunshine Act, which requires certain manufacturers of drugs, biologics, devices and medical supplies to record any transfers of value to U.S. physicians and U.S. teaching hospitals;
- the Health Insurance Portability and Accountability Act ("HIPAA"), as amended by the Health Information Technology for Economic and Clinical Health Act, which governs the conduct of certain electronic healthcare transactions and protects the security and privacy of protected health information; and
- state or foreign law equivalents of each of the U.S. federal laws above, such as anti-kickback and false claims laws, which may apply to items or services reimbursed by any third-party payor, including commercial insurers.

These laws will continue to impose administrative, cost and compliance burdens on us. The shifting compliance environment and the need to build and maintain robust systems to comply with multiple jurisdictions with different compliance and/or reporting requirements increases the possibility that a healthcare company may violate one or more of these requirements. In addition, any action against us for violation of these laws, even if we successfully defend against it, could cause us to incur significant legal expenses and divert our management's attention from the operation of our business. If our operations are found to be in violation of any of the laws described above or any other governmental regulations that apply to us, we may be subject to penalties, including civil and criminal penalties, damages, fines, exclusion from the Medicare and Medicaid programs or similar government programs in foreign jurisdictions, and the curtailment or restructuring of our operations, any of which could adversely affect our ability to operate our business, results of operations and financial condition.

Risks Related to Being a Public Company

Our failure to establish and maintain effective internal control over financial reporting could result in material misstatements in our financial statements, our failure to meet our reporting obligations and cause investors to lose confidence in our reported financial information, which in turn could cause the trading price of our common stock to decline.

Maintaining effective disclosure controls and procedures and internal control over financial reporting are necessary for us to produce reliable financial statements. Material weaknesses in our internal control over financial reporting have adversely affected us in the past and could affect us in the future and the results of our periodic management evaluations and annual auditor attestation reports regarding the effectiveness of our internal control over financial reporting required by Section 404 of the Sarbanes-Oxley Act of 2002. Any failure to maintain or implement new or improved internal controls, or any difficulties that we may encounter in their maintenance or implementation, could result in additional material weaknesses, result in material misstatements in our consolidated financial statements

and cause us to fail to meet our reporting obligations. This could cause us to lose public confidence and could cause the trading price of our common stock to decline.

General Business Risks

Natural disasters, climate related events, terrorist attacks, acts of war, pandemics, disease outbreaks or other events beyond our control may cause damage or disruption to us and our employees, facilities, information systems, security systems, vendors and customers, which could significantly impact our business, results of operations and financial condition.

We have significant manufacturing and distribution facilities, including in the United States, France, Switzerland, Germany and Singapore. In particular, the western United States has experienced a number of earthquakes, wildfires, floods, landslides and other natural disasters in recent years. These occurrences could damage or destroy our facilities which may result in interruptions to our business and losses that exceed our insurance coverage. In addition, lack of fuel resources due to geopolitical instability (such as Russia's reduction in energy resources supplied to Western Europe), electricity outages, the inability to operate our production and distribution facilities due to power grid failures or lack of fuel, and strikes or other labor unrest at any of our sites or surrounding areas could cause disruption to our business. Acts of terrorism, bioterrorism, violence or war (such as Russia's invasion of Ukraine and the recent escalation of conflicts in the Middle East), weather-related events, or public health issues such as pandemics and the outbreak of a contagious disease like COVID-19 could also affect the markets in which we operate, our business operations and strategic plans. Political unrest may affect our sales in certain regions, such as in Southeast Asia, the Middle East and Eastern Europe. Any of these events could adversely affect our business, results of operations and financial condition.

Risks Related to Our Common Stock

A significant majority of our voting stock is held by the Schwartz family, which could lead to conflicts of interest.

We have two classes of voting stock: Class A Common Stock and Class B Common Stock. With a few exceptions, holders of Class A and Class B Common Stock vote as a single class. When voting as a single class, each share of Class A Common Stock is entitled to one-tenth of a vote, while each share of Class B Common Stock has one vote. In the election or removal of directors, the classes vote separately and the holders of Class A Common Stock are entitled to elect 25% of the Board of Directors, with holders of Class B Common Stock electing the remaining directors. As a result of the Schwartz family's ownership of our Class A and Class B Common Stock, they are able to elect a majority of our directors, effect fundamental changes in our direction and control matters affecting us, including the determination of business opportunities that may be suitable for our company. The Schwartz family may exercise its control over us according to interests that are different from other investors' or debtors' interests. In particular, this concentration of ownership and voting power may have the effect of delaying or preventing a change in control of our company.

The forum selection provision in our bylaws could increase costs to bring a claim, discourage claims or limit the ability of the Company's stockholders to bring a claim in a judicial forum viewed by the stockholders as more favorable for disputes with the Company or the Company's directors, officers or other employees.

Our bylaws provide that unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware (or, if the Court of Chancery does not have jurisdiction, another state court located within the State of Delaware or, if no state court located within the State of Delaware has jurisdiction, the federal district court for the District of Delaware) shall be the sole and exclusive forum for (i) any derivative action or proceeding brought on behalf of the Company, (ii) any action asserting a claim of breach of a fiduciary duty owed by any director, officer or other employee of the Company to the Company or the Company's stockholders, (iii) any action arising pursuant to any provision of the General Corporation Law of the State of Delaware, the Certificate of Incorporation or the Bylaws (in each case, as may be amended from time to time) or (iv) any action asserting a claim against the Company or any of its directors, officers or other employees governed by the internal affairs doctrine of the State of Delaware. This choice of forum provision may increase costs to bring a claim, discourage claims or limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with the Company or the Company's directors, officers or other employees, which may discourage such lawsuits against the Company or the Company's directors, officers and other employees. Alternatively, if a court were to find the choice

of forum provision contained in the Company's bylaws to be inapplicable or unenforceable in an action, the Company may incur additional costs associated with resolving such action in other jurisdictions.

Application of the choice of forum provision may be limited in some instances by applicable law. Section 27 of the Exchange Act creates exclusive federal jurisdiction over all suits brought to enforce any duty or liability created by the Exchange Act or the rules and regulations thereunder. As a result, the choice of forum provision will not apply to actions arising under the Exchange Act or the rules and regulations thereunder. Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over suits brought to enforce any duty or liability created by the Securities Act or the rules and regulations thereunder, subject to a limited exception for certain "covered class actions." There is uncertainty, particularly in light of current litigation, as to whether a court would enforce the choice of forum provision with respect to claims under the Securities Act. Our stockholders will not be deemed, by operation of the Company's choice of forum provision, to have waived claims arising under the federal securities laws and the rules and regulations thereunder.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 1C. CYBERSECURITY

Cybersecurity Risk Management and Strategy

We have developed and implemented a cybersecurity risk management program intended to protect the confidentiality, integrity, and availability of our critical systems and information. Our cybersecurity risk management program includes a cybersecurity incident response plan.

We design and assess our program based on the National Institute of Standards and Technology Cybersecurity Framework Special Publication 800-53, 800-61, rev 2 and Center for Internet Security, Critical Security Controls (CIS Controls). This does not imply that we meet any particular technical standards, specifications, or requirements, only that we use the National Institute of Standards and Technology Cybersecurity Framework as a guide to help us identify, assess, and manage cybersecurity risks relevant to our business.

Our cybersecurity risk management program is part of our overall enterprise risk management program, and shares common methodologies, reporting channels and governance processes that apply across the enterprise risk management program to other legal, compliance, strategic, operational, and financial risk areas.

Our cybersecurity risk management program includes:

- risk assessments designed to help identify material cybersecurity risks to our critical systems, information, products, services, and our broader enterprise IT environment;
- a security team principally responsible for managing (1) our cybersecurity risk assessment processes, (2) our security controls, and (3) our response to cybersecurity incidents;
- the use of external service providers, where appropriate, to assess, test or otherwise assist with aspects of our security controls;
- cybersecurity awareness training of our employees, incident response personnel, and senior management;
- a cybersecurity incident response plan that includes procedures for responding to cybersecurity incidents; and
- a third-party risk management process to oversee critical service providers, suppliers, and vendors.

We have not identified risks from known cybersecurity threats, including as a result of any prior cybersecurity incidents in the past fiscal year, that have materially affected or are reasonably likely to materially affect us,

including our operations, business strategy, results of operations, or financial condition. For more information about our cybersecurity related risks, see Part I, Item 1A, Risk Factors under the risks titled "Breaches of our information systems could have a material adverse effect on our business and results of operations" and "If our information technology systems are disrupted, or if we fail to successfully implement, manage and integrate our information technology and reporting systems, our business, results of operations and financial condition could be harmed."

Cybersecurity Governance

Our Board considers cybersecurity risk as part of its risk oversight function and has delegated to the Legal and Regulatory Compliance Committee ("Committee") oversight of cybersecurity and other information technology risks. The Committee oversees management's implementation of our cybersecurity risk management program.

The Committee receives quarterly reports from management on our cybersecurity risks. In addition, management updates the Committee, as necessary, regarding any material cybersecurity incidents, as well as any incidents with lesser impact potential.

The Committee reports to the full Board regarding its activities, including those related to cybersecurity. The full Board also receives briefings from management on our cyber risk management program. Board members receive presentations or reports on cybersecurity topics from our SVP Global Technology & Systems, who is our Chief Information Security Officer ("CISO"), internal security staff or external experts as part of the Board's continuing education on topics that impact public companies.

Our management team, including, our Chief Information Security Officer, Chief Privacy Officer, General Counsel, Director of Information Security & IT Compliance, Corporate Treasurer, and Internal Audit Senior Director, is responsible for assessing and managing our material risks from cybersecurity threats. The team has primary responsibility for our overall cybersecurity risk management program and supervises both our internal cybersecurity personnel and our retained external cybersecurity consultants. Our management team includes a wealth of expertise in navigating the complex landscape of cybersecurity, with a robust background in cyber risk management and incident response. With a collective experience that spans several decades, our team has successfully addressed and mitigated diverse cyber threats, ranging from sophisticated attacks to emerging vulnerabilities. Members of our management team hold industry-recognized certifications, including but not limited to CISSP, CISA, and CEH, underscoring their commitment to continuous professional development and adherence to the highest standards in the field.

Our management team supervises efforts to prevent, detect, mitigate, and remediate cybersecurity risks and incidents through various means, which may include briefings from internal security personnel; threat intelligence and other information obtained from governmental, public or private sources, including external consultants engaged by us; and alerts and reports produced by security tools deployed in the IT environment.

ITEM 2. PROPERTIES

We own our corporate headquarters located in Hercules, California. The principal manufacturing and research locations for each segment are as follows:

Segment	Location	Owned/Leased
Life Science	Boulder, Colorado	Leased
	Oxford, England	Leased
	Neuried, Germany	Leased
	Shanghai, China	Leased
	Suzhou, China	Leased
Clinical Diagnostics	Irvine, California	Leased
	Greater Seattle Area, Washington	Leased
	Warsaw, Poland	Leased
	Cressier, Switzerland	Owned
	Dreieich, Germany	Owned/Leased
Shared	Greater San Francisco Bay Area, California	Owned/Leased
	Ann Arbor, Michigan	Leased
	Greater Paris Area, France	Leased
	Lille, France	Owned
	Leipzig, Germany	Leased
	Singapore	Leased

Most manufacturing and research facilities also house administration, sales and distribution activities. In addition, we lease office and warehouse facilities in a variety of locations around the world. The facilities are used principally for sales, service, distribution and administration for both segments.

ITEM 3. LEGAL PROCEEDINGS

We are a party to various claims, legal actions and complaints arising in the ordinary course of business. While we do not believe, at this time, that any ultimate liability resulting from any of these matters will have a material adverse effect on our results of operations, financial position or liquidity, we cannot give any assurance regarding the ultimate outcome of these matters and their resolution could be material to our operating results for any particular period, depending on the level of income for the period.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Information Concerning Common Stock

Bio-Rad's Class A and Class B Common Stock are listed on the New York Stock Exchange with the ticker symbols BIO and BIO.B, respectively.

On February 11, 2025, we had 144 holders of record of Class A Common Stock and 82 holders of record of Class B Common Stock. Bio-Rad has never paid a cash dividend and has no present plans to pay cash dividends.

In July 2023, the board of directors authorized a new share repurchase program ("2023 Share Repurchase Program") granting the Company authority to repurchase, on a discretionary basis, up to \$500 million of the outstanding shares of the Company's common stock. In July 2024, the board of directors granted the Company authority to repurchase, on a discretionary basis, up to an additional \$500 million of the outstanding shares of the Company's common stock under the 2023 Share Repurchase Program. During the three months ended December 31, 2024, we did not purchase or otherwise acquire any shares of common stock. As of December 31, 2024, \$577.1 million remained available for repurchases under the 2023 Share Repurchase Program.

See Item 12 of Part III of this report for the security ownership of certain beneficial owners and management and for securities authorized for issuance under equity compensation plans.

Stock Performance Graph

The following graph compares the cumulative stockholder returns over the past five years for our Class A Common Stock, the S&P 500 Index, the S&P MidCap 400 Index, and the S&P 500 Life Sciences Tools & Services Index, assuming \$100 invested on December 31, 2019, and reinvestment of dividends if paid:

(1) As a result of an S&P 500 Index rebalance, we have been moved from the S&P 500 Index to the S&P MidCap 400 Index and, thus, are presenting both the S&P MidCap 400 Index and the S&P 500 Index for this year of transition.

This stock performance graph shall not be deemed incorporated by reference by any general statement incorporating by reference into any filing under the Securities Act or the Exchange Act and shall not otherwise be deemed filed under these Acts.

ITEM 6. RESERVED

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion should be read in conjunction with the information contained in our consolidated financial statements and the accompanying notes which are an integral part of the statements. Refer to Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations located in our Annual Report on Form 10-K for the fiscal year ended December 31, 2023, filed on February 16, 2024, for the discussion of the comparison of the fiscal year ended December 31, 2023 to the fiscal year ended December 31, 2022.

Overview. We are a multinational developer, manufacturer and worldwide distributor of our own life science research and clinical diagnostics products. Our business is organized into two reportable segments: Life Science and Clinical Diagnostics, with the mission to provide scientists with specialized tools needed for biological research and health care specialists with products needed for clinical diagnostics.

We sell more than 12,000 products and services to a diverse client base comprised of scientific research, healthcare, education and government customers worldwide. We do not disclose quantitative information about our different products and services as it is impractical to do so based primarily on the numerous products and services that we sell and the global markets that we serve.

We manufacture and supply our customers with a range of reagents, apparatus and equipment to separate complex chemical and biological materials and to identify, analyze and purify components. As our customers require standardization for their experiments and test results, much of our revenues are recurring in nature.

We rely on the support of many governments for both research and healthcare. The current global economic outlook is still uncertain as the need to control social spending by many governments limits opportunities for growth. Approximately 41% of our 2024 consolidated net sales are derived from the United States and approximately 59% are derived from international locations, with Europe being our largest international region. The international sales are largely denominated in local currencies such as the Euro, Swiss Franc, Japanese Yen, Chinese Yuan and British Sterling. As a result, our consolidated net sales expressed in dollars benefit when the U.S. dollar weakens and suffer when the dollar strengthens. When the dollar strengthens, we benefit from lower cost of sales from our own international manufacturing sites, and from lower international operating expenses. We regularly discuss our changes in revenue and expense categories in terms of both changing foreign exchange rates and in terms of a currency neutral basis, if notable, to explain the impact currency has on our results.

We are impacted by ongoing global economic and geopolitical conditions and our business continued to be negatively impacted by the ongoing challenges impacting the biopharma market and small biotech companies. We expect that these conditions will continue to impact our business in 2025.

Critical Accounting Policies and Estimates

The accompanying discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and contingencies as of the date of the financial statements and reported amounts of revenues and expenses during the reporting periods. We evaluate our estimates on an on-going basis. We base our estimates on historical experience and on other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. However, future events may cause us to change our assumptions and estimates, which may require adjustment. Actual results could differ from these estimates. We have determined that for the periods reported in this Annual Report on Form 10-K the following accounting policies and estimates are critical in understanding our financial condition and results of operations.

Accounting for Income Taxes

We operate in multiple jurisdictions and our profits are taxed pursuant to the tax laws of these jurisdictions. Our effective income tax rate may be affected by the changes in or interpretations of tax laws and tax agreements in any given jurisdiction, utilization of net operating loss and tax credit carryforwards, changes in geographical mix of income and expense, and changes in our assessment of matters such as the ability to realize deferred tax assets. As a result of these considerations, we must estimate income taxes in each of the jurisdictions in which we operate. This process involves estimating current tax exposure together with assessing temporary differences resulting from the different treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in the consolidated balance sheet.

We assess the likelihood that our deferred tax assets will be recovered from future taxable income, considering all available evidence such as historical levels of income, expectations and risks associated with estimates of future taxable income and ongoing prudent and feasible tax strategies. When we determine that it is not more likely than not that we will realize all or part of our deferred tax assets, an adjustment is charged to earnings in the period when such determination is made. Likewise, if we later determine that it is more likely than not that all or a part of our deferred tax assets would be realized, the previously provided valuation allowance would be reversed.

We make certain estimates and judgments about the application of tax laws, the expected resolution of uncertain tax positions and other matters surrounding the recognition and measurement of uncertain tax benefits. In the event that uncertain tax positions are resolved for amounts different than our estimates, or the related statutes of limitations expire without the assessment of additional income taxes, we will be required to adjust the amounts of the related assets and liabilities in the period in which such events occur. Such adjustments may have a material impact on our income tax provision and our results of operations.

Impairment of Goodwill

We conduct a goodwill impairment analysis annually in the fourth quarter or more frequently if indicators of impairment exist or if a decision is made to sell or exit a business. We test goodwill at the reporting unit level. Significant judgments are involved in determining if an indicator of impairment has occurred.

We first may assess qualitative factors to determine if it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the quantitative goodwill impairment test included in U.S. GAAP. To the extent our assessment identifies adverse conditions, or if we elect to bypass the qualitative assessment, goodwill is tested at the reporting unit level using a quantitative impairment test. We generally estimate the fair value of the reporting units in goodwill impairment assessments using an income approach, which includes an analysis of the future cash flows expected to be generated and the risk associated with achieving such cash flows. This approach requires significant management judgment including the discount rate that is applied to the discretely forecasted future cash flows to calculate the present value of those cash flows and the estimate of future cash flows attributable to the reporting unit. Actual results may differ from management's estimates. There were no impairments for the years ended December 31, 2024, 2023 and 2022.

Revenue Recognition

We recognize revenue from operations through the sale of products, services, license of intellectual property and rental of instruments.

We enter into contracts that can include various combinations of products and services, which are generally accounted for as distinct performance obligations. The transaction consideration is allocated between separate performance obligations of an arrangement based on the stand-alone selling price ("SSP") for each distinct product or service.

We recognize revenue from product sales at the point in time when we have satisfied our performance obligation by transferring control of the product to the customer. We use judgment to evaluate whether and when control has transferred and consider the right to payment, legal title, physical possession, risks and rewards of ownership, and customer acceptance if it is not a formality, as indicators to determine the transfer of control to the customer.

Fair Value Measurements

We elected the fair value option under ASC 825, Financial Instruments for accounting of the Loan to Sartorius-Herbst Beteiligungen II GmbH to simplify the accounting. The Loan includes certain value appreciation rights that are due upon repayment of the Loan. The fair value of the Loan and value appreciation right is estimated under the income approach using a discounted cash flow, and option pricing model, respectively. The significant assumptions used to estimate fair value of the Loan include an estimate of the discount rate and cash flows of the Loan and the

significant assumptions used to estimate the fair value of the value appreciation right include volatility, the risk-free interest rate, expected life (in years) and expected dividend. The inputs are subject to estimation uncertainty and actual amounts realized may materially differ. An increase in the expected volatility may result in a significantly higher fair value, whereas a decrease in expected life may result in a significantly lower fair value. All subsequent changes in fair value of the Loan and value appreciation right, including accrued interest are recognized in Losses from change in fair market value of equity securities and loan receivable in our consolidated statements of income (loss).

Results of Operations - Sales, Gross Margins and Expenses

Comparison of the Year Ended December 31, 2024 to the Year Ended December 31, 2023

The following table shows Cost of goods sold, Gross profit, components of operating expense, and Net loss as a percentage of Net sales:

	2024	2023
Net sales	100.0 %	100.0 %
Cost of goods sold	46.3	46.6
Gross profit	53.7	53.4
Selling, general and administrative expense	31.7	31.5
Research and development expense	11.5	9.3
Net loss	(71.9)	(23.9)

Net sales

Percentage sales growth in currency neutral amounts are calculated by translating prior period sales in each local currency using the current period monthly average foreign exchange rates for that currency and comparing that to current period sales.

Net sales (sales) for the year ended December 31, 2024 were \$2.57 billion, compared to \$2.67 billion for the year ended December 31, 2023, a decrease of 3.9%. On a currency neutral basis, for the year ended December 31, 2024 sales decreased by approximately 3.6% compared to the same period in 2023. The decrease in sales was driven by lower sales in our Life Science segment.

The Life Science segment sales for the year ended December 31, 2024 were \$1.03 billion, a decrease of 12.8% compared to the year ended December 31, 2023. On a currency neutral basis, sales decreased 12.6% compared to the year ended December 31, 2023. The decrease was driven by ongoing weakness in the biotech and biopharma end-markets. Currency neutral sales decreased across all regions.

The Clinical Diagnostics segment sales for the year ended December 31, 2024 were \$1.54 billion, an increase of 3.3% compared to the year ended December 31, 2023. On a currency neutral basis, sales increased 3.7% compared to the year ended December 31, 2023. The currency neutral sales increase was primarily driven by an increased demand for our quality control and blood typing products. Currency neutral sales increased across all regions.

Gross margin

Consolidated gross margin was 53.7% for the year ended December 31, 2024 compared to 53.4% for the year ended December 31, 2023. Gross margin for the Life Science segment and Clinical Diagnostics segment for the year ended December 31, 2024 increased by approximately 0.3 percentage points and 0.5 percentage points, respectively, from the year ended December 31, 2023. The increase in gross margin was primarily driven by favorable product mix and cost control measures, partially offset by higher restructuring and material costs.

Selling, general and administrative expense

Consolidated selling, general and administrative expense (SG&A) decreased to \$814.0 million or 31.7% of sales for the year ended December 31, 2024 compared to \$841.7 million or 31.5% of sales for the year ended December 31, 2023. The decrease to SG&A expense was primarily due to lower restructuring costs and a reduction in discretionary spending.

Research and development expense

Consolidated research and development (R&D) expense increased to \$295.9 million or 11.5% of sales for the year ended December 31, 2024 compared to \$247.4 million or 9.3% of sales for the year ended December 31, 2023. The increase in R&D expense in the year ended December 31, 2024 compared to the year ended December 31, 2023 was primarily due to a one-time acquired in-process research and development expense of \$29.5 million in 2024 and an increase in the fair value of contingent consideration of \$12.5 million impacting R&D expense in 2024 compared to a decrease in the fair value of contingent consideration of \$14.0 million impacting R&D expense in 2023.

Results of Operations – Non-operating

Interest expense

Interest expense for the years ended December 31, 2024 and 2023 was \$48.9 million and \$49.4 million, respectively, which primarily consisted of interest expense related to the \$1.2 billion Senior Notes.

Foreign currency exchange (gains) losses

Foreign currency exchange (gains) losses, net consist primarily of foreign currency transaction gains and losses on intercompany net receivables and payables and the change in fair value of our forward foreign exchange contracts used to manage our foreign currency exchange risk. Foreign currency exchange net gains were \$3.9 million and \$7.3 million for the years ended December 31, 2024 and December 31, 2023, respectively. Gains and losses are primarily due to the estimating process inherent in the timing of product shipments and intercompany debt payments, market volatility, and the change in the fair value of our foreign exchange contracts.

Change in fair market value of equity securities and loan receivable

Losses from change in fair market value of equity securities and loan receivable was \$2.66 billion and \$1.25 billion for the years ended December 31, 2024 and 2023, respectively. The change in the fair market value primarily resulted from the recognition of higher holding losses of \$2.68 billion compared to \$1.26 billion in the year ended December 31, 2023 on our position in Sartorius AG. In addition, holding gains from the change in fair market value of our loan receivable of \$12.5 million in the year ended December 31, 2024, compared to holding losses of \$6.8 million in the year ended December 31, 2023 contributed to the change.

Other income, net

Other income, net includes investment and dividend income, interest income on our cash and cash equivalents, short-term investments and long-term marketable securities. Other income, net for the year ended December 31, 2024 decreased to \$90.3 million compared to \$106.5 million for the year ended December 31, 2023. The decrease was primarily attributable to lower dividend income from Sartorius AG in 2024 compared to 2023.

Effective tax rate

Our effective tax rates were 21.3% and 25.0% for the years ended December 31, 2024 and 2023, respectively. The effective tax rates for the years ended December 31, 2024 and 2023 were primarily driven by the unrealized gain/loss in equity securities that was taxed at 22.6% and 22.3%, respectively, as well as the geographical mix of earnings.

Our income tax returns are routinely audited by U.S. federal, state and foreign tax authorities. We are currently under examination by many of these tax authorities. There are differing interpretations of tax laws and regulations, and as a result, significant disputes may arise with these tax authorities involving issues of the timing and amount of deductions and allocations of income among various tax jurisdictions.

We record liabilities for unrecognized tax benefits related to uncertain tax positions. We do not believe the resolution of our uncertain tax positions will have a material adverse effect on our consolidated financial statements, although an adverse resolution of one or more of these uncertain tax positions in any period may have a material impact on the results of operations for that period.

As of December 31, 2024, based on the expected outcome of certain examinations or as a result of the expiration of statutes of limitation for certain jurisdictions, we believe that within the next twelve months it is reasonably possible that our previously unrecognized tax benefits could decrease by approximately \$18.1 million.

On August 16, 2022, President Biden signed into law the Inflation Reduction Act of 2022, which included an Alternative Minimum Tax based on the Adjusted Financial Statement Income of Applicable Corporations. We do not believe the Inflation Reduction Act will have a material impact on our income tax provision and cash taxes, but we continue to monitor U.S. Department of the Treasury guidance and regulations.

Liquidity and Capital Resources

Bio-Rad operates and conducts business globally, primarily through subsidiary companies established in the markets in which we trade. Goods are manufactured in a small number of locations, and are then shipped to local distribution facilities around the world. Our product mix is diversified, and certain products compete largely on product efficacy, while others compete on price. Gross margins are generally sufficient to exceed normal operating costs, and funding for research and development of new products, as well as routine outflows for capital expenditures, interest and taxes. In addition to the annual positive cash flow from operating activities, additional liquidity is readily available via the sale of short-term investments and access to our \$200.0 million unsecured Revolving Credit Agreement that we entered into in February 2024, and to a lesser extent international lines of credit. Borrowings under the Revolving Credit Agreement are available on a revolving basis and can be used to make acquisitions, for working capital and for other general corporate purposes. We had no outstanding borrowings under the Revolving Credit Agreement as of December 31, 2024, however, \$5.7 million was utilized for domestic standby letters of credit that reduced our borrowing availability. As of December 31, 2024, our short-term investments include the net cash proceeds from the sale of Senior Notes of \$1.186 billion. Interest is payable semiannually in arrears on March 15 and September 15 of each year. Management believes that this availability, together with cash flow from operations, will be adequate to meet our current objectives for operations, research and development, capital additions for manufacturing and distribution, plant and equipment, information technology systems and acquisitions of reasonable proportion to our existing total available capital for the next twelve months and beyond.

At December 31, 2024, we had available \$1.7 billion in cash, cash equivalents and short-term investments, of which approximately 14% was held in our foreign subsidiaries. The amount of funds held in the United States can fluctuate due to the timing of receipts and payments in the ordinary course of business and due to other reasons, such as acquisitions and borrowings. As part of our ongoing liquidity assessments, we regularly monitor the mix of domestic and foreign cash flows (both inflows and outflows).

It is generally our intention to repatriate certain foreign earnings to the extent that such repatriations are not restricted by local laws, and there are no substantial incremental costs.

Cash Flows from Operations

Net cash provided by operations was \$455.2 million and \$374.9 million for the years ended December 31, 2024 and 2023, respectively. The increase in operating cash flows was primarily due to lower cash paid to suppliers and employees, lower income tax paid, and higher proceeds from foreign exchange contracts, partially offset by lower cash received from customers and lower dividend proceeds from Sartorius AG.

Cash Flows from Investing Activities

Our investing activities have consisted primarily of cash used for purchases of marketable securities and investments, and acquisitions.

Net cash used in investing activities was \$160.2 million compared to net cash provided by investing activities of \$20.2 million for the years ended December 31, 2024 and 2023, respectively, primarily due to the timing of our purchases, maturities and sales of marketable securities and investments.

Cash Flows from Financing Activities

Our financing activities have consisted primarily of cash used for stock related activity, including the issuance of common stock and repurchases of treasury stock.

Net cash used in financing activities was \$218.8 million and \$425.6 million for the years ended December 31, 2024 and 2023, respectively. The change was primarily attributable to lower payments for share repurchases, partially offset by a one-time payment of contingent consideration.

Treasury Shares

During the year ended December 31, 2024, 183,567 shares of Class A treasury stock with an aggregate total cost of \$64.0 million were reissued to fulfill grants to employees under our restricted stock program and our Employee Stock Purchase Program. Upon reissuing the Class A treasury stock, Additional paid-in capital was reduced by \$48.2 million from share reissuance activity during the year.

During the year ended December 31, 2023, 160,811 shares of Class A treasury stock with an aggregate total cost of \$64.1 million were reissued to fulfill grants to employees under our restricted stock program and our Employee Stock Purchase Program. Upon reissuing the Class A treasury stock, Additional paid-in capital was reduced by \$49.7 million from share reissuance activity during the year.

The re-issuance of the treasury stock for the years ended December 31, 2024 and 2023 did not require cash payments or receipts and therefore did not affect liquidity.

During the year ended December 31, 2024, we repurchased 690,857 shares of Class A common stock for \$201.6 million under our share repurchase programs, compared to the repurchase of 1,267,757 shares of our common stock for \$428.7 million during the year ended December 31, 2023. As of December 31, 2024, \$577.1 million of stock remained available for repurchases under the Company's 2023 Share Repurchase Program. We designated these repurchased shares as treasury stock.

Contractual Obligations

The following summarizes certain of our contractual obligations as of December 31, 2024 and the effect such obligations are expected to have on our cash flows in future periods (in millions):

Contractual Obligations	Payments Due by Period				
	Total	Less Than One Year	1-3 Years	3-5 Years	More than 5 Years
Long-term debt, including current portion (1)	\$ 1,210.4	\$ 1.2	\$ 401.0	\$ 1.1	\$ 807.1
Interest payments (1)	\$ 257.7	\$ 43.9	\$ 77.4	\$ 61.4	\$ 75.0
Operating lease obligations (2)	\$ 195.5	\$ 46.8	\$ 66.0	\$ 39.4	\$ 43.3
Purchase obligations (3)	\$ 77.8	\$ 60.1	\$ 17.7	\$ —	\$ —
Long-term liabilities (4)	\$ 90.8	\$ 4.4	\$ 17.5	\$ 10.0	\$ 58.9

(1) These amounts represent expected cash payments, primarily from Senior Notes, which are included in our December 31, 2024 consolidated balance sheet. See Note 6 of the consolidated financial statements for additional information about our debt.

(2) Operating lease obligations are described in Note 16 of the consolidated financial statements.

(3) Purchase obligations include agreements to purchase goods or services that are enforceable and legally binding to Bio-Rad and that specify all significant terms. Purchase obligations exclude agreements that are cancelable without penalty. Recognition of purchase obligations occurs when products or services are delivered to Bio-Rad generally within Accounts payable or Other current liabilities.

(4) These amounts primarily represent recognized long-term obligations for other post-employment benefits and long-term deferred revenue. Excluded from this table are tax liabilities for uncertain tax positions and contingencies in the amount of \$81.1 million. We are not able to reasonably estimate the timing of future cash flows of these tax liabilities, therefore, our income tax obligations are excluded from the table above. See Note 7 of the consolidated financial statements for additional information about our income taxes. See Note 13 of the consolidated financial statements for additional information about these purchase obligations.

Recent Accounting Pronouncements Adopted

See Note 1 to the consolidated financial statements for recent accounting pronouncements adopted and to be adopted.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Financial Risk Management

The main goal of Bio-Rad's financial risk management program is to reduce the variance in expected cash flows arising from unexpected foreign exchange rate and interest rate changes. Financial exposures are managed through operational means and by using various financial instruments, including cash and investments, borrowings, and forward and spot foreign exchange contracts. No derivative financial instruments are entered into for the purpose of trading or speculation. Company policy requires that all derivative positions are undertaken to manage the risks arising from underlying business activities. We do not have derivative contracts that are designated for hedge accounting treatment. As a result, all derivative instruments are carried at fair value on the balance sheet and changes in fair value are included in reported earnings.

Foreign Exchange Risk. We operate and conduct business in many countries and are exposed to movements in foreign currency exchange rates. We face transactional currency exposures that arise when we enter into transactions denominated in currencies other than U.S. dollars. Additionally, our consolidated net equity is impacted by the conversion of the net assets of our international subsidiaries for which the functional currency is not the U.S. dollar.

Foreign currency exposures are managed and hedged on a centralized basis. This allows for natural offsets and netting of foreign exchange exposures across entities. Where possible, we seek to manage our foreign exchange risk in part through operational means, including matching same-currency revenues to same-currency costs, and same-currency assets to same-currency liabilities. We enter into foreign currency forward contracts to hedge the gains and losses arising from remeasurement of non-US dollar denominated monetary assets and liabilities, primarily cash,

accounts receivables and accounts payables. The majority of forward contracts expire within 90 days or less. We record the change in value of our foreign currency denominated cash, receivables and payables as a Foreign exchange (gain) loss on our consolidated statements of income (loss) along with the change in fair market value of the forward exchange contract used as an economic hedge of those assets or liabilities.

Our forward contract holdings at year-end were analyzed to determine their sensitivity to fluctuations in foreign currency exchange rates. All other variables were held constant. Market risk associated with derivative holdings is the potential change in fair value of derivative positions arising from an adverse movement in foreign exchange rates. A hypothetical 10% depreciation / appreciation of foreign currencies relative to the U.S. dollar would result in an unrealized gain / loss of \$32.1 million on our derivative position as of December 31, 2024. The gains or losses on foreign currency forward contracts resulting from changes in currency exchange rates are expected to approximately offset remeasurement losses or gains on the exposures being hedged.

Interest Rate Risk. Bio-Rad centrally manages the short-term cash surpluses and maintains a diversified portfolio of high-quality fixed income securities, such as U.S. Treasury, U.S. government agency securities, corporate notes and bonds, and asset backed securities. A sharp rise in interest rates could have a material adverse impact on the fair value of our fixed-income investment portfolio. Conversely, declines in interest rates could have a material adverse impact on interest income for our investment portfolio. A hypothetical increase or decrease in interest rates by 50 and 100 basis points would have resulted in a decrease or increase in the fair value of our net investment position of approximately \$10.9 million and \$21.7 million, respectively, as of December 31, 2024.

As of December 31, 2024, we had \$1.20 billion in principal amount of fixed-rate long-term debt outstanding. Interest rate changes affect the fair value of our notes but do not impact our financial position, cash flows or results of operations due to the fixed nature of the debt obligations.

Share price movement risk associated with our investment in Sartorius. We face financial statement exposure resulting from changes in the market value of our position in Sartorius. A 10% depreciation / appreciation on the quoted stock prices for ordinary and preference shares of Sartorius at December 31, 2024, would result in an approximate loss / gain of \$0.45 billion reported in the financial statement line Losses from change in fair market value of equity securities and loan receivable in our consolidated statements of income (loss) for the year ended December 31, 2024.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
Bio-Rad Laboratories, Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Bio-Rad Laboratories, Inc. and subsidiaries (the Company) as of December 31, 2024 and 2023, the related consolidated statements of income (loss), comprehensive income (loss), changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2024, and the related notes (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2024, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 14, 2025 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of a critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Evaluation of the sufficiency of audit evidence over net sales

As discussed in Notes 1 and 15 to the consolidated financial statements, the Company recorded \$2.6 billion of net sales for the year ended December 31, 2024. The Company is a multinational manufacturer and worldwide distributor of its own life science research products and clinical diagnostics products. The Company recognizes revenue through the sale of products, services, license of intellectual property and rental of instruments.

We identified the evaluation of the sufficiency of audit evidence over net sales as a critical audit matter. Evaluating the sufficiency of audit evidence obtained required subjective auditor judgment because of the Company's global geographical dispersion and multiple revenue streams. This included determining the Company locations and revenue streams for which procedures were performed as well as the level of supervision and review to perform over the selected locations.

The following are the primary procedures we performed to address this critical audit matter. We applied auditor judgment to determine the nature and extent of procedures to be performed over net sales. For each location for which procedures were performed, we evaluated the design and tested the operating effectiveness of certain internal controls related to the Company's net sales processes for the selected revenue streams. We assessed the recorded net sales by selecting a sample of revenue transactions during the year and comparing the amounts recognized by the Company to relevant underlying documentation such as contracts and shipping documents or other third-party evidence. We evaluated the sufficiency of the audit evidence obtained by assessing the results of procedures performed, including the appropriateness of the nature and extent of such evidence over net sales.

February 14, 2025

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors
Bio-Rad Laboratories, Inc.:

Opinion on Internal Control Over Financial Reporting

We have audited Bio-Rad Laboratories, Inc. and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2024 and 2023, the related consolidated statements of income (loss), comprehensive income (loss), changes in stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2024, and the related notes (collectively, the consolidated financial statements), and our report dated February 14, 2025 expressed an unqualified opinion on those consolidated financial statements.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The accompanying notes are an integral part of these consolidated financial statements.

BIO-RAD LABORATORIES, INC.
Notes to Consolidated Financial Statements

1. SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The consolidated financial statements include the accounts of Bio-Rad Laboratories, Inc. and all of our wholly and majority owned subsidiaries (referred to in this report as “Bio-Rad,” “we,” “us,” “the Company” and “our”) after elimination of intercompany balances and transactions. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. The Company has changed its presentation from thousands to millions and, as a result, any necessary rounding adjustments have been made to prior period disclosed amounts.

Use of Estimates

The preparation of the consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingencies at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting periods. Bio-Rad bases its estimates on historical experience and on various other market-specific and other relevant assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Such estimates include, but are not limited to, revenue recognition, the valuation of inventory, the valuation of acquired intangible assets, valuation of accounts receivable, estimation of warranty reserve, estimation of legal reserves, the recognition and measurement of current and deferred income tax assets and fair value measurement of the Loan receivable. Actual results could differ materially from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and highly liquid investments with original maturities of three months or less which are readily convertible into cash.

Available-for-Sale Investments

Available-for-sale investments consist of corporate obligations, municipal securities, asset backed securities and U.S. government sponsored agencies. Management classifies investments at the time of purchase and reevaluates such classification at each balance sheet date. Investments with maturities beyond one year may be classified as short-term based on their liquid nature and because such marketable securities represent the investment of cash that is available for current operations. Available-for-sale investments are reported at fair value based on quoted market prices and other observable market data. Unrealized gains and losses are reported as a component of other comprehensive income (loss), net of any related tax effect. Realized gains and losses and other-than-temporary impairments on investments are included in Other income, net (see Note 11).

Concentration of Credit Risk

Financial instruments that potentially subject us to concentration of credit risk consist primarily of cash and cash equivalents, investments, foreign exchange contracts, trade accounts receivable and loans receivable. Cash and cash equivalents and investments are placed with various highly rated major financial institutions located in different geographic regions.

The forward contracts used in managing our foreign currency exposures have an element of risk in that the counterparties may be unable to meet the terms of the agreements. We attempt to minimize this risk by limiting the counterparties to a diverse group of highly-rated domestic and international financial institutions. In the event of non-performance by these counterparties, the carrying values of our financial instruments represent the maximum amount of loss we would have incurred as of our fiscal year-end.

Credit risk for trade accounts receivable is generally limited due to the large number of customers and their dispersion across many geographic areas. We manage our accounts receivable credit risk through ongoing credit evaluation of our customers' financial conditions. We generally do not require collateral from our customers.

Loans receivable represent the Loan extended to Sartorius-Herbst Beteiligungen II GmbH ("SHB") and is collateralized by the pledge of certain trust interests under the Sartorius family trust ("Trust"), which upon termination of the Trust represent the right to receive Sartorius ordinary shares. The collateral is subject to market volatility based on fluctuation in value of the Sartorius ordinary shares.

Accounts Receivable and Allowance for Credit Losses

We record trade accounts receivable at the net invoice value and such receivables are non-interest bearing. We consider receivables past due based on the contractual payment terms. Amounts later determined and specifically identified to be uncollectible are charged or written off against the allowance for credit losses.

Any adjustments made to our historical loss experience reflect current differences in asset-specific risk characteristics, including, for example, accounts receivable by customer type (public or government entity versus private entity) and by geographic location of the customer.

Changes in our allowance for credit losses were as follows (in millions):

December 31,	2024	2023	2022
Beginning balance	\$ 14.9	\$ 15.0	\$ 15.1
Provision for expected credit losses	(0.6)	0.5	1.7
Write-offs charged against the allowance	(5.1)	(0.6)	(1.8)
Ending balance	\$ 9.2	\$ 14.9	\$ 15.0

Inventory

Inventories are valued at the lower of cost and net realizable value and include material, labor and overhead costs. Cost is determined using standard costs, which approximate actual costs, and are relieved from inventory on a first-in, first-out or average cost basis. We classify our inventories based on our historical and anticipated levels of sales; any inventory in excess of its normal operating cycle is classified as long-term on our consolidated balance sheets. The long-term inventory was immaterial as of December 31, 2024 and 2023.

Property, Plant and Equipment, net

Property, plant and equipment are stated at cost, less accumulated depreciation and amortization. Additions and improvements are capitalized, and maintenance and repairs are expensed as incurred. Included in property, plant and equipment are buildings and equipment acquired under capital lease arrangements, reagent rental equipment and capitalized software, including costs for software developed or obtained for internal use.

Depreciation is computed on a straight-line basis over the estimated useful lives of the assets. The estimated useful lives of property, plant and equipment are generally as follows:

Buildings	10 – 50 years
Leasehold improvements	Life of the improvements or lease term, whichever is shorter
Reagent rental equipment	1 – 5 years
Equipment	3 – 12 years
Computer software	3 – 5 years

When property and equipment is retired or otherwise disposed of, the cost and accumulated depreciation are relieved from the accounts and the net gain or loss is included in operating expenses.

Internal-Use Software Development Costs

Costs incurred in the development of internal use software during the application development stage are capitalized and included in Property, plant and equipment, net on the consolidated balance sheets. Such capitalized costs include costs directly associated with the development of the applications. Capitalization of such costs begins when the preliminary project stage is complete and ceases at the point the project is substantially complete and is ready for its intended purpose. Internal-use software is amortized on a straight-line basis over the estimated useful life of between 3-5 years. Costs incurred during the preliminary project stage, as well as maintenance and training costs, are expensed as incurred.

Leases

We determine if an arrangement is a lease at inception. Operating leases are included in Operating lease right-of-use (“ROU”) assets, Current operating lease liabilities, and Operating lease liabilities in our consolidated balance sheets. Finance leases are included in Property, plant and equipment, net, Current maturities of long-term debt and notes payable, and Long-term debt, net of current maturities in our consolidated balance sheets.

ROU assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease. Operating lease ROU assets and liabilities are recognized at the commencement date based on the present value of lease payments over the lease term. As our leases do not provide an implicit rate, we use our incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments. Operating lease ROU assets also include any lease payments made and excludes lease incentives. Our lease terms may include options to extend or terminate the lease. For purposes of determining the lease term used in the measurement of operating lease ROU assets and operating lease liabilities, we include the noncancellable period of the lease together with those periods covered by the option to extend the lease if we are reasonably certain to exercise that option, the periods covered by an option to terminate the lease if we are reasonably certain not to exercise that option, and the periods covered by the option to extend (or to not terminate) the lease in which exercise of the option is controlled by the lessor. Lease expense is recognized on a straight-line basis over the lease term. Where we act as lessee, we elected not to separate lease and non-lease components.

Intangible Assets

Our intangible assets principally include goodwill, acquired technology / know how, license, tradenames, customer relationships, and in-process research and development. Intangible assets with finite lives, which include acquired technology / know how, tradenames, licenses and customer relationships, are carried at cost and amortized using the straight-line method over their estimated useful lives.

The estimated useful lives used in computing amortization of intangible assets are as follows:

Customer relationships/lists	4 – 16 years
Know how	14 years
Developed product technology	2 – 20 years
Licenses	12 – 13 years
Tradenames	6 – 10 years
Covenants not to compete	3 – 10 years

Intangible assets with indefinite lives, which include only goodwill and in-process research and development assets, are not amortized but instead are recorded at cost and evaluated at least annually for impairment.

Impairment of Long-Lived Assets

We review long-lived assets, such as property, plant and equipment and finite-lived intangible assets, for impairment whenever events indicate that the carrying amounts might not be recoverable. Recoverability of property, plant and equipment, and other finite-lived intangible assets are measured by comparing the projected undiscounted net cash flows associated with those assets to their carrying values. If an asset is considered impaired, it is written down to its fair value, which is determined based on the asset's projected discounted cash flows or appraised value, depending on the nature of the asset. For purposes of recognition of impairment for assets held for use, we group assets and liabilities at the lowest level for which cash flows are separately identifiable.

There were no impairments of finite-lived intangible assets for the years ended December 31, 2024, 2023 and 2022.

Impairment of Goodwill

Goodwill represents the excess of the purchase price over the fair value of the net tangible and identifiable intangible assets acquired in each business combination. We conduct an impairment analysis for goodwill annually in the fourth quarter or more frequently if indicators of impairment exist or if a decision is made to sell or exit a business. Significant judgments are involved in determining if an indicator of impairment has occurred. Such indicators may include deterioration in general economic conditions, negative developments in equity and credit markets, adverse changes in the markets in which an entity operates, increases in input costs that have a negative effect on earnings and cash flows, or a trend of negative or declining cash flows over multiple periods, among others. The fair value that could be realized in an actual transaction may differ from that used to evaluate the impairment of goodwill.

We first may assess qualitative factors to determine if it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the quantitative goodwill impairment test included in U.S. GAAP. To the extent our assessment identifies adverse conditions, or if we elect to bypass the qualitative assessment, goodwill is tested at the reporting unit level using a quantitative impairment test.

We determined that there are two reporting units, which are the same as our operating segments, namely Life Science and Clinical Diagnostics. We generally estimate the fair value of the reporting units in goodwill impairment assessments using an income approach, which includes an analysis of the future cash flows expected to be generated and the risk associated with achieving such cash flows. This approach requires significant management judgment including the discount rate that is applied to the discretely forecasted future cash flows to calculate the present value of those cash flows and the estimate of future cash flows attributable to the reporting unit. Actual results may differ from management's estimates. In the current year, we elected to perform a qualitative assessment of goodwill and determined that it is not more likely than not that the fair values of our reporting units are less than their carrying amounts and that goodwill is not impaired for any of our reporting units. There were no impairments of goodwill for the years ended December 31, 2024, 2023 and 2022.

Impairment of Indefinite-Lived Intangible Assets

For indefinite-lived intangible assets, which are comprised of in-process research and development, we conduct an impairment analysis annually in the fourth quarter or more frequently if indicators of impairment exist. We first perform a qualitative assessment to determine if it is more likely than not that the carrying amount of each of the in-process research and development assets exceeds its fair value. The qualitative assessment requires the consideration of factors such as adverse macroeconomic conditions, declining market and industry trends in which the company operates, rising cost factors including inflation, and changes in projected future cash flows. If we determine it is more likely than not that the fair value is less than its carrying amount of the in-process research and development assets, a quantitative assessment is performed. The quantitative assessment compares the fair value of the in-process research and development assets to its carrying amount. If the carrying amount exceeds its fair value, an impairment loss is recognized for the excess. We elected to perform a qualitative assessment of indefinite-lived intangible assets and determined that it is not more likely than not that the fair value is less than its carrying amount and that in-process research and development are not impaired. There were no impairments of in-process research and development for the years ended December 31, 2024, 2023 and 2022.

Income Taxes

We account for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, deferred tax assets and liabilities reflect the tax effects of net operating losses, tax credits, and temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. They are determined using enacted tax rates in effect for the year in which such temporary differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

We record deferred tax assets to the extent we believe these assets will more likely than not be realized. In making such determination, we consider all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies and recent financial operations. When we establish or reduce the valuation allowance against our deferred tax assets, our provision for income taxes will increase or decrease, respectively, in the period that determination to change the valuation allowance is made.

We recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. The tax benefits recognized in the financial statements on a particular tax position are measured based on the largest benefit that has a greater than a 50% likelihood of being realized upon settlement. The amount of unrecognized tax benefits is adjusted as appropriate for changes in facts and circumstances, such as significant amendments to existing tax law, new regulations or interpretations by the taxing authorities, new information obtained during a tax examination, or resolution of an examination. We recognize both accrued interest and penalties, where appropriate, related to unrecognized tax benefits in the provision for income taxes.

Revenue Recognition

We recognize revenue from operations through the sale of products, services, license of intellectual property and rental of instruments. Revenue from contracts with customers is recognized upon transfer of control of promised products or services to customers in an amount that reflects the consideration we expect to receive in exchange for those products or services. Revenue is recognized net of any taxes collected from customers (sales tax, value added tax, etc.), which are subsequently remitted to government authorities.

We enter into contracts that can include various combinations of products and services, which are generally accounted for as distinct performance obligations. A product or service is considered distinct if it is separately identifiable from other deliverables in the arrangement and if a customer can benefit from such product or service on its own or with other resources that are readily available to the customer. The transaction consideration is allocated between separate performance obligations of an arrangement based on the SSP for each distinct product or service.

We recognize revenue from product sales at the point in time when we have satisfied our performance obligation by transferring control of the product to the customer. We use judgment to evaluate whether and when control has transferred and consider the right to payment, legal title, physical possession, risks and rewards of ownership, and customer acceptance if it is not a formality, as indicators to determine the transfer of control to the customer. For products that include installation, the product and installation are separate performance obligations. The product revenue is recognized when control has transferred to the customer, generally upon delivery, and installation service revenue is recognized when the product installation is completed.

Service revenues on extended warranty contracts are recognized ratably over the life of the service agreement as a stand-ready performance obligation. For arrangements that include a combination of products and services, the transaction price is allocated to each performance obligation based on SSP. The method used to determine the SSP for product and service revenues is based on the observable prices when the product or services have been sold separately.

We recognize revenues for a functional license of intellectual property at a point in time when the control of the license and technology transfers to the customer. For license agreements that include sales or usage-based royalty payments to us, we recognize revenue at the later of (i) when the related sale of the product occurs, or (ii) when the performance obligation to which some or all of the royalty has been allocated has been satisfied, or partially satisfied.

The primary purpose of our invoicing terms is to provide customers with simple and predictable methods of purchasing our products and services, not to either provide or receive financing to or from our customers. We record contract liabilities when cash payments are received or due in advance of our performance.

We do not disclose the value of unsatisfied performance obligations for contracts with an original expected length of one year or less. Our payment terms vary by the type and location of our customer, and the products and services offered. The term between invoicing and when payment is due is not significant.

In addition, we offer a reagent rental program which provides our customers the ability to use an instrument and consumables (reagents) on a per test basis. These agreements may also include maintenance of the instruments placed at customer locations as well as initial training. We initially determine if a reagent rental arrangement contains a lease at contract commencement. Where we have determined that such an arrangement contains a lease, we then determine the lease classification. Our reagent rental arrangements are predominantly classified as operating leases and any sales-type leases have historically been immaterial and we do not enter into direct finance leases.

We concluded that the use of the instrument (referred to as “lease elements”) in our reagent rental agreements is not governed by the revenue recognition guidance of ASC 606, Revenue from Contracts with Customers, but instead is addressed by the lease guidance in ASC 842, Leases. Accordingly, we first allocate the transaction price between the lease elements and the non-lease elements based on relative standalone selling prices. Our reagent rental arrangements are predominantly comprised of variable lease payments that fluctuate depending on the volume of reagents purchased, as such arrangements generally do not contain any fixed or minimum lease payments. Maintenance services and reagent sales are allocated to the non-lease elements and recognized as income over time as control is transferred. Maintenance services are recognized ratably over the period whereas reagents revenue is recognized upon transfer of control when either (i) the consumables are delivered or (ii) the consumables are consumed by the customer.

Revenue attributed to the lease elements of our reagent rental arrangements represented approximately 3% of total revenue in 2024, 3% of total revenue in 2023 and 2% of total revenue in 2022. Such revenue forms part of the Net sales in our consolidated statements of income (loss).

Contract costs:

As a practical expedient, we expense as incurred costs to obtain contracts as the amortization period would have been one year or less. These costs include our internal sales force and certain partner sales incentive programs and are recorded within Selling, general and administrative expense in our consolidated statements of income (loss).

Disaggregation of Revenue:

The disaggregation of our revenue by geographic region is based primarily on the location of the use of the product or service, and by industry segment sources. The disaggregation of our revenues by industry segment sources are presented in our Segment Information footnote (see Note 15).

Deferred revenues primarily represent unrecognized fees billed or collected for extended service arrangements including installation services. The deferred revenue balance at December 31, 2024 and December 31, 2023 was \$61.5 million and \$68.3 million, respectively. The short-term deferred revenue balance at December 31, 2024 and December 31, 2023 was \$47.8 million and \$51.1 million, respectively.

We warrant certain equipment against defects in design, materials and workmanship, generally for a period of one year. We estimate the cost of warranties at the time the related revenue is recognized based on historical experience, specific warranty terms and customer feedback. These costs are recorded within Cost of goods sold in our consolidated statements of income (loss).

Warranty liabilities are included in Other current liabilities and Other long-term liabilities in the consolidated balance sheets. Changes in our warranty liability were as follows (in millions):

	2024	2023	2022
January 1	\$ 8.4	\$ 10.6	\$ 12.7
Provision for warranty	6.1	9.3	8.8
Actual warranty costs	(7.4)	(11.5)	(10.9)
December 31	<u>\$ 7.1</u>	<u>\$ 8.4</u>	<u>\$ 10.6</u>

Shipping and Handling

We classify all freight costs billed to customers as Net sales. Related freight costs are recognized upon transfer of control of the promised products to customers as a fulfillment cost and included in Cost of goods sold.

Research and Development

All research and development costs are expensed as incurred. Types of expense incurred in research and development include materials and supplies, employee compensation, consulting and third-party services, depreciation, facility costs and information technology.

Foreign Currency

Balance sheet accounts of international subsidiaries are translated at the current exchange rates as of the end of each accounting period. Income statement items are translated at average exchange rates for the period. The resulting translation adjustments are recorded as a separate component of stockholders' equity.

Foreign currency transaction gains and losses are included in Foreign currency exchange gains, net in the consolidated statements of income (loss). Transaction gains and losses result primarily from fluctuations in exchange rates when intercompany receivables and payables are denominated in currencies other than the functional currency of our subsidiary that recorded the transaction.

Forward Foreign Exchange Contracts

As part of distributing our products, we regularly enter into intercompany transactions. We enter into forward foreign exchange contracts to manage foreign exchange risk of future movements in exchange rates that affect

foreign currency denominated intercompany receivables and payables. We do not use derivative financial instruments for speculative or trading purposes, nor do we seek hedge accounting treatment for any of our contracts. As a result, these contracts, generally with maturity dates of 90 days or less and denominated primarily in currencies of industrial countries, are recorded as an asset or liability measured at their fair value at each balance sheet date. The resulting gains or losses offset exchange gains or losses, on the related receivables and payables, all of which are recorded in Foreign currency exchange gains, net in the consolidated statements of income (loss). We classify the proceeds from forward foreign exchange contracts, net as cash flows from operating activities in our consolidated statements of cash flows.

Share-Based Compensation Plans

Share-based compensation expense for all share-based payment awards granted is determined based on the grant-date fair value. We recognize these compensation costs over the requisite service period of the award, which is generally the vesting term of the share-based payment awards. Forfeitures are recognized as they occur. These plans are described more fully in Note 10.

Loss Per Share

We compute Net loss per share of Class A Common Stock ("Class A") and Class B Common Stock ("Class B") using the two-class method required for participating securities. Our participating securities include Class A and Class B. Each share of Class A and Class B participates equally in earnings and losses, but may not participate equally in dividend distributions. No dividends were distributed or declared during any of the periods presented. Loss is attributable equally to each share of Class A and Class B common stock and is determined based on the weighted average number of the respective class of common stock outstanding for the year.

Accordingly, Basic loss per share is computed by dividing Net loss attributable to Bio-Rad by the weighted average number of common shares outstanding for that period. Diluted loss per share takes into account the effect of dilutive instruments, such as stock options, restricted stock and performance stock, and uses the average share price for the period in determining the number of potential common shares that are to be added to the weighted average number of shares outstanding. Potential common shares are excluded from the Diluted loss per share calculation if the effect of including such securities would be anti-dilutive.

The weighted average number of common shares outstanding used to calculate Basic and diluted loss per share, and the anti-dilutive shares that are excluded from the Diluted loss per share calculation are as follows (in thousands):

	Year Ended December 31,		
	2024	2023	2022
Basic weighted average shares common outstanding	28,214	29,209	29,785
Effect of potentially dilutive stock options, restricted stock and performance stock awards	—	—	—
Diluted weighted average common shares outstanding	28,214	29,209	29,785
Anti-dilutive shares	226	212	325

Fair Value of Financial Instruments

For certain financial instruments, including cash and cash equivalents, short-term investments, accounts receivable, marketable securities, accounts payable and foreign exchange contracts, the carrying amounts approximate fair value.

The estimated fair value of financial instruments is based on the exchange price that would be received for an asset or paid to transfer a liability (an exit price) using available market information or other appropriate valuation methodologies in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. Estimates are not necessarily indicative of the amounts that could be realized in a

current market exchange as considerable judgment is required in interpreting market data used to develop estimates of fair value. The use of different market assumptions or estimation techniques could have a material effect on the estimated fair value (see Note 2).

Variable Interest Entities

We enter into relationships with or make investments in other entities that may be variable interest entities ("VIE"). A VIE is consolidated in the financial statements if we are the primary beneficiary. The primary beneficiary has the power to direct activities that most significantly impact the economic performance of the VIE and has the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE.

In 2021, we extended a loan to a VIE, SHB, a private limited company incorporated under the laws of Germany (See Note 2). We have not consolidated this entity because we do not have the power to direct the activities that most significantly impact the VIE's economic performance related to repayment of the loan or cash management of the SHB and, thus, we are not considered the primary beneficiary of the VIE. We believe that our maximum exposure to loss as a result of our involvement with the VIE is limited to the receivable due to us from the VIE under the terms of the loan.

Equity Investments

Investments in publicly traded companies in which we do not have the ability to exercise significant influence are reported at fair value, with unrealized gains and losses reported as a component of (gains) losses from change in fair market value of equity securities and loan receivable in our consolidated statements of income (loss). Companies in which we do not have a controlling financial interest, but over which we have significant influence, are accounted for using the equity method (see Note 2). Our share of the after-tax earnings of equity method investees is included in Other income, net in our consolidated statements of income (loss). Investments in privately held companies in which we do not have the ability to exercise significant influence are accounted for using the cost method with adjustments for observable changes in price or impairments (see Note 2). We monitor our relationships with investees when changes occur that could affect whether we have the ability to exercise significant influence.

Recent Accounting Pronouncements Adopted

In November 2023, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2023-07, "Improvements to Reportable Segment Disclosures". The ASU includes enhanced disclosure requirements, primarily related to significant segment expenses that are regularly provided to and used by the chief operating decision maker ("CODM"). We adopted ASU 2023-07 effective January 1, 2024. This has been applied retrospectively to all prior periods presented in the financial statements. See Note 15, Segment Information for our updated presentation.

Recent Accounting Pronouncements to be Adopted

In December 2023, the FASB issued ASU 2023-09, "Income Taxes (Topic 740): Improvements to Income Tax Disclosures". The ASU includes enhanced disclosure requirements, primarily related to the rate reconciliation and income taxes paid information. The amendments are to be applied prospectively in the financial statements. ASU 2023-09 is effective for fiscal years beginning after December 15, 2024, with early adoption permitted. We are currently evaluating the effect of adopting this pronouncement on our financial statements and disclosures.

In March 2024, the U.S. Securities and Exchange Commission ("SEC") adopted the final rule under SEC Release No. 33-11275, The Enhancement and Standardization of Climate-Related Disclosures for Investors. This rule would require registrants to disclose certain climate-related information in registration statements and annual reports. However, on April 4, 2024, the SEC issued an order staying the rule pending the completion of an ongoing judicial review. We are monitoring SEC developments and evaluating the final rule to determine its impact on our disclosures.

In November 2024, the FASB issued ASU 2024-03, "Income Statement—Reporting Comprehensive

Income—Expense Disaggregation Disclosures (Subtopic 220-40)". This ASU requires entities to disclose additional information about specific expense categories in the notes to financial statements. ASU 2024-03 is effective for fiscal years beginning after December 15, 2026, with early adoption permitted. We are currently evaluating the effect of adopting this pronouncement on our disclosures.

2. FAIR VALUE MEASUREMENTS AND INVESTMENTS

We determine the fair value of an asset or liability based on the assumptions that market participants would use in pricing the asset or liability in an orderly transaction between market participants at the measurement date. The identification of market participant assumptions provides a basis for determining what inputs are to be used for pricing each asset or liability. A fair value hierarchy has been established which gives precedence to fair value measurements calculated using observable inputs over those using unobservable inputs. This hierarchy prioritizes the inputs into three broad levels as follows:

- Level 1: Quoted prices in active markets for identical instruments
- Level 2: Other significant observable inputs (including quoted prices in active markets for similar instruments)
- Level 3: Significant unobservable inputs (including assumptions in determining the fair value of certain investments)

Financial assets and liabilities carried at fair value and measured on a recurring basis as of December 31, 2024 are classified in the hierarchy as follows (in millions):

	Level 1	Level 2	Level 3	Total
Financial assets carried at fair value:				
Cash equivalents:				
Time deposits	\$ —	\$ 31.2	\$ —	\$ 31.2
U.S. government sponsored agencies	—	14.9	—	14.9
Money market funds	139.4	—	—	139.4
Total cash equivalents (a)	139.4	46.1	—	185.5
Restricted investments (b)	1.6	—	—	1.6
Equity Securities (c)	4,548.0	—	—	4,548.0
Loan under the fair value option (d)	—	—	317.5	317.5
Available-for-sale investments:				
Corporate debt securities	—	533.6	—	533.6
U.S. government sponsored agencies	—	118.6	—	118.6
Foreign government obligations	—	5.2	—	5.2
Municipal obligations	—	9.4	—	9.4
Asset-backed securities	—	430.8	—	430.8
Total available-for-sale investments (e)	—	1,097.6	—	1,097.6
Forward foreign exchange contracts (f)	—	8.8	—	8.8
Total financial assets carried at fair value	\$ 4,689.0	\$ 1,152.5	\$ 317.5	\$ 6,159.0
Financial liabilities carried at fair value:				
Forward foreign exchange contracts (g)	\$ —	\$ 2.4	\$ —	\$ 2.4
Total financial liabilities carried at fair value	\$ —	\$ 2.4	\$ —	\$ 2.4

Financial assets and liabilities carried at fair value and measured on a recurring basis as of December 31, 2023 are classified in the hierarchy as follows (in millions):

	Level 1	Level 2	Level 3	Total
Financial assets carried at fair value:				
Cash equivalents:				
Commercial paper	\$ —	\$ 12.5	\$ —	\$ 12.5
Time deposits	—	36.6	—	36.6
U.S. government sponsored agencies	—	7.0	—	7.0
Money market funds	28.0	—	—	28.0
Total cash equivalents (a)	28.0	56.1	—	84.1
Restricted investments (b)	7.1	—	—	7.1
Equity securities (c)	7,399.3	—	—	7,399.3
Loan under the fair value option (d)	—	—	325.7	325.7
Available-for-sale investments:				
Corporate debt securities	—	531.6	—	531.6
U.S. government sponsored agencies	—	255.9	—	255.9
Foreign government obligations	—	12.7	—	12.7
Municipal obligations	—	12.1	—	12.1
Asset-backed securities	—	323.7	—	323.7
Total available-for-sale investments (e)	—	1,136.0	—	1,136.0
Forward foreign exchange contracts (f)	—	4.1	—	4.1
Total financial assets carried at fair value	\$ 7,434.4	\$ 1,196.2	\$ 325.7	\$ 8,956.3
Financial liabilities carried at fair value:				
Forward foreign exchange contracts (g)	\$ —	\$ 11.7	\$ —	\$ 11.7
Contingent consideration (h)	—	—	17.5	17.5
Total financial liabilities carried at fair value	\$ —	\$ 11.7	\$ 17.5	\$ 29.2

(a) Cash equivalents are included in Cash and cash equivalents in the consolidated balance sheets.

(b) Restricted investments are included in the following accounts in the consolidated balance sheets (in millions):

	December 31, 2024	December 31, 2023
Restricted investments	\$ —	\$ 5.6
Other investments	1.6	1.5
Total	\$ 1.6	\$ 7.1

(c) Equity securities are included in the following accounts in the consolidated balance sheets (in millions):

	December 31, 2024	December 31, 2023
Short-term investments	\$ 78.8	\$ 67.2
Other investments	4,469.2	7,332.1
Total	\$ 4,548.0	\$ 7,399.3

(d) The Loan under the fair value option is included in Other investments in the consolidated balance sheets.

(e) Available-for-sale investments are included in Short-term investments in the consolidated balance sheets.

- (f) Forward foreign exchange contracts in an asset position are included in Other current assets in the consolidated balance sheets.
- (g) Forward foreign exchange contracts in a liability position are included in Other current liabilities in the consolidated balance sheets.
- (h) Contingent considerations in a liability position are included in Other long-term liabilities in the consolidated balance sheets. The changes in the fair value of contingent consideration included in Research and development expense and Selling, general and administrative expense amounted to \$14.0 million and \$4.1 million, respectively, in the consolidated statements of income (loss) for the year ended December 31, 2023. During the year ended December 31, 2024, the settlement of the contingent liability resulted in Research and development expense of \$12.5 million in the consolidated statements of income (loss).

Level 1 Fair Value Measurements

As of December 31, 2024, we owned 12,987,900 ordinary voting shares and 9,588,908 preference shares of Sartorius AG ("Sartorius"), of Goettingen, Germany, a process technology supplier to the biotechnology, pharmaceutical, chemical and food and beverage industries. We owned approximately 38% of the outstanding ordinary shares (excluding treasury shares) and 28% of the preference shares of Sartorius as of December 31, 2024. The Sartorius family trust (Sartorius family members are beneficiaries of the trust) holds a majority interest of the outstanding ordinary shares of Sartorius. We do not have the ability to exercise significant influence over the operating and financial policies of Sartorius primarily because we do not have any representative or designee on Sartorius' board of directors and have tried and failed to obtain access to operating or financial information necessary to apply the equity method of accounting.

The change in fair market value of our investment in Sartorius for the twelve months ended December 31, 2024 was a loss of \$2,681.6 million and is recorded in our consolidated statements of income (loss).

Level 2 Fair Value Measurements

To estimate the fair value of Level 2 debt securities as of December 31, 2024 and 2023, our primary pricing provider uses Refinitiv as the primary pricing source. Our pricing process allows us to select a hierarchy of pricing sources for securities held. If Refinitiv does not price a Level 2 security that we hold, then the pricing provider will utilize our custodian supplied pricing as the secondary pricing source.

Available-for-sale investments consist of the following (in millions):

	December 31, 2024				
	Amortized Cost	Unrealized Gains	Unrealized Losses	Allowances for Credit Losses	Estimated Fair Value
Short-term investments:					
Corporate debt securities	\$ 533.1	\$ 2.1	\$ (1.6)	—	\$ 533.6
Municipal obligations	9.5	—	(0.1)	—	9.4
Asset-backed securities	432.4	1.3	(2.9)	—	430.8
U.S. government sponsored agencies	119.5	0.1	(1.0)	—	118.6
Foreign government obligations	5.2	—	—	—	5.2
	<u>\$ 1,099.7</u>	<u>\$ 3.5</u>	<u>\$ (5.6)</u>	<u>\$ —</u>	<u>\$ 1,097.6</u>

The following is a summary of the amortized cost and estimated fair value of our debt securities at December 31, 2024 by contractual maturity date (in millions):

	Amortized Cost	Estimated Fair Value
Mature in less than one year	\$ 87.6	\$ 87.5
Mature in one to five years	712.2	712.5
Mature in more than five years	299.9	297.6
Total	<u>\$ 1,099.7</u>	<u>\$ 1,097.6</u>

Available-for-sale investments consist of the following (in millions):

	December 31, 2023			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Estimated Fair Value
Short-term investments:				
Corporate debt securities	\$ 534.1	\$ 0.8	\$ (3.3)	\$ 531.6
Municipal obligations	12.2	—	(0.1)	12.1
Asset-backed securities	325.7	0.7	(2.7)	323.7
U.S. government sponsored agencies	257.4	0.1	(1.6)	255.9
Foreign government obligations	12.8	—	(0.1)	12.7
Total	<u>\$ 1,142.2</u>	<u>\$ 1.6</u>	<u>\$ (7.8)</u>	<u>\$ 1,136.0</u>

As of December 31, 2024, there were no significant continuous unrealized losses greater than 12 months.

Our evaluation of credit losses for available-for-sale investments included the extent to which the fair value is less than the amortized cost basis, adverse conditions specifically related to the debt security, an industry or geographic area, and any changes in the rating of a security by a rating agency. Credit loss impairments are limited to the amount that the fair value of an instrument is less than its amortized cost basis.

At December 31, 2024, we concluded that all payments related to our available-for-sale investments are expected to be made in full and on time at par value. The diminution of value in the intervening period is due to market conditions such as illiquidity and interest rate movements and not due to significant, inherent credit concerns surrounding the issuer. As a result, we have no allowances for credit losses on our available-for-sale investments portfolio as of December 31, 2024.

Included in Other current assets are \$13.1 million and \$11.9 million of interest receivable as of December 31, 2024 and December 31, 2023, respectively, primarily associated with securities in our available-for-sale investments portfolio. Associated interest on these securities is typically payable semi-annually. Due to the short-term nature of our interest receivable asset, we have made an accounting policy election not to measure an allowance for credit losses for accrued interest receivable. We consider any uncollected interest receivable that is overdue greater than one year to be impaired for purposes of write-off. For the year ended December 31, 2024, we have not written off any uncollected interest receivable.

As part of distributing our products, we regularly enter into intercompany transactions. We enter into forward foreign exchange contracts to manage foreign exchange risk of future movements in foreign exchange rates that affect foreign currency denominated intercompany receivables and payables. We do not use derivative financial instruments for speculative or trading purposes. We do not seek hedge accounting treatment for these contracts. As a result, these contracts, generally with maturity dates of 90 days or less, are recorded at their fair value at each balance sheet date. The notional amounts provide one measure of foreign exchange exposures as of December 31, 2024 and do not represent the amount of Bio-Rad's exposure to loss. The estimated fair value of these contracts was derived using the spot rates and forward points from Refinitiv on the last business day of the quarter. The resulting gains or losses from foreign exchange contracts offset gains or losses from foreign currency

remeasurement of the related receivables and payables, both of which are included in Foreign currency exchange gains, net in the consolidated statements of income (loss).

The following is a summary of our forward foreign currency exchange contracts (in millions):

	December 31, 2024
Contracts maturing in January through March 2025 to sell foreign currency:	
Notional value	\$ 717.2
Unrealized gain/(loss)	\$ 5.7
Contracts maturing in January through March 2025 to purchase foreign currency:	
Notional value	\$ 107.8
Unrealized gain/(loss)	\$ 0.7

Included in Other investments in the consolidated balance sheet are investments without readily determinable fair value measured at cost with adjustments for observable price changes or impairments. The carrying value of these investments was \$23.0 million and \$6.5 million as of December 31, 2024 and December 31, 2023, respectively.

Also included in Other investments in the consolidated balance sheet are our equity method investments, for which our share of the equity method investees earnings is included in Other income, net in our consolidated statements of income (loss). The carrying value of these investments, net of impairments, was \$27.9 million and \$32.3 million as of December 31, 2024 and December 31, 2023, respectively.

The carrying value and fair value of our long-term debt were as follows (in millions):

	December 31, 2024		December 31, 2023	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Senior notes	\$ 1,191.2	\$ 1,098.3	\$ 1,189.5	\$ 1,102.5
Other long-term debt	9.2	9.2	9.6	9.6
Total	\$ 1,200.4	\$ 1,107.5	\$ 1,199.1	\$ 1,112.1

The fair value of our long-term debt was determined based on quoted market prices and on borrowing rates available to the Company at the respective period ends, which represent level 2 measurements.

Level 3 Fair Value Investments

During the fourth quarter of 2021, we extended a collateralized loan to Sartorius-Herbst Beteiligungen II GmbH ("SHB"), a private limited company incorporated under the laws of Germany, with a principal amount of €400 million due on January 31, 2029, subject to certain events which could trigger payment prior to maturity ("Loan"). SHB used the Loan proceeds to partially finance the acquisition of interests under the Sartorius family trust ("Trust") from a beneficiary of the Trust. The Loan is collateralized by the pledge of certain of the Trust interests, which upon termination of the Trust in mid-2028 represent the right to receive Sartorius ordinary shares. Interest on the loan is payable annually in arrears at 1.5% per annum, and the entire principal amount is due at maturity. In addition to contractual interest, we are entitled to certain value appreciation rights associated with the acquired Trust interests, which upon termination of the Trust represent the right to receive Sartorius ordinary shares, that is due upon repayment of the Loan. We elected the fair value option under ASC 825, Financial Instruments for accounting of the Loan to SHB to simplify the accounting. The fair value of the Loan and value appreciation right is estimated under the income approach using a discounted cash flow, and option pricing model, respectively, which results in a fair value measurement categorized in Level 3. The significant assumptions used to estimate fair value of the Loan include an estimate of the discount rate and cash flows of the Loan and the significant assumptions used to estimate the fair value of the value appreciation right include volatility, the risk-free interest rate, expected life (in years) and expected dividend. The inputs are subject to estimation uncertainty and actual amounts realized may

materially differ. An increase in the expected volatility may result in a significantly higher fair value, whereas a decrease in expected life may result in a significantly lower fair value. All subsequent changes in fair value of the Loan and value appreciation right, including accrued interest are recognized in Losses from change in fair market value of equity securities and loan receivable in our consolidated statements of income (loss). The overall change in fair market value reflected in Losses from change in fair market value of equity securities and loan receivable during the twelve months ended December 31, 2024 was a gain of \$12.5 million, which includes a \$38.4 million gain from change in fair market value of the Loan and a \$25.9 million loss from change in fair market value of the value appreciation right. The increase in the fair market value of the loan receivables was due to a closer maturity date and lower discount rate. As of December 31, 2024, the €400.0 million principal amount of the loan is still due on January 31, 2029.

The following table provides a reconciliation of the Level 3 Loan measured at estimated fair value (in millions):

December 31, 2023	\$	325.7
Change in estimated fair market value, net		12.5
Foreign currency adjustments gains (losses), net		(20.7)
December 31, 2024	\$	<u>317.5</u>

3. **GOODWILL AND OTHER PURCHASED INTANGIBLE ASSETS**

Changes to goodwill by segment were as follows (in millions):

	2024			2023		
	Life Science	Clinical Diagnostics	Total	Life Science	Clinical Diagnostics	Total
Balances as of January 1:						
Goodwill	\$ 333.3	\$ 415.5	\$ 748.8	\$ 333.3	\$ 408.4	\$ 741.7
Accumulated impairment losses and write-offs	(41.8)	(293.4)	(335.2)	(41.8)	(293.4)	(335.2)
Goodwill, net	<u>291.5</u>	<u>122.1</u>	<u>413.6</u>	<u>291.5</u>	<u>115.0</u>	<u>406.5</u>

6. **NOTES PAYABLE AND LONG-TERM DEBT**

The principal components of long-term debt are as follows (in millions):

	December 31, 2024	December 31, 2023
3.3%, Senior Notes due 2027	\$ 400.0	\$ 400.0
3.7%, Senior Notes due 2032	800.0	800.0
Less unamortized discounts and debt issuance costs	(8.8)	(10.5)
Long-term debt less unamortized discounts and debt issuance costs	1,191.2	1,189.5
Finance leases and other debt	10.4	10.1
Less current maturities	(1.2)	(0.5)
Long-term debt	<u>\$ 1,200.4</u>	<u>\$ 1,199.1</u>

Under domestic and international lines of credit, standby letters of credit and guarantee arrangements, we had \$207.1 million available for borrowing and usage as of December 31, 2024, which was reduced by \$15.5 million that was utilized for standby letters of credit and guarantee arrangements issued by our banks to support our obligations.

Senior Notes due 2027 and 2032

In March 2022, pursuant to an indenture we issued \$400.0 million in principal amount of Senior Notes due March 2027 (the “2027 Notes”) and \$800.0 million in principal amount of Senior Notes due March 2032 (the “2032 Notes” and, together with the 2027 Notes, the “Notes”). The issuance of the 2027 Notes yielded net cash proceeds of \$395.7 million at an effective rate of 3.53% and the issuance of the 2032 Notes yielded net cash proceeds of \$790.5 million at an effective rate of 3.84%. The 2027 Notes and the 2032 Notes pay a fixed rate of interest of 3.3% and 3.7% per annum, respectively. Interest on the Notes is payable semiannually in arrears on March 15 and September 15 of each year until the principal is paid or made available for payment. We have the option to redeem the Notes at any time, in whole or in part, at a redemption price calculated in accordance with the indenture, plus accrued and unpaid interest thereon to the redemption date. In the event of a change of control, the holders may require us to repurchase for cash all or a portion of their notes at a purchase price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest, if any. Our obligations under the Notes are unsecured senior obligations that rank equally in right of payment with all of our other existing and future unsecured, unsubordinated debt. The Notes include covenants that limit our ability to, among other things, (i) grant specified liens, (ii) engage in specified sale and leaseback transactions, (iii) consolidate or merge with or into other companies or (iv) sell all or substantially all of our assets. We were in compliance with these covenants as of December 31, 2024.

Credit Agreement

In February 2024, we entered into a new \$200.0 million unsecured revolving credit agreement ("Revolving Credit Agreement") with a group of financial institutions. The Revolving Credit Agreement replaced the Company's previous credit agreement, dated as of April 15, 2019. Borrowings under the Revolving Credit Agreement are on a revolving basis and can be used to make acquisitions, for working capital and for other general corporate purposes. The Revolving Credit Agreement requires Bio-Rad to comply with certain financial ratios and other customary covenants and provisions. We were in compliance with these covenants as of December 31, 2024. The Revolving Credit Agreement matures in February 2029. As of December 31, 2024, no borrowings were outstanding under the Revolving Credit Agreement; however, \$5.7 million was utilized for domestic standby letters of credit that reduced our borrowing availability as of December 31, 2024. If we had borrowed against our Revolving Credit Agreement, the borrowing rate would have been 5.68% at December 31, 2024, which is based on the 3-month Secured Overnight Financing Rate ("SOFR").

Maturities of finance leases and other debt at December 31, 2024 were as follows (in millions):

2025	\$	1.2
2026		0.5
2027		400.5
2028		0.5
2029		0.6
2030 and thereafter		807.1
Total maturities of finance leases and other debt	\$	<u>1,210.4</u>

7. INCOME TAXES

The U.S. and international components of income before taxes are as follows (in millions):

	Year Ended December 31,		
	2024	2023	2022
U.S.	\$ (1,117.0)	\$ (31.0)	\$ (2,403.4)
International	(1,225.5)	(819.1)	(2,300.8)
Income (loss) before taxes	<u>\$ (2,342.5)</u>	<u>\$ (850.1)</u>	<u>\$ (4,704.2)</u>

The benefit from income taxes consists of the following (in millions):

	Year Ended December 31,		
	2024	2023	2022
Current tax expense:			
U.S. Federal	\$ 81.0	\$ 73.8	\$ 112.8
State	14.0	12.0	20.1
International	28.5	17.4	24.1
Current tax expense	<u>123.5</u>	<u>103.2</u>	<u>157.0</u>
Deferred tax (benefit) expense:			
U.S. Federal	(571.6)	(291.7)	(1,121.3)
State	(34.7)	(15.7)	(83.6)
International	(20.5)	(15.2)	(36.7)
Deferred tax expense	<u>(626.8)</u>	<u>(322.6)</u>	<u>(1,241.6)</u>
Non-current tax expense (benefit)	<u>5.0</u>	<u>6.6</u>	<u>7.9</u>
Benefit from income taxes	<u>\$ (498.3)</u>	<u>\$ (212.8)</u>	<u>\$ (1,076.7)</u>

The reconciliation between our effective tax rate on income before taxes and the statutory tax rate is as follows:

	Year Ended December 31,		
	2024	2023	2022
U. S. statutory tax rate	21.0 %	21.0 %	21.0 %
Impact of foreign operations	(11.1)	(20.4)	(10.0)
U.S. taxation of foreign income	11.3	23.8	10.5
State taxes	0.9	2.4	1.1
Other	(0.8)	(1.8)	0.3
Benefit from income taxes	<u>21.3 %</u>	<u>25.0 %</u>	<u>22.9 %</u>

On December 22, 2017, the U.S. enacted comprehensive tax legislation (the “Tax Act”). The Tax Act made broad and complex changes to the U.S. tax code, including the imposition of a one-time mandatory deemed repatriation tax (“Transition Tax”) on certain earnings accumulated offshore since 1986 and the reduction of the corporate tax rate from 35% to 21% for U.S. taxable income, resulting in a one-time remeasurement of U.S. federal deferred tax assets and liabilities. The Tax Act also amended Internal Revenue Code Section 174 requiring capitalization of research and experimentation expenditures. The capitalized expenses are amortized over a period of 5 or 15 years.

On August 16, 2022, President Biden signed into law the Inflation Reduction Act of 2022, which included an Alternative Minimum Tax based on the Adjusted Financial Statement Income of Applicable Corporations. We do not believe the Inflation Reduction Act will have a material impact on our income tax provision and cash taxes, but we continue to monitor U.S. Department of the Treasury guidance and regulations.

Our effective income tax rates were 21.3%, 25.0% and 22.9% for the years ended December 31, 2024, 2023 and 2022, respectively. The effective tax rates for the years ended December 31, 2024, 2023 and 2022 were primarily

driven by the unrealized gain/loss in equity securities that was taxed at 22.6%, 22.3% and 22.5%, respectively, as well as the geographic mix of earnings.

Many jurisdictions in which we operate have statutory tax rates that differ from the U.S. statutory tax rate of 21%. Our effective tax rate is impacted, either favorably or unfavorably, by many factors including, but not limited to the jurisdictional mix of income before tax, changes to statutory tax rates, changes in tax laws or regulations, tax audits and settlements, and generation of tax credits.

Deferred tax assets and liabilities reflect the tax effects of losses, credits, and temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of deferred tax assets and liabilities are as follows (in millions):

	December 31,	
	2024	2023
Deferred tax assets:		
Bad debt, inventory and warranty accruals	\$ 28.2	\$ 29.4
Other post-employment benefits, vacation and other reserves	17.0	17.5
Tax credit and net operating loss carryforwards	131.0	126.4
Lease obligations	34.0	41.9
Other	40.8	48.8
Total gross deferred tax assets	251.0	264.0
Valuation allowance	(95.2)	(53.2)
Total deferred tax assets	155.8	210.8
Deferred tax liabilities:		
Property and equipment	37.7	40.4
Lease assets	31.4	38.4
Investments and intangible assets	858.1	1,565.0
Total deferred tax liabilities	927.2	1,643.8
Net deferred tax liabilities	\$ (771.4)	\$ (1,433.0)

The realization of deferred tax assets is dependent upon the generation of sufficient taxable income of the appropriate character in future periods. We regularly assess our ability to realize our deferred tax assets and establish a valuation allowance if it is more likely than not that some portion, or all, of our deferred tax assets will not be realized. In assessing the realizability of our deferred tax assets, we weigh all available positive and negative evidence. Due to the weight of objectively verifiable negative evidence, we believe that it is more likely than not that certain of our federal, state and foreign deferred tax assets will not be realized as of December 31, 2024, and have maintained a valuation allowance on such deferred tax assets.

The valuation allowance for deferred tax assets is as follows (in millions):

	December 31,		
	2024	2023	2022
Beginning balance	\$ 53.2	\$ 72.8	\$ 46.4
Additions charged to expenses	42.0	—	26.4
Deductions from reserves	—	(19.6)	—
Ending balance	\$ 95.2	\$ 53.2	\$ 72.8

As of December 31, 2024, our federal, state and foreign net operating loss carryforwards were approximately \$9.0 million, \$29.5 million and \$266.2 million, respectively. Of our foreign net operating losses, \$163.5 million may be carried forward indefinitely. The majority of the remaining foreign net operating losses, if not utilized, will

begin to expire in 2025. Our federal and state net operating loss carryforwards, if not utilized, will begin to expire in 2028. As of December 31, 2024, our federal and state tax credit carryforwards were approximately \$8.3 million and \$81.3 million, respectively. Our federal tax credits, if not utilized, will begin to expire in 2029, and our state tax credits, generally, may be carried forward indefinitely.

Federal and state tax laws impose restrictions on the utilization of net operating loss and certain tax credit carryforwards in the event of a change in our ownership as defined by the Internal Revenue Code Sections 382 and 383. Under Section 382 and 383 of the Internal Revenue Code, substantial changes in our ownership and the ownership of acquired companies may limit the amount of net operating loss and research and development credit carryforwards that are available to offset taxable income. The annual limitation would not automatically result in the loss of net operating loss or research and development credit carryforwards but may limit the amount available in any given future period.

Our income tax returns are audited by U.S. federal, state and foreign tax authorities. We are currently under examination by many of these tax authorities. The tax years open to examination include the years 2012 and forward for the U.S. and certain foreign jurisdictions including France, Germany, India and Switzerland. There are differing interpretations of tax laws and regulations, and as a result, significant disputes may arise with these tax authorities involving issues of the timing and amount of deductions and allocations of income among various tax jurisdictions. We evaluate our exposures associated with our tax filing positions on a quarterly basis.

We record liabilities for unrecognized tax benefits related to uncertain tax positions. We do not believe any currently pending uncertain tax positions will have a material adverse effect on our consolidated financial statements, although an adverse resolution of one or more of these uncertain tax positions in any period may have a material impact on the results of operations for that period.

The following is a tabular reconciliation of the total amounts of unrecognized tax benefits (in millions):

	2024	2023	2022
Unrecognized tax benefits – January 1	\$ 84.7	\$ 85.5	\$ 61.9
Additions to tax positions related to prior years	1.7	0.2	18.1
Reductions to tax positions related to prior years	(2.3)	(12.8)	(0.2)
Additions to tax positions related to the current year	6.0	11.6	9.8
Settlements	(1.5)	(0.2)	(2.2)
Lapse of statute of limitations	(1.5)	(0.9)	(0.8)
Foreign currency adjustments	(0.4)	1.3	(1.1)
Unrecognized tax benefits – December 31	<u>\$ 86.7</u>	<u>\$ 84.7</u>	<u>\$ 85.5</u>

We recognize accrued interest and penalties related to unrecognized tax benefits as income tax expense. Related to the unrecognized tax benefits noted above, the cumulative amount of accrued interest and penalties as of December 31, 2024, 2023 and 2022 was \$12.6 million, \$9.6 million and \$6.7 million, respectively. We accrued interest and penalties of \$3.0 million, \$2.8 million, and \$(1.1) million for the years ended December 31, 2024, 2023, and 2022, respectively. The total unrecognized tax benefits and interest and penalties of \$99.3 million as of December 31, 2024 was partially offset by deferred tax assets of \$18.2 million and prepaid taxes of \$2.6 million, for a net amount of \$78.5 million.

As of December 31, 2024, based on the expected outcome of certain examinations or as a result of the expiration of statutes of limitation for certain jurisdictions, we believe that within the next twelve months it is reasonably possible that our previously unrecognized tax benefits could decrease by approximately \$18.1 million. Substantially all such amounts will impact our effective income tax rate if recognized.

It is generally our intention to repatriate certain foreign earnings to the extent that such repatriations are not restricted by local laws or accounting rules, and there are no substantial incremental costs. The determination of the

amount of the unrecognized deferred tax liability for foreign earnings that are indefinitely reinvested is not practicable to estimate.

8. STOCKHOLDERS' EQUITY

Bio-Rad's issued and outstanding stock consists of Class A and Class B common stock. Each share of Class A and Class B common stock participates equally in the earnings and losses of Bio-Rad, and each share is identical to the next in all respects except as follows. Class A common stock has limited voting rights compared to Class B. Each share of Class A is entitled to one-tenth of a vote on most matters, whereas each share of Class B is always entitled to one vote. Additionally, Class A stockholders are entitled to elect 25% of the directors, with Class B stockholders electing the remaining directors. Cash dividends may be paid on Class A shares without paying a cash dividend on Class B shares. In contrast, no cash dividend may be paid on Class B shares unless at least an equal cash dividend is paid on Class A shares. Class B shares are convertible at any time into Class A shares on a one-for-one basis at the option of the stockholder. The founders of Bio-Rad, the Schwartz family, collectively hold a majority of Bio-Rad's voting stock. As a result, the Schwartz family is able to exercise control over Bio-Rad.

Changes to Bio-Rad's issued common stock shares are as follows (in thousands):

	Class A Shares	Class B Shares
Balance at January 1, 2022	25,134	5,078
Class B to Class A conversions	20	(20)
Issuance of common stock	8	16
Balance at December 31, 2022	25,162	5,074
Class B to Class A conversions	8	(8)
Issuance of common stock	—	30
Balance at December 31, 2023	25,170	5,096
Class B to Class A conversions	21	(21)
Issuance of common stock	—	—
Balance at December 31, 2024	<u>25,191</u>	<u>5,075</u>

Treasury Shares

The share repurchase activity under the share repurchase programs through open market transactions for the years ended December 31, 2024, 2023 and 2022 are summarized as follows:

	Number of Shares Purchased	Weighted- Average Price per Share	Total Shares Repurchased To Date	Remaining Authorized Value (in millions)
May 1, 2022 - May 31, 2022	255,284	\$ 489.65	918,367	\$ 98.1
November 1, 2022 - November 30, 2022	241,408	\$ 375.63	1,159,775	\$ 207.4
May 1, 2023 - May 31, 2023	549,863	\$ 377.20	1,709,638	\$ —
September 1, 2023 - September 30, 2023	58,478	\$ 364.61	1,768,116	\$ 478.7
November 1, 2023 - November 30, 2023	659,416	\$ 303.30	2,427,532	\$ 278.7
March 1, 2024 - March 31, 2024	14,250	\$ 329.98	2,441,782	\$ 274.0
May 1, 2024 - May 31, 2024	221,893	\$ 289.69	2,663,675	\$ 209.7
June 1, 2024 - June 30, 2024	124,333	\$ 287.29	2,788,008	\$ 174.0
July 1, 2024 - July 31, 2024	328,171	\$ 293.01	3,116,179	\$ 577.8
August 1, 2024 - August 31, 2024	2,210	\$ 321.73	3,118,389	\$ 577.1

For the years ended December 31, 2024 and 2023, we used 183,567 and 160,811, respectively, of the repurchased shares in connection with the vesting of restricted stock units and our Employee Stock Purchase Program. As of December 31, 2024, the Company had repurchased \$1,072.9 million under the 2017 Share Repurchase Program, which completed the level of authorized purchases under that share repurchase program. In July 2023, the board of directors authorized a new share repurchase program ("2023 Share Repurchase Program") granting the Company authority to repurchase, on a discretionary basis, up to \$500 million of the outstanding shares of the Company's common stock. In July 2024, the board of directors granted the Company authority to repurchase, on a discretionary basis, up to an additional \$500 million of the outstanding shares of the Company's common stock under the 2023 Share Repurchase Program. As of December 31, 2024, \$577.1 million remained available for repurchases under the 2023 Share Repurchase Program.

9. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Accumulated other comprehensive income (loss) included in our consolidated balance sheets and consolidated statements of changes in stockholders' equity consists of the following components (in millions):

	Foreign currency translation adjustments	Foreign other post-employment benefits adjustments	Net unrealized holding gains (losses) on available-for-sale investments	Total Accumulated other comprehensive income (loss)
Balances as of January 1, 2023	\$ (466.5)	\$ 10.0	\$ (10.3)	\$ (466.8)
Other comprehensive (loss) income, before reclassifications	132.9	(13.1)	13.4	133.2
Amounts reclassified from accumulated other comprehensive income (loss)	—	0.7	1.2	1.9
Income tax effects	(0.5)	(0.4)	(3.4)	(4.3)
Other comprehensive income (loss), net of income taxes	132.4	(12.8)	11.2	130.8
Balances as of December 31, 2023	\$ (334.1)	\$ (2.8)	\$ 0.9	\$ (336.0)
Other comprehensive income (loss), before reclassifications	(207.0)	(0.7)	6.3	(201.4)
Amounts reclassified from accumulated other comprehensive income (loss)	—	1.6	(2.2)	(0.6)
Income tax effects	0.7	0.1	(1.0)	(0.2)
Other comprehensive income (loss), net of income taxes	(206.3)	1.0	3.1	(202.2)
Balances as of December 31, 2024	\$ (540.4)	\$ (1.8)	\$ 4.0	\$ (538.2)

All amounts reclassified out of Accumulated other comprehensive income (loss) were reclassified into Other income, net in the consolidated statements of income (loss). Reclassification adjustments are calculated using the specific identification method.

The impact to Income (loss) before income taxes for amounts reclassified out of Accumulated other comprehensive income (loss) into Other income, net in the condensed consolidated statements of income (loss) were as follows (in millions):

Components of comprehensive income (loss)	December 31, 2024	December 31, 2023
Amortization of foreign other post-employment benefit items	\$ (1.6)	\$ (0.7)
Net holding gains (losses) on equity securities and available-for-sale investments	\$ 2.2	\$ (1.2)

10. SHARE-BASED COMPENSATION/EQUITY AWARDS AND PURCHASE PLANS

Equity Award Plan

The 2017 Incentive Award Plan, as amended ("2017 Plan") authorizes the grant of stock options, restricted stock, restricted stock units, performance-based stock units and other types of equity awards to officers and certain other employees. Stock options are granted at exercise prices not less than the fair market value of the underlying common stock on the date of grant and have a maximum term of 10 years. We may issue stock options for either Class A or Class B common stock. Prior to September 2020, equity awards granted vest in increments of 20% per year on the yearly anniversary date of the grant. Starting in September 2020, equity awards granted vest in increments of 25% per year on the yearly anniversary date of the grant.

A total of 2,108,724 shares have been reserved for issuance of equity awards under the 2017 Plan and may be of either Class A or Class B common stock. At December 31, 2024, there were 906,156 shares available to be granted.

Performance-based Stock awards

Bio-Rad granted certain executive officers Performance-based stock unit (PSU) awards in 2022 and 2023, which are administered under the 2017 Plan. PSUs generally vest over a three-year performance period based on achievement of specific performance goals. Based on the extent to which the targets are achieved, vested shares may range from zero to 200 percent of the target award. No PSUs vested during the year ended December 31, 2024 which was the last period in which issued PSUs were eligible for vesting.

We consider the dilutive impact of PSUs in our diluted net income per share calculation only to the extent that the performance conditions would have been met if the reporting period was the end of the performance period.

Employee Stock Purchase Plan

Our 2011 Employee Stock Purchase Plan ("2011 ESPP" or "ESPP") provides that eligible employees may contribute up to the greater of 10% of their compensation or \$25,000 annually towards the quarterly purchase of our Class A common stock. The employees' purchase price is 85% of the lesser of the fair market value of the stock on the first business day or the last business day of each calendar quarter. The Board of Directors authorized the sale of 1,300,000 shares of Class A common stock under the 2011 ESPP.

Share-Based Compensation

Included in our share-based compensation expense is the cost related to stock option grants, ESPP stock purchases and restricted stock unit awards, including performance-based stock awards. Share-based compensation expense is allocated in the consolidated statements of income (loss) as follows (in millions):

	Year ended December 31,		
	2024	2023	2022
Cost of goods sold	\$ 6.5	\$ 6.1	\$ 5.4
Selling, general and administrative expense	42.9	43.9	45.6
Research and development expense	12.9	11.3	9.9
Share-based compensation expense	<u>\$ 62.3</u>	<u>\$ 61.3</u>	<u>\$ 60.9</u>

The income tax benefit related to share-based compensation expense was \$10.6 million, \$9.8 million and \$8.8 million for the years ended December 31, 2024, 2023 and 2022, respectively. We did not capitalize any share-based compensation expense as it was immaterial.

The tax benefit (expense) from equity awards vested or exercised during the years ended December 31, 2024, 2023 and 2022 was \$(3.5) million, \$1.3 million and \$4.0 million, respectively.

For equity awards, we amortize the grant date fair value on a straight-line basis over the requisite service periods of the awards, which are generally the vesting periods. We recognize forfeitures as they occur.

Stock Options

No stock options were granted during the years ended December 31, 2023 and 2022. The weighted-average fair value of stock options granted was estimated using a Black-Scholes option-pricing model with the following weighted-average assumptions for the year ended December 31, 2024:

	Year Ended December 31, 2024
Expected volatility	32.5%
Risk-free interest rate	4.07%
Expected life (in years)	6.3
Expected dividend	—
Weighted-average fair value of options granted	\$ 137.14

Expected volatility is based on the historical volatilities of our common stock for a period equal to the stock option's expected life. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of the grant. The expected life represents the number of years that we estimate, based primarily on historical experience, that the options will be outstanding prior to exercise. We do not anticipate paying any cash dividends in the future and therefore use an expected dividend yield of zero.

The following table summarizes stock option activity:

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in millions)
Outstanding, January 1, 2024	89,760	\$ 410.50		
Granted	50,907	\$ 343.76		
Exercised	(8,500)	\$ 277.77		
Forfeited	(30,925)	\$ 463.19		
Outstanding, December 31, 2024	<u>101,242</u>	\$ 371.99	6.06	\$ 2.0
Unvested, December 31, 2024	38,692	\$ 367.21	9.06	\$ —
Exercisable, December 31, 2024	62,550	\$ 374.95	4.21	\$ 2.0

Intrinsic value for stock options is defined as the difference between the current market value and the exercise price. The total intrinsic value on the date of exercise of stock options exercised during the years ended December 31, 2024, 2023 and 2022 was \$0.5 million, \$20.2 million and \$15.2 million, respectively.

No cash was received from stock options exercised during the year ended December 31, 2022. Cash received from stock options exercised during the years ended December 31, 2024 and December 31, 2023 amounted to \$2.4 million and \$0.7 million, respectively.

As of December 31, 2024, there was \$4.5 million of total unrecognized compensation expense from stock options. This amount is expected to be recognized in the future over a remaining weighted-average period of approximately three years.

Restricted Stock Units - Service-based

Restricted stock units are rights to receive shares of company stock. The fair value of a restricted stock unit is the market value as determined by the closing price of the stock on the day of grant.

The following tables summarize restricted stock units activity:

	Restricted Stock Units	Weighted- Average Grant-Date Fair Value	Weighted- Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in millions)
Outstanding, January 1, 2024	344,593	\$ 460.22		
Granted	247,367	\$ 328.56		
Vested	(119,848)	\$ 475.00		
Forfeited	(43,690)	\$ 448.94		
Outstanding, December 31, 2024	428,422	\$ 381.21	1.87	\$ 140.7

The total fair value of restricted stock units - service-based vested for the years ended December 31, 2024, 2023 and 2022 was \$40.2 million, \$44.7 million and \$54.5 million, respectively. As of December 31, 2024, there was approximately \$143.7 million of total unrecognized compensation expense related to restricted stock units. This amount is expected to be recognized over a remaining weighted-average period of approximately three years.

Employee Stock Purchase Plan

The fair value of the employees' purchase rights under the 2011 ESPP was estimated using a Black-Scholes model with the following weighted-average assumptions:

	Year Ended December 31,		
	2024	2023	2022
Expected volatility	32.4 %	35.4 %	41.3 %
Risk-free interest rate	5.29 %	5.15 %	1.71 %
Expected life (in years)	0.25	0.24	0.25
Expected dividend	—	—	—
Weighted-average fair value of purchase rights	\$ 68.78	\$ 90.11	\$ 124.26

The assumptions are primarily based on historical data. Volatility is based on the historical volatilities of our common stock for a period equal to the expected life of the purchase rights. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of the grant. We do not anticipate paying any cash dividends in the future and therefore use an expected dividend yield of zero.

We sold 65,200 shares for total employee contributions of \$16.3 million, 56,985 shares for total employee contributions of \$17.8 million and 44,480 shares for total employee contributions of \$17.6 million under the 2011 ESPP to employees for the years ended December 31, 2024, 2023 and 2022, respectively. At December 31, 2024, 353,679 shares remain authorized and available for issuance under the 2011 ESPP.

11. *OTHER INCOME, NET*

Other income, net includes the following components (in millions):

	Year Ended December 31,		
	2024	2023	2022
Interest and investment income	\$ (82.0)	\$ (100.9)	\$ (58.1)
Net realized gains on investments	(6.7)	(0.7)	(2.3)
Other-than-temporary impairment losses on investments	—	—	11.9
Current expected credit losses on loans to equity method investees	—	—	7.5
Gain on divestiture of a division	—	—	(1.4)
Escrow receipts on prior acquisition	—	(2.5)	—
Other income	(1.6)	(2.4)	(2.3)
Other income, net	<u>\$ (90.3)</u>	<u>\$ (106.5)</u>	<u>\$ (44.7)</u>

12. SUPPLEMENTAL CASH FLOW INFORMATION

The reconciliation of net loss to net cash provided by operating activities is as follows (in millions):

	Year Ended December 31,		
	2024	2023	2022
Net loss	\$ (1,844.2)	\$ (637.3)	\$ (3,627.5)
Adjustments to reconcile net loss			
to net cash provided by operating activities			
Depreciation and amortization	151.6	145.9	137.3
Reduction in the carrying amount of right-of-use assets	41.2	46.5	39.9
Share-based compensation	62.3	61.3	60.9
Acquired in-process research and development	29.5	—	—
Other-than-temporary impairment losses on investments	—	—	11.9
Current expected credit losses on loans	—	—	7.5
Losses from change in fair market value of equity securities and loan receivable	2,656.8	1,252.3	5,193.6
Gain on divestiture of a division	—	(2.5)	(1.4)
Payments for operating lease liabilities	(42.8)	(41.0)	(38.1)
Changes in fair value of contingent consideration	12.5	(18.1)	—
(Increase) decrease in accounts receivable	16.2	11.4	(87.4)
(Increase) decrease in inventories	8.5	(46.3)	(158.8)
(Increase) decrease in other current assets	(2.2)	5.6	(27.3)
Decrease in accounts payable and other current liabilities	(40.9)	(51.8)	(94.2)
Increase (decrease) in income taxes payable	24.1	(21.3)	(1.2)
Decrease in deferred income taxes	(626.8)	(322.6)	(1,241.6)
Increase in other long-term assets	(5.3)	(3.7)	(5.1)
Increase (decrease) in other long-term liabilities	5.6	(4.1)	5.6
Other	9.1	0.6	20.3
Net cash provided by operating activities	<u>\$ 455.2</u>	<u>\$ 374.9</u>	<u>\$ 194.4</u>
Non-cash investing activities:			
Purchased property, plant and equipment	\$ 4.2	\$ 6.9	\$ 7.3
Purchased marketable securities and investments	<u>\$ —</u>	<u>\$ 0.4</u>	<u>\$ —</u>

13. COMMITMENTS AND CONTINGENT LIABILITIES

Deferred Profit Sharing Retirement Plan

We have a profit sharing plan covering substantially all U.S. employees. Contributions are made at the discretion of management. As of December 31, 2024 and 2023, the liability related to the U.S. profit sharing plan was \$1.9 million and \$1.9 million, respectively. The contribution expense was \$20.4 million, \$20.2 million and \$19.1 million for the years ended December 31, 2024, 2023 and 2022, respectively.

Purchase Obligations

As of December 31, 2024, we had purchase obligations that have not been recognized on our balance sheet of \$77.8 million, which include agreements to purchase goods or services that are enforceable and legally binding to Bio-Rad and that specify all significant terms and exclude agreements that are cancelable without penalty. Recognition of purchase obligations occurs when products or services are delivered to Bio-Rad, generally within Accounts payable or Other current liabilities.

The annual future fixed and determinable portion of our purchase obligations that have not been recognized on our balance sheet as of December 31, 2024 were as follows (in millions):

2025	\$	60.1
2026		16.0
2027		1.7
2028		—
2029		—
2030 and thereafter		—

Long-Term Liabilities

As of December 31, 2024, we had obligations that have been recognized on our balance sheet of \$90.8 million, which primarily represent long-term deferred revenue and other post-employment benefits. Excluded are tax liabilities for uncertain tax positions and contingencies. We are not able to reasonably estimate the timing of future cash flows of these tax liabilities, therefore, our income tax obligations are excluded.

The annual future fixed and determinable portion of our obligations that have been recognized on our balance sheet as of December 31, 2024 were as follows (in millions):

2025	\$	4.4
2026		9.1
2027		8.4
2028		5.6
2029		4.4
2030 and thereafter		58.9

Letters of Credit/Guarantees

In the ordinary course of business, we are at times required to post letters of credit/guarantees. The letters of credit/guarantees are issued by financial institutions to guarantee our obligations to various parties. We were contingently liable for \$15.5 million of standby letters of credit/guarantees with financial institutions as of December 31, 2024.

Other Post-Employment Benefits

In several foreign locations we are statutorily required to provide retirement benefits or a lump sum termination indemnity to our employees upon termination for virtually any reason. These plans are accounted for as defined benefit plans and the associated net benefit obligation as of December 31, 2024 and 2023 of \$59.2 million and \$62.2 million, respectively, has been included in Accrued payroll and employee benefits and Other long-term liabilities in the Consolidated Balance Sheets. Most plans are not required to be funded, and as such, there is no trust or other device used to accumulate assets or settle these obligations. However, some of these plans require funding based on local laws in which there is a trust or other device administered by an external plan manager that is used to accumulate assets to assist in settling these obligations. The following disclosures include such plans, which are located in France, Switzerland, Germany, Korea, India, Thailand, Italy, Dubai and Japan.

Obligations and Funded Status

The following table sets forth the change in benefit obligations, fair value of plan assets and amounts recognized in the Consolidated Balance Sheets for the plans (in millions):

Change in benefit obligation:	2024	2023
Benefit obligation at beginning of year	\$ 154.4	\$ 129.2
Service cost	4.9	5.4
Interest cost	2.7	3.4
Plan participants' contributions	3.0	3.3
Actuarial (gain) loss	2.4	14.0
Gross benefits paid	(1.2)	(1.0)
Plan amendments	(0.8)	(0.7)
Acquisitions	—	2.5
Settlements	(14.4)	(10.6)
Foreign currency adjustments	(10.7)	8.9
Benefit obligation at end of year	140.3	154.4
Change in plan assets:		
Fair value of plan assets at beginning year	92.2	82.4
Actual return on plan assets	2.6	1.7
Employer contributions	3.5	4.7
Plan participants' contributions	3.0	3.3
Gross benefits paid	0.7	0.3
Acquisitions	—	2.4
Settlements	(14.3)	(10.5)
Foreign currency adjustments	(6.6)	7.9
Fair value of plan assets at end of year	81.1	92.2
Underfunded status of plans	(59.2)	(62.2)
<u>Amounts recognized in the consolidated balance sheets:</u>		
Current liabilities (Accrued payroll and employee benefits)	(2.3)	(2.7)
Noncurrent liabilities (Other long-term liabilities)	(56.9)	(59.5)
Net liability, end of fiscal year	\$ (59.2)	\$ (62.2)

Components of Net Periodic Benefit Cost

The following sets forth the net periodic benefit cost (income) for the periods indicated (in millions):

	2024	2023	2022
Service costs	\$ 4.9	\$ 5.4	\$ 6.6
Interest costs	2.7	3.4	0.8
Expected returns on plan assets	(1.6)	(2.2)	(1.0)
Amortization of actuarial losses	—	(0.1)	0.3
Amortization of prior service costs	(0.5)	(0.4)	(0.3)
Settlements	2.2	1.3	(0.2)
Net periodic benefit costs	<u>\$ 7.7</u>	<u>\$ 7.4</u>	<u>\$ 6.2</u>

Assumptions

The above actuarial net gains were primarily based on financial, demographic and experience assumptions.

The weighted-average assumptions used in computing the benefit obligations were as follows:

	2024	2023
Discount rate	1.6 %	2.0 %
Compensation rate increase	1.8 %	1.8 %

The weighted-average assumptions used in computing the net periodic benefit costs were as follows:

	2024	2023	2022
Discount rate	1.9 %	2.5 %	0.6 %
Expected long-term rate of return on plan assets	1.8 %	2.6 %	1.3 %

The accumulated benefit obligation ("ABO"), an estimate based on the assumption if these plans were to be terminated immediately, as of December 31, 2024 and 2023 was \$122.1 million and \$114.8 million, respectively. The ABO and fair value of plan assets for these plans with ABO in excess of plan assets were \$41.0 million and \$22.6 million as of December 31, 2024 and 2023, respectively.

In some foreign locations we have service award plans that are paid based upon the number of years of employment. Under these plans, the liability as of December 31, 2024 and 2023 was \$2.2 million and \$2.4 million, respectively, and has been included in Accrued payroll and employee benefits and Other long-term liabilities in the consolidated balance sheets.

Concentrations of Labor Subject to Collective Bargaining Agreements

At December 31, 2024, approximately 6 percent of Bio-Rad's approximately 3,297 U.S. employees were covered by a collective bargaining agreement, which will expire on November 14, 2025. Many of Bio-Rad's non-U.S. full-time employees, especially in France, are covered by collective bargaining agreements.

14. LEGAL PROCEEDINGS

We are a party to various claims, legal actions and complaints arising in the ordinary course of business. We record a reserve when we believe a loss arising from these matters is probable and can be reasonably estimated. Significant judgment is required in both the determination of the probability of a loss and the determination as to whether a loss is reasonably estimable. As additional information becomes available, any potential liability related to these matters

is assessed and the estimates revised. While we do not believe, at this time, that any ultimate liability resulting from any of these matters will have a material adverse effect on our results of operations, financial position or liquidity, we cannot give any assurance regarding the ultimate outcome of these matters and their resolution could be material to our operating results for any particular period, depending on the level of income for the period.

15. SEGMENT INFORMATION

Bio-Rad is a multinational developer, manufacturer and worldwide distributor of its own life science research products and clinical diagnostics products. We have two reportable segments: Life Science and Clinical Diagnostics. These reportable segments are strategic business lines that offer more than 12,000 different products and services and require different marketing strategies. We do not disclose quantitative information about our different products and services as it is impractical to do so based primarily on the numerous products and services that we sell and the global markets that we serve.

The Life Science segment develops, manufactures, and markets instruments, systems, reagents, and consumables used for biological research, biopharmaceutical production processes, food testing regimes, and science education. These products are sold to universities and medical schools, industrial research organizations, government agencies, pharmaceutical manufacturers, biotechnology researchers, food producers and food testing laboratories.

The Clinical Diagnostics segment designs, manufactures, markets and supports test systems, informatics systems, test kits and specialized quality controls that serve clinical laboratories in the global diagnostics market. These products are primarily sold to hospital laboratories, diagnostic reference laboratories, transfusion laboratories, and physician office laboratories.

Other Operations represent a small miscellaneous operation from a prior acquisition, which was sold during 2023 with no material impact on the consolidated statements of income (loss).

The accounting policies of the segments are the same as those described in Significant Accounting Policies (see Note 1). During the year ended December 31, 2024, the segment measure of profit and loss used by our chief operating decision maker ("CODM") was changed from Operating Income to Gross Profit, which represents Net sales reduced by Cost of goods sold. As a result, our disclosed measure of segment profit and loss has been updated consistent with the revised manner in which our CODM evaluates segment performance and allocates resources. The change aligns with our renewed focus on operating performance and Gross Profit as the key driver in management's performance optimization strategy and was informed by recent appointments to our senior leadership team during the year ended December 31, 2024. Prior period segment information has been retrospectively adjusted to reflect this change. We identify our CODM to be our Chairman of the Board and Chief Executive Officer.

Information regarding industry segments at December 31, 2024, 2023, and 2022 and for the years then ended is as follows (in millions):

		Life Science	Clinical Diagnostics	Other Operations
Net sales	2024	\$ 1,028.1	\$ 1,537.9	\$ 0.5
	2023	1,178.4	1,489.3	3.5
	2022	1,347.2	1,451.0	4.0
Cost of goods sold	2024	\$ 445.7	\$ 741.3	\$ 0.6
	2023	514.4	725.8	4.1
	2022	532.7	696.5	5.7
Depreciation and amortization	2024	\$ 67.3	\$ 84.3	\$ —
	2023	62.8	83.1	—
	2022	57.9	79.4	—
Segment profit	2024	\$ 582.4	\$ 796.6	\$ (0.1)
	2023	664.0	763.5	(0.6)
	2022	814.5	754.5	(1.7)
Segment assets	2024	\$ 286.7	\$ 473.3	\$ —
	2023	287.1	493.1	0.3
	2022	269.9	448.8	0.6

The following reconciles total segment gross profit to consolidated income (loss) before income taxes (in millions):

	Year Ended December 31,		
	2024	2023	2022
Total segment profit	\$ 1,378.9	\$ 1,426.9	\$ 1,567.3
Selling, general and administrative expense	(814.0)	(841.7)	(827.8)
Research and development expense	(295.9)	(247.4)	(256.9)
Interest expense	(48.9)	(49.4)	(38.1)
Foreign currency exchange gains, net	3.9	7.3	0.2
Losses from change in fair market value of equity securities and loan receivable	(2,656.8)	(1,252.3)	(5,193.6)
Other income, net	90.3	106.5	44.7
Consolidated income (loss) before income taxes	<u>\$ (2,342.5)</u>	<u>\$ (850.1)</u>	<u>\$ (4,704.2)</u>

The following reconciles total segment assets to consolidated total assets (in millions):

	December 31,	
	2024	2023
Total segment assets	\$ 760.0	\$ 780.5
Cash, short-term investments and other current assets	2,270.3	2,267.8
Property, plant and equipment, net, and operating lease right-of-use assets	688.6	723.7
Goodwill, net	410.5	413.6
Other long-term assets	5,234.7	8,113.5
Total assets	<u>\$ 9,364.1</u>	<u>\$ 12,299.1</u>

The following presents net sales to external customers by geographic region based primarily on the location of the use of the product or service (in millions):

	Year Ended December 31,		
	2024	2023	2022
United States	\$ 1,041.5	\$ 1,121.9	\$ 1,155.5
Europe	834.1	819.8	851.9
Asia	521.6	563.0	639.4
Other (primarily Canada and Latin America)	169.3	166.5	155.4
Total net sales	<u>\$ 2,566.5</u>	<u>\$ 2,671.2</u>	<u>\$ 2,802.2</u>

The following presents Property, plant and equipment, net, Operating lease right-of-use assets and Other assets, excluding deferred income taxes, by geographic region based upon the location of the asset (in millions):

	December 31,	
	2024	2023
United States	\$ 461.4	\$ 477.3
Europe	171.3	197.0
Asia	97.1	82.7
Other (primarily Canada and Latin America)	14.1	19.1
Total Property, plant and equipment, net, Operating lease right-of-use assets and Other assets, excluding deferred income taxes	<u>\$ 743.9</u>	<u>\$ 776.1</u>

16. LEASES

We have operating leases and to a lesser extent finance leases, for buildings, vehicles and equipment. Our leases have remaining lease terms of 1 year to 14 years, which includes our determination to exercise renewal options.

The components of lease expense were as follows (in millions):

	Year Ended December 31,		
	2024	2023	2022
Operating lease cost	<u>\$ 69.5</u>	<u>\$ 63.4</u>	<u>\$ 57.5</u>
Finance lease cost:			
Amortization of right-to-use assets	\$ 0.6	\$ 0.4	\$ 0.4
Interest on lease liabilities	0.7	0.7	0.8
Total finance lease cost	<u>\$ 1.3</u>	<u>\$ 1.1</u>	<u>\$ 1.2</u>

Operating lease cost includes original reduction in the carrying amount of right-of-use assets, the impact of remeasurements, modifications, impairments and abandonments.

Our short-term leases are expensed as incurred, reflecting leases with a lease term of one year or less, and are not significant for the years ended December 31, 2024, 2023 and 2022. Operating lease variable cost is primarily comprised of reimbursed actual common area maintenance, property taxes and insurance, which are immaterial for the years ended December 31, 2024, 2023 and 2022.

Supplemental cash flow information related to leases were as follows (in millions):

	Year Ended December 31,		
	2024	2023	2022
Cash paid for amounts included in the measurement of lease liabilities:			
Operating cash flows from operating leases	\$ 42.8	\$ 41.0	\$ 38.1
Operating cash flows from finance leases	\$ 0.7	\$ 0.7	\$ 0.8
Financing cash flows from finance leases	\$ 0.6	\$ 0.4	\$ 0.4
Right-of-use assets obtained in exchange for lease obligations:			
Operating leases	\$ 15.5	\$ 53.7	\$ 21.2
Finance leases	\$ —	\$ —	\$ 0.1

Supplemental balance sheet information related to leases were as follows (in millions):

	December 31,	
	2024	2023
Operating Leases		
Operating lease right-of-use assets	\$ 160.5	\$ 194.7
Current operating lease liabilities	\$ 41.7	\$ 40.4
Operating lease liabilities	131.4	165.5
Total operating lease liabilities	\$ 173.1	\$ 205.9

Finance leases are included in Property, plant and equipment, net, Current maturities of long-term debt and notes payable, and Long-term debt and notes payable, net of current maturities.

	December 31,	
	2024	2023
Finance Leases		
Property, plant and equipment, gross	\$ 11.7	\$ 11.9
Less: accumulated depreciation and amortization	(6.1)	(5.9)
Property, plant and equipment, net	\$ 5.6	\$ 6.0
Current maturities of long-term debt and notes payable	\$ 0.4	\$ 0.5
Long-term debt, net of current maturities	9.2	9.6
Total finance lease liabilities	\$ 9.6	\$ 10.1

	December 31,	
	2024	2023
Weighted Average Remaining Lease Term		
Operating leases - in years	6	7
Finance leases - in years	13	14
Weighted Average Discount Rate		
Operating leases	4.1 %	3.9 %
Finance leases	6.5 %	6.4 %

Maturities of lease liabilities were as follows (in millions):

Year Ending December 31,	Operating Leases	Finance Leases
2025	\$ 46.8	\$ 1.1
2026	37.3	1.1
2027	28.7	1.1
2028	21.6	1.1
2029	17.8	1.1
Thereafter	43.3	9.7
Total lease payments	195.5	15.2
Less imputed interest	(22.4)	(5.6)
Total	<u>\$ 173.1</u>	<u>\$ 9.6</u>

The value of our operating lease portfolio is principally for facilities with longer durations than the lesser value vehicles and other equipment with shorter terms and higher-turn over.

As of December 31, 2024, operating leases that have not commenced are not material.

17. **QUARTERLY FINANCIAL DATA (UNAUDITED)**

The following tables provide unaudited condensed consolidated quarterly financial data for all of the periods in the years ended December 31, 2024 and 2023.

Summarized quarterly financial data for the years ended December 31, 2024 and 2023 are as follows (in millions, except per share data):

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
<u>2024</u>				
Net sales	\$ 610.8	\$ 638.5	\$ 649.7	\$ 667.5
Gross profit	325.9	355.1	355.9	342.0
Net income (loss)	383.9	(2,165.5)	653.2	(715.8)
Basic earnings (loss) per share	13.46	(76.26)	23.37	(25.57)
Diluted earnings (loss) per share	13.45	(76.26)	23.34	(25.57)

<u>2023</u>				
Net sales	\$ 676.8	\$ 681.1	\$ 632.1	\$ 681.2
Gross profit	362.4	362.5	335.7	366.3
Net income (loss)	69.0	(1,162.3)	106.3	349.7
Basic earnings (loss) per share	2.33	(39.59)	3.65	12.15
Diluted earnings (loss) per share	2.32	(39.59)	3.64	12.14

18. **SUBSEQUENT EVENTS**

On February 7, 2025, we initiated a strategy-driven restructuring plan in furtherance of our ongoing program to improve operating performance. The restructuring plan primarily impacts our operations in the United States and includes the elimination of certain positions, the consolidation of certain functions, and the relocation of certain

operations to lower cost locations. The restructuring plan is expected to eliminate a total of approximately 5% of our workforce. We anticipate the restructuring plan will be substantially completed by the end of fiscal year 2025.

We estimate that as a result of this restructuring plan we will incur between approximately \$45 million and \$50 million in total cost, which we anticipate will consist primarily of one-time termination benefits to the affected employees, including cash severance payments, healthcare benefits, and related transition assistance. We anticipate that we will record approximately \$30 million to \$35 million of the charges related to this restructuring plan in the first quarter of fiscal year 2025 with the balance expected to be recorded by the end of fiscal year 2025.

The amounts are preliminary estimates based on the information currently available to management. It is possible that additional charges and future cash payments could occur in relation to the restructuring actions.

On February 13, 2025, the Company entered a binding offer to purchase all equity interests in Stilla Technologies (“Stilla”) for approximately \$225 million in cash, as well as potential future contingent milestone payments for a maximum amount of up to \$50 million. The acquisition remains subject to consultation with relevant employee representatives, regulatory approvals, and other customary closing conditions, and is expected to close by the end of the third quarter of 2025. With operations in France and the U.S., Stilla develops and markets next-generation digital PCR instruments, consumables, and assays. Stilla’s Nio® family of all-in-one digital PCR systems aids the development of a wide range of genetic tests and molecular assays across multiple applications.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

We maintain “disclosure controls and procedures”, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (“Exchange Act”), that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Subject to the limitations noted above, our management, with the participation of our CEO and CFO, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the year covered by this Annual Report on Form 10-K. Based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective to meet the objective for which they were designed and operate at the reasonable assurance level.

(b) Management’s Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company as defined in Rule 13a-15(f) or 15(d)-15(f) of the Exchange Act. Our internal control over

financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with U.S. generally accepted accounting principles, and includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Company's assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with U.S. generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our consolidated financial statements.

Our management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2024 using the criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on this assessment and those criteria, management concluded that our internal control over financial reporting was effective as of December 31, 2024. Our internal control over financial reporting has been audited by KPMG, LLP, an independent registered public accounting firm, as stated in their report, which appears in Part II, Item 8 of this Form 10-K.

(c) Changes in Internal Control over Financial Reporting

Management continuously reviews disclosure controls and procedures, and internal control over financial reporting, and accordingly may, from time to time, make changes aimed at enhancing their effectiveness to ensure that its systems evolve with its business. There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15(d)-15(f) under the Exchange Act) during the quarter ended December 31, 2024 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

(d) Inherent Limitations on Effectiveness of Internal Controls

Because of its inherent limitations, our internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ITEM 9B. OTHER INFORMATION

During the three months ended December 31, 2024, no director or officer of the Company adopted or terminated a "Rule 10b5-1 trading arrangement" or "non-Rule 10b5-1 trading arrangement," as each term is defined in Item 408(a) of Regulation S-K.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III.

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Part of the information required to be furnished pursuant to this item is incorporated by reference from portions of Bio-Rad's definitive proxy statement to be mailed to stockholders in connection with our 2025 annual meeting of stockholders (the "2025 Proxy Statement") under "Executive Officers," "Election of Directors," "Committees of the Board of Directors" and "Section 16(a) Beneficial Ownership Reporting Compliance."

Bio-Rad’s Board of Directors has determined that each of Jeffrey L. Edwards, Gregory K. Hinckley and Melinda Litherland is an “audit committee financial expert,” as defined in Item 407(d)(5) of Regulation S-K. Each of Jeffrey L. Edwards, Gregory K. Hinckley and Melinda Litherland is also an “independent” director, as determined in accordance with the independence standards set forth in Rule 10A-3 under the Securities Exchange Act of 1934, as amended, and Section 303A.02 of the New York Stock Exchange (NYSE) Listed Company Manual.

We have adopted a code of business ethics and conduct that applies to our principal executive officer, principal financial officer, controller (or persons performing similar functions), all other employees and our directors. It is available through the Corporate Governance section of our website (www.bio-rad.com). We will also provide a copy of the code of ethics to any person, without charge, upon request, by writing to us at “Bio-Rad Laboratories, Inc., Investor Relations, 1000 Alfred Nobel Drive, Hercules, CA 94547.” We intend to satisfy any disclosure requirement under Item 5.05 of Form 8-K regarding an amendment to, or waiver from, a provision of the code of ethics by posting such information on the Corporate Governance section of our website (www.bio-rad.com) within four business days following the date of the amendment or waiver.

We have adopted an Insider Trading Compliance Policy governing the purchase, sale, and other dispositions of our securities by our directors, officers, and employees that we believe is reasonably designed to promote compliance with insider trading laws, rules and regulations, and listing standards applicable to us. A copy of our Insider Trading Compliance Policy is filed as Exhibit 19.1 to this Annual Report on Form 10-K.

ITEM 11. EXECUTIVE COMPENSATION

The information required to be furnished pursuant to this item is incorporated by reference from portions of the 2025 Proxy Statement under “Compensation Discussion and Analysis,” “Summary Compensation Table,” “Grants of Plan-Based Awards,” “Outstanding Equity Awards at Fiscal Year-End,” “Option Exercises and Stock Vested Table,” “Pension Benefits,” “Nonqualified Deferred Compensation Plans,” “Potential Payments on Termination or Change in Control,” “Director Compensation,” “Compensation Committee Interlocks and Insider Participation” and “Pay Ratio Disclosure.” In addition, the information from a portion of the 2025 Proxy Statement under “Compensation Committee Report” is incorporated herein by reference and furnished on this Form 10-K and shall not be deemed “filed” for purposes of Section 18 of the Securities and Exchange Act of 1934, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Part of the information required to be furnished pursuant to this item is incorporated by reference from a portion of the 2025 Proxy Statement under “Principal and Management Stockholders.”

Equity Compensation Plan Information as of December 31, 2024
